#90247c0360 09/04/1990 ~Comtex

STAMFORD, CT (SEPT. 5) COMTEX - Las Vegas-based American Pacific Corp. (TICKER: APFC) has signed an agreement with Dynamit Nobel AG to allow American Pacific to produce sodium azide, the principal component of the propellant used in automobile safety-airbag systems.

American Pacific said it plans to sell 1.9 million common shares aimed at raising about $20 million to help build a $29 million facility in Iron County, Utah, according to a Securities and Exchange Commission filing.

The plant will have an annual capacity of 1,000 metric tons of sodium azide.

American Pacific is one of two domestic manufacturers of ammonium perchlorate, used primarily as an oxidizing agent in solid propellants for rockets and missiles.

The market for airbag systems, and thus sodium azide, is expected to expand dramatically over the next decade since North America's three major auto makers have commited to install airbags in all new cars.

The two major U.S. airbarg suppliers, TRW and Morton, have indicated that their demand for sodium azide will exceed North American supply for the near future.

Dynamit Nobel is the original developer of the sodium metal-based process for the manufacture of sodium azide and has granted American Pacific an exclusive license to market its technology in North America.

This 8-k Filing was submitted to the Securities and Exchange Commission on Sept. 4, 1990.

JOHANNESBURG (SEPT. 4) - Losing the fight to lower-than-expected circulation and much higher-than-anticipated overheads, the Johannesburg Daily Mail announced Tuesday it was publishing its last edition.

The liberal daily was launched on June 20 this year with a promise to "reflect the extraordinary times we live in", but found itself unable to make inroads into the daily market held by the more traditional newspapers.

Insiders said market research had led the editors to believe they could achieve a circulation of above 20,000, but in reality only between 7,000 and 10,000 newspapers were being sold daily.

The lower circulation had led financial backers to withhold promised funds and the newspaper had run out of cash.

In a front page editorial Tuesday, editors Anton Harber and Irwin Manoim said the newspaper would revert to publishing weekly under the title Weekly Mail.

The Weekly Mail, with a circulation of about 30,000, was launched in June 1985 after the internationally-acclaimed Rand Daily Mail fell victim to similar market forces now forcing the demise of the Daily Mail.

In their editorial, the editors said the Weekly Mail "will continue to fight for fundamental political, social and economic change; for democracy; for the protection of human rights; for a government that represents the majority and respects the minority."

BEIJING (SEPT. 4) - China has successfully launched its second experimental weather satellite into a geostationary orbit using a Long March ' rocket, China Daily said Tuesday.

The English-language daily said the rocket was launched Monday from the

Taiyuan Satellite Launch Centre, in central Shanxi province.

The Urumqi satellite earth station, in the autonomous region of Xinjiang in northwest China, received late Monday the first signals from the satellite, Fengyun 1, the newspaper said.

The satellite's launch was timed so it could be operational before the Asian Games, due to open September 22, and the satellite will be able to transmit news to overseas countries with earth stations, it said.

The newspaper said Tuesday that the second satellite launch would allow China "to strengthen its weather forecasting capacity and to contribute to economic development."

China is understood to be ambitious to enter the strong market for heavy payload launches, which will be possible with the launch of the new generation Long March 2-E, after a successful trial last July.

MOSCOW (SEPT. 4) - Soviet Deputy Foreign Minister Igor Rogachev has issued a stern warning to Japan and North Korea over infringement of its economic resources in fishing and lumber in the Soviet Far East.

The warning, which appeared in Tuesday's edition of Trud newspaper, came on the day Soviet Foreign Minister Eduard Shevardnadze began an official visit to Japan, following a trip over the weekend to North Korea.

In the article, Mr. Rogachev, who is responsible for Asian affairs, also reaffirmed Moscow's right to sovereignty over the four Kuril islands, which are claimed by Japan.

Over the past two to three years, fishing violations in the Soviet Far East have occurred on "a massive scale", "far beyond what is admissible in the context of normal inter-state relations", Mr. Rogachev said.

Trawlers involved in illegal fishing did not fly a flag, but "most are seen to head towards Japan", the minister said, adding that the Soviet Foreign Ministry had on several occasions called on Tokyo to curb the activity of its fishermen.

Mr. Rogachev called for the reinforcement of KGB troops, responsible for guarding the border and territorial waters, while suggesting that cooperation between different countries in the region could be beneficial to all.

WELLINGTON (SEPT. 4) - New Zealand's Independent Newspapers Ltd., half owned by Rupert Murdoch's News Ltd., said Tuesday it would buy newspapers and a distribution chain in Australia.

They are to buy the interests from News Ltd.

"Few other growth opportunities in New Zealand are now available," INL chairman Alan Burnet said. "This move into Australia is an excellent opportunity for the company and also reflects the spirit of closer economic relations between the two countries."

He said the company would pay 200 million dollars (124 million U.S.) for magazine distributor Gordon and Gotch Ltd., Australia, Gordon and Gotch (New Zealand) and three provincial newspapers in Australia.

He said INL had virtually outgrown the New Zealand market, owning more than 50 per cent of the newspaper business by circulation.

Mr. Burnet said that as part of the purchase agreement, INL had also negotiated a 10-year exclusive right to distribute all News Ltd.'s magazines in Australia and New Zealand through Gordon Gotch.

The purchases are subject to approval from the Australian Foreign Investment Review Board. New Zealand Commerce Commission and Overseas Investment Commission approvals have been obtained.

Mr. Burnet said INL intended to examine the possibility of listing on the Australian Stock Exchange.

Dhaka (SEPT. 4) - Bangladesh began sending troops to Saudi Arabia Tuesday to help defend the kingdom against possible Iraqi aggression and to demonstrate solidarity with King Fahd in the Gulf conflict, a military spokesman said.

The first batch of about 300 men flew out of Dhaka Tuesday morning and more were due to leave later in the day.

President Hussain Muhammad Ershad told the Bangladesh contingent last week that they were soldiers of Islam and would protect the holy city of Mecca.

The dispatch of troops to Saudi Arabia sparked off violent protests. At least 55 people were injured and many arrested during a general strike Monday called by the opposition Awami League and other groups.

#90247d3830 09/04/1990 ~French/German News Agency
JAKARTA (SEPT. 4) - Bank Duta, one of Indonesia's largest private banks, was put under tight supervision by monetary authorities after it was found to have committed financial improprieties, Bank Indonesia (central bank) said Tuesday.

The bank was found to have mistakes in its foreign exchange operations, and its majority shareholders have agreed to undertake steps to correct the situation, Bank Indonesia said in a statement.

Bank Duta, a listed firm in the Jakarta Stock Exchange, is the second largest private bank with assets of more than one billion dollars at the start of the year. Its majority shareholders are charity foundations chaired by President Suharto.

Bank Duta had appointed a caretaker board of directors in place of the old board and named Coordinating Minister for Economy Radius Prawiro as advisor pending a shareholders' meeting to form a new board, the statement said.

Mr. Prawiro had been proposed to become Bank Duta's chief commissioner in place of Bustanil Arifin, who is cooperative minister in Mr. Suharto's cabinet.

MANILA (SEPT. 4) - The Asian Development Bank (ADB) Tuesday announced a 900,000 dollar grant to help stop environmental damage in tiny South Pacific island countries.

The ADB said environmental management had become a critical issue in the islands because of limited land areas, their dependence on natural resources, relatively extensive ecological damage and scarcity of local expertise.

The Cook Islands, the Federated States of Micronesia, Fiji, Kiribati, Marshall islands, Solomon islands, Tonga, Vanuatu and Western Samoa are to benefit from the grant, the ADB said.

-30- 771
#90247d3890 09/04/1990 ~French/German News Agency
WASHINGTON (SEPT. 4) - U.S. President George Bush summoned his Cabinet for a meeting Tuesday on the crisis in the Gulf as Treasury Secretary Nicholas Brady prepared to visit allies in search of financing for the

massive military operation there.

Mr. Bush returned from his summer home in Kennebunkport, Maine, Monday night with a full agenda awaiting him in Washington.

Besides the crisis in the Gulf, Mr. BUsh will be preparing for a summit with Soviet President Mikhail Gorbachev in Helsinki that is just five days away.

U.S. officials hope the summit Sunday will show Iraq that the superpowers are united in their opposition to Baghdad's August 2 invasion and subsequent annexation of Kuwait.

Those preparations come as the administration steps up its efforts to secure more tangible assistance from its alies in Europe and Asia where Mr. Bush's pleas for burden-sharing have met with only a tepid response.

According to estimates published in U.S. news reports, the deployment of U.S. troops to Saudi Arabia and the naval blockade of Iraq is expected to cost Washington more than one billion dollars a month.

Under a proposal reviewed by the National Security Council, another 10 billion dollars should be earmarked as aid to help cushion the economies of countries like Egypt, Turkey and Jordan against the shock of the international embargo against Iraq.

Mr. Brady was to leave Tuesday for Paris, the first stop on a four-day tour that will also take him to London, Seoul, and Tokyo in search of allied funding for the effort in the Gulf.

Secretary of State James Baker also was due to travel to the Gulf on Thursday on a similar mission but first he must appear before House and Senate Foreign Affairs Committees later Tuesday to respond to questions on U.S. strategy in the Gulf.

The need for greater burden-sharing appeared uppermost in the minds of some U.S. lawmakers.

#90247d3910 09/04/1990 ~French/German News Agency

FRANKFURT (SEPT. 4) - The Hoechst chemical company said Tuesday its world group pre-tax profits fell to 1.8 billion Deutschmarks (1.13 billion dollars) in the first half of 1990, down 13.7 percent on its profits in the same period last year.

Hoechst blamed the lower value of the dollar and yen against the mark, as well as lower prices for depressing the company's earnings.

Total world group turnover slipped 2.2 percent to 22.4 billion marks. While chemical sales by volume rose 3.5 percent, their prices had fallen by 2.7 per cent.

At the same time, the lower value of the dollar and yen had produced, when denominated in D-marks, a 1.2 billion mark drop in turnover, Hoechst said.

The parent stock company in Frankfurt accounted for 1 billion marks of the pre-tax earnings, down 5.8 percent, on turnover of 8.5 billion marks, 0.6 percent lower.

ADDIS ABABA (SEPT. 4) - More than 350,000 people were left homeless following floods in Ethiopia's western province of Gambella, the Ethiopian News Agency (ENA) said here Tuesday.

The floods occurred after three rivers - the Baro, Jejebe and Awaro - overflowed.

ENA said this season's crops were destroyed and electricity supplies to Gambella hospital disrupted.

Rome (SEPT. 4) - China has greatly increased its fishing capacity to become the world's third-biggest fishing nation behind Japan and the Soviet Union, the U.N. Food and Agricultural Organisation (Fao) said here Tuesday.

The Fao said China's fishing catch last year reached 10.5 million tons, compared to 6.5 million tons in 1985.

Just ahead of China were Japan and the Soviet Union, each with an estimated catch of eleven million tons last year, said the Fao report issued on the eve of a conference on fishery questions.

Altogether, around 100 million tons of fish were caught around the world in 1989, only one percent above the volume of the year before and a major slowdown from the 5.8 percent growth rates recorded in 1987 and 1988.

Developing nations last year accounted for 52 percent of the fishing catch,

while making up 45 percent of the market for fish, the report noted. Fao general director Edouard Souma stressed that fishing was the most important source of hard currency earnings for developing countries.

WASHINGTON (SEPT. 4) - The United States has chartered an Iraqi jetliner to fly an estimated 138 foreign women and children out of Iraq Tuesday, Cable News Network (CNN) reported.

CNN, citing unidentified sources, said the airliner was to fly to Amman, Jordan.

The sources told CNN that foreign women and children were told to gather at the U.S. Embassy in Baghdad for the flight out.

About two dozen U.S. nationals were expected to be among the 138 people aboard the flight, the report said. French, British and possibly Canadian citizens also would be aboard, according to the report.

BEIJING (SEPT. 4) - At least 90 people died and 1,000 were injured when Typhoon Abe hit eastern China's Zhejiang and Jiangsu provinces, the China Daily reported Tuesday.

Damage from the weekend typhoon is estimated at 56 million dollars, the official English-language daily said.

In Zhejiang, the hardest hit province, 65 people died and 839 were injured, while 600,000 were cut off by floodwaters and 40,000 were left homeless, it said.

The People's Daily, the official communist party newspaper, added that more than 375,000 hectares (926,250 acres) of cultivated land were flooded.

A provincial official said the damage, which he described as "the biggest in 40 years," would be at least 38.2 million dollars.

In neighbouring Jiangsu province, at least 23 people died and hundreds of others were hurt, the China Daily said.

An estimated 80,000 houses were destroyed and 120,000 damaged, the province's foreign affairs bureau reported.

It said 1.34 million hectares (3.3 million acres) of rice and cotton fields were devastated by the floods.

Abe also brushed Shanghai, China's biggest city, killing two people,

injuring 46 and damaging around 106,000 houses, the bureau said.

The area was hit last month by another typhoon, Yancy, which killed 91 people in Zhejiang and 161 in neighbouring Fujian.

Ankara (SEPT. 4) - Retail prices rose by 2.5 percent in Turkey in August, putting the annual inflation rate at 54.6 percent, the lowest in three years, it was reported here Tuesday.

The State Institute of Statistics (Die) said that by comparison, last year the August inflation rate was 3.5 percent for the month and 65.6 percent on an annual basis.

With the August increase, the cumulative inflation for the first eight months of 1990 was 29.3 percent, the Die said.

WELLINGTON (SEPT. 4) - Australian and New Zealand insurance giant AMP Society said Tuesday it would begin participating in Asian markets.

The company's international chief general manager Ian Salmon said in a statement that the Asian market for goods and services was growing at four billion New Zealand dollars (2.4 billion U.S) per week and currently totalled four trillion dollars (2.4 trillion dollars).

"As this growth heats up, we in Australia and New Zealand will be thinking more positively of participating," Mr. Salmon said.

"It will not be easy -- language and customs do not help -- but it will be essential if we are to maximise our position in this marketplace."

Because of AMP's size, substantial growth opportunities do not exist in Australia and New Zealand, he said.

"We have set a strategy that will enable us to spread our risks broadly both in terms of major strategic and economic geographic groups and the countries within each group," he said.

"Much of this is, as yet, untested. We have only recently embarked upon our programme and it will be some years before we can expect to have much of a spread of risks and businesses."

Mr. Salmon said some countries favoured foreign investment over insurance.

"Markets such as Japan, which are otherwise effectively closed to us as a life insurer, could be more welcoming to us in the role of an investment manager," he said.

SEATTLE, WASHINGTON (SEPT. 4) - Asiana Airlines has ordered 27 Boeing jets and has taken options on 24 more, the South Korean airliner and Boeing have announced.

The order could total six billion dollars if all the options are carried out by the two-year-old carrier, which plans to increase the number of its international destinations.

The firm orders alone -- for nine 747-400s, 10 767-300s and eight 737-300s -- are worth a total of three billion dollars, officials said Monday.

In addition, Asiana also took options on nine 747-400s, eight 767-300s and seven 737-400s.

Asiana said the deliveries were scheduled to begin in 1991 and be completed in 1999.

The contract was signed at the Farnborough International Air Show in Farnborough, England.

SINGAPORE (SEPT. 4) - Indonesia's powerful Salim Group is expanding its holdings in Singapore with the announcement that it will take a 19.1 per cent stake in local fast food operator Inno-Pacific Holdings Ltd. (IPH).

IPH annouunced Monday that the group headed by Indonesian tycoon Liem Sioe Liong would pay 15.1 million Singapore dollars (8.6 million U.S.) through its Singapore investment company KMP Pte. Ltd.

Salim holds the Kentucky Fried Chicken franchise in Indonesia and IPH holds it here. IPH said the new deal "would lead to the emergence of a major new trading group in Singapore."

Mr. Liem's group is reportedly negotiating with IPH to set up two chicken-related joint ventures -- a chicken farm in Indonesia and a processed poultry distribution centre in Singapore.

KMP and Inno-Pac also announced a new venture between them to take over Inno-Pac's interests in the Shakey's Pizza franchise system worldwide, except in Japan.

The new venture plans to buy Shakey's from Inno-Pac for 35 million dollars (20 million U.S.). KMP will in turn subscribe for 11.1 per cent of the shares in the venture for 2.5 million U.S. dollars.

BEIJING (SEPT. 4) - China's economy is showing signs of recovery but a major effort is needed to meet agricultural and industrial targets, the China Daily reported Tuesday, quoting a senior official.

Zou Jiahua, minister in charge of the state planning commission, told the standing committee of the People's National Congress, the Chinese parliament, that "an upturn has become more apparent in the national economy" in recent months, the official English-language newspaper said.

Inflation had been curbed, the summer grain harvest was good and the annual harvest, barring natural disasters, should be satisfactory, he said, adding that industrial growth was showing signs of recovery and the trade balance was again in surplus.

The imposition of an austerity plan from late 1988 stemmed a surge in prices, which only rose an average three per cent in the first quarter of this year after double-digit rises in 1988, he said.

Industrial production during the first seven months rose 2.3 per cent to 161 billion dollars compared to the same period last year, Mr. Zou said.

A 21.2 per cent devaluation of the yuan in December helped boost foreign trade, he said, adding that the balance was 3.3 billion dollars in China's favour for the first seven months of the year.

But despite these encouraging signs, the minister said, retail sales dropped and the State industrial sector was still suffering.

Inventories were growing because of weak demand, businesses were cash-starved and becoming indebted, while many badly-managed state enterprises were having trouble maintaining production.

China has set an industrial growth target of six per cent for 1990, which most analysts here believe is too ambitious.

#90247d4430 09/04/1990 ~French/German News Agency

SINGAPORE (SEPT. 4) - Singapore Aerospace, publicly listed less than a month ago, has followed up a move into the U.S. market with a deal to take a 50 percent stake in a British aircraft parts supplier.

The joint venture was disclosed Monday as Singapore Aerospace announced interm results for 1990 showing a net profit of 8.55 million Singapore dollars (4.8 million U.S.), up 9.5 percent on first six months of last year.

Singapore Aerospace said in a statement it was forming a 50-50 joint venture with Britain's Qualitair Aviation Group to create Qualitair Rotables Services.

The new company, to be based in Cambridge, will specialise in the management and supply of spare parts for Boeing 737 aircraft.

Last month, Singapore Aerospace announced plans to buy a 20 million U.S. dollar installation in the southern U.S. state of Alabama to service Boeing 747 jets and establish a foothold in the American market.

Singapore Aerospace, which specialises in aircraft maintenance and modification, was the first defence company to be floated as part of a government privatisation program. It made its appearance on the local stock market on August 8.

Its net profit for the first half of 1990 compared to the 7.81 million dollars (4.39 million U.S.) registered for the same period last year.

Pre-tax profit rose 4.3 percent to 9.86 million Singapore dollars (5.53 million U,.S.) compared with the corresponding period of 1989.

Turnover rose 23.8 percent to 93.64 million dollars (52.6 million U.S.).

"Barring unforeseen circumstances, the board expects the results of the second half of 1990 to be better than the first half of the year," a

company statement said.

#90247d4530 09/04/1990 ~French/German News Agency

KUALA LUMPUR (SEPT. 4) - Brazil has offered to cut its annual tin production by 14 percent to 37,000 tons if it joins the Association of Tin Producing Countries (ATPC), an ATPC official said Tuesday.

"They are very close to joining the ATPC," said Redzwan Sumun, executive secretary of the seven-member association grouping Australia, Bolivia, Indonesia, Malaysia, Nigeria, Thailand and Zaire.

Brazil, the world's largest tin producer, said it will keep 1990 production to 43,000 tons before cutting it by 14 percent to 37,000.

It produced about 56,000 tons last year.

Mr. Redzwan, just back from a tour of Brazilian mines, said Brazil's offer, made by senior industry officials, showed it would like to see the ATPC working effectively.

"They have seen the point, that the main thing about cutting stocks is not just export control," Mr. Redzwan said.

"It is the first time that they have actually agreed with us on the type of rationalisation we need to do."

The ATPC pegged exports at 84,233 tons for the 10 months from March to cut down overhanging stocks standing at 43,200 tons at the end of February.

Brazil and China, another big non-member producer, are reported to support the ATPC exercise by imposing their own quotas.

The ATPC requires members to keep stocks at approved levels but does not control production levels.

Mr. Redzwan said ATPC members would also have to cut production for the Brazilian offer to be effective.

The ATPC executive committee is due to meet in Cochabamba, Bolivia, on September 25. The ATPC annual ministers' conference is scheduled for October 1.

On the Kuala Lumpur Tin Market, the tin price fell 12 Malaysian cents (4.44 U.S. cents) to a 46-month low of 15.10 dollars (5.59 U.S. dollars) a kilogram (2.2 pounds) on heavy selling.

Malaysia Mining Corp., the country's biggest tin-mining company, said prices were now below the company's costs of production.

Analysts said the tin market had been hit by high stocks, increased stockpile sales and the Gulf crisis.

#90247d4550 09/04/1990 ~French/German News Agency

WIESBADEN, WEST GERMANY (SEPT. 4) - West Germany's gross national product (GNP) growth slowed in the second quarter of this year, the federal statistics office said here Tuesday.

GNP growth in volume terms stood at 3.4 percent in the second quarter over the same period last year, against a 4.5 percent increase in the first quarter.

GNP shrank one percent in the second quarter over the first quarter level, after rising 3.5 percent in the first quarter over the last three months of 1989.

The statistics office said that the slowdown in the second quarter was largely due to the fact that there were more working days in the first quarter of 1990 than in the same period last year, while there were less in the second quarter.

In addition, the first quarter figures were boosted by the effects of a particularly mild winter.

MOSCOW (SEPT. 4) - Moscow is suffering a severe bread shortage, with people queuing for up to four hours outside those bakeries with loaves on offer.

The town hall in the Soviet capital set up a crisis committee on Monday which issued a statement reassuring people that "the bread industry has the means and raw materials needed to supply Moscow" and that "the situation is under control," the Moskovskaia Pravda newspaper said Tuesday.

Nonetheless, many Moscow bakeries are not receiving supplies and the city is for the first time suffering a severe shortage of bread, one of the few items which up until now has been available in sufficient supply to meet demand.

The shortage has already led some enterprising lucky purchasers to offer their bread to the waiting queues, at a price four times what they have

just paid for it.

An official of Moscow's sole bread factory said in a telephone interview with Soviet television that only three of the plant's 12 production units were in working order, blaming staff inefficiency and worn-out equipment.

This year's grain harvest has been particularly good, and there is no shortage of flour.

#90247d4590 09/04/1990 ~French/German News Agency

Zurich (SEPT. 4) - The U.S. tobacco and food conglomerate Philip Morris Companies Inc. said here Tuesday it had acquired 85 percent of the equity and 92 percent control of the Swiss chocolate concern Jacobs Suchard.

Philip Morris disclosed the figures a day after its offer to shareholders, issued in June, expired.

The company, through the Colima Holding firm in Zug, had offered 1,660 Swiss francs (1,276 dollars) per registered share and 8,500 francs per bearer share in its takeover offer. Philip Morris said it was extending the offer deadline until September 18.

Colima is the holding through which Klaus J. Jacobs held majority control of Jacobs Suchard. He reached agreement with Philip Morris on the sale of Colima to the U.S. firm in June, at which time the U.S. firm made its offer to independent Jacobs Suchard shareholders.

Philip Morris said its offer had attracted 75 percent of the shares which had not previously been owned by Colima.

Jacobs Suchard will continue to operate as an independent company in Zurich, Philip Morris said. In addition, it will take over certain activities of the Philip Morris subsidiary Kraft General Foods, in return for which Kraft General Foods will receive 100,000 bearer shares of Jacobs Suchard.

#90247d4720 09/04/1990 ~French/German News Agency

Manila (SEPT. 4) - The Philippines wants complete control of Clark Air Base by 1991 but would ask the United States to stay three more years in Subic naval base, according to the draft of a treaty released tuesday, a week before Manila and Washington resume talks on the future of U.S. military bases.

The talks are scheduled for September 10-14, possibly at the fortress- like

central bank building in Manila's tourist belt area.

Foreign Secretary Raul Manglapus, who will head the Philippine panel, will present the government position for full jurisdiction over all offences committed by Americans within their bases, the document says.

According to the draft treaty, Manila wants that Philippines laws to apply within the installations and facilities and that the U.S. should assist the Philippines in the arrest of American offenders.

The Philippines will also ask the U.S. to vacate Clark air base by 1991 but will allow a three-year extension of lease of Subic naval base.

The military bases agreement expires on September 16, 1991 and Manila said it considers terminated the lease on Clark and Subic bases and four other smaller installations.

President Corazon Aquino has said a new bases treaty with the U.S. was possible only if it is in the national interest. The U.S. has stated that it wanted a new accord.

#90247d4870 09/04/1990 ~French/German News Agency

Munich (SEPT. 4) - The ailing West German sporting goods firm Adidas will need at least until 1993 before it has turned itself around, its chief executive said Monday.

Adidas chairman Rene C. Jaeggi said group losses in 1989 rose to 130 million marks (82 million dollars) due to extraordinary expenditures despite a 90 million mark rise in turnover to 1.04 billion marks.

Reporting at the Ispo sporting goods fair in Munich on his strategy to try to turn the company around, Jaeggi said Adidas expected a two to three percent increase in turnover in 1990, and earnings would improve by some 100 million marks, which would still leave it at a deficit.

In 1991, sales turnover was targeted to rise by ten percent, but restructuring measures would cut into earnings, Jaeggi said, so that only in 1992 would the firm start to show prospects for any earnings. This would set the stage for listing Adidas' shares on stock markets in 1993.

Jaeggi did not indicate whether the new majority owner, French entrepreneur Bernard Tapie, had yet given his backing to the plans.

Nor did Jaeggi say what effects his plans would have on Adidas' production sites and payrolls. Adidas has 9,500 employees - 4,000 of them at eight plants in France - while such competitors as Nike and Reebok have much

smaller payrolls.

Adidas is 80 percent-owned by the Bernard Tapie Finanz company based in Essen, Germany. A further ten percent plus an option on 4.9 percent are held by Liga Part, a division of the Metro retail store chain. The remaining equity is held by Dassler family heirs Suzanne and Adolphe Dassler.

#90247d4920 09/04/1990 ~French/German News Agency

KABUL (SEPT. 4) - Unknown gunmen ambushed an International Committee of the Red Cross (ICRC) vehicle in western Afghanistan and shot dead an Afghan ICRC officer, a Red Cross spokesman said here Tuesday.

It was the first time that a Red Cross official had been killed on a mission in Afghanistan, the ICRC said.

The ICRC car was riddled with machine-gun fire Saturday while returning from Islam Kala about five kilometers (three miles) from Herat, the spokesman said.

The ICRC field officer was seriously injured in the attack and died later at Herat hospital.

An ICRC official in Peshawar, Pakistan, identified the slain man as Faqir Yar and said he was travelling with a Swiss delegate who was not injured.

The two-member team had been touring areas of the western province to chalk out plans to provide assistance to war wounded in the area, which is close to the Soviet border, other Red Cross officials said here.

The spokesman could not say whether anti-government mujahedeen fighters or local militia had attacked the car.

There was no immediate reaction from the government here, but sources said a United Nations official was scheduled to leave Kabul for Herat to investigate the killing.

The ICRC runs hospitals and clinics in Kabul and neighbouring Pakistan for Afghan war wounded and has been slowly branching out into the country's provinces in efforts to reach more wounded. It also helps relatives contact prisoners on both sides of the war, and helps with prisoner returns.

#90247d5030 09/04/1990 ~French/German News Agency

BEIJING (SEPT. 4) - Japan's Honda Motor Corp., seeking a higher profile

in China, will set up three technical training schools and increase its motorcycle service centers from four to 30 by 1992, the China Daily said Tuesday.

The aim, the official English-language newspaper said, is to meet a rising demand in the Chinese motorcycle market, which has doubled over the past three years.

The schools for motorcycle mechanics will be set up in the cities of Guangzhou in the south, Shanghai in the east and Chongqing in the southeast, it said.

Honda will furnish the machinery, technical advice and instructors for the schools, it said.

Honda has service centers in four major Chinese cities and plans to expand its network through local motorcycle manufacturers, the China Daily said.

The newspaper reported that the Honda decision had been announced in New York, but it did not say when.

Motorcycle production in China skyrocketed in 10 years from 12,000 in 1978 to 1.17 million in 1988.

The annual production capacity is 1.35 million, but the current economic austerity program limited production to 1.03 million in 1989 and the figure for this year should be about the same, according to the China National Automotive Industry Corporation (CNAIC).

About 490,000 motorcycles have been produced so far this year, the China Daily said, quoting CNAIC figures.

#90247d5060 09/04/1990 ~French/German News Agency

SYDNEY (SEPT. 4) - New Zealand's biggest publisher Independent Newspapers Ltd. has expanded to Australia with the 151.9 million dollars (123.3 million U.S.) purchase of Gordon and Gotch Ltd. and three provincial newspapers from News Corp Ltd.

INL, owned 49.7 percent by News Corp, is now poised to seek out other Australian acquisitions and plans to examine the possibility of listing on the Australian Stock Exchange.

News Corp settled for a price well below the 160 million dollar (129.8 million U.S.) to 170 million dollars (137.9 million U.S.) expected for magazine distributor Gordon and Gotch.

It also sweetened the deal by throwing in three Victorian papers, the Bendigo Advertiser, the Geelong Advertiser and the thrice-weekly Mail in Horsham.

Rupert Murdoch's group will also take up almost half of a placement and issue of convertible notes being undertaken by Independent Newspapers to raise a total of 92.6 million dollars (75.1 million U.S.) towards the acquisitions.

The intended sale of Gordon and Gotch, which covers major cities in Australia and New Zealand, was announced in May as part of an assets sales program designed to offset debts of 10 billion dollars (8.12 billion U.S.) plus and provide scope for its overseas broadcasting assets.

#90247d5120 09/04/1990 ~French/German News Agency

MUNICH (SEPT. 4) - West Germany's smaller breweries Tuesday sharply criticised big brewers for their massive exports to East Germany, and also attacked the ''ecology beer'' wave sweeping the country.

Franz Xaver Glossner, managing director of the Federation of Medium-Sized Private Breweries, said the 160 medium-sized East German breweries had suffered ''incredible sales losses'' due to the massive deliveries to East Germany.

In some cases, East German brewers' output had plunged to just 20 to 40 per cent of their levels of a year ago, said Glossner, whose association represents some 800 of West Germany's 1,178 breweries.

Even more damaging to the entire beer brewing industry, Glossner said, were the ''eco-beers'' now being put on the market by ''charlatans who believe that their beers are purer than pure''.

Glossner said his association had nothing against beers produced from ingredients which had been ecologically grown, but was opposed to the impression created that ''eco-beers'' were cleaner than conventionally-brewed beers.

BONN (SEPT. 4) - West Germany's grain harvest this year was 0.5 percent below last year's level at 25.97 million tons, but in East Germany the harvest improved 7.3 percent to 11.61 million tonnnes, according to estimates from the West German agriculture ministry.

But the ministry stressed the good quality of this year's West German crop,

saying that yield was up 7.2 percent over the average for the past five years.

The amount of ground planted was down 3.2 percent at 4.49 million hectares (11 million acres).

-30- 693

#90247d5180 09/04/1990 ~French/German News Agency

WARSAW (SEPT. 4) - The Roman Catholic Church thinks that laissez-faire economic reform in Poland is going too far when nuns are forced to live over a sex-shop.

In the town of Koszalin, near the Baltic Sea coast, the local authority has given permission for a sex-shop to open on the ground floor of a building whose other tenants include nuns of the Immaculate Heart of the Virgin Mary.

The Catholic newspaper Slowo Powszechne complained Tuesday of the "frivolous signs" now displayed on the building, which it said offended the moral sense of the nuns living on the second floor.

The newspaper was doubly indignant because, it said, the nuns had formerly owned the building, but had been "dispossessed" by the communist authorities in the early 1960's.

At the time, the Young Communists moved into the ground floor. Now they are gone and, the newspaper said, "trivial trade" is moving in.

#90247d5190 09/04/1990 ~French/German News Agency

AMMAN (SEPT. 4) - Saudi officials have discreetly ordered two million cans of beer from a Jordanian brewery for U.S. troops deployed in Saudi Arabia, where alcohol is banned, an official for the brewery said here Tuesday.

Islamic practice forbids all drinking of alcohol. This law is strictly applied by Saudi Arabia, which forbids both its import and consumption.

The brewery source, who asked not to be identified, said the order for the beer had bypassed official channels in order to maintain secrecy.

But several people said they saw thousands of cartons of beer being loaded at the Jordanian factory Monday and Tuesday onto large trucks with Saudi license plates.

Sources said it was apparently felt that it was more practical to purchase Jordanian -- rather than American -- beer for the troops because it could be trucked overland.

An estimated 60,000 U.S. air and ground forces have been deployed in Saudi Arabia to bolster the kingdom's defenses against a possible Iraqi attack from neighboring Kuwait.

#90247d5240 09/04/1990 ~French/German News Agency

TEHERAN (SEPT. 4) - Iran and Iraq have exchanged nearly 50,000 prisoners from the Gulf war since mid-August, the International Committee of the Red Cross (ICRC) said here Tuesday.

The committee said 23,798 Iranians had returned home as of Monday night, while 24,250 Iraqis had been repatriated, for a total of 48,048.

Iran and Iraq, who fought an eight-year border war that ended in a cease-fire in August 1988, have agreed to exchange POWs under ICRC auspices at the rate of 2,000 a day until the last man returns home.

The committee at the time of the cease-fire had officially recorded the names of 50,203 Iraqi prisoners and 18,902 Iranians. But other estimates put the total number of POWs at 100,000 -- 70,000 Iraqis and 30,000 Iranians.

The prisoner exchanges began August 17, two days after a dramatic announcement by Iraqi President Saddam Hussein that he was in effect accepting Iranian terms for a formal peace treaty.

#90247d5310 09/04/1990 ~French/German News Agency

ROME (SEPT. 4) - Chinese Deputy Foreign Minster Tian Zengpei said here Tuesday that Beijing would like a "total resumption of relations between China" and the European Economic Community (EEC).

The official spoke after a meeting here with Italian Prime Minister Giulio Andreotti. Italy currently holds the EEC presidency.

Rome was the latest stop on his diplomatic circuit, prior to the forthcoming meeting in New York of Chinese Foreign Minister Qian Qichen and the troika of European foreign ministers. The latter are from the countries holding the past, present and future EEC presidency: Ireland, Italy and Luxemburg.

It will be the first Chinese-EEC meeting on this level since the Chinese

military was ordered to crush the pro-democracy movement in Tiananmen Square in June 1989, triggering an international outcry and western sanctions against China.

Mr. Tian Zengpei said "reforms are necessary in China for the development of laws and democracy", but said they must come about "in compliance wth concrete Chinese conditions". Relations with other countries must be developed on the "basis of mutual respect", he said.

He will be in Paris on Wednesday for talks with the secretary general of the French foreign ministry, after already visiting Yugoslavia, Romania, Hungary, Albania and Bulgaria.

TOKYO (SEPT. 4) - Kuwait has been reshuffling its foreign assets since Iraq invaded the oil-rich emirate last month although government bought more than they have sold, the country's finance minister said Tuesday.

"You have not seen selling of assets in various markets," Sheik Ali al-Khalifa al-Athbi al-Sabah told a news conference.

"We have been net buyers rather than net sellers," he said.

Sheik al-Sabah, who overseees an estimated 100 billion dollars invested abroad including some 20 billion dollars in Japan, said Kuwait still had access to foreign investments despite freezes on Kuwaiti assets in many countries.

"We have been given a complete management role and access to these assets in whatever form they are in," the finance minister said.

He added that the Kuwaiti government in exile had been given "unhindered freedom" to do so from central banks and finance ministries in several countries.

But he indicated that his government was relying more on income from these investments rather than outright sales to support Kuwaitis stranded abroad and to help countries adversely affected by trade sanctions against Iraq.

"As responsible people, when we are given freedom we use it responsibly," he said. "We are using some of the income of these assets to support the legitimate needs of the Kuwaiti people and countries affected."

Sheik al-Sabah did not say how governments which froze Kuwaiti and Iraqi assets last month were able to determine the legitimacy of transactions undertaken on behalf of the Kuwaiti government.

The Japanese government froze Kuwaiti assets in Japan soon after the Iraqi invasion, estimating their value at around 20 billion dollars including a 10.3 percent stake in Arabian Oil Co. Ltd., the country's biggest oil producer.

The Kuwaiti finance minister met earlier Tuesday with senior government officials including Prime Minister Toshiki Kaifu to thank Japan for supporting his exiled government.

He also met Bank of Japan governor Yasushi Mieno and Foreign Minister Taro Nakayama.

#90247d5440 09/04/1990 ~French/German News Agency

MELBOURNE, Australia (SEPT. 4) - Mining company CRA Ltd has blamed lower metal prices and the closure of Bougainville Copper's operations for dragging its interim equity net profit sharply lower to 269 million dollars (218 million U.S.).

The result for the six months to June 30 was well down on the 370 million dollars (300 million U.S.) earned a year ago.

CRA chief executive John Ralph said the second half profit would be "of the same order" as the interim result.

He said the full year result depended on currency swings, with every one cent rise in the Australian dollar cutting 22 million dollars (17.8 million U.S.) from CRA's after tax profit.

The company's sales fell 14.7 percent to 2.19 billion dollars (1.78 billion U.S.).

Pre-tax profit slumped 40 percent to 364 million dollars , (295.38 million U.S.) but net profit was boosted by a 60 million dollars (48.7 million) abnormal gain.

The result was at the top end of analysts' expectations. They expect a slightly better second half figure on the back of higher metal prices and better diamond production.

Directors said Bougainville, which is 53.6 percent owned by CRA, was treated as an abnormal item "to more clearly reflect CRA's operating profit".

PARIS (SEPT. 4) - The French government on Tuesday blocked plans by Eurocom and Carat-Espace to combine their advertising space activities in France, but left the door open for international operations.

Eurocom and Carat had asked the finance ministry in March for the green light to operate together on the French market after deciding to join forces in October.

But Finance and Economy Minister Pierre Beregovoy on Tuesday turned down the link-up on the French market after the monopolies commission said that the two companies together "would have on the market for buying advertising space in France an influence on certain aspects" of the market.

Carat and Eurocom together could control 40 per cent of the market in some areas, the commission said.

The ministry had therefore decided to "forbid the companies concerned to unite their advertising space-buying activities in France."

But the two can operate together when buying advertising space with an international dimension, where an international publicity campaign including France is being carried out through "transnational" media.

CAIRO (SEPT. 4) - A contingent of Egyptian troops left here Tuesday for the United Arab Emirates (UAE) to help bolster UAE defenses, the official Middle East News Agency (MENA) reported.

The agency did not disclose the number of troops sent but said their deployment would be "under an Arab umbrella".

Egypt has already sent forces to Saudi Arabia, as have Morocco and Syria, as part of a multinational effort to defend the kingdom against a possible attack from Iraqi troops occupying Kuwait.

Informed sources here have put the number of Egyptians at between 15,000 and 20,000 in Saudi Arabia, although the official figure had never been disclosed.

The United States and Britain likewise sent military units to Saudi Arabia following the August 2 Iraqi invasion of Kuwait.

The UAE last month announced that it would also accept the deployment of U.S. forces on its territory.

MOSCOW (SEPT. 4) - Soviet President Mikhail Gorbachev, rather than Prime Minister Nikolai Ryzhkov, will present the economic reform programme to the Supreme Soviet next week, presidential spokesman Vitaly Ignatenko said here Tuesday.

The move follows Mr. Gorbachev's decision to combine elements from a reform programme presented by his prime minister with those put forward by another commission, headed by himself and the president of the Russian parliament,

Boris Yeltsin. The second commission is chaired by academician Stanislav Shatalin.

Mr. Gorbachev's decision to present the package himself to parliament "doesn't mean he has lost confidence in Mr. Ryzhkov," the spokesman told a press conference here.

Mr. Ryzhkov's initial package of reforms, designed to create a market economy in the Soviet Union, was rejected by parliament last May. Deputies gave Mr. Ryzhkov until early September to come up with alternative proposals.

Mr. Ignatenko confirmed that Mr. Gorbachev intended to put a single programme to the Supreme Soviet "based on the Shatalin concept and incorporating parts of the government programme".

Mr. Gorbachev, along with the presidential council and the council of the federation, were meeting Tuesday afternoon to study how best to combine both economic packages, Mr. Ignatenko said.

"There is no great difference between the two programmes", he added, saying that divergences concerned mainly the pace of change and ways to implement price reform.

Mr. Yeltsin, for his part, has rejected any compromise solution, saying the two programmes were "like a snake and a hedgehog" and could not be "married".

He has further called for Mr. Ryzhkov's resignation, saying the prime minister no longer has the confidence of the people.

MANAMA (SEPT. 4) - Iraq has deployed at least three truck-mounted missile batteries near Kuwait City, witnesses who recently fled the Iraqi-occupied

emirate said here Tuesday.

The two Bahrainis, both familiar with military affairs, said the surface-to-surface missiles were marked Al-Hussein, Al-Abbas and As-Saddam.

Al-Hussein is the best-known of Iraq's arsenal of ballistic missiles. It is an improved version of the Soviet-made Scud-B missile and has a range of 600 kilometres (370 miles).

During the Iran-Iraq conflict, Moscow supplied Baghdad with several hundred Scud missiles, which lack precision but caused heavy damage in attacks on Iranian cities.

Al-Abbas has a range of 900 kilometres (550 miles), according to Iraq's minister of military industries, Hussein Kamel. After its test firing in April 1988, he said it was an improved version of Al-Hussein.

The other missile, As-Saddam, named after Iraqi President Saddam Hussein, is also a converted Scud-B, but less is known of its capabilities.

The Bahraini witnesses, who declined to be named, said the Iraqi Army had deployed several heavy tanks, anti-aircraft batteries and multi-barreled rocket launchers on the seafront at Kuwait City.

OSLO (SEPT. 4) - Norway decided Tuesday to evacuate its embassy in Kuwait City as soon as possible due to the hardships which the remaining diplomats there are having to endure, a foreign ministry spokesman said here.

Supplies of food and water are running short and electicity lines are still cut off. The three diplomates will drive to Baghdad. The evacuation would be temporary, the spokesman said.

Other Western embassies also planned to evacuate their staff, but it was still unclear whether it would be a joint operation, spokesman Bjorn Blokhus said.

However not all Western embassies are as exposed to Iraqi pressure as that of Norway, which is situated in a part of town where Kuwaiti resistance has been strong.

The Norwegian embassy is permanentely surrounded by soldiers, and the three diplomates have been kept indoors for weeks. Due to lack of electricity, the air conditioning is not working and the heat makes living conditions almost unbearable, Mr. Blokhus said.

The immediate evacuation was requested by ambassador Hans Wilhelm Longva who had been given a free hand in deciding when to abandon the embassy, the spokesman said.

For the last week there has been no direct contact between the embassy and the foreign ministry in Oslo. All messages have been passed through other embassies. Five local staff at the Norwegian embassy have been invited to follow the diplomatic personnel to Baghdad, the spokesman said.

Leipzig (SEPT. 4) - Daimler-Benz and Hewlett-Packard have established a services joint venture in East Berlin to help East Germany's five new states, the West German firm said here Tuesday.

Peter Wiese, managing director of the new company, called System House for Information Processing Ssi, said the venture is one of the first to be exclusively comprised of Western firms in East Germany.

Partners in Ssi are Daimler's new services subsidiary InterService with a 74.9 percent share and Hewlett-Packard with 25.1 percent.

''We have stepped forward in order to develop a market in the five new federal states,'' Wiese said at the Leipzig Autumn Fair.

Ssi management board chairman Bernward Ruepprich said that most of the 80 employees hired for the new company came from the former East German state-owned Data Processing Conglomerate.

ZURICH (SEPT. 4) - Swiss arms maker Oerlikon-Buehrle said Tuesday it was

expecting heavy losses this year because of the Gulf crisis, reversing earlier hopes of turning in a profit this year for the first time since 1985.

Buehrle said it was also planning to axe jobs, particularly in its Italian subsidiary Contraves, because of arms contracts it would not be able to honor because of a U.N. embargo on trade with Iraq and Kuwait.

The company also announced that leading shareholder and board chairman Dietrich Buehrle, aged 69, and chief executive Michael Funk were to step down.

Mr. Buehrle's ideas for the company no longer command majority support on the board.

The changes follow pressure from banks but are also the result of internal problems which have come to a head in recent weeks, new group boss Ernst Winkler said.

#90247d6250 09/04/1990 ~French/German News Agency

PARIS (SEPT. 4) - French oil group Elf Aquitaine made a consolidated net profit (group share) of 4.9 billion francs (about 950 million dollars) in the first half of the year, up 15 percent from the 4.3 billion francs scored for the same period last year, the group announced Tuesday.

The announcement noted that the improvement came despite declines in the value of the dollar (to an average of 5.69 francs, against 6.43 during the first six months last year) and of the yen.

Elf Aquitaine made a consolidated net profit of 7.2 billion francs for all 1989. But in view of events in the Gulf, the group did not venture a forecast of results for 1990 as a whole, noting that the future was too uncertain.

It said that the reported first-half profit includes a capital gain of 620 million francs on sales of the La Seigneurie paints unit and first-half results from business taken over from Orkem (chemicals), consisting of minority interests worth around 300 million francs.

Profit per share was 40 francs in the first half, against 41 in the same period last year.

The operating profit was up for the first half from 8.4 billion to 10.2 billion francs, while sales reached 82.3 billion francs (against 72.8 billion a year previously). But the bulk of the sales increase was due to inclusion of the Orkem business and of the new U.S. subsidiary, Pennwalt.

Elf Aquitaine's oil output was up in the first half from 11.5 million to 14.9 million tons, while natural gas production was off from eight million to 7.4 million tons of oil equivalent. Exploration expenditures accounted for 2.3 billion francs.

#90247d6440 09/04/1990 ~French/German News Agency

ZURICH (SEPT. 4) - U.S. group Philip Morris Companies (PMI) has succeeded in a takeover bid for Switzerland's second largest agro-food group Jacobs Suchard, and now controls 92 percent of voting rights and 85 percent of its capital, it was announced here Tuesday.

Philip Morris had launched its 3.8 billion dollar friendly bid for the Swiss group on June 22 through its 100 percent owned subsidiary Kraft General Foods.

Jacobs Suchard named American Raymond Viault to head the company in mid-August to replace Klaus Jacobs, who resigned.

Mr. Viault said he wanted to see Jacobs Suchard become the world's leading coffee and confectionery group and to integrate certain activities of Kraft General Foods into the group.

LONDON (SEPT. 4) - Britain must reduce its inflation rate to below three percent by 1995 or its industry will face disastrous consequences on world markets, the employers' organisation the Confederation of British Industry (CBI) warned Tuesday.

To achieve this massive reduction from a current annual inflation rate of 9.8 percent, the government should maintain high interest rates "for some time to come" and maintain "a fairly strong exchange rate" for the pound, the CBI said.

The appropriate rate for sterling within the European Monetary System "is likely to be nearer three Deutsche marks than, say, 2.60," the CBI said in a 35-page study of Britain's "inflation psychology."

"The authorities need to be cautious in judging when to relax policy," it warned, and proposed public spending cuts or tax increases to help high interest rates slow down economic activity.

The CBI also warned that British salaries would be higher than those in West Germany by 1995 if nothing was done to prevent this, while low labour costs have been one of Britain's key attractions to foreign investment.

BONN (SEPT. 4) - Italian mountain-climber Reinhold Messner is to try to track down the "abominable snowman" or yeti.

In an interview with the weekly German magazine Quick to be published on Thursday, Mr. Messner, 45, who crossed Antarctica on foot last year, intends to start his expedition early in 1991.

He plans to travel 850 kilometres (535 miles) across the Himalayas at an altitude of between 5,000 and 6,000 metres (16,500 to 19,800 feet) in the Kingdom of Bhutan.

There have been no proven sightings of the yeti over the years, although the legend of an "abominable Snowman" has been fuelled by huge unexplained footprints which have been seen and photographed.

TAMPERE, FINLAND (SEPT. 4) - The Socialist International movement begins a three-day conference here on Wednesday with the the situation in the Middle East and the Gulf crisis expected to dominate the discussions even though the main theme is disarmament.

About 100 delegates representing 40 social democratic and labour parties from 30 countries are due to attend the meeting.

The main themes of the conference are "towards a new security system", "disarmament for development - redirecting resources" and "naval arms control", but Finland's Foreign Minister and leader of Finland's Social Democratic Party Mr. Pertti Paasio admitted on Tuesday that the Gulf crisis is expected to take up most of the time reserved for disarmament.

According to Mr. Paasio, the conference is a response to favourable developments in disarmament but he stressed that the disarmament process only concerns Europe.

The disarmament conference will be opened by Socialist International veteran President Willy Brandt of West Germany and Mr. Paasio.

Originally the conference was due to be hosted by the Speaker of Finnish parliament and chairman of the disarmament committee of Socialist International Kalevi Sorsa. Hoowever Mr. Sorsa underwent cancer surgery on Monday will be on sick leave for several weeks.

The other participants include Swedish Prime Minister Ingvar Carlsson, Japanese opposition leader Mrs. Takako Doi, Lebanese Socialist leader Walid Jumblatt, Turkish opposition leader Erdal Inoenu and British shadow cabinet defence minister Martin O Neill.

Also the social democratic parties of the Soviet Union, Yugoslavia, Hungary and Czechoslovakia as well as those from the three Baltic countries, Estonia, Latvia and Lithuania have sent their delegations.

JOHANNESBURG (SEPT. 4) - Seven Dutch members of parliament arrived here Tuesday for a ten-day fact-finding visit -- the first formal Dutch delegation to visit South African since 1965.

On their arrival at Jan Smuts airport here, the leader of the delegation, Harry Aarts said a future "friendship relationship" between South Africa and the Netherlands would only be possible if apartheid was totally abolished.

The delegation comprises representatives of the five biggest political parties in the Netherlands and Mr. Aarts said he did not want to give South Africans the impression that the visit was a "friendly one".

"The situation in South Africa is still not one with which we can live, but we hope that it will improve in the future".

The question of sanctions will be the "hottest item on the agenda", Mr. Aarts said.

The delegation will hold discussions with political parties across the political spectrum, church leaders, academics and pay a courtesy visit to President Frederik de Klerk.

They will also visit South Africa's largest black township Soweto, adjoining Johannesburg, before leaving the country on September 11.

Washington (SEPT. 4) - U.S. President George Bush will probably go on from the Helsinki summit at the weekend to Brussels for talks with North Atlantic Treaty Organisation allies, it was stated Tuesday.

White House spokesman Marlin Fitzwater said that visits to ''other cities'' had not been ruled out.

He said Bush would leave for Helsinki Friday evening for his third summit meeting with Soviet President Mikhail Gorbachev, being held Sunday.

Talks during the morning, over lunch and then in the afternoon would concentrate on the Gulf crisis, but also include the role of the superpowers in the post-cold war era and a review of conventional arms reduction in Europe.

The aim was to make the summit seal ''an even stronger bond of unified opposition'' to Iraqi President Saddam Hussein. The summit would close with a joint declaration or press conference, Fitzwater said. dpa sc 041922 sep 90

#90247d7210 09/04/1990 ~French/German News Agency

WASHINGTON (SEPT. 4) - A Kuwaiti Army major appealed here Tuesday for advanced weapons to help the outgunned Kuwaiti resistance fight Iraqi occupying forces.

Speaking at a press conference organized by Citizens for a free Kuwait, a group of Kuwaitis, Americans and others opposing the August 2 Iraqi invasion of Kuwait, the official, identified only as Major Sam, said the resistance needed "anti-tank weapons, grenades, electrical devices and communciation systems."

For security reasons, Major Sam, who said he planned to return to Kuwait shortly, was heard but not seen at a press conference which was held under tight security.

The major, said to be in his 30's, asserted that the resistance was inflicting heavy losses on the estimated 160,000 Iraqi troops in Kuwait. The guerrillas are reportedly using car-bombings and attacks on Iraqi convoys.

U.S. President George Bush said last week that he backed the Kuwaiti resistance but refused to comment on reports that U.S. intelligence and Army Special Forces were lending covert support to the Kuwaiti fighters.

The reports said the Central Intelligence Agency was making available maps, special weapons and target-selection advice to the guerrillas while U.S. Green Berets were said to be offering advice but not taking part in paramilitary activities.

The Kuwaitis refused during Tuesday's press conference to discuss any link between Washington and their resistance activities.

"We are successful in our operations because the Iraqis are bogged down in the south facing the (U.S.-led) multinational force" in Saudi Arabia, the Kuwaiti major said, speaking from behind a screen.

"But just imagine if they (the U.S. and allied troops) were not there ... I'm sure that Iraqi troops would like to deal with us the way they dealt with the Iranians. I'm talking about the question of genocide," he said, referring to Iraqi use of chemical weapons during its 1980-1988 war against Iran.

The major said the resistance wanted the U.S. and allied forces to tie down the Iraqis along the Kuwaiti-Saudi border but not to fight "our war" inside Kuwait.

He said the resistance was growing and involved non-Kuwaitis, including Egyptians and Palestinians.

#90247d7310 09/04/1990 ~French/German News Agency

ISLAMABAD (SEPT 4) - Pakistan has decided to close its embassy in Kuwait "temporarily" with immediate effect, the foreign ministry said here Tuesday.

The decision has been taken in view of the "prevailing difficult conditions" but it "is without prejudice to Pakistan's principled position on the invasion and annexation of Kuwait by Iraq," the ministry said.

Pakistan's ambassador will remain in Kuwait along with a skeleton staff to assist with the repatriation of the country's stranded nationals there, it said in a statement.

Six diplomats, including Ambassador Zahid Saeed and 20 staff members are still in Kuwait.

Pakistan, which continues to recognize Kuwait, has sent troops to Saudi Arabia as part of a multinational force there.

An official spokesman said last month that Pakistan would not close its embassy in Kuwait unless it was forced to do so.

There were about 92,000 Pakistani workers in Kuwait and many thousands in Iraq when the emirate was invaded on August 2 by Iraq.

According to officials here about 35,000 have since fled to neighbouring countries from Kuwait and Iraq and 20,000 of them have arrived back home.

-30- 1359

#90247d7370 09/04/1990 ~French/German News Agency

WASHINGTON (SEPT. 4) - U.S. leaders began Tuesday a flurry of diplomatic activity, from the Gulf to Asia via Europe, to tighten the economic knot around Iraq and to broaden the role of U.S. allies.

Treasury Secretary Nicholas Brady was leaving Tuesday for Europe and Asia, traveling to Paris, Tokyo, Seoul and Singapore to persuade friendly nations to cough up funds to help those most affected by the Gulf crisis.

In Asia, the Philippines and India have lost the income of home remittances sent by tens of thousands of their nationals who were working in Kuwait before the Iraqi invasion, while oil imports have dried up.

Pakistan and Bangladesh, two Moslem nations which have agreed to provide troops to help defend Saudi Arabia from a possible Iraqi attack, have been hit in the same way.

Nationals from all four countries who fled Kuwait since the August 2 invasion have lost everything they possessed and are stranded in massive refugee camps along the Iraq-Jordan border while their governments lack the resources to repatriate them.

The refugee situation is also ravaging the Jordanian economy, which is already threatened with devastation because it will lose most of its foreign revenues if it applies fully the U.N. sanctions against Iraq. Jordan too has been seeking international emergency financial assistance.

Another nation bordering Iraq is Turkey which, according to Foreign Minister Ali Bozer, has lost some 4.5 billion dollars in revenue since it shut down a pipeline pumping Iraqi oil to the world markets.

East European nations, already suffering severe financial problems before the Gulf crisis erupted, have found themselves deprived of their main supply of oil and are now being forced to pay hard cash in convertible

currencies to purchase Soviet oil.

And Egypt, a stalwart in the anti-Iraqi coalition, says it stands to lose two billion dollars in one year primarily because of the loss of home remittances by their nationals who had been working in Iraq and Kuwait and the loss of transit fees for ships passing through the Suez Canal.

President George Bush announced Tuesday that he would ask Congress to forgive Egypt's 7.1 billion dollar military debt to the United States in recognition of its role in countering Iraqi aggression.

NEW DELHI (SEPT 4) - At least 13 people were killed and 31 more injured when a powerful bomb believed planted by tribal militants exploded on a bus in eastern India's Assam state Tuesday, the Press Trust of India (PTI) said.

Seven people died instantly and six more died in hospital, officials quoted by PTI said. Thirty-one others were under treatment in hospital for injuries.

The officials blamed the bombing on Bodo tribal militants campaigning for a separate state in part of Assam, PTI said.

The blast on the Assam State Transport Corp. bus occurred as it passed through Rangiya in Assam's Kamrup district on way to Guwahati, the former Assamese capital, PTI said.

ACCRA (SEPT 4) - Ghanaian students Tuesday added their voice to calls for a return to a multy-party system in the West African country, the Ghana News Agency (Gna) reported.

The students, Gna said, insisted that all parties must be funded by the state to ''eliminate the economic interests that make politicians corrupt through trying to recoup monies they have invested in the parties they support''.

Gna quoted the President of the National Union of Ghana Students (Nugs) Daniel Owusu-Nyampong as saying state funding of political parties would also bring ''the weak and marginalised sections of society into the mainstream of political activities''.

The students join the Movement for Freedom and Justice (Mfj), the Kwame

Nkrumah revolutionary guards, the lawyers and the New Democratic Movement in calling for a return to party politics which the government of Jerry Rawlings has strongly argued brings strife, bitterness and corruption.

NEW YORK (SEPT 4) - A warning by Iraqi President Saddam Hussein to all foreigners hiding in Kuwait was censored by Iraqi authorities from an interview he gave last week to U.S. pastor Jesse Jackson, a TV producer said Tuesday.

In the warning, Mr. Hussein said any foreigner hiding from Iraqi forces could be treated as a spy, said Av Westin, executive producer of the series "Inside Editions."

The censured eight-to-10-minute portion of the 90-minute interview was discovered late Monday when the film was being edited. The interview was filmed by an Iraqi television crew and the tapes were given to Mr. Jackson's entourage on Saturday.

Mr. Hussein's "dire threat was that anybody who did not turn themselves in within 10 days would be treated as a spy," said Mr. Westin.

Ken Walker, a former ABC Television reporter who accompanied Mr. Jackson on his interview with the Iraqi president, said Mr. Hussein, however, did not threaten to harm the foreigners.

Iraqi officials set no precondition for the interview nor did they warn that it had been censored when they released the tapes, Mr. Walker added.

Mr. Jackson's interview with Mr. Saddam and with several western hostages in Iraq and Kuwait will be aired during a four-part series beginning Tuesday.

TUNIS (SEPT 4) - A senior PLO official here Tuesday denied he had said in a French newspaper interview that Iraq was now prepared to negotiate a partial withdrawal from Kuwait.

Abu Iyad, the Palestine Liberation Organisation's second-in-command, told Agence France-Presse that he regretted the newspaper had attributed such comments to him.

The newspaper Liberation quoted him as saying Iraqi President Saddam Hussein was ready to negotiate a partial withdrawal from Kuwait but would never allow the exiled Al-Sabah ruling family to return to the emirate.

The PLO is a close ally of Iraq, although it has criticized the Iraqi invasion of Kuwait on August 2.

In Baghdad, the official Iraqi News Agency reasserted Tuesday that "Kuwait is a vital part of Iraqi territory and will remain so for ever," in reaction to the newspaper report.

#90247d7890 09/04/1990 ~French/German News Agency

WASHINGTON (SEPT. 4) - Iraq Tuesday stalled the departure of some 130 Western hostages, including 30 U.S. citizens, destined to leave aboard an Iraqi jet chartered by the United States, the White House said.

At 1600 GMT Tuesday, according to White House spokesman Marlin Fitzwater, the Iraqi authorities had still not given permission for the aircraft to leave and had not provided exit visas to the hostages destined for evacuation.

Mr. Fitzwater maintained the Iraqis were deliberately obstructing U.S. efforts to repatriate U.S. citizens.

"It seems like at every step they try to frustrate our efforts," he said.

In London, the British Foreign Office said that some 40 British subjects had already obtained Iraqi exit visas and were due to board an Iraqi

Airways Boeing 727 for Amman.

Mr. Fitwater said that between 70 and 75 U.S. citizens were detained in Iraq and Kuwait and, following the evacuation of about 100 U.S. citizens over the past few days, there were still some 2,000 U.S. citizens including 1,200 women and children stranded in Kuwait and 350 U.S. citizens stranded in Iraq.

Earlier Tuesday, the Iraqi Foreign Ministry claims that the United States was preventing food shipments from reaching Iraq.

The ministry said Baghdad would not accept responsibility for the resulting hardship suffered by thousands of foreigners, notably Asians.

A ministry spokesman, quoted by the Iraqi news agency, said Washington was "preventing certain countries from sending food to Iraq" and said his government "declined all responsibility for what hundreds of thousands of foreigners, Asians especially, would have to endure."

"Many countries with a great number of nationals in Iraq have expressed a desire to provide Iraq with emergency food supplies for their citizens in order to avert the consequences of the imperialist blockade," the ministry spokesman said.

"The United States, determined to tighten its inhuman blockade on Iraq, has prevented these countries from taking any appropriate measures."

Iraqi Foreign Minister Tareq Aziz on Monday said countries with "large numbers" of citizens in Iraq must make "urgent" provisions to provide food for them.

KUALA LUMPUR (SEPT 4) - Malaysia's gold production fell by around 6.5 percent in June to 200,818 grammes from 214,448 grammes the month before, the Department of Mines said here Tuesday.

The department added that June production of gold as a main product totalled 2,962 grammes while output of gold as a by-product totalled 117,856 grammes, Bernama news agency said.

In comparison, the May figures were 77,406 grammes and 137,042 grammes respectively.

Giving figures for tin production, it said that output of tin concentrates was down to 3,207 tonnes in June from 3,386 tonnes in May while output of tin metal content amounted to 2,417 tonnes in June against 2,556 tonnes

previously.

In June, one tin dredge and 10 gravel pump tin mines were closed, resulting in the number of dredges in operation falling to 26 and the number of gravel pump mines declining to 142, according to the department.

The mining industry employed 14,275 workers in June, down from 14,700 persons in May while those in tin mining fell from 11,235 workers to 10,733 workers.

BANGKOK (SEPT 4) - The Securities Exchange of Thailand (SET) index lost 28.20 points, or 3.2 percent, on Tuesday to close at 873.34 points.

Tuesday's turnover was 3.31 billion baht (132,480 U.S. dollars), down from Monday's turnover of 3.85 billion baht (153,960 dollars).

A total of 45.54 million shares changed hands Tuesday, down by 10.58 million from Monday.

SET officials gave no explanation for the 3.2 percent dip in value.

#90247d7950 09/04/1990 ~French/German News Agency

EAST BERLIN (SEPT. 4) - Some 21 civil right activists marched into the former state security ministry in East Berlin Tuesday demanding to be handed the files that the secret police (Stasi) kept on them during the former communist dictatorship.

West Germany so far has refused to promise that the six million files accumulated by the East German secret police will not be made available to Bonn's own intelligence agencies after reunification.

Representatives of several political factions in East Germany have indicated sympathy with the 21 activists, who are determined to remain holed up on the third floor of the ex-Ministry of State Security in East Berlin's Normannenstrasse.

Members of the group said they feared that the West German authorities would deny them access to their files and thus sabotage their rehabilitation.

#90247d7980 09/04/1990 ~French/German News Agency

WASHINGTON (SEPT. 4) - The U.S. Defense Department is using the massive deployment in the Gulf to test a number of sophsticated weapon systems -- some still in development -- in desert conditions and, perhaps, under fire.

Pilotless spy planes, or Unmanned Aerial Vehicles (UAV), and tactical satellite relay stations are two of the state-of-the-art combat systems that could go through real life tests, defense specialty publications said Tuesday.

Israel has for several years used the UAVs successfully and the Defense Department is asking for four billion dollars in funding between 1991 and 1997 to procure the spy planes, the Armed Forces Journal reported.

UAVs are pilotless aircraft that hover over a target and transmit imagery back to a command station on the ground or ship.

The Pioneers medium-range UAV, which resembles a small private plane, and the Canadian-built helicopter Sentinel UAV that is shaped like a peanut are both deployed on U.S. Navy ships in the region, Defense News reported.

The Marines are also equipped with the Pointer UAV. On the outside it looks like a children's windup plane, but the resemblance stops there. The hand-thrown, battery-powered aircraft is designed to conduct short-range reconnaissance.

Using Pointers to conduct reconnaissance missions would relieve the military of the need to send in more costly and manned planes and helicopters, defense analysts said.

Marines, for the first time, are also equipped with receptors linked to NavStar navigation satellites that can view their own position -- an invaluable system in the desert where sand dunes are perpetually moving.

Also to be tested are M1A1 Abrams main battle tank, the M23 Bradley Infantry Fighting Vehicle, both of which have been tested on European terrain but not in the hot, relentless Saudi desert, Defense News said.

But some members of Congress and Pentagon planners have said operational testing of weapons is unrealistic, with some charging that the Defense Department rigs the tests to ensure good results.

Congress, in the past, has demanded favorable results during the testing of some weapons systems and has threatened to withdraw funding if the weaponry does not meet certain standards.

Some information has already come from troops on the ground who have complained about problems from the fine sand that penetrates everything including the M-60 machine-guns.

Air conditioning in transport vehicles that carry indispensable computers in a modern army are too weak for the desert heat, causing failures in the radar launching system of the Patriot anti-aircraft missile.

Soldiers have been reduced to protecting their radios with damp napkins at regular intervals to protect cables. The heat has also caused breakdowns in fighter plane and combat helicopter viewfinders.

#90247d8020 09/04/1990 ~French/German News Agency

NEW DELHI (SEPT. 4) - At least 10 people were killed after attacks on Hindu religious processions triggered widespread violence in western India's Gujarat state Tuesday, the Press Trust of India (PTI) said.

Rival groups clashed in Gujarat's Baroda, Surat and Anand towns after word spread that unidentified people had thrown stones at Hindu processions marking the end of the 10-day annual Ganesh festival, police told PTI.

An indefinite curfew was imposed on the old walled city area of Baroda, the worst hit, where six people were killed and "many" more were injured, PTI said.

One of the six was killed when police opened fire on a stone-throwing crowd, police quoted by PTI said. The Baroda firing injured one other person.

The agency did not specify the total number hurt or the extent of their injuries.

The police opened fire after using batons and tear gas to try and break up clashes between rival groups, which were not indentified.

A number of houses and shops were set on fire in the incidents, PTI said.

Three people were killed in Anand town when police fired to quell similar riots, police quoted by PTI said.

An unidentified person was stabbed to death in Surat, PTI said, adding that four more were injured in violence there, one of them seriously.

#90247d8030 09/04/1990 ~French/German News Agency

JERUSALEM (SEPT 4) - Prime Minister Yitzhak Shamir said here Tuesday that Israel would leave its options open on a Soviet call for an international conference on the Gulf crisis.

"Although Israel is not an involved party in the Gulf crisis, we do not reject out of hand the idea of an international conference centred on this conflict," he told journalists.

The premier's spokesman, Avi Pazner, added however that Israel was opposed to the convening of an international conference on the Middle East in general,
 opting instead for direct talks with Arab states.

"Whoever wants to resolve the Gulf problem through an international conference, that's his affair, but if the idea is to include Israel in all the problems of the region, our reply is clearly 'no,'" he said.

Soviet Foreign Minister Eduard Shevardnadze said earlier Tuesday that Moscow wanted to "step up pressure for an international conference" as a possible solution to the Gulf crisis.

"Israel's agreement to it being called could exert a great influence on the overall situation in the Middle East and on efforts to defuse the crisis in the Persian Gulf," Mr. Shevardnadze said.

His announcement appeared to be a revival of a long-standing Soviet proposal for an international conference on the troubled region, which has in the past been rejected by Israel and most Western countries.

DAKAR (SEPT. 4) - Senegal is to send troops to Saudi Arabia, President Abdou Diouf said at a cabinet meeting here Tuesday, according to an official statement.

Senegal thus becomes the first black African country to send a contingent to join the U.S.-led multinational force sent to protect Saudi Arabia from possible attack by Iraq following its August 2 invasion of neighboring Kuwait.

Mr. Diouf said Senegal backed the search for a peaceful solution to the Gulf crisis in the framework of U.N. resolutions.

No information was given about the size of the contingent to be sent by the West African country.

PORT OF SPAIN (SEPT 4) - Imam Yasin Abu Bakr, the Black Muslim leader who

led the unsuccessful attempt at a coup d'etat in July, met in Tripoli with Libyan leader Moamer Kadhafi the Trinidad Guardian reported Tuesday in a report which included photos apparently showing the two men in the Libyan capital.

The newspaper said the photos were discovered in Mr. Abu Bakr's house, among items found by police when they raided the house. Mr. Abu Bakr is leader of the Jamaat Al Muslimeen, a Black Muslim group.

The Libyan leader has denied links to the coup attempt by members of the Muslimeen on July 27, said the Guardian.But he admitted meeting Mr. Abu Bakr at an Islamic conference in Libya.

According to the Guardian, the police also seized what were described as false travel documents from Middle Eastern countries.

The report said some Trinidad and Tobago passports were found showing entry stamps for Saudi Arabia.

Videotapes reportedly made in an Arab country, explaining terrorist methods were also discovered,the paper reported.

The Guardian said when police raided the Black Muslim group's commune, they found bombs made with transistor radio batteries, galvanized pipe, and explosives used in quarrying.

Mr. Abu Bakr and 112 members of the group are facing several charges stemming from the coup attempt, including treason and murder.

Twenty-four people, including one member of Parliament, were killed in the uprising when the Muslimeen members stormed Parliament and a television station, holding Prime Minister Ray Robinson and 16 MPs hostage for five days. Mr. Robinson was shot in both legs and has still not resumed duties as prime minister.

#90247d8640 09/04/1990 ~French/German News Agency
JOHANNESBURG (SEPT 4) - Black nationalist leader Nelson Mandela met with Law and Order Minister Adriaan Vlok late on Tuesday to discuss continuing violence in black townships around Johannesburg, state-run radio said.

A fresh outbreak of black-on-black violence in the Sebokeng black township some 60 kilometres (36 miles) south of here left 36 people dead on Tuesday bringing the death toll since violence flared on August 13 to 560.

The clashes saw supporters of the African National Congress (ANC) pitted against Zulu hostel dwellers loyal to Chief Mangosuthu Buthelezi's Inkatha Freedom Party.

No statement was issued after Tuesday's meeting, which took place at an undisclosed venue, the radio added.

#90247d8700 09/04/1990 ~French/German News Agency
HANOI (SEPT 5) - Cambodian Prime Minister Hun Sen asserted Tuesday that Prince Norodom Sihanouk had not been invited to talks this week in Jakarta and urged Indonesia to include the former Cambodian monarch.

Cambodian Ambassador to Hanoi Tep Hen said the premier had sent a letter to Indonesian Foreign Minister Ali Alatas saying, "I still could not understand the reason why your excellency has not invited Prince Sihanouk."

Mr. Hun Sen's letter stressed that the prince is "always president of the CGDK," the resistance government opposed to Mr. Hun Sen's Vietnamese-backed Phnom Penh administration, the ambassador said.

Mr. Hun Sen has refused to attend the informal talks between the rival Cambodian factions planned this week in Jakarta because Prince Sihanouk was not attending.

"Prince Sihanouk has been regarded by many as the key person to all political solution to the Cambodian problem," Mr. Hun Sen's letter said.

"May I request your excellency to reexamine the opportunity to invite him to attend this meeting."

Prince Sihanouk's office in Bangkok issued a statement Tuesday saying "Mr. Hun Sen has no right whatsoever to demand that Norodom Sihanouk be his opposite at the meeting in Jakarta."

Prince Sihanouk's son, Prince Norodom Ranariddh, had yet to decide Tuesday whether to attend the talks in the absence of Mr. Hun Sen, according to his office in Bangkok.

A Phnom Penh delegation led by Hor Nam Hong, a top Hun Sen aide, was expected in Jakarata on Wednesday, when the talks were originally scheduled to start.

BOGOTA (SEPT 4) - A Colombian industrialist was killed along with 12 of his kidnappers this week in a shootout with police during a resuce operation gone awry, authorities said Tuesday.

Julian Echavarria Lince, 46, was killed Monday during a shootout between his kidnappers and would-be rescuers in the heavily forested Magdalena Medio region, an area known for its paramilitary death squads -- some of them financed by Colombian cocaine traffickers.

Mr. Echavarria had been abducted from his ranch northwest of Bogota May 18 along with his 10-year-old stepson by a group of gunmen dressed in military-style uniforms.

The boy was rescued safe.

SAINT-MARCELLIN, FRANCE, (SEPT 4) - A train driver died and 70 passengers were slightly injured Tuesday in a collision between two trains on a single track near this southeastern town, according to the regional police headquarters.

The police said that the victim was the driver of a train going from Saint-Gervais to Nice, which collided with the Catalan-Talgo train travelling from Geneva to Barcelona.

The driver of the Saint-Gervais-Nice train apparently entered his train onto the single track when he should have waited on a side track at the Saint-Marcellin Station for the passage of the Catalan-Talgo, which had the right of way.

The injured passengers, most of them suffering only from bruises, were taken to two hospitals in the area.

In 1985, a train coming from Paris collided with a railcar coming from southern France, killing 31 people and seriously injuring 91.

#90247d8990 09/04/1990 ~French/German News Agency
MEXICO CITY (SEPT 4) - The skeletons of 81 nuns buried some 200 years ago were discovered under the Ministry of Education building, it was reported here Tuesday.

Archeologist Carlos Salas told local newspapers that his excavation team found the bones in a 70-square-meter (750-square-feet) area in what might have been the choir loft of a 18th century Roman Catholic church.

The common grave was located near the city's Metropolitan Cathedral and an ancient temple of the Aztec Indians, who inhabited the region before the Spanish conquistadors arrived in the Western Hemisphere.

The skulls of the skeletons were adorned with copper decorations and were dressed in clothing worn only twice in their lives -- "when they took their vows and when they died," said Mr. Salas.

Artifacts and human remains of various historical epocs have often been discovered in the historic center of Mexico City, site of the ancient Aztec capital Tenochtitlan.

Modern buildings here now sit atop many of the Aztecs' pre-Hispanic temples and edifices.

The archeologists, who began their excavation May 10, also encountered chinaware, gold jewelry, and crucifixes.

The scientists were continuing their dig in search of other artefacts.

OTTAWA (SEPT 4) - The Canadian Embassy in Baghdad has leased an Iraqi aircraft to evacuate Canadian women and children held against their will in Iraq and Iraqi-occupied Kuwait, a government spokesman said Tuesday.

Rejean Tessier, a spokesman for the secretary of state for external affairs, said an Iraqi Boeing 707 would land Thursday in Kuwait to pick up some 150 Canadian women and children.

He said the jet would then fly to Baghdad, where 25 other Canadian mothers and children are to board the plane.

All of the evacuees, who have demanded exit visas from Iraqi authorities, were to land first in Ankara before returning to Canada.

"We don't anticipate there will be delays of individuals. We will see how it goes," said Mr. Tessier.

WASHINGTON (SEPT 4) - Another expeditionary brigade of 2,200 U.S. Marines has arrived in the Gulf, the Defense Department announced Tuesday.

A Pentagon spokesman, Colonel Stuart Wagner, said the 5th Marine Expeditionary Brigade -- based in Okinawa, Japan -- had arrived in the region.

President George Bush ordered thousands of U.S. troops to Saudi Arabia August 7 to deter a possible attack by Iraqi troops, which invaded neighboring Kuwait five days earlier.

Pentagon sources said the department also deployed F-15 and F-16 fighter jets to Oman and the United Arab Emirates, while Bahrain had agreed to permit U.S. F-18 fighter jets, A-6 ground attack planes, and some vertical-takeoff-and-landing jets to land on its territory.

Last week, Qatar indicated it would accept the deployment of U.S. F-16's on its territory.

#90247d9360 09/04/1990 ~French/German News Agency

TAIPEI (SEPT. 5) - Taiwan's foreign trade surplus in the first eight months of 1990 dwindled 15.1 percent from the same period last year to 8.01 billion U.S. dollars, according to government figures released Wednesday.

Exports in the January-August period slid one percent to 44.03 billion dollars, while imports inched up 2.8 percent to 36.02 billion dollars, a report from the Directorate General of Budget, Accounting and Statistics said.

In August alone, the sagging exports declined 1.3 percent from a year earlier to 5.87 billion dollars while imports registered a rare 4.5 percent drop to 4.28 billion dollars, leaving a surplus of 1.59 billion dollars.

Taiwan's trade surplus with the United States, the island's biggest trading partner, slipped 23.9 percent to 6.14 billion dollars out of a two-way trade of 25.21 billion dollars in the first eight months of this year.

The United States accounted for 33.4 percent of Taiwan's overall exports in the first eight months, followed by Japan with 12.3 percent, it added.

The long-standing trade deficit with Japan, Taiwan's largest supplier, rose 11.6 percent to 5.08 billion dollars out of a total bilateral trade of 15.94 billion dollars in the same period.

Japan sold 10.51 billion dollars worth of products to the island in the January-August period, taking a 29.2 percent share of Taiwan's total imports, the report said.

Manila (SEPT. 5) - The death toll has risen to at least 65 in severe flooding in the Philippine capital Manila and surrounding provinces over the past ten days, officials said here Wednesday.

High water destroyed or seriously damaged the homes of around a quarter of a million people, cutting off until Wednesday at least 50 villages in the worst-hit provinces of Pampanga and Tarlac on main Luzon island.

The flood waters unleashed by monsoon rainfall swept away bridges, damaged roads and caused numerous landslides.

The flooding on Luzon island came after a severe earthquake killed at least 1,600 people on July 16.

New Delhi (SEPT. 4) EFE - The Indian government has sent 17 tonnes of foods to Jordan for 1,400 of its citizens housed in refugee camps there since they fled from Iraq, the PTI news agency reported Tuesday.

Quoting a foreign ministry spokesman, PTI said the plane carrying rice, lentils and powdered milk left India Monday for the Jordanian capital of Amman.

The spokesman said the government would also try to send medicines to Jordan via the International Red Cross.

Tens of thousands of foreigners have fled to Jordan from Iraq since Baghdad invaded Kuwait August 2.

Conditions at the refugee camps are said to be dire and the Jordanian government has appealed for international aid to help feed and care for the foreigners until they can be evacuated.

#90247e0024 09/04/1990 ~Latin America New Agency

Buenos Aires (SEPT. 4) EFE - The World Bank is to back up Argentine President Carlos Menem's drastic economic reform program with a dlrs one billion loan, a Buenos Aires newspaper reported Tuesday.

According to the daily El Cronista, government sources have revealed that the loan will be ratified during a visit to Argentina by World Bank vice president Moeen Qureshi on September 15.

The loan will be split into four main parts to bolster Menem's economic reforms begun 14 months ago.

Government sources said that a large part of the loan will go to maintain foreign exchange levels, hopefully avoiding a crisis on the currency markets such as happened throughout last year and early this year.

The credit will also be put towards covering the social cost of the reform program, mainly through the resumption of low-cost housing projects abandoned over the last year.

Provincial authorities will no longer receive state aid in cutting costs, and will be given a final pay-off out of the loan.

Finally, 120,000 state sector layoffs announced last week will be partially funded through the loan.

ROSARIO, ARGENTINA (SEPT. 4) EFE - A police officer in the Argentine city of Rosario has been arrested after a woman he was taking a statement from recognized him as the thief who had robbed her home hours earlier.

"It's him, I'm absolutely sure of it because I got a glimpse of his face when his hood slipped back", Juana Corbo told the police station's chief.

Corbo had turned up for help at her local police station after three robbers burst into her home in Rosario, 300 km northwest of Buenos Aires, and stole jewellery and documents.

Police were able to arrest another one of the robbers thanks to scratches on his face made by Corbo's daughter, Gisella, who had thrown herself on the thieves when they broke into her home.

A police spokesman said they were still searching for the third suspect.

#90247e0026 09/04/1990 ~Latin America New Agency
PAMPLONA, SPAIN (SEPT. 4) EFE - A Spanish woman is ill with cholera after returning from Morocco where authorities have reported an outbreak of the disease, Spanish heath authorities said Tuesday.

A spokesman at Navarra Hospital in Pamplona, 310 km north of Madrid, said the woman was admitted Sunday and that she was recovering and out of danger.

The 32-year-old woman had gone on holiday to Morocco where she reportedly drank from a public fountain. The sometimes fatal disease can be spread by contaminated water.

She returned to Spain last week after suffering the first symptoms in the Moroccan capital of Rabat, the spokesman said.

Moroccan health authorities admit there is an outbreak of cholera in the country but have not disclosed the number of cases.

But on Monday, the Madrid daily El Mundo reported that more than 100 Moroccans had died in the cholera outbreak.

Spanish press reports this week have said that Spanish authorities were taking steps to prevent the disease spreading into Europe as some 300,000 Moroccans returning from holidays in their homeland to Western Europe by road through Spain.

A statement from the Moroccan Health Ministry said preventive measures recommended by the ministry would be sufficient to control the outbreak.

#90247e0029 09/04/1990 ~Latin America New Agency
BARCELONA (SEPT. 4) EFE - Spanish experts said Tuesday they believe that a virus, and not toxic waste, is the mystery killer that has wiped out hundreds of Mediterranean striped dolphins.

But although a vaccine could probably be produced as an antidote, they fear the deep-sea loving dolphins will prove impossible to innoculate.

Alex Aguilar, a biologist at Barcelona University who is also president of the European Society of Cetaceans, said Tuesday that a yet unidentified virus was probably the cause of the epidemic.

He rejected the idea that chemical waste flushed into the sea from factories was killing the marine mammales although post-mortems showed levels as much as 70 times the normal expected in their bodies.

Ferran Costa, a biologist at Barcelona Zoo, said that although it was feasible to make up a vaccine it would be impossible to administer it to the dolphins.

Unlike North Sea seals which were hit by a virus some two years ago, dolphins never come to shore and rarely swim within 10 miles of the coast.

Costa belives the dolphins' only salvation can come from building up their own antibodies to the virus although he added this may come too late to save it from extinction in the Mediterranean.

The team of experts studying the problem, including David Taylor from the British Royal College of Veterinary Surgeons, hopes to catch a live dolphin to speed up their analysis.

So far they have been restricted to studying bodies, some 150 of which have been washed up on Spanish beaches, but fishing authorities in the northeastern region of Catalonia have now sent out patrols to try and catch a live specimen.

On Monday Taylor acknowledged the possibility that the dolphins' immune system had been weakened by dumped chemical waste as the environmental group Greenpeace has charged.

But he said there was not enough evidence to blame the plague on pollution.

He noted that autopsies indicated that the dolphins died from acute liver failure probably caused by a virus or biological toxin.

"So far 200 dead dolphins have been found, but we reckon there may be a thousand more in the Mediterranean," he added.

#90247e0033 09/04/1990 ~Latin America New Agency

Amman (SEPT. 4) EFE - The Gulf state of Qatar has ordered the expulsion of the political attache from the Palestine Liberation Organization's (PLO) embassy, the PLO's ambassador to Jordan said Tuesday.

PLO ambassador Abdel Rajim said that political attache Abdel Shefi Mahmud Sayan had been told to leave Qatar within five days, without any reasons being given, following the expulsion of three other PLO embassy officials last week.

"There is no justifiable reason for such measures except that they are the fruit of the ill-intentioned attitude of these governments,+ said Rajim, referring to the Gulf nations' support for Kuwait following its invasion

by Iraq last month.

"The PLO will not keep quiet and will take the measures necessary to protect the interests of the Palestinian people."

On Monday the PLO said that Qatar was preparing to expel hundreds of Palestinians resident in the emirate because of their support for Iraq.

The residents had been prevented from returning to their jobs after taking their holidays and had been asked to leave the country.

Last week PLO leader Yasser Arafat proposed a five-point plan to solve the Gulf crisis, including the deployment of a pan-Arab force in Kuwait and the withdrawal of non-Arab forces from the Gulf region.

Qatar, however, has supported the arrival of U.S.-led multinational forces sent to ward off further Iraqi aggression and enforce a United Nations trade embargo against Iraq and occupied Kuwait.

#90247e0034 09/04/1990 ~Latin America New Agency

BANGKOK (SEPT 4) EFE - The Khmer Rouge will not attend peace talks in the Indonesian capital of Jakarta, scheduled for Wednesday, unless the Cambodian premier Hun Sen also attends, a Khmer Rouge spokesman said Tuesday.

Hun Sen announced he would not attend the United Nations-backed peace talks unless Prince Norodom Sihanouk was present, who had planned to send an envoy.

As a result Khmer Rouge leader Khieu Samphan said he would not attend, and neither would any other senior Khmer Rouge representative.

The Khmer Rouge is the most powerful of a tri-partite opposition coalition made up of factions led by former monarch Prince Norodom Sihanouk and former prime minister Son Sann.

The rebel coalition has been fighting the Vietnamese-backed government of Hun Sen in an 11-year-long civil war.

Announced last week, the peace plan calls for a cease-fire and the intervention of some 10,000 UN troops to keep the peace until elections could take place,

The plan was initially well received by both Vietnam and Cambodia, as well as the rebel coalition, and all agreed to meet Wednesday to set the terms for a regional power sharing agreement.

Vietnam invaded Cambodia in 1978, putting an end to three years of brutal Chinese-backed Khmer Rouge government in which up to one million people died, almost a seventh of the population.

#90247e0041 09/04/1990 ~Latin America New Agency

WASHINGTON (SEPT 4) EFE - The United States intends to include Iraq in a list of countries which support terrorist acts, a State Department spokesman said Tuesday.

The spokesman, saying a decision was imminent, added that Secretary of State James Baker might make the announcement Tuesday during a congressional meeting on the Gulf crisis.

Iraq was taken off the list in 1982 after distancing itself from Arab terrorist groups in an apparent attempt to gain Western support during the 1980-88 Iran-Iraq war.

But press reports since Baghdad's takeover of Kuwait have said Iraqi President Saddam Hussein has offered protection and other aid to terrorist groups and was preparing terrorist acts in Europe.

Economic sanctions are imposed on other terrorist-branded countries which include Syria, Iran, Libya, North Korea and Cuba.

But the inclusion of Iraq on the list will have little affect, since a U.N.-approved international embargo has already been imposed on that country.

#90247e0042 09/04/1990 ~Latin America New Agency

NICOSIA (SEPT 4) EFE - Iraqi forces have been deploying ballistic missiles near Kuwait city, witnesses leaving the invaded emirate said on Saudi Arabia's Radio Riyadh Tuesday.

The witnesses said the Iraqis had been deploying large, white missiles outside the Kuwaiti capital over the last few days.

According to the radio, monitored in Nicosia, the missiles included the Iraqi-made Al Abbas, Al Hussein and Al Saddam types, which can carry chemical or nuclear heads.

Al Abbas missiles have a range of 900 km while Al Hussein missiles, which were used in the 1980-88 Iran-Iraq war, have a range of 600 km.

The Al Saddam missile is thought to have a 1,200 km range and is similar to the Soviet Scud-B model.

Iraqi President Saddam Hussein invaded and annexed neighbouring Kuwait five weeks ago.

TOKYO (SEPT. 4) XINHUA - VISITING BRAZILIAN FOREIGN MINISTER FRANCISCO REZEK SAID HERE YESTERDAY THAT HIS COUNTRY WOULD NOT EXPORT WEAPONS TO IRAQ UNDER ITS PRESENT LEADERSHIP EVER AFTER U.N. SANCTIONS AGAINST IRAQ ARE LIFTED.

REZEK MADE THE PLEDGE AT A MEETING WITH JAPANESE FOREIGN MINISTER TARO NAKAYAMA, ACCORDING TO JAPANESE GOVERNMENT SOURCES.

BRAZIL WAS A MAJOR SUPPLIER OF CONVENTIONAL ARMS TO IRAQ WHILE IT WAS UNDER MILITARY RULE FROM 1964 TO 1985, REZEK SAID, ADDING THAT ALL TRADE IN WEAPONS BETWEEN THE TWO COUNTRIES WAS SUSPENDED ONE AND HALF YEARS AGO.

REZEK ARRIVED HERE ON SUNDAY FOR A THREE-DAY VISIT.

ISLAMABAD (SEPT. 4) XINHUA - THE INTERNATIONAL MONETARY FUND (IMF) HAS THREATENED TO STOP ASSISTANCE TO PAKISTAN IF IT DOES NOT RAISE OIL PRICES TO THE INTERNATIONAL LEVEL.

ACCORDING TO LOCAL PRESS REPORTS TODAY, THE WARNING WAS CONVEYED BY FINANCE MINISTER SARTAJ AZIZ TO THE CARETAKER GOVERNMENT OF PAKISTAN AT A CABINET MEETING ON MONDAY.

THE REPORTS SAID THAT THE IMF HAS WARNED PAKISTAN AGAINST BREACHING ITS AGREEMENT WITH THE FUND TO RAISE OIL PRICES, OTHERWISE IT WILL STOP THE DISBURSEMENT OF ITS PROMISED FINANCIAL ASSISTANCE WHICH THE COUNTRY BADLY NEEDS TO COVER THE ADDITIONAL BALANCE OF PAYMENTS GAP OF ONE BILLION DOLLARS.

SARTAJ AZIZ HAS REPORTEDLY SUGGESTED A 33.6 PERCENT INCREASE IN OIL PRICES TO RECOVER THE ADDITIONAL COST IN THE CURRENT FISCAL YEAR. THE IMF HAS DIRECTED PAKISTAN TO WORK WITH AN AVERAGE PRICE OF 24 DOLLARS A BARREL AGAINST 17 DOLLARS A BARREL AS WAS ESTIMATED AT THE TIME OF FORMULATION OF THE CURRENT YEAR'S BUDGET.

ACCORDING TO OFFICIAL FIGURES, PAKISTAN WILL LOSE ONE BILLION U.S. DOLLARS THIS YEAR, IF THE GULF CRISIS CONTINUES, FROM THE RISE OF OIL PRICES AND THE SHARP DROP OF REMITTANCES FROM THE REGION.

THE CABINET REVIEWED THE SITUATION IN DETAIL, BUT DEFERRED A FINAL DECISION ON THIS ACCOUNT AS THE MAJORITY OF MINISTERS DID NOT FAVOR ANY IMMEDIATE RISE IN OIL PRICES, FEARING ADVERSE PUBLIC REACTION WILL AFFECT THE FORTHCOMING GENERAL ELECTIONS.

LONDON (SEPT. 4) XINHUA - A MOTION ON EMPLOYMENT LAW RESTRICTING RIGHT OF STRIKE HAS BEEN PASSED BY A MAJORITY AT THE ANNUAL CONFERENCE OF THE BRITISH TRADES UNION CONGRESS (TUC).

THE MOTION, WHICH WAS IN LINE WITH THE OPPOSITION LABOR PARTY'S POLICY, WAS "DESIGNED TO RESTORE A REASONABLE BALANCE BETWEEN EMPLOYERS AND EMPLOYEES."

UNDER THE NEW POLICY ADOPTED ON MONDAY, PICKETING WOULD BE LIMITED, BALLOTS REQUIRED BEFORE A STRIKE AND UNION OFFICIALS SUBJECT TO ELECTION.

SYMPATHETIC INDUSTRIAL ACTION WOULD BE ALSO LIMITED TO INSTANCES WHERE THERE IS A DIRECT INTEREST BETWEEN TWO GROUPS OF WORKERS.

THE CONFERENCE WANTED WORKERS AND UNIONS IN U.K. TO ENJOY NO LESS RESPECT FROM THE GOVERNMENT THAN THEIR COLLEAGUES AND FRATERNAL ORGANIZATIONS IN OTHER EUROPEAN COMMUNITY (EC) COUNTRIES.

THE TUC LOOKS FORWARD "TO AN END TO CONFRONTAION BETWEEN GOVERNMENT AND UNIONS AS A BASIS OF BUILDING ON THE EUROPEAN SOCIAL CHARTER."

"THIS COULD ONLY BENEFIT THE ECONOMY AND SOCIETY," THE RESOLUTION SAID. THE DECISION WAS REGARDED AS AN HISTORIC OPTION AND AN ESSENTIAL INGREDIENT TO A POSSIBLE LABOR ELECTION VICTORY.

THE CONFERENCE REJECTED A LEFT WING COUNTER-PROPOSAL, WHICH SOME UNION LEADERS BELIEVED COULD MAKE LABOR UNELECTABLE.

CAIRO (SEPT. 4) XINHUA - EGYPT SENT TROOPS TO THE UNITED ARAB EMIRATES TODAY TO HELP DEFEND "ANY OUTSIDE AGGRESSION," THE MIDDLE EAST NEWS AGENCY (MENA) SAID.

THE EGYPTIAN FORCES WERE SENT TO THE UAE TO "REINFORCE ITS DEFENSE CAPABILITIES AGAINST ANY OUTSIDE AGGRESSION" AND WILL "SERVE UNDER THE UAE COMMAND," MENA REPORTED, WITHOUT SPECIFYING THE SIZE AND TYPES OF THE FORCES.

A MILITARY SOURCE, HOWEVER, SAID 350 EGYPTIAN TROOPS OF VARIOUS TYPES WERE FLOWN THERE.

THE UAE IS THE SECOND COUNTRY AFTER SAUDI ARABIA TO ALLOW FOREIGN AND ARAB FORCES TO STAY ON ITS TERRITORY. OTHER GULF STATES, INCLUDING BAHRAIN, QATAR AND OMAN, HAVE AGREED TO PROVIDE MILITARY FACILITIES TO FOREIGN TROOPS OR PERMITTED MILITARY DEPLOYMENT ON THEIR LANDS.

EGYPT HAS REPORTEDLY SENT ABOUT 4,000 TROOPS TO SAUDI ARABIA TO JOIN AN ARAB FORCE IN LINE WITH THE AUGUST 10 ARAB SUMMIT RESOLUTIONS TO HELP DEFEND THE KINGDOM AGAINST POSSIBLE ATTACKS FROM THE OUTSIDE.

SYRIA AND MOROCCO ALSO HAVE CONTRIBUTED TO THE ARAB FORCE IN THE GULF.

THE SUMMIT RESOLUTIONS, ADOPTED BY 12 OF THE 21 ARAB LEAGUE COUNTRIES, SANCTIONED DISPATCH OF A JOINT FORCE FROM MEMBER STATES TO DEFEND THE GULF COUNTRIES FROM POSSIBLE ATTACKS FROM IRAQ WHICH INVADED KUWAIT ON AUGUST 2 AND ANNEXED IT SIX DAYS LATER.

SINGAPORE (SEPT. 4) KYODO - THE GOVERNMENT HAS REJECTED JAPANESE RETAILER SOGO CO.,'S PROPOSAL TO BUILD A 500-ROOM HOTEL IN SINGAPORE'S ORCHARD ROAD SHOPPING DISTRICT BECAUSE OF ENVIRONMENTAL CONCERNS, A MAJOR FINANCIAL DAILY REPORTED TUESDAY.

SOGO, WHICH BOUGHT A SHOPPING COMPLEX AND LAND BEHIND IT FOR A RECORD 690 MILLION SINGAPORE DOLLARS LAST NOVEMBER, HAD PLANNED TO BUILD A HOTEL ON THE LAND, WHICH IS BEHIND ORCHARD ROAD.

THE GOVERNMENT, HOWEVER, WANTS THE AREA BEHIND ORCHARD ROAD TO BE USED STRICTLY FOR RESIDENTIAL PURPOSES.

THE BUSINESS TIMES SAID SOGO'S APPLICATION TO BUILD THE HOTEL HAD FIRST BEEN TURNED DOWN BY THE URBAN REDEVELOPMENT AUTHORITY ON THE GROUNDS THAT IT ''WANTED TO MINIMIZE THE NEGATIVE IMPACT ON THE NEIGHBORHOOD.'' SOGO APPEALED TO THE MINISTRY OF NATIONAL DEVELOPMENT.

THE MINISTRY HAS INDICATED IT WOULD GRANT APPROVAL IF SOGO BUILT APARTMENTS INSTEAD OF A HOTEL, ACCORDING TO THE DAILY.

TOKYO (SEPT. 4) KYODO - JAPAN'S RULING LIBERAL DEMOCRATIC PARTY (LDP) DECIDED TUESDAY TO PRESENT PERU WITH A FLEET OF 120 TRUCKS FOR TRANSPORT OF RELIEF GOODS TO DROUGHT-HIT AREAS.

THE 300 MILLION YEN GIFT WAS DECIDED IN LINE WITH REQUESTS MADE BY PERUVIAN PRESIDENT ALBERTO FUJIMORI.

LDP SECRETARY GENERAL ICHIRO OZAWA SAID HE TELEPHONED FUJIMORI THE SAME DAY TO INFORM HIM OF THE GIFT.

FUJIMORI, WHO WAS SWORN IN AS PRESIDENT OF PERU ON JULY 28 TO BECOME THE

FIRST NATIONAL LEADER OF JAPANESE DESCENT OVERSEAS, COMPLAINED OF A SHORTAGE OF TRUCKS TO CARRY AID MATERIALS TO DROUGHT-RAVAGED AREAS OF HIS COUNTRY AND ASKED FOR JAPANESE HELP WHEN HE VISITED JAPAN IN EARLY JULY.

THE LDP DECIDED TO RESPOND TO THE REQUEST FOR TRUCKS AS A SEPARATE MEASURE TO 4 MILLION U.S. DOLLARS IN ASSISTANCE THE JAPANESE GOVERNMENT PLEDGED JULY 27 TO HELP EASE DAMAGE CAUSED BY THE DROUGHT, OZAWA SAID.

DELIVERY OF THE TRUCKS, ALL OF ONE TO THREE TONS, WILL BEGIN SEPTEMBER 10.

OZAWA SAID FUJIMORI THANKED THE LDP FOR THE NEW OFFER ON THE TELEPHONE TUESDAY AND ASKED FOR COOPERATION IN FUTURE ASSISTANCE.

THE LDP HOPES TO SEND USED CARS TO PERU IF THE NEED ARISES IN FUTURE, OZAWA SAID.

TOKYO (SEPT. 4) KYODO - JAPAN'S TWO AUTO GIANTS ARE SEEKING HELP FROM EACH OTHER IN AUTO PARTS SUPPLY AS A COST REDUCTION EFFORT AMID THE INCREASING RIVALRY AMONG AUTOMAKERS AT HOME AND OVERSEAS, INDUSTRY SOURCES SAID TUESDAY.

TOYOTA MOTOR CORP. IS MOVING TO PURCHASE AUTO PARTS FROM AN AFFILIATE OF ITS ARCHRIVAL NISSAN MOTOR CO. FOR ITS PLANNED PLANT IN FUKUOKA, WHILE NISSAN PLANS TO ENTER A CONTRACT WITH NIPPON DENSO CO., A MAJOR ELECTRONIC AND ELECTRICAL PARTS MAKER AFFILIATED WITH TOYOTA, THE SOURCES SAID.

THE MOVE, THE FIRST SUCH COOPERATION BETWEEN THE TWO COMPANIES, IS EXPECTED TO BRING ABOUT A CRITICAL CHANGE IN JAPAN'S BUSINESS GROUPINGS, A MAJOR PROBLEM IN JAPAN-U.S. NEGOTIATIONS CONCLUDED IN LATE JUNE AIMED AT REMOVING BARRIERS TO TRADE AND INVESTMENT IN BOTH NATIONS.

THE SOURCES SAID NISSAN PLANS TO BUY FUEL PUMPS FROM ASSOCIATED FUEL PUMP SYSTEMS, A SOUTH CAROLINA-BASED JOINT VENTURE BETWEEN NIPPON DENSO AND BOSCH OF WEST GERMANY.

THE FUEL PUMPS WILL BE USED IN ELECTRONIC FUEL INJECTION EQUIPMENT OF SENTRA CARS PRODUCED BY NISSAN'S U.S. MANUFACTURING BASE, NISSAN MOTOR MANUFACTURING CORP. U.S.A.

TOYOTA, MEANWHILE, IS STUDYING THE POSSIBILITY OF PARTS SUPPLY FROM NISSAN GROUP'S AUTO PARTS MAKERS FOR ITS NEW FUKUOKA PLANT, EXPECTED TO BEGIN OPERATION IN 1993, ACCORDING TO THE SOURCES.

#90247k0087 09/04/1990 ~Japanese News Agency

SUBSIDIARY IN LONDON TO STEP UP ITS FUND INVESTMENT IN EUROPE.
THE EUROPEAN UNIT, FUKOKU LIFE INTERNATIONAL (U.K.) LTD., WILL BE CAPITALIZED AT 2 MILLION POUNDS, FUKOKU OFFICIALS SAID.

FUKOKU WILL ALSO SET UP ANOTHER FINANCIAL CONCERN, FUKOKU SEIMEI JERSEY LTD., ON JERSEY ISLAND, KNOWN AS A TAX HAVEN, IN THE ENGLISH CHANNEL.

THE COMPANY WILL TRADE IN SECURITIES IN THE EUROPEAN CURRENCY UNIT (ECU) THROUGH FUKOKU LIFE INTERNATIONAL, THE OFFICIALS SAID.

THE SCALE OF INVESTMENT TO BE HANDLED BY THE FIRM IS ESTIMATED AT AROUND 40 MILLION ECUS.

FUKOKU IS THE FIRST JAPANESE INSURANCE COMPANY TO TRADE IN ECU-DENOMINATED FINANCIAL ASSETS USING A WHOLLY OWNED SUBSIDIARY OVERSEAS, THEY SAID.

-30- 964

#90247k0088 09/04/1990 ~Japanese News Agency

OSAKA (SEPT. 4) KYODO - SAKAI IRON WORKS CO. OF OSAKA PREFECTURE SAID TUESDAY IT HAS CONCLUDED A COMPREHENSIVE BUSINESS AND TECHNOLOGICAL TIE-UP WITH AN INDONESIAN STATE-RUN ENTERPRISE, P.T. AMARTA KARYA.

UNDER THE ACCORD, THE MEDIUM-SCALE JAPANESE MAKER OF STEEL PIPES FOR THE ELECTRIC POWER INDUSTRY WILL WORK WITH THE JAKARTA-BASED ENTERPRISE TO SECURE ORDERS IN INDONESIA FOR STEEL PIPES AND TOWERS FOR HYDROELECTRIC AND IRRIGATION FACILITIES, SAKAI OFFICIALS SAID.

P.T. AMARTA KARYA IS INDONESIA'S THIRD LARGEST MANUFACTURER OF STEEL STRUCTURES, WITH SALES TOTALING ABOUT 1,360 MILLION YEN IN FISCAL 1988, THE OFFICIALS SAID.

THE JAPANESE FIRM HAD RECEIVED ORDERS FROM INDONESIA ALMOST ANNUALLY FROM 1969 TO 1981, WHEN THE APPRECIATION OF THE JAPANESE YEN IN EXCHANGE MARKETS REDUCED THE COMPANY'S COMPETITIVENESS.

BUT IN JULY LAST YEAR, SAKAI IRON WORKS AND THE INDONESIAN ENTERPRISE JOINTLY WON AN ORDER IN INDONESIA FOR WATER PIPES, LEADING TO THE BUSINESS AFFILIATION, THE OFFICIALS SAID.

#90247k0098 09/04/1990 ~Japanese News Agency

TOKYO (SEPT. 4) KYODO - A JAPANESE BANKING INDUSTRY LEADER SAID TUESDAY HE THINKS THE PRESENT FORMULA USED TO SET THE SHORT-TERM PRIME LENDING RATE SHOULD BE REVISED TO BETTER REFLECT MARKET RATES.

TAIZO HASHIDA, CHAIRMAN OF THE FEDERATION OF BANKERS ASSOCIATION OF JAPAN, MADE THE SUGGESTION AT A REGULAR PRESS CONFERENCE.

HASHIDA SAID WHEN THE CURRENT FORMULA WAS DEVISED, 30 TO 40 PERCENT OF FUNDS RAISED BY MAJOR JAPANESE BANKS WERE THROUGH DEPOSITS WITH GOVERNMENT REGULATED INTEREST RATES.

BUT THE PROPORTION HAS NOW DECREASED TO ABOUT 20 PERCENT, HE POINTED OUT.

IN VIEW OF THE CHANGES IN FUND-RAISING METHODS AND FINANCIAL DEREGULATION, HASHIDA SAID THE FORMULA TO DETERMINE THE SHORT-TERM PRIME RATE WOULD HAVE TO BE REVISED.

THE SHORT-TERM PRIME RATE, WHICH IS OFFERED TO THE MOST CREDITWORTHY CUSTOMERS, IS CURRENTLY DECIDED AT THE DISCRETION OF INDIVIDUAL BANKS. BANKS BASE THEIR RATES ON THE COST OF RAISING FUNDS, AMOUNT OF FUNDS RAISED FROM FIXED RATE-BEARING FINANCIAL INSTRUMENTS, AND THE OFFICIAL DISCOUNT RATE SET BY THE BANK OF JAPAN.

THE OFFICIAL DISCOUNT RATE WAS RAISED BY 0.75 PERCENTAGE POINT LAST THURSDAY TO 6.00 PERCENT.

HASHIDA, PRESIDENT OF FUJI BANK, ALSO STRESSED THE NEED TO OVERHAUL THE CURRENT BANK COMMISSION FEE SYSTEM.

-30- 1461

NAGOYA (SEPT. 4) KYODO - INAX CORP., THE BIGGEST TILE MAKER IN JAPAN, SAID TUESDAY IT WILL LAUNCH EXPORTS OF ITS TILES TO EUROPE, WITH AN EYE TO THE PLANNED MARKET INTEGRATION IN WEST EUROPE IN 1992 AND ECONOMIC REFORMS IN EASTERN EUROPE.

THE MOVE REFLECTS THE COMPANY'S DESIRE TO BOOST ITS PRESENCE IN THE EUROPEAN MARKET TO CASH IN ON THE GREATER DEMAND FOR TILES EXPECTED FROM DRAMATIC CHANGES IN THE ECONOMIC SITUATION NOW UNDER WAY IN THE REGION.

AS PART OF ITS NEW EUROPEAN STRATEGY, INAX BOUGHT A STAKE IN A WEST GERMAN TILE PRODUCER GAIL LAST YEAR AND HAS ESTABLISHED A DESIGN AWARD FOR EUROPEAN CERAMICS DESIGNERS.

SO FAR, EXPORTS BY THE COMPANY HAVE BEEN SLOW, ACCOUNTING FOR ONLY 1 PERCENT OF ITS TOTAL SALES.

INAX SAID THE PLAN PROMISES BIG CHANGES FOR THE COMPANY. IT HAS ALREADY WON ORDERS FROM WEST GERMANY AND SWITZERLAND, AND HAS RECEIVED INQUIRIES FROM THE NETHERLANDS AND FRANCE.

TOKYO (SEPT. 4) KYODO - JAPAN AND THE SOVIET UNION ARE PREPARING TO JOINTLY SET UP A PRIVATE ART AND ENGINEERING UNIVERSITY IN THE SUBURBS OF MOSCOW, A JAPANESE PARLIAMENTARIAN SAID TUESDAY.

TOSHIO YAMAGUCHI, A DIET MEMBER OF THE RULING LIBERAL DEMOCRTATIC PARTY, SAID THE SOVIET UNION PLANS TO OPEN THE UNIVERSITY NEXT SPRING.

SUCH A PRIVATE UNIVERSITY WILL BE THE FIRST IN EASTERN EUROPE AND THE

SOVIET UNION, YAMAGUCHI SAID.

YAMAGUCHI ALSO SAID THE PLAN CAME UP WHEN JAPAN'S FORMER FOREIGN MINISTER SHINTARO ABE VISITED MOSCOW IN JANUARY. YAMAGUCHI SAID HE HAD ALREADY AGREED IN PRINCIPLE ON THE ESTABLISHMENT OF THE UNIVERSITY WITH ONE OF PRESIDENT MIKHAIL GORBACHEV'S AIDES.

ACCORDING TO THE PLAN, THE FOUR-YEAR UNIVERSITY WILL BE COMPRISED OF TWO DEPARTMENTS FEATURING ENGINEERING AND ECONOMICS FOR SOVIET AND EAST EUROPEAN STUDENTS. THERE WILL ALSO BE A DEPARTMENT FOR JAPANESE WHO WISH TO STUDY ARTS SUCH AS SOVIET CLASSICAL BALLET. IT WILL ALSO BE ATTACHED TO A TWO-YEAR COLLEGE FOR THE ARTS.

YAMAGUCHI SAID SOVIET AND EAST EUROPEAN STUDENTS WILL RECEIVE PRACTICAL TRAINING AT COMPANIES IN JAPAN FOR ABOUT SIX MONTHS.

#90247k0116 09/04/1990 ~Japanese News Agency

TOKYO (SEPT. 4) KYODO - THE AGENCY OF NATURAL RESOURCES AND ENERGY HAS DECIDED AGAINST REQUIRING OIL SUPPLIERS TO CHANGE THEIR ACCOUNTING SYSTEM FOR OIL STOCKS IN ORDER TO REGULATE PRICE INCREASES, AGENCY SOURCES SAID TUESDAY.

THE AGENCY INSTEAD WILL ALLOW OIL COMPANIES TO USE THEIR CURRENT COST-ACCOUNTING METHODS AND IMMEDIATELY REFLECT HIGHER CRUDE OIL PRICES STEMMING FROM THE PERSIAN GULF CRISIS, THE SOURCES SAID.

A PROPOSAL BY THE AGENCY AT A RECENT CABINET MEETING THAT OIL COMPANIES SWITCH FROM THE LAST-IN, FIRST-OUT (LIFO) COST ACCOUNTING METHOD TO A TOTAL-AVERAGE SYSTEM DREW SHARP CRITICISM FROM THE NATION'S OIL SECTOR.

ALTHOUGH THE AGENCY HAS DECIDED TO ALLOW THE FREE MARKET TO SET THE PRICE OF OIL PRODUCTS, IT WILL SPELL OUT MEASURES THE AGENCY CAN TAKE IF PRICE GOUGING OCCURS, THE SOURCES SAID.

UNDER THE LIFO COST-ACCOUNTING SYSTEM, THE LATEST STOCK PURCHASED IS SOLD AT THE CURRENT MARKET PRICE BEFORE OLD STOCK IS CLEARED. OIL COMPANIES PREFER THE LIFO BECAUSE IT ALLOWS THEM TO RESPOND IMMEDIATELY TO PRICE FLUCTUATIONS AND AVOID HEAVY LOSSES THAT COULD RESULT DURING PRICE WARS.

''THE PRICES OF OIL PRODUCTS, LIKE THOSE OF OTHER PRODUCTS, SHOULD BE DETERMINED THROUGH THE FREE MARKET MECHANISM,'' SAID ONE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY OFFICIAL.

''IF WE PERMIT A GRADUAL RAISE OF PRICES TO AVOID SHARP INCREASES, THAT COULD TRIGGER A STAMPEDE TO BUY WHILE THE PRODUCTS ARE CHEAP,'' HE ADDED.

INDUSTRY SOURCES SAID THE DECISION IS EXPECTED TO RESULT IN A 10 YEN PER LITER PRICE INCREASE AT THE NATION'S GASOLINE PUMPS IN AN AFTER THE MIDDLE OF THIS MONTH.

THE AGENCY WILL REACH A FORMAL DECISION ON THE COST-ACCOUNTING POLICY WITHIN THE NEXT FEW DAYS.

JAPANESE OIL COMPANIES WERE UPSET BY REPORTS THAT MINISTER OF INTERNATIONAL TRADE AND INDUSTRY KABUN MUTO PROMISE TO CONSIDER REVISIONS IN THE WAY THEY CALCULATE PRICES.

THEIR ANGER WAS PARTLY BASED ON THE FACT THAT THE GOVERNMENT INSTRUCTED THEM TO SWITCH TO THE CURRENT LIFO METHOD WHEN THE WORLD OIL MARKET STARTED EASING AROUND 1986.

AN OFFICIAL OF THE PETROLEUM ASSOCIATION OF JAPAN SAID, ''THE GOVERNMENT TOLD US CHANGE THE ACCOUNTING METHOD WHEN OIL PRICES DROPPED, AND NOW THEY SAY WE SHOULD ADOPT ANOTHER SYSTEM. WE CAN NOT MANAGE AN OIL COMPANY UNDER SUCH AN INCONSISTENT POLICY.''

''AS THE PRICES OF THE AUGUST SHIPMENTS OF CRUDE OIL FROM THE GULF HAVE ALREADY BEEN RAISED BY ABOUT 10 DOLLARS PER BARREL, WE WILL SUFFER MASSIVE LOSSES UNLESS WE BOOST THE PRICES OF OUR PRODUCTS IMMEDIATELY, A TOP OFFICIAL OF A MAJOR JAPANESE OIL SUPPLIER SAID.

AS A PRECAUTIONARY MEASURE, HOWEVER, THE AGENCY WILL REQUIRE OIL SUPPLIERS TO REPORT COSTS FOR PURCHASING CRUDE OIL EVERY MONTH AS A WAY TO IMPOSE DISCIPLINE ON THE INDUSTRY, AGENCY SOURCES SAID.

''WE CAN NOT HELP TAKING A CAUTIOUS STANCE TOWARD REQUIRING CHANGES OF THE ACCOUNTING SYSTEM'' BECAUSE THAT MIGHT FORCE OIL COMPANIES TO LOOK FOR A WAY AROUND GOVERNMENT-IMPOSED PRICE REGULATIONS, AN AGENCY OFFICIAL SAID.

REGARDING THE USE OF THE NATION'S OIL RESERVES TO HOLD DOWN PRICES, THE OFFICIAL SAID, ''SINCE THE NATIONAL RESERVES ALREADY COST 30 DOLLARS PER BARREL, PUTTING THEM INTO USE WOULD NOT MAKE ANY CONTRIBUTION TO PUTTING A CAP ON PRICES.''

''WE CAN CONTAIN INFLATION COMPLETELY ONLY IF WE USE THE RESERVES IN THE PRIVATE SECTOR ON THE PREMISE THAT WE WILL BUY NO ADDITIONAL OIL FOR A CERTAIN PERIOD OF TIME, WHILE USING UP THE ENTIRE OIL RESERVE,'' HE SAID.

''BUT IN REALITY, WE WILL HAVE TO KEEP BUYING OIL EVEN IF PRICES ARE QUITE HIGH TO RETAIN THE LEVEL OF THE RESERVES,'' HE ADDED.

U.S. bonds lose nearly half a point, yields move back up above nine percent. ... Crude oil is nearly $1.50 higher than Friday's New York close. ... ASIANA AIRLINES of South Korea has ordered 27 BOEING jets and taken options on 24 more in a deal worth as much as $6 billion. ... Ireland's GPA GROUP leasing company says it has ordered 13 McDONNELL DOUGLAS MD-11 jets and options on an additional 12, worth up to $2.5 billion. ... NORTHWEST AIRLINES says it will go ahead with plans to buy 75 Airbus A320 jets and option an additional 30 in a deal valued at up to $4.6 billion. ... CBS executive LAURENCE TISCH and his brother disclose they acquired sizeable stakes in three bank-holding companies: BAY BANKS of Boston, EQUIMARK of Pittsburgh and CONTINENTAL of Chicago. management and marketing software.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT is scheduled to release July construction spending figures at 10 a.m. EDT. ... The LABOR DEPARTMENT will release its 2nd quarter productivity report at 10 a.m. EDT. ... The purchasing managers' index is due out sometime today. ... IBM will introduce its first new generation of mainframes in more than five years. ... CHRYSLER plans to extend its cost cutting efforts by $1 billion more than previously announced, raising its goal to $2.5 billion.

FROM THE BULLS:

A prolonged Mideast stalemate would be bullish to JAMES AWAD, president of BMI CAPITAL. "Once we get over the shock of the Mideast and people learn to live with it, I think investors will send stock prices gradually higher " says Awad who believes the economy is weak but not recessionary. Oil will cause general price levels to move a little bit higher, "but we do not have an inflationary psychology in the economy." Awad thinks the values are in the secondary and OTC stocks. "Historically, whenever you have bought stocks during a period of financial panic, when you look back six months later you have made a lot of money." (CNN "Business Day", 9/4)

FROM THE BEARS:

"We are in a bear market," says ROBERT WYAND II, president of STRATEGIC PORTFOLIO MANAGEMENT. "We don't know how long it will last or how low stock prices will go." ("USA Today", 9/4)

"Really, this is not a new bear cycle that began in July and accelerated in August," says RICHARD McCABE of MERRILL LYNCH. "It's a bear cycle that for many stocks is already a year old." He says bear markets usually last about a year. "I think we're pretty well along on it, and it could last until the fourth quarter [of 1990] or the first quarter [of 1991]." ("The Washington Post", 9/3)

"We're still in a bear trend, and it gets a little tricky down here because it's obvious to everybody it's a bear trend and they get a little too aggressive on the short side," says MICHAEL JENKINS, editor and publisher of "Stock Cycles Forecast." (CNBC "Market Wrap- Up", 8/31)

STOCK MARKET:

Stocks could give back all of Friday's gains on today's opening, says MICHAEL BENSON of LEHMAN BROTHERS INTERNATIONAL in London where U.S. stocks are trading lower. Benson says stocks went up because Friday was the last day of the month. "The papers over the weekend were full of doom and gloom. No one really sees the market going anywhere." Benson looks for support around 2580; if that fails to hold, the next support level would be twenty points lower at 2560. (FNN "World Business Update", 9/4)

"At a minimum, you've got to say that the bull market has been interrupted both because of general economic uncertainty and inflationary uncertainty related to oil," says PETER CANELO of BEAR STEARNS & CO. "If there is an outbreak of fighting, a shooting war, we could see the market fall to 2250 or 2300. I think that would be a major low and a buying opportunity." ("The Washington Post", 9/2)

EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT says the "underlying tone" of the market "is becoming more constructive," but he still does not expect any significant recovery. "My feeling is the market will begin to set up a basing formation between Dow 2690, where there's a lot of resistance, and the low 2500s," says Peroni. He believes we are in the midst of a bear market, but only a short-lived one which should last from three to five weeks. ("Investor's Daily", 9/4)

"The market's reaction to the Mideast has been so severe because of the fear that it would make a weak profit situation worse," says JOSEPH McALINDEN, director of research at DILLON READ. "Any company bucking that trend would be a buy candidate." (WSJ, 9/4)

MARTIN ZWEIG says he is worried - "as usual." But he says he respects the fact that the market could go up. "The news in the Mideast could clear up to the good side and if it does, I think we could rally maybe 200 points [on the Dow]. But if everything bad, that I worry about, comes into effect, we could go down a lot more than that." ("Wall Street Week", 8/31)

MARY FARRELL agrees with those who say the stock market is being held hostage to the Mideast situation and says that the market "has had a much greater reaction to that than any other global crisis we have had in the last 50 years - including Pearl Harbor, including the Cuban missile crisis - and I think that suggests there are some more underlying concerns - namely the economy [and] corporate earnings that are keeping the market down." She recommends that investors "pull in your horns here and be very defensive" by looking at drug and beverage stocks. ("Wall Street Week", 8/31)

"This market could turn quite quickly," says JAY GERKEN, portfolio manager at SHEARSON LEHMAN BROTHERS. "The Persian Gulf situation ... is clearly dominating the market, but that can turn very quickly, so I don't think it is prudent to be entirely out of the market." (CNBC "Market Wrap-Up", 8/31)

Friday's "modest volume reflects that it's the final trading day before a long holiday weekend and that there's no new news out of the Middle East," says McDONALD & CO. SECURITIES' BRADLEY TURNER. He says as the Middle East crisis continues, the resulting higher oil prices may have a more significant impact on the market by weakening the economy. "It's probably premature at this point to make any major cuts in earnings estimates," says Turner, but if the crisis "lasts beyond another month, we'll start to see some downward revisions." ("Investor's Daily", 9/4)

STOCK TIPS:

SMITHKLINE BEECHAM is featured in this week's "Barron's." The magazine says the company "is hardly free of problems" just over a year after it was merged. However, it says a strong second-quarter earnings report issued last month was among the signs that the merger is "beginning to bear fruit." The article says that "recession or not, SMITHKLINE should post higher earnings, not only this year, but next year as well." It projects $3.50 a share this year and $4.25 next year. ("Barron's", 9/3)

PETER TAUPE, senior executive vice president at LEHMAN BROTHERS, thinks the energy stocks "are still attractive here." He notes that oil stocks were selling at the same levels they are now before the outbreak of trouble in the Middle East even though oil prices have gone from $16 a barrel to $27 a barrel. "That is going to reflect in their earnings and we think that the oil stocks are the place to be." He says oil service stocks could be good buys if oil prices settle in the "mid-20s." ("Wall Street Week", 8/31)

JOHN TAUER JR., manager of PIPER'S VALUE FUND, likes ST. JUDE MEDICAL INC. the leading maker of mechanical heart valves. He reasons that a slow economy might hurt some companies like airlines, "but if you need a heart

valve, you don't wait until the economy rebounds." ("Barron's", 9/3)

The Mideast turmoil "could be the watershed event that could lead to Americans realizing the importance of ethanol," says CLINTON MAYER III, an analyst at BEAR STEARNS in New York. This could help the stock shares of ARCHER-DANIELS-MIDLAND, a leader in the ethanol industry. Mr. Mayer predicts that the company will earn $1.85 a share for the fiscal year through June 1991, up 13.5% from fiscal 1990. (WSJ, 9/4)

#90247m0002 09/04/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT 4) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

Worsening U.S. economic fundamentals, which could lead to lower U.S. interest rates when rates abroad are rising, will erode support for the dollar, according to 10 economists and traders surveyed by DOW JONES INTERNATIONAL NEWS SERVICE in New York, Tokyo, Frankfurt and London. The dollar is expected to falter further against most major currencies this month and much of this autumn. (WSJ, 9/4)

"It's just a lack of fresh ideas," says one currency trader in London explaining that the dollar rose yesterday for no fundamental reason. "There have been no large positions taken and nothing has changed." (NYT, 9/4)

TIM FOX, treasury economist at MIDLAND BANK PLC in London says the dollar would shoot upward briefly if hostilities were to erupt in the Middle East but then continue its downtrend. (WSJ, 9/4)

"In the usual terms of growth versus inflation, the arguments for and against an easing of U.S. monetary policy are nearly balanced," writes MARCOS JONES, an economist at the DEUTSCHE BANK CAPITAL CORPORATION, in a letter to his clients. "But the potential impact of credit-related difficulties in the economy has grown to uncomfortable proportions, giving even the central bank a stake in a modest bout of reflation. So long as it can avoid a disorderly decline in the dollar, we expect the Federal Reserve to ease policy in the first half of this month." (NYT, 9/4)

"I have some confidence that the Federal Reserve will step in an ease those [interest] rates if we start getting more evidence that we are that close [to a recession] ... but if they don't step in, then that would give me more concern," says MARY FARRELL. ("Wall Street Week", 8/31)

"We are coming close to the point where the Fed will have to move even though the market is not quite as stable as it might like," says DONALD FINE, chief market analyst at CHASE MANHATTAN BANK. "The key thing is to prevent a recession, and lower interest rates will help you do that." (NYT, 9/4)

Forced to choose between fighting inflation and fighting a recession, the Fed will cut interest rates to stimulate the economy, says ALBERT GROSS, chief economist at REFCO. "The bond market, on the other hand, is reflecting more and more inflationary fears. ... The yield curve is steepening and I would expect that trend to continue." Gross says it will take a cut in the fed funds rate of greater than 1/4 percent in order to stimulate the economy. (CNBC "World Business", 9/4)

The Mideast turmoil "produced one of the biggest sell-offs in the global financial markets on record," says NICHOLAS SARGEN, director of international research at SALOMON BROTHERS INC., in the firm's weekly bond market comments. "Yields in all the principal international markets soared during August, with those in Japan, West Germany and the U.S. testing or setting 1990 highs." (WSJ, 9/4)

The Middle Eastern crisis tends to obscure what is wrong with the world economy, says JAMES GRANT, editor of "Grant's Interest Rate Observer." "What is wrong basically is that the world is in the throes of a credit contraction. The fellow who was used to getting a loan in the 1980s is now being denied in 1990." Grant says he is more worried about what is happening in the Japanese banking system than what is going on in the Mideast: "As Japanese banks are forced to raise capital or shrink their assets, the world will feel it." Grant sees higher interest rates in one year for both U.S. Treasuries and risk securities. ("The Nightly Business Report", 9/1)

"Speculative-grade corporate bonds have been damaged by a great deal of uncertainty regarding their ability to endure a recession," says JOHN LONSKI, a senior economist at MOODY'S. "The modern junk-bond era that began in the mid-1980s has yet to be put through the crucible of recession." Speculative bond-yields have jumped a great deal more than higher rated debentures according to Lonski, who concludes, "Quality is king once again." ("Investor's Daily", 9/4)

"Generally speaking, it's probably safe to predict that bonds will do well in recessions," says RICHARD BERNER, an economist at SALOMON BROTHERS INC. "But remember, no two recessions are identical." (WSJ, 9/4)

THE ECONOMY:

DUN & BRADSTREET CORP. says the number of business failures has shot up 11.7% so far this year from the same 1989 period. The increase in

failures is "almost a straight line, week by week," says JOSEPH DUNCAN, chief economist at Dun & Bradstreet. CYNTHIA LATTA, senior financial economist at DRI/McGRAW HILL INC., says she was surprised by the magnitude of the increase reported, though not by the upward trend itself. She says new or struggling enterprises "haven't been able to accumulate the capital you need to carry you through hard times. ... All the numbers suggest the economy is on the verge of a recession. This is one more piece of evidence." (WSJ, 9/4)

JOHN SILVIA of KEMPER FINANCIAL SERVICES says the economy probably is in a recession, but "whether we are in a recession or not is a pretty sterile debate, as far as investors go. My philosophy is that there is no futures market in the gross national product." EDWARD HYMAN of C.J. LAWRENCE sees a flat economy at best and says there now is a 50% chance of a recession, mainly because the economy is so highly leveraged "and is taking a lot of body blows from exogenous events" like the Middle East. ("Barron's", 9/3)

"I do think that we are going into a recession," says PETER DaPUZZO, senior executive vice president at LEHMAN BROTHERS. "I believe we are going to be in a recession in the last quarter of this year and perhaps the first and second of next." ("Wall Street Week", 8/31)

"I can't see any signs of a turnaround" in the economy, says THEODORE TUNG chief economist at NATIONAL CITY CORP. in Cleveland. "We're still looking at a weak economy in the U.S. and relatively strong economic growth in Germany and Japan," says CARL WEINBERG, at HIGH FREQUENCY ECONOMICS consultants. "But to be honest, nobody knows for sure what will happen. It's strictly a wait-and-see situation." ("USA Today", 9/4)

ALLEN SINAI of the BOSTON COMPANY sees two to three quarters of decline "and a peak-to-trough decline in real gross national product of 1 to 1 1/2% measured fourth quarter to fourth quarter." FRANCIS SCHOTT of the EQUITABLE LIFE ASSURANCE SOCIETY predicts a "fairly mild" recession of three quarters duration "most likely beginning in the fourth quarter of 1990." DAVID RANSON of H.C. WAINWRIGHT & COMPANY ECONOMICS INC., is not at all sure there will be declines in gross national product, but notes that "whether we're in a recession depends on how the authorities decide it is to be defined. The standard definition [of two consecutive quarters of negative growth] isn't absolutely watertight. It's very arbitrary." (NYT, 9/2)

"If we go into a recession, which is a fair possibility, we have such debt around that there will be a lot of Donald Trump's on a small level - people that just can't afford to pay off the mortgages on their homes or their consumer installment debt," says MARTIN ZWEIG. PETER TAUPE, senior executive vice president at LEHMAN BROTHERS, says a recession is "inevitable" but "not that deep." ("Wall Street Week", 8/31)

MERRILL LYNCH's chief economist DONALD STRASZHEIM thinks the purchasing managers' index due out today is going slip from the July level. "The numbers are going to be weak. All this invasion does is create uncertainty and that causes a lot of businessmen to freeze in their tracks." (WSJ, 9/4)

IN WASHINGTON:

Capital gains taxes are likely to come to the forefront once again when Congress reconvenes, and some analysts say the prospects for passage are improving. Budget negotiators "will come back to town and see a deteriorating economy," predicts JEFF DeBOER of the NATIONAL REALTY COMMITTEE. This heightens the possibility of a reduction in the capital gains taxes "because it can jump-start the economy." KEN HAGERTY of the NATIONAL VENTURE CAPITAL ASSOCIATION agrees that a lowering of rates would help the economy, but says passage may require some concessions from the Administration. "... Politically, it's become a lightning rod," says Hagerty. "The Democrats figure the President wants it very badly and that they ought to get something for it." ("Investor's Daily", 9/4)

#90247p0815 09/04/1990 ~PR Newswire

SACRAMENTO, CALIF. (SEPT. 4) PR NEWSWIRE - Randy Shepherd, 33, has been named division manager of Sacramento operations for Martech USA Inc. (NASDAQ: MUSA). He will be taking over as division manager for Sacramento resident Donald Litchfield, 30, who has been named vice president and manager of European operations for Martech. Litchfield, based in Budapest will be directing the environmental remediation projects currently being undertaken by Martech in Czechoslovakia, Hungary and Poland.

With more than 12 years of professional experience, Shepherd has managed all aspects of many large and complex hazardous waste remediation projects. These projects include 3.25 acres of PCB and lead contaminated soils at the Jibboom Junkyard EPA Superfund site as well as clean-up and off-site disposal of 6,000 tons of PCB and solvent contaminated soil and sludge from an NPL site in Oakland, Calif.

Prior to joining Martech, Shepherd served as project manager and regional manager for U.S. Pollution Control Inc. He has completed undergraduate courses in business at Cosumnes River College in Sacramento.

Litchfield is a member of Martech's board of directors and has managed a variety of hazardous waste remediation and waste management projects which involved waste stabilization, waste reduction, on-site treatment, shipping and disposal, soil and water sampling and underground tank removal.

Prior to joining Martech, Litchfield was northwest regional manager for

U.S. Pollution Control Inc., a national pollution control company. He has a degree in geological engineering from South Dakota school of Mines & Technology and holds a California class "A" general engineering contractors license.

Martech USA provides a comprehensive range of environmental remediation services as well as specialized marine and construction services.

CONTACT: David Walke, 212-986-5900; or Doug Sherk or Ann Combs, 415-296-7383, all of Morgen-Walke Associates for Martech USA Inc.

#90247p0839 09/04/1990 ~PR Newswire

THOUSAND OAKS, CA (SEPT. 4) PR NEWSWIRE - Amgen Inc. (NASDAQ: AMGN) today announced that it has entered into a multiyear collaboration with Regeneron Pharmaceuticals Inc. of Tarrytown, N.Y., to develop and commercialize two neurotrophic factors: Brain-Derived Neurotrophic Factor (BDNF) and Neurotrophin-3 (NT-3). Neurotrophic factors are believed to be crucial to the survival and maintenance of nerve tissue. These factors may be useful in the treatment of a variety of neurological disorders including neurodegenerative diseases of the central nervous system, nerve injury or trauma. Potential uses include the treatment of conditions such as Alzheimer's, Parkinson's disease and periperhal neuropathies.

Under the collaboration, Amgen and Regeneron will establish a joint venture partnership, Amgen-Regeneron Partners, for the commercialization of BDNF and NT-3 in the United States. Separately, Regeneron has licensed Amgen to commercialize these factors outside the United States, Japan and certain other Asian countries.

Amgen made an equity investment of $15 million in exchange for convertible preferred stock of Regeneron and paid $1 million to Regeneron over the signing of the license agreement. In addition, over the next two years, Amgen will fund $10 million for continued research and development of these two factors by Regeneron. If certain technological and commercial benchmarks are achieved, Amgen will provide additional funding. Upon commercialization of the factors, Amgen will pay Regeneron a royalty on product sales outside the United States and both companies will share profits generated from U.S. sales of the products.

Amgen Chairman and Chief Executive Officer Gordon M. Binder stated, "This represents a major commitment by Amgen to the field of neurobiology and to the development of therapies for treatment of neurological diseases. Regeneron is a recognized leader in neurobiology, and these factors represent some of the most promising potential products in the field today. We are pleased that Regeneron chose Amgen to be its partner."

Regeneron Pharmaceuticals, Inc., a private biotechnology company located in Tarrytown, N.Y., was founded in January, 1988. The company focuses on the discovery and development of neurotropic factors and neurite growth regulatory factors to treat neurodegenerative diseases and traumatic nerve injury.

Amgen is a multinational biotechnology firm developing pharmaceutical products based on advances in cellular and molecular biology. The company headquartered in Thousand Oaks, Calif., was founded in April, 1980.

CONTACT: Mark Brand, 805-499-5725, ext. 3028, or Sarah Crampton, (investors) 805-499-5725, ext. 3352, both of Amgen.

VALLEY FORGE, PA (SEPT. 4) PR NEWSWIRE - NovaCare, Inc. (NASDAQ: NVCR) today announced the filing of a public offering of common stock. Of the 4.5 million shares to be sold, 2 million will be offered by the company and 2.5 million shares by certain selling security holders.

The lead manager of the offering will be Robertson, Stephens & Company, in the United States. Alex. Brown & Sons Incorporated, Lehman Brothers and Paribas Corporation will be co-managers. The lead manager of a concurrent international offering will be Lehman Brothers International. Co-managers will be Paribas Capital Markets Group; Robertson, Stephens & Company; and Alex. Brown & Sons Incorporated.

The proceeds of the offering will be used to repay debt and fund systems initiatives and a disciplined acquisition strategy. The company seeks to acquire a limited number of companies providing rehabilitation services in institutional settings other than nursing homes to diversify the patient caseload and increase private pay revenues.

As of Aug. 31, certain venture partnerships associated with the founding of the company distributed 3,966,660 shares of common stock to their partners. A substantial portion of the distributed shares are freely tradable under Rule 144(k) of the Securities Act. In addition, the partnerships hold warrants for 820,904 shares exercisable at $6.80 per share.

In order to effect a more orderly distribution of these shares and to eliminate the overhang of these shares on the company's common stock, 1,679,096 of such shares are being sold by certain partners and all of the 820,904 shares issuable upon the exercise of such warrants are being sold in this offering. Holders of at least a majority of the remaining distributed shares of common stock will have agreed prior to the effective date of the registration statement that, for a period of 365 days from

such effective date, they will not, without the prior written consent of the underwriters of the offering, offer to sell, sell or otherwise dispose of distributed shares.

NovaCare is the largest and only national provider of rehabilitation services to health care institutions, principallynursing homes.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

CONTACT: Timothy E. Foster, senior vice president of NovaCare, 215-631-9300, or Susan A. Noonan or Kathryn M. Baker, 212-979-9180, both of Noonan/Russo Communications, for NovaCare.

#90247p0843 09/04/1990 ~PR Newswire

DEARBORN, MI (SEPT. 4) PR NEWSWIRE - Ford Motor Company (NYSE: F) has refined its 1991 warranty policy to better respond to the diverse needs of today's car and truck buyers.

Effective immediately, all 1991-model Lincoln Town Car, Continental and Mark VII vehicles will carry expanded bumper-to-bumper coverage for four years or 50,000 miles, with no deductible.

"Luxury car buyers make a larger investment in their vehicle, so naturally they expect more of everything -- more room, more power and, today, more warranty coverage," explained Lee R. Miskowski, Ford vice president and general manager, Ford Parts and Service Division. "Adding bumper-to-bumper coverage on our full line of Lincolns is one more way we can provide extra value to luxury owners."

In addition, Ford has lowered the deductible from $100 to $50 on all Ford and Mercury cars and Ford light trucks, with a four-year or 50,000- mile powertrain coverage. "We've found that Ford and Lincoln-Mercury vehicle buyers place increasing value on lower deductibles," explained Miskowski. "This new policy recognizes the different expectations of our customers."

Previously, all Ford, Lincoln and Mercury vehicles carried six-year or 60,000-mile powertrain coverage, with $100 deductible per repair visit. Basic warranty coverage remains at 12 months or 12,000 miles.

All 1991-model vehicles sold before the announced warranty change will have the combination of both the new and previous coverages. To complement the new warranty policy, an expanded line of Ford's Extended Service Plan (ESP) contracts will be introduced for 1991.

#90247p0845 09/04/1990 ~PR Newswire

WASHINGTON (SEPT. 4) PR NEWSWIRE - U.S. Commissioner of Customs Carol Hallett today announced that K mart Corporation (NYSE: KM) of Troy, Mich., and its subsidiary, K mart Taiwan, Ltd., have entered into a civil settlement with the U.S. Customs Service in the amount of $6,002,410.30.

The settlement follows a lengthy investigation by Customs special agents in Detroit into efforts by K mart and K mart, Taiwan, to evade quota controls on textile imports.

The Customs Service administers quotas that set absolute limits on the quantities of many types of textile articles which may be imported from specific countries during a given period of time.

The governments of some exporting countries allocate portions of their quota amount, known as "basic" quota, to their textile producers. The basic quota applies to textile exports regardless of their piece price.

The governments of South Korea and Taiwan also hold back a portion of their quotas, which are called "free" quotas. These they award to producers exporting merchandise valued above a "check" price set by each government. This promotes the export of higher cost and quality merchandise. Under this system, a producer which has used up all its basic quota can only export free quota merchandise to the United States.

The Customs investigation of K mart showed that beginning in 1982, K mart and K mart, Taiwan, manipulated prices of various textile articles imported from Taiwan and South Korea to circumvent the check price system and thus evade the quota controls on certain classes of those articles.

In instances where K mart's foreign suppliers had no remaining basic quota, and thus could ship no more articles to K mart in a given quota category, K mart and K mart, Taiwan, would artificially inflate the price of articles to be shipped to the United States above the check price so as to obtain free quota for the shipment. K mart's over payment to the foreign producers for this merchandise were later rebated in the from of artificially decreased prices on merchandise for which the basic quota was still available.

Between March 1982 and March 1986, K mart filed over 400 entries of textile articles in New York; Savannah, Ga.; Newark, N.J.; and Los Angeles, in which prices of the goods had been inflated to obtain free quota from South Korea and Taiwan. Customs calculated the value of this merchandise, which was imported in circumvention of the quota controls, in excess of $24 million.

#90247p0847 09/04/1990 ~PR Newswire

CHERRY HILL, N.J. (SEPT. 4) PR NEWSWIRE - Harvey Lamm has announced his resignation from his posts as chairman of the board and chief executive officer of Subaru of America (NASDAQ: SBRU) (SOA).

Lamm is one of the founders of the company, which has had the exclusive United States marketing rights to Subaru vehicles, which are manufactured by Fuji Heavy Industries in Japan and Lafayette, Ind.

Lamm is being succeeded as chairman of the board by Takeshi Higurashi. Higurashi has been employed by Fuji Heavy Industries since 1954. Most recently, he has held the position of managing director of Fuji Heavy Industries in charge of Subaru Overseas business.

Fuji Heavy Industries and Subaru of America have finalized a merger agreement which results in SOA becoming a wholly owned subsidiary of Fuji Heavy Industries, with continuing responsibility for sales and marketing in the United States. Lamm's decision to step aside is attributed to a desire to provide a clear path for the strategic and operational integration of the manufacturing, product development and sales and marketing arms of the new enterprise.

In a related development, Marvin S. Riesenbach, executive vice president and chief financial officer, has announced his plans for early retirement on Oct. 31, 1990. Riesenbach said he has been contemplating early retirement to pursue other business interests for some time and determined that the finalization of the merger presented an appropriate time to announce his plans.

It was further announced by Subaru of America and Fuji Heavy Industries that, under the new management structure, Thomas R. Gibson will be president and chief operating officer and Masaharu Masumitsu will be vice chairman of the board and chief executive officer. They will also continue as members of the board of directors of the company. Higurashi emphasized that Fuji Heavy Industries fully supports Gibson and Masumitsu and is confident of their ability to lead the company in this very competitive

environment.

#90247p0848 09/04/1990 ~PR Newswire

PITTSBURGH (SEPT. 4) PR NEWSWIRE - Thomas H. O'Brien, chairman, president and chief executive officer of PNC Financial Corp (NYSE: PNC), today announced the appointment of Wilson W. Wyatt Jr. as senior vice president, corporate and public affairs, effective Sept. 4.

Wyatt, 46, joins PNC from BATUS Inc., headquartered in Louisville, Ky., where he was vice president for corporate affairs and government relations. BATUS, with 1989 sales of $8 billion, was the management holding company for the U.S. businesses of B.A.T. Industries p.l.c. (U.K.). The companies included Saks Fifth Avenue, Marshall Field's, Farmers Group Inc. (insurance), Appleton Papers, and Brown & Williamson Tobacco Corp.

Wyatt will be responsible for directing all of PNC's public functions, including: media relations, financial communications, shareholder relations, employee communications, and government relations on a national state and local level.

His last responsibility for BATUS was to direct the U.S. communications and public affairs activities for the successful defense of B.A.T. Industries against a $21 billion hostile takeover attempt by Sir James Goldsmith. He then directed the corporation's communications activities associated with the sale of its retail businesses and demerger of its paper business, resulting from a restructuring of B.A.T. Industries.

A native of Louisville, Ky., Wyatt's background includes serving in the Kentucky General Assembly, and he was a reporter for The Courier-Journal. He was director of corporate affairs and communications for BATUS subsidiary Brown & Williamson Tobacco Corp. before joining BATUS as vice president-public policy, heading the company's Washington office for five years. He was appointed BATUS vice president for corporate affairs in 1986.

He is a member of the Conference Board's Public Affairs Research Council and the board of directors of the Public Affairs Council. He has been active in public affairs and cultural activities in Washington, D.C., and Louisville for many years.

PNC Financial Corp, headquartered in Pittsburgh, is the nation's 14th-largest bank holding company with assets of $47.8 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. PNC currently

operates 530 community banking offices in Pennsylvania, Kentucky, Indiana, Ohio, Delaware and New Jersey. It also conducts business through additional offices in 15 states and seven foreign countries.

POTOMAC, MD. (SEPT. 4) PR NEWSWIRE - Phillips Publishing, Inc., today announced the acquisition of Rotor & Wing International magazine from PJS Publications Inc. of Peoria, Ill.

Rotor & Wing International, which will be celebrating its 25th year of publication in 1991, has a subscriber base of 38,500 helicopter industry professionals in 172 countries.

Since 1967, Rotor & Wing International has been the dominant news source for the worldwide civil helicopter marketplace. With the introduction of its military section in 1983, it is now the publication of record for the total helicopter industry.

Magazine operations will shift from Peoria to Potomac, headquarters of Phillips Publishing. Key staff members, including Advertising Director Julie Stone and Editor David Jensen will continue in their roles with the magazine.

Thomas L. Phillips, president of Phillips Publishing, announced the acquisition which he termed the largest in the 16-year history of the company. Phillips Publishing achieved revenues of $44 million in its latest fiscal year.

"I'm delighted that this exceptional magazine and key members of the Rotor & Wing International team will be joining us," Phillips said. "Having published Helicopter News newsletter for the past four years, we are keenly aware of the vitality of this marketplace. With the additional resources of Phillips Publishing, Rotor & Wing International will enjoy significant growth in the years ahead."

Rotor & Wing International represents a major addition to Phillips Publishing's growing Magazine Group under the leadership of Group Publisher David J. Durham. The Magazine Group also includes these specialized business magazines: Avionics, Via Satellite and Mobile Products News.

In addition to the four magazines, Phillips Publishing publishes more than 30 business newsletters as well as directories, market studies and other

information services, primarily in the fields of defense/aerospace, civil aviation, telecommunications, data communications and banking. The company also publishes eight consumer newsletters in the areas of health and investments.

SEATTLE (SEPT. 4) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today announced that it has filled five new positions for regional sales managers, tapping a cumulative total of 34 years of experience in managing the sales of oncology products.

The five new regional sales managers are: - Kenneth Borum, 42. Midwest regional sales manager. Three years as Eastern regional sales manager for NeoRx Corp. in Seattle and an additional six years experience in oncology sales and management with Adria Laboratories in Columbus, Ohio.

- Jean-Luc Frande, 36. Midatlantic regional sales manager. More than five years' experience in oncology-sales management: two years as district sales manager with Summit Pharmaceuticals, a division of Ciba-Geigy Corp., and the previous two and a half years in oncology-sales management with Schering-Plough in Kenilworth, N.J.

- Charles Griffin, Jr., 33. Southeast regional sales manager. Three years as regional sales manager for Whitehall Laboratories in Atlanta. An additional seven years of experience in oncology and pharmaceutical sales, including position as senior oncology specialist, with Adria Laboratories.

- Michael Hanley, 41. Northeast regional sales manager. Former manager of anticancer products and business development for Bristol-Myers Squibb's International Division, where he oversaw international marketing development for the company's entire oncology product line. He also worked as a hospital manager for Glaxo Inc., in Research Triangle Park, N.C. and for Bristol Laboratories in East Syracuse, N.Y.

- Forrest McIntosh, 40. West Coast Regional Sales Manager. Nine years of experience with Adria. As Central Pacific district sales manager, he managed the sales force for 15 Central and Northwest states. From 1984 to 1986 he was Adria's oncology business manager for special projects and was responsible for strategic program planning for the company's Adriamycin and other oncology product lines.

The five new managers have already begun to recruit local representatives to build regional organizations throughout the United States.

Immunex is a leading biotechnology firm focused on the research, development, marketing, and manufacture of immunological therapeutic products.

SYRACUSE, NY (SEPT. 4) PR NEWSWIRE - Carlisle Companies Incorporated (NYSE: CSL) has completed the cash purchase of the Off- Highway Braking Systems business from BFGoodrich Aerospace. Further terms of the transaction were not disclosed.

The Off-Highway Braking Systems business manufactures brakes and associated hydraulic controls used on construction, mining and other off-highway vehicles. Sales in 1989 totaled approximately $47 million. The business is headquartered in Bloomington, Ind. and operates plants in Bloomington, the Netherlands and Brazil. The purchase also includes a 49 percent interest in Japan Power Brake located in Tokyo.

The Off-Highway Braking Systems business will become part of Carlisle's Motion Control Subsidiary with headquarters in Ridgway, Pa., which produces brake lining materials for heavy duty truck and off- highway equipment.

Carlisle, headquartered in Syracuse, N.Y., is a diversified manufacturer of products for automotive, industrial, construction and data communications markets. For the fiscal year ended Dec. 31, 1989 it reported sales of $553.7 million.

TORONTO (SEPT. 4) PR NEWSWIRE - Alias Research Inc. (NASDAQ: ADDDF), producers of 3D computer software for design, animation and scientific visualization, today announced results for the second quarter ended July 31, 1990.

Net earnings for the second quarter were US $523,000, or 12 cents per share compared to $332,000 or eight cents per share for the same period last year, a 58 percent increase. Net earnings for the six months were $891,000 compared to $726,000 last year. Revenues for the second quarter were US$4,279,000 compared to $2,153,000 for the second quarter last year, a 99 per cent increase. Revenues for the first six months were $7,656,000 compared to $4,686,000 for the first half of last year.

President Stephen Bingham said, "We attribute strong sales to the fact that our customers tend to be well-capitalized companies investing in Alias technology to increase their own competitiveness in response to a tight economy. The expanding Alias worldwide marketing effort, direct sales force and distribution network continue to add to the company's growth."

Alias introduced entry level workstation products, Alias Designer(TM) and Alias Animator(TM), during the quarter. At quarter's end, the company launched Alias Studio(TM) for the design market and Alias Power Animator(TM) for the professional film and video animation market. These two powerful 3D products represent the most significant R&D effort from Alias to date. The expected revenue stream from the release of Alias Studio on the IBM RISC System/6000 workstations also began at quarter's end.

During the quarter Alias acquired the marketing, distribution, and development rights for new 3D computer graphics software technology for

use by architects, space planners and interior designers from SketchTech, Inc. of Minneapolis, Minnesota. From Digital Art, S.A. of Brussels, Belgium, Alias purchased software technology for use by graphics designers in the creation of photorealistic print and packaging design concepts. This technology will be incorporated into the company's product offerings.

RICHMOND, VA (SEPT. 4) PR NEWSWIRE - Markel Corporation (NASDAQ: MAKL) announced today its plans to focus the Company in insurance brokerage and underwriting operations in the United States and to simplify its existing organizational structure.

To move toward this goal, Markel has reached a tentative agreement with its Canadian affiliate, Fairfax Financial Holdings Limited (Fairfax) with respect to a proposed transaction in which Markel would acquire the interest Fairfax presently holds in F-M Acquisiton Corporation (F-M) in exchange for $45 million in cash and substantially all its ownership of Fairfax and other securities. Markel currently owns 42.5 percent of F-M which has assets of approximately $550 million and which owns all of the outstanding stock of Shand, Morahan Services Inc. (Shand) and its insurance subsidiaries.

In addition, Markel would exchange its 50 percent-owned claims administration subsidiary, Lindsey & Newsom Claims Services, Inc. for share in Fairfax's publicly-held claims administration subsidiary, Morden & Helwig Group, Inc. Terms and conditions for any such transactions have not been finalized. If consummated, it is contemplated that Markel would own only a very minor interest in Fairfax, would own 90 percent of F-M, would own a minority interest in Morden & Helwig and would cease to own any direct interest in Lindsey & Newsom. Following the transaction, the operations of F-M would be consolidated with Markel's other subsidiaries for financial reporting purposes.

Alan I. Kirshner, President, emphasized that if a definitive agreement can be negotiated, a number of regulatory and other approvals will be required.

Fairfax has announced its intention to acquire Commonwealth Insurance Company, a Canadian property and casualty insurer, and will utilize the proceeds from the sale of F-M in connection with that transaction.

Markel Corporation also announced today that its Board of Directors has authorized the repurchase of its common stock from time to time in the open market. Mr. Kirshner stated that the repurchase authorization was

based upon the Board's perception that the common stock is an extremely attractive investment at this time.

FULLERTON, CA (SEPT. 4) PR NEWSWIRE - Hughes Aircraft Company has been awarded a $48.7 million follow-on production contract to supply battlefield digital communications equipment for the U.S. Army's Enhanced Position Location Reporting System.

The award from the U.S. Army Communications Electronics Command at Ft. Monmouth, N.J. is in addition to a $107 million production contract received earlier this year by the company's Ground Systems Group. Hughes is a subsidiary of GM Hughes Electronics.

The Enhanced Position Location Reporting System, commonly referred to as EPLRS, provides secure and jam-resistant, user-to-user data communications identification, position location and navigation services.

The compact EPLRS user units can be carried on troops' backs, mounted in vehicles such as tanks or trucks, and installed in helicopters or other aircraft.

CARSON, CA (SEPT. 4) PR NEWSWIRE - Nissan Motor Corporation in U.S.A. today announced manufacturer's suggested retail prices for its all-new 1991 Sentra line of small sedans.

Nissan Division also disclosed that it will increase prices an average of 1.8 percent on its 1991 carry-over products, or an average of $290 a

vehicle.

Base pricing for the Sentra E two-door with manual transmission begins at $7,999, while the sporty Sentra SE-R is offered at $10,970. Rounding out the Sentra lineup are the value-packed XE sedan, with a suggested base price of $9,100, and the top-of-the-line GXE 4-door with automatic transmission, air conditioning, cruise control, power windows and alloy wheels, offered at $12,750.

Featuring contemporary styling, a modern, ergonomic interior and a pair of state-of-the-art drivetrains, the 1991 Sentra line promises to set new standards for the small car segment.

The 1991 Sentra, which goes on sale at Nissan dealers this month, is available in two- and four-door sedan bodystyles at four trim levels. In addition to the two-door E and XE sedans, buyers may select from SE and performance-oriented SE-R models. The four-door sedan is available in E, XE and luxurious new GXE models.

#90247p0873 09/04/1990 ~PR Newswire

DETROIT (SEPT. 4) PR NEWSWIRE - Strong summer sales and the introduction of an enhanced 1991 product lineup have put Pontiac Division in position to finish calendar year 1990 with a 7 percent share of industry passenger car sales, up from 1989's 6.9 percent share, according to Pontiac Division General Manager John G. Middlebrook.

Middlebrook said key summer performers in Pontiac's lineup have been the Grand Prix, up 41 percent in the 60-day period ending Aug. 20; Sunbird, ahead by 27 percent; and Grand Am, up 18 percent.

On the performance front, Pontiac's all-new Twin Dual Cam V6 engine -- a 3.4-liter, 210 horsepower four-cam 24-valve powerplant -- is the highest displacement multivalve V6 from any car manufacturer. It's standard on the 1991 Grand Prix GTP coupe and available on the Grand Prix SE and STE models.

The Grand Prix GTP features the performance and looks of last year's Grand Prix Turbo coupe, but with a price tag thousands below the Turbo coupe. The 1991 Grand Prix STE sedan equipped with the Twin Dual Cam V6 enjoys a similar lower price than its 1990 Turbo V6-equipped predecessor.

A major breakthrough in driver technology and value is being offered on Pontiac's volume-leading Grand Am line -- GM's new-generation ABS VI

anti-lock brake system. By offering ABS VI standard on all Grand Am SE models, Pontiac has brought technology once limited to low-volume sports cars to high-volume, affordable models.

Key highlights of Pontiac's 1991 marketing program include: -- New, lower-priced models for Pontiac's volume sellers -- Grand Am, Sunbird and Grand Prix.

-- Optional appearance packages that provide up-level looks on lower-cost, high-volume models.

-- Option group discounts on all high-volume models for increased value to customers.

Examples of Pontiac's option group pricing strategy include a popularly equipped 1991 Grand Prix SE coupe with a Manufacturer's Suggested Retail Price (MSRP) of $16,767 -- $445 below the comparable 1990 LE coupe. A popularly equipped 1991 Trans Sport at $17,654 is $296 below the comparable 1990 model.

On base models, a Sunbird coupe at $9,139 in 1991 is $115 below 1990; Grand Am coupe at $10,629 -- $440 lower than last year; and Grand Prix LE sedan priced at $14,779, $335 less than the 1990 model.

#90247p0875 09/04/1990 ~PR Newswire

RICHMOND, VA (SEPT. 4) PR NEWSWIRE - Reynolds Metals Company (NYSE: RLM) today introduced its third new consumer product in 18 months as part of its continuing strategy to broaden the company's presence in the home food management grocery product category.

New Reynolds(R) Microwave Wrap non-stick cooking paper, designed exclusively for use in the microwave oven, is being launched after six years of extensive consumer research. It is viewed by consumers as a natural extension of the company's Reynolds Wrap(R) aluminum foil franchise, the company said.

"While 83 percent of U.S. households now have microwave ovens, this is the first cooking paper designed specifically to provide versatility and convenience in microwave cooking," said John M. Lowrie, vice president and general manager of the Reynolds Consumer Products Division.

The innovative non-stick cooking paper is recyclable and treated with a grease- and moisture-resistant organic coating, the company said. It will be available in the country's Central region this year with national

distribution expected in the near future.

"Microwave Wrap is part of the intense effort Reynolds has launched to grow our consumer products business," he said. "We expect more than 50 percent of the product's volume to come from new or increased category consumption."

In addition to its uniqueness as a microwave product, the new cooking paper has a number of positive environmental benefits. Microwave Wrap is packaged in a carton made from 100 percent recycled paperboard and the core is 100 percent recycled fiber.

Independent consumer marketing research showed that nearly 70 percent of microwave oven owners surveyed intended to purchase the new paper wrap, according to Thomas W. Krusinis, Reynolds brand manager.

Microwave Wrap is available in 25- and 50-square-foot rolls. Each package contains a brochure, prepared by The Microwave Cooking Institute and The Reynolds Wrap Kitchens, explaining product use. Also included in the brochure are recipes for food preparation in the microwave oven.

The introduction of Reynolds Microwave Wrap follows the company's successful launch of two new consumer products last year, Reynolds(R) Crystal Color(R) Plastic Wrap in four colors and Reynolds(R) Sure-Seal(R) reclosable plastic bags. Both products are available nationwide.

#90247p0878 09/04/1990 ~PR Newswire

PITTSBURGH (SEPT. 4) PR NEWSWIRE - The Pittsburgh Steelers, Landmark Savings Association (AMEX: LSA) and WTAE called interference on alcohol and drug abuse in area schools with the launch of the third annual "Know the Score on Alcohol and Other Drugs" campaign today.

An all-star lineup echoed the sponsors' sentiments and congratulated the Steelers and Landmark for their efforts to sideline drugs for good. Videotaped messages from each of the AFC Central teams, including Reggie Langhorne, Cleveland Browns; Anthony Munoz, Cincinnati Bengals; Mike Munchak, Houston Oilers; and a special message from NFL Commissioner Paul Tagliabue, highlighted the press conference.

"'Know the Score' is designed to recognize the programs already in place that lead the way in educating students and expanding awareness about the dangers of substance abuse," noted James G. Caliendo, senior vice president and chief operations officer at Landmark. "It is not designed to

teach students about drug and alcohol abuse," he added.

"We think that 'Know the Score' is an appropriate way to honor those schools that are fighting alcohol and drug abuse," said Joe Gordon, Steelers director of communications and business. "We're very pleased at the more than 100 entries we've received this year. And, we salute each school's efforts in the fight against substance abuse," he concluded.

Each week following the Steelers game, voice of the Steelers Myron Cope will announce his choice for the Steelers Player of the Week, in whose name the "Know the Score" award will be presented to that week's winning school. Each week's winning school is announced on Cope's locker room show and on the WTAE-TV nightly newscasts.

"Know the Score" recognizes area school programs that educate students about the dangers of alcohol and drug abuse and is held in conjunction with the Steelers season. The program honors 17 weekly winners with a $500 check in the name of the Steelers Player of the Week. Each winning school receives on-field recognition at one of the Steelers games and a visit from a Steelers player during the school year, as well as various other awards. In addition, this year's winners also receive a "Know the Score" flag to fly at their school. The weekly winners vie for the title of "Know the Score School of the Year," honored at the end of the season with a $2,000 award. The first and second runners-up receive $1,500 and $1,000, respectively.

Entries submitted were judged on overall awareness and impact, meeting program goals, effective reach of target audiences, student and administrative involvement, uniqueness and creativity. The 1990 judges panel included Dr. Joshua Perper, Allegheny County Coroner; Patty Tascarella, associate editor of Executive Report Magazine; Bonnie Rack-Wildner, community services representative for Gateway Rehabilitation Center; and David L. Lloyd, Landmark Savings Association board member.

Landmark Savings Association is a Pennsylvania state-chartered, publicly owned savings association with assets of approximately $1.5 billion.

PITTSBURGH (SEPT. 4) PR NEWSWIRE - Equitable Gas Co. president John Milantoni announced today at a joint news conference with Pittsburgh Mayor Sophie Masloff that the local gas utility will support recycling efforts by making a major effort to purchase products produced from recycled materials.

One of the key elements in recyling is that waste materials be reprocessed and returned to the marketplace as useable products.

"Effective with the next production run, our customer billing envelopes and customer return envelopes will be produced on recycled paper," Milantoni said. The company uses an average of 530,000 such envelopes each month.

Milantoni said Equitable is in the process of determining whether the 275,000 gas bill statements it mails each month can be printed on recycled paper. The company also will use recycled paper for its copying machines and computers.

In addition to supporting recycling through the purchase of recycled products, Equitable is assisting in educating the public by including bill inserts about recycling with customers' September gas bills and the use of one of the headquarters building's display window at 420 Boulevard of the Allies, downtown.

Milantoni concluded by saying, "At Equitable we are committed not only to providing economical and efficient energy to the Pittsburgh area, but supporting recycling efforts as well as doing our part in making a better environment for our community."

TWINSBURG, OHIO (SEPT. 4) PR NEWSWIRE - James Adamson, executive vice president of marketing for Revco D.S., Inc. today announced the appointment of Jim Mastrian, R.Ph., to the newly created position of vice president and general manager of marketing.

In his new position, Mastrian will have overall responsibility for all purchasing at Revco, including over-the-counter medications, health and beauty aids and prescription medications. He will oversee pharmacy marketing as well as third-party marketing, the department which markets Revco's services to prescription insurance plan providers. He will report directly to Adamson.

The new position replaces that of vice president and general merchandise manager held by Jeffrey Doshan. Doshan has resigned from Revco to become president of the Tannery West retail chain based in Minneapolis.

"We have positioned Revco as a 90s version of the traditional neighborhood drugstore," said Adamson, "with the merchandise mix and customer-driven marketing to support that position. Jim's industry experience and marketing savvy are strengths that will drive the momentum already established."

Mastrian, 48, has significant experience in retail marketing and the drugstore industry. He was formerly senior vice president of merchandising and marketing for the paint store group of Sherwin Williams, headquartered in Cleveland, and president and general manager of the former Sherwin Williams subsidiary Gray Drug Fair, a drug store chain since purchased by Rite Aid.

A native of Farrell, Pa., Mastrian is a 1965 graduate of the University of Pittsburgh. He and his wife Nancy live with their two children in Moreland Hills, Ohio.

Revco, one of the nation's foremost drugstore chains, is a privately held company based in Twinsburg, Ohio.

PROVIDENCE, RI (SEPT. 4) PR NEWSWIRE - Citizens Financial Group ("Citizens") announced today that it has reached a definitive agreement with Bank of New England Corporation (NYSE: NEB) ("BNE") providing for

Citizens to acquire substantially all of the assets and liabilities from Bank of New England/Old Colony, N.A., BNE's Rhode Island banking subsidiary.

With this acquisition, Citizens will add 22 offices to its existing 30 Rhode Island branch office locations and will also increase its deposits by approximately $900 million, bringing total deposits of Citizens to more than $3 billion.

George Graboys, chief executive officer of Citizens, stated that Citizens "was pleased to have had the opportunity and the resources to acquire this important banking franchise which has served the consumer, business, and public sectors of our state for many years."

Additionally, Graboys noted that "with the addition of Old Colony's branch locations, we are extending our geographic reach within the state to Aquidneck Island, as well as into Woonsocket, West Warwick, Bristol, and East Greenwich, and complementing our branch network in many other communities."

Completion of the transaction, which will be accomplished through Citizens' Rhode Island banking affiliates, Citizens Savings Bank and Citizens Trust Company, is subject to normal approvals by state and federal regulatory authorities.

Citizens Financial Group, Inc., a wholly owned subsidiary of The Royal Bank of Scotland Group, plc, is the parent of Citizens Savings Bank and Citizens Trust Company (which operate jointly as Citizens Bank), Fairhaven Savings Bank, and Gulf States Mortgage Company, Inc. Citizens Bank services its markets through 30 offices in Rhode Island, as well as through loan production offices in Boston and Burlington, Mass., and Portland, Maine. Fairhaven Savings Bank is headquartered in Fairhaven, Mass., with branch offices in South Dartmouth, Mattapoisett, and New Bedford, Mass. Gulf States operates offices in Georgia, Florida, Virginia and Kentucky.

Citizens is currently in the process of acquiring BankWorcester Corporation, the parent company of the Worcester County Institution for Savings, which services Central Massachusetts through 18 offices in Worcester and nine surrounding communities. Completion of the BankWorcester acquisition is subject to stockholder and regulatory approvals.

NILES, MI (SEPT. 4) PR NEWSWIRE - Toyota Tsusho America, Inc., and National-Standard Company (NYSE: NSD), together with a consortium of Japanese wire weavers, including Fujita Wire Cloth Co., Ltd., announced a joint venture agreement to build a wire weaving facility in North America, according to Tamotsu Shiota, president of Toyota Tsusho America, and Michael B. Savitske, president and chief executive officer of National-Standard.

This joint venture, known as the North American Wire Weaving Company (NAWWC), was created to supply stainless steel wire cloth and related products for applications in the automotive air bag industry and other industrial markets.

The combined capabilities of Toyota Tsusho, National-Standard and the Japanese consortium, through NAWWC, will establish a strong North American manufacturing presence to meet the needs of the rapidly expanding automotive air bag industry for quality wire cloth materials. Wire cloth is used to cool, filter, and diffuse the gases that inflate the air bag.

Production of these materials will begin immediately through the combined resources of all parties. The timing and location of the new North American facility will be finalized at a later date.

Toyota Tsusho America, a subsidiary of Toyota Tsusho Corporation of Nagoya Japan, is a leading trading company having sales of $660 million with 10 operating locations in the U.S. Established in 1960, Toyota Tsusho America is headquartered in New York.

National-Standard Company's Woven Products Group is a major supplier of wire cloth and metal fiber material to the automotive industry for use in critical applications such as air bag inflator devices. National-Standard, founded in 1907, is a Niles, Mich.-based firm with annual sales of approximately $300 million. In 17 operating facilities throughout the world, the company manufactures and distributes a broad range of wire, wire-related products, and specialized machinery systems.

NEW YORK (SEPT. 4) PR NEWSWIRE - The Zweig Total Return Fund, Inc. (NYSE, PSE: ZTR), a closed-end investment company that began operations in September 1988, today announced its monthly distribution to shareholders. The distribution, of 8 cents per share, will be paid on Sept. 27, 1990 to shareholders of record on Sept. 14, 1990 (ex-date Sept. 10, 1990).

Martin Zweig, chairman of the board and president of the fund, said, "I am pleased to announce this distribution to The Zweig Total Return Fund's shareholders. This distribution is in keeping with our policy to make minimum monthly distributions of 0.83 percent of the fund's net asset value (10 percent on an annualized basis), offering our shareholders a stable cash flow."

The Zweig Total Return Fund's investment objective is to seek the highest total return, consisting of capital appreciation and current income, consistent with the preservation of capital.

CONTACT: Jeff Lazar of The Zweig Total Return Fund, 212-486-7110, or Fern Lazar or Debra Wasser of Dewe Rogerson, 212-688-6840, for the Zweig Total Return Fund.

NEWPORT, MI (SEPT. 4) PR NEWSWIRE - Robert McKeon has been named plant manager at Detroit Edison's Fermi 2 power plant. He succeeds Douglas R. Gipson, who was appointed assistant vice president and manager, Nuclear Production, three months ago.

McKeon, with more than 32 years' utility experience at nuclear and fossil fuel plants, has been the plant's Operations superintendent since joining Detroit Edison (NYSE: DTE) in November 1988. In his new position, he will report to Gipson.

"Bob McKeon has a unique blend of utility operating experience combined with a background as an industry evaluator which will serve him well as plant manager," said William S. Orser, senior vice president, Nuclear Generation. "We consider this position a key to Fermi 2 being among the top-performing nuclear plants in the country."

During McKeon's two-year tenure as superintendent, the Nuclear Regulatory Commission has noted continual improvement in plant operations. In 1989, the plant operated for a record 169 continuous days and later that year, successfully completed its first refueling outage in less time than the industry average.

From 1985 to 1988, McKeon worked at Tennessee Valley Authority's Browns Ferry Nuclear Power Plant in Athens, Ala. As operations supervisor and unit superintendent, he was responsible for planning and managing plant operations.

In 1985, he assessed the operation of nuclear power plants across the country as a senior operations evaluator for the Institute of Nuclear Power Operations (INPO). INPO is an industry group dedicated to improving

the nation's nuclear power plant operations by sharing information, assisting in training and annually assessing plant performance.

From 1966 to 1985, McKeon held a number of positions with increasing responsibilities in the operations and radioactive waste areas with General Public Utilities' Oyster Creek Nuclear Generating Station in Forked River, N.J. He was manager of plant operations the last three years.

McKeon has a bachelor of science degree in physics from Stockton State College in New Jersey. He also held a senior reactor operator's license while at Oyster Creek.

McKeon and his wife, Barbara, live on Grosse Ile.

HARTFORD, CT (SEPT. 4) PR NEWSWIRE - Loctite Corporation (NYSE: LOC) stated today that Barron's Sept. 3 article titled "The 51st State? A Fateful Choice Looms for Puerto Rico" contains a grossly erroneous estimate of Loctite's 1988 tax saving from its Puerto Rico operations.

The following table shows the correct data for each of the last three fiscal years ended June 30:

LOCTITE CORPORATION
(Dollars in millions)

	1990	1989	1988
Total income after tax	$61.37	$54.48	$41.85
Tax decrease resulting from Puerto Rico operations:			
Percent of IAT	6.6	3.9	6.4
Amount	$4.1	$2.1	$2.7

Loctite Corporation, a worldwide market-driven specialty chemical company, ranks among the leading suppliers of proprietary high- performance adhesives, sealants, coatings, specialized brand-name chemicals and electroluminescent lamps and lighting systems. Principal markets include industrial, electronics, specialized medical, professional automotive and consumer.

DALLAS (SEPT. 4,) PR NEWSWIRE - EDS and New Century Enterprises, Inc., an affiliate of Pritzker family interests, today announced they have reached an agreement in principle to acquire Westwood Equities Corporation, owner of the Ticor companies. Details of the transaction were not disclosed.

After the acquisition and under a separate agreement, EDS (Electronic Data Systems Corp.) will furnish all information technology services to Westwood's corporate and operating subsidiaries. EDS will immediately bring to bear its extensive information technology expertise and technological infrastructure to improve Ticor's operational efficiency and service capabilities.

"EDS is pleased to be working together with the Pritzkers. Their distinguished record of success in managing and growing businesses makes them the ideal partner for this transaction," said Les Alberthal, chairman president and CEO of EDS. "EDS is also excited by the opportunity to enhance the services of the Ticor companies with the kind of innovative technological support only EDS can provide."

Winston Morrow, president of Westwood Equities Corporation, based in Los Angeles, commented, "This relationship is exactly what Ticor needs to promote its subsidiaries' service capabilities into the next century. We are very pleased and excited to be associated with such an outstanding company as EDS and the Pritzker interests."

The Ticor Title Insurance Companies are one of the nation's oldest and largest providers of real estate title insurance, and Ticor Realty Tax Services is the nation's second-largest provider of tax-reporting services to lenders and others on mortgaged property. Both components facilitate purchases and loans involving residential and commercial properties.

Ticor's title insurance expertise will play an integral role in continuing the growth strategy of EDS' Commercial Insurance Division.

The acquisition is subject to, among other conditions, satisfactory financing arrangements, creditor bank approval and other requisite approvals and consents from state and federal regulators, shareholders and other interests.

EDS, based in Dallas, has operations in 27 countries and is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

EAST HARTFORD, CT (SEPT. 4) PR NEWSWIRE - Pratt & Whitney's JT9D -- the engine that launched the first Boeing 747 into service 20 years ago -- recently marked another milestone as the first engine of its class to surpass 100 million hours flight hours.

With nearly 3,000 engines in service on about 700 aircraft, the JT9D is the most widely used wide-body aircraft engine in the world. In operation with some 60 airlines, these engines are accumulating approximatley 600,000 flight hours every month.

In addition to the Boeing 747, JT9Ds power Boeing 767s, McDonnell Douglas DC-10s and Airbus Industrie A310 and A300 wide-body aircraft.

The JT9D also was the first "high-bypass" turbofan engine to enter commercial service, an achievement that contributed substantially to improved propulsion efficiency, lower noise levels and greater takeoff thrust.

High-bypass turbofans are engines that use a large fan at the front of the engine to force pressurized air around and through the engine.

The higher the ratio of air propelled around the engine to the air passing through the engine's core the greater the fuel efficiency. The bypass ratio of a JT9D engine is about 5 to 1 compared to about 1.5 to 1 for earlier turbofans.

From the original JT9D-3A model at 43,600 pounds of thrust, the series has recorded a 25 percent increase in thrust to the latest model, the JT9D-7R4H1, which produces 56,000 pounds of thrust.

Production of the JT9D has been slowly winding down and will end later this year. It is being replaced by a more advanced and more powerful engine, the PW4000, which entered service in 1987.

The PW4000 is currently in service at 60,000 pounds of thrust, but the engine is capable of growing to 85,000 pounds of thrust and beyond when required by the world's airlines.

Pratt & Whitney is a unit of United Technologies Corporation (NYSE: UTX).

GRASS VALLEY, CA (SEPT. 4) PR NEWSWIRE - Brush Creek Mining and Development Co. Inc. (the "Company") (NASDAQ: BCMD) announced today that a second independent laboratory, Rocky Mountain Geochemical of Nevada, has confirmed by check fire assays its recent gold discovery in the Northern Mines Region of the California Motherlode.

To date, the company has taken and fire-assayed a total of 64 channel samples out of this new discovery. These 64 channel samples taken from two separate levels are more representative of the grade of gold mineralization than drill intercepts as they are significantly bigger samples (approximately 25 pounds each over an average width of 4.6 feet.) The ore shoots were accessed through two previously developed drifts, 2,900 feet and 700 feet respectively, 400 vertical feet apart. These ore shoots are open to depth.

The above gold values include some of the highest assays. The uncut weighted average grade of the remaining samples returned 3.28 ounces of gold per ton, to give an overall uncut weighted average of 5.45 ounces of gold per ton over an average width of 4.6 feet. In addition to the gold, the eight samples listed above averaged 2.235 ounces of silver per ton.

This preliminary sampling program was designed to confirm the presence of bonanza type ore and further evaluation is underway by Keewatin Engineering to determine the average grade of the milling ore. The Company estimates a first-stage exploration program will cost $5 million.

The company also announced that effective Aug. 31, 1990, Georges Benarroch has been appointed chairman of board of directors and chief executive officer. Since 1982 Benarroch has been the chief executive officer and president of Euro Canadian Securities limited of Toronto, Canada, an investment banking firm. Benarroch is a specialist in institutional asset management and is a director of various financial institutions as well as private and public comapnies in Canada, United States, and Europe. Benarroch has been involved as agent or syndicate member in raising financing internationally in various currencies for public comapnies, with particular interest in natural resources. He is involved in regular work with international organizations such as the Global Economic Action Institute and the International Peace Academy. Benarroch holds a master's degree and a doctorate in international law from Canadian and European universities.

HOMEWOOD, IL (SEPT. 4) PR NEWSWIRE - Prominent business book publisher Dow Jones-Irwin has announced that it is changing its name to Business One Irwin. Effective immediately, all books published by the company will bear the new imprint.

The company is a division of textbook publisher Richard D. Irwin, Inc., and was established in 1965 as a result of a co-publishing agreement with Dow Jones & Co., Inc. Ten years later, Dow Jones & Co. purchased Richard D. Irwin, and Dow Jones-Irwin continued its rapid growth as a trade and professional book publisher.

In February 1988, Richard D. Irwin was purchased by The Times Mirror Company (NYSE: TMC) and became part of that company's growing professional information and book publishing group.

Since its inception 25 years ago, Business One Irwin has expanded its publishing program to include books on banking, computers, management, manufacturing, marketing, small business, professional reference, and custom publishing for associations and corporations. Some of the company's best-selling titles include:

-- Service America!, Doing Business in the New Economy,
   by Karl Albrecht and Ron Zemke
-- At America's Service, How Corporations Can Revolutionize the
   Way They Treat Their Customers,
   by Karl Albrecht -- The Money Market
   by Marcia Stigum
-- The Dow Jones-Irwin Guide To Using The Wall Street Journal,
   by Michael B. Lehmann -- The Banker's Handbook
   Edited by William H. Baughn, Thomas I. Storrs,
   and Charls E. Walker
-- Stan Weinstein's Secrets For Profitting In Bull And Bear Markets,
   by Stan Weinstein -- Perot, An Unauthorized Biography,
   by Todd Mason

-- Executive Support Systems, The Emergence of Top Management
Computer Use,
by John F. Rockart and David W. DeLong

Business One Irwin is a division of Richard D. Irwin, Inc., a wholly owned operating unit of Los Angeles based Times Mirror. Its headquarters are located in Homewood. In early 1992, Business One Irwin will join the Irwin company in its new 150,000 sq. ft. national headquarters, currently under construction in Burr Ridge, Ill., a suburb of Chicago.

LYNN, MASS. (SEPT. 4) PR NEWSWIRE - The Italian Ministry of Defense today selected the T700/T6A engine, co-developed by Alfa Romeo Avio and Fiat Avio of Italy, and GE (USA) Aircraft Engines, to power the Italian Navy's new three-engine EH101 helicopter.

With power ratings of 2000 SHP, the T700/T6A is the most powerful derivative yet developed from GE's highly successful T700 engine family.

The three-engine, multi-mission EH101 helicopter has been developed by EH

Industries, a joint effort between Gruppo Agusta of Italy and Westland Helicopter of the UK, as well as between the governments of the U.K. and Italy.

The EH101 entered flight testing in October 1987, and eight prototypes are currently flying, four at Agusta in Italy and four at Westland in the U.K. The ninth, and final, prototype will enter flight testing in the fourth quarter of this year. Five of the prototypes are powered by CT7-6/-6A engines, commercial versions of the military T700/T6A; the other four are powered by T700-GE-401A engines. To date, more than 5,000 engine hours and 670 aircraft flying hours have been accumulated in the EH101 flight test program.

The GE/Italian partnership initiated the agreement to design, develop, qualify, and produce the CT7-6 in July 1986. Since then, the CT7-6/-6A has received commercial qualification from Italian, British, and US aviation authorities, and the T700/T6A, with a common hardware configuration to the CT7-6A, is undergoing qualification in Italy under the authority of the Italian Ministry of Defense.

Alfa Romeo Avio is the prime contractor in Italy for the CT7-6/-6A and T700/T6A engines and together with Fiat Avio will manufacture more than 70 percent of the production engines for use in Italy. All engines will be assembled and tested at Alfa Romeo Avio in Pomigliano D'Arco, Italy.

Elsewhere, the T700/T6A is being offered for the NH90 helicopter, a collaborative effort between Italy, France, West Germany, and the Netherlands. Canada is also considering the CT7-6A to power the EH101 for its NSA (New Shipborne Aircraft).

IRVINE, CALIF. (SEPT. 4) PR NEWSWIRE - Allergan Inc. (NYSE: AGN) announced today that the U.S. District Court for the Northern District of Texas upheld its patent for the use of its product "Ultrazyme" in conjunction with hydrogen peroxide to simultaneously clean and disinfect contact lenses. In its ruling, the Court found that broad claims covering methods for simultaneous cleaning and disinfection of contact lenses were valid, infringed and enforceable.

The suit was brought by Alcon Laboratories of Fort Worth, Texas. In addition to seeking to invalidate the patent, the suit alleged that Allergan had violated anti-trust laws. The court ruled that Alcon had failed to prove these claims.

The Court's decision confirms the unique nature of the technology developed by Allergan through its contact lens care research and development activities. Its decision allows Allergan to exclusively market "Ultrazyme" for simultaneous use with hydrogen peroxide in the United States through May, 2005.

"Ultrazyme" is a specially formulated proteolytic enzyme. By combining cleaning with peroxide disinfection, lens care becomes more efficacious and convenient and patient compliance improves.

Allergan Inc. is a worldwide health care company concentrated in eye care. Allergan supplies prescription and over-the-counter pharmaceuticals, contact lenses and lens care products, and ophthalmic diagnostic products. Based in Irvine, Calif., the company employs more than 6,500 people.

HIGHLAND PARK, MICH. (SEPT. 4) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today reported that production of the Dodge Daytona sports car and the Chrysler LeBaron coupe and convertible at its St. Louis I (Fenton, Mo.) Assembly Plant will be temporarily extended to the end of the 1991 model year, barring unforeseen circumstances.

The company said it plans to provide an additional seven months of continued employment for about 2,300 St. Louis I hourly and salaried employees by the temporary extension.

The extended production at St. Louis I will enable the company's Newark (Del.) Assembly Plant to satisfy increased fleet and dealer demand for the Dodge Spirit and Plymouth Acclaim. It also allows the Sterling Heights

(Mich.) Assembly Plant the flexibility to react to potential increased demand for the fuel-efficient Dodge Shadow and Plymouth Sundance, including the new low-priced America models.

COLORADO SPRINGS, CO (SEPT. 4) PR NEWSWIRE - Analytical Surveys, Inc. announced today (Sept. 4) that it has appointed Sid Corder as president and chief operating officer for the company. The announcement was made by Analytical Surveys' Chairman John Thorpe who will remain chief executive officer and will remain responsible for policy formation and strategic technical advancements for the corporation.

Corder brings more than 20 years of experience and expertise in business management and technical direction to Analytical Surveys. He was formerly president of Cubic Corporation's subsidiary Cubic Western Data, a San Diego-based high-tech electronics firm. In his newly established position, Corder will be directly responsible for the organization, implementation and management of all operational and financial objectives for the company.

"We are delighted to announce the appointment of an individual with Sid's valuable experience and impressive accomplishments," said Thorpe. "Sid will contribute greatly to the efficient management of our business and to its continuing growth."

Before joining Cubic Corporation in 1979, Corder was general manager of manufacturing control for Rohr Industries, a California-based company providing technology and manufacturing services to the aerospace industry. In addition, his extensive business background includes formal education at Stanford University, the University of Southern California and San Diego State University.

Analytical Surveys, Inc. is a professional services company providing digital mapping and Geographic Information Systems (GIS) database services. The company is an industry leader in innovative technological advances and productivity. Its clients include cities, counties, utility companies and others making use of the emerging technologies related to digital mapping.

KING OF PRUSSIA, PA (SEPT. 4) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMCC) announced today that type approval ("Homologacion") of the Ultraphone(R) system by the Secretary of Communications and Transports (SCT) of Mexico has been received, significantly expanding the market for IMM's Ultraphone products.

In Mexico, Homologacion is recognized as much more than just type approval; it is a seal of excellence.

After an 18-month evaluation of the Ultraphone 100 for its technical merits as well as its value to Mexico, the SCT type-approved the Ultraphone rural radiotelephone system for country-wide deployment, operating at 454.025-459.650 MHz with a 20 KHz channel width and a 5 MHz separation between transmit and receive.

In the United States, this action can be compared to the Federal Communications Commission (FCC) establishment of Basic Exchange Telecommunications Radio Service (BETRS) in January 1988. BETRS was established "to make basic telephone service more accessible to rural households and businesses." The FCC assigned 94 channels to BETRS; 26 are the same channels that Mexico has reassigned and where the Ultraphone has provided service for more than three years in the United States.

This announcement comes shortly after Telefonos de Mexico S.A. de C.V. (Telmex) issued a purchase order for Ultraphone systems in the amount of $1.64 million, which are currently being installed. Telmex has also standardized the Ultraphone 100 system as the technology of choice to address their rural backlog and may now utilize the 454 to 459 MHz to provide rural radiotelephone service. IMM's distributor, ROLM Telecomunicaciones S.A. de C.V., which assisted in the sale of the first system to Telmex, played a key role in Ultraphone receiving Homologacion. Carlos Humphrey, general manager of ROLM, said, "We signed up to sell the Ultraphone because we knew it was an excellent product and could solve Mexico's telecommunications problems. The Ultraphone receiving Homologacion proves we were right and expands the market potential in Mexico significantly."

Leonel Lopez Celaya, from the SCT said, "This type approval of the world's most advanced, digital, spectrum-efficient rural radiotelephone system is a very strong message that as Mexico moves into the 21st century it will no longer be a dumping ground for antiquated 20th century technologies."

IMM is a world leader in wireless digital access technologies.

LIVERPOOL, NY (SEPT. 4) PR NEWSWIRE - Fay's Incorporated (NYSE: FAY) reported net earnings for the second quarter ended July 28, 1990 were a record $3,253,000 or $.21 per share, compared to $3,018,000 or $.20 per share in the second quarter of last year. Revenues for the quarter increased 16.1 percent to a record $162.3 million from $139.8 million a year earlier. Revenues for comparable stores (stores open one year or more as of July 28, 1990) increased 10.2 percent for the quarter.

Fay's net earnings for the first half of the year, before an extraordinary charge, were a record $4,729,000 or $.31 per share, compared to $4,373,000 or $.29 per share earned in the first six months of last year. Revenues for the first half increased 16.5 percent to $315.5 million from $270.9 million a year earlier. For the first half of the year, revenues for comparable stores increased 8.5 percent.

During the first quarter, the company repurchased, in open market transactions, $12 million face value of its 13-3/4 percent subordinated debentures due 2005, which resulted in an extraordinary charge in the first quarter of $574,000 or $.04 per share. Net earnings for the first half of the year, after giving effect to the extraordinary charge, were $4,155,000 or $.27 per share.

Henry A. Panasci, Jr., chairman of the board of Fay's, stated, "The results for the first half of the year met our expectations. Based upon the aggressive game plan we have put together for the balance of this year I expect considerable improvement in Fay's financial performance during the last half of the year."

Since the beginning of the fiscal year, Fay's opened six Fay's Super Drug Stores, one Wheels Discount Auto Supply Store, one Paper Cutter Store and two bantam drug stores. In addition, three bantam drug stores were acquired and one bantam drug store was closed. Fay's currently operates 184 drug stores, 25 Wheels Discount Auto Supply Stores and 18 Paper Cutter Stores in the states of New York and Pennsylvania. Plans for the remainder of the fiscal year include the opening of three Fay's Super Drug Stores, two Wheels Discount Auto Supply Stores and eight Paper Cutter Stores.

KALAMAZOO, MICH. (SEPT. 4) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) met with Maryland Medicaid program administrators last Thursday and agreed on a plan to offer rebates to the state for Upjohn prescription products, the company announced today.

The agreement will provide a $1.35 rebate for each Medicaid prescription filled with the company's products. The proposal includes both single-source, those covered by patent, and multi-source medications.

"We are pleased that Maryland could be the first state to sign such an agreement with Upjohn," said Nelson Sabatini, deputy secretary, Maryland Department of Health and Mental Hygiene. "This represents a very positive step in helping to stem the rising cost of health care."

The terms of the agreement originated in a proposal made by Upjohn to all Medicaid programs on Aug. 27.

"Pharmaceutical therapy offers the most cost-effective means of treating many diseases, while holding down costs such as surgery and hospitalization," said Theodore Cooper, chairman of the board, president and chief executive officer of The Upjohn Company. "The Upjohn Medicaid prescription rebate proposal assures greater public access to the innovative pharmaceutical products that we develop, while offering savings to Medicaid budgets during a time of increased financial pressures," Cooper said.

Under the agreement, Upjohn would provide the Maryland Medicaid program with a quarterly rebate payment based on the number of prescriptions filled during the previous three-month period. The rebates are intended to reimburse the states for a portion of their Medicaid prescription claims processing and dispensing costs. "The beauty of the Upjohn proposal is its simplicity," said Sabatini. "The rebate doesn't change from drug to drug, and we see it as a very clean, workable plan."

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

CHICAGO (SEPT. 4) PR NEWSWIRE - WMS Industries Inc. (NYSE: WMS) announced today results for its fiscal year ended June 30, 1990. Despite an increase in revenues from $143,940,000 in fiscal 1989 to $147,062,000 in the year just ended, the company reported a fiscal 1990 net loss of $10,293,000 ($1.24 per share) as compared with net income of $218,000, or $.03 per

share, in fiscal 1989.

The primary reason for the loss was a $7 million write-off of the company's investment in Divi Hotels N.V. and a charge of $2.8 million incurred in connection with the move of the company's corporate office from New York City to the company's existing facility in Chicago, offset in part by a $2 million gain relating to the excess of insurance proceeds over the net book value of the company's hotel properties damaged by Hurricane Hugo.

Income from operations before the $7 million Divi write-off and adjusted to exclude the $2.8 million relocation charge was $6,186,000 for fiscal 1990 compared to $10,954,000 for fiscal 1989.

Several factors contributed to this lower level of operating income. The impact of Hurricane Hugo which struck Puerto Rico in September 1989, necessitated reduced average room rates to maintain occupancy levels. In the coin-operated amusement game business the company has dedicated considerable resources to secure a meaningful share of the video game market which requires incurring significant up-front investment in design engineering costs before models are manufactured and shipped. And the company has made other investments to achieve long-term improvements, including embarking on a Manufacturing Resource Planning (MRPII) project to generate benefits by improving purchasing, inventory and other manufacturing-related operations.

Despite the disappointing results for fiscal 1990, Louis J. Nicastro, chairman of the board, indicated that "Our hotel/casino properties are in better condition with more and expanded facilities than ever before. Puerto Rico continues to benefit from increased airline availability which will better serve the continuing strong demand of tourism to the island. We are embarking on the development of a major destination resort complex through a joint venture with an affiliate of Kumagai Gumi Company, Ltd., one of the world's leading construction companies, which has been actively involved in the development of major resort projects in the Hawaiian Islands.

"Our amusement game business is poised to move forward to secure a larger share of the worldwide video game market. As the dominant force in the pinball market we expect to benefit from the opening of new markets in Eastern Europe and from the unification of East and West Germany, of which the latter has continuously been one of our stronger markets. We expect to achieve significant benefits as a result of our MRPII project and other changes we have made to our manufacturing facilities. As our video library grows, we look forward to generating increased ancillary income from the licensing of our video game titles to the home video game market."

WMS Industries Inc. is engaged in the design, manufacture and sale of

coin-operated amusement games and the ownership and operation of hotels and casinos.

SANTA ANA, CA (SEPT. 4) PR NEWSWIRE - ON-SITE Toxic Control Inc. (OTC-pink sheets) subsidiary Ultrox International has achieved a backlog of $1.75 million, the largest in the water and air treatment company's history. Xerox Corp., General Motors Corp., TRW, the U.S. Bureau of Engraving and the city of South Gate, Calif., have full-scale Ultrox systems under construction.

ON-SITE Toxic Control Inc. is a leader in the $3 billion water and air purification market. Recently, the Unipure Division of Unocal and FMC have signed marketing and technical agreements with Ultrox. A positive U.S. Environmental Protection Agency (EPA) report on the company's technology -- called ultraviolet light (UV)/oxidation -- has now been released on videotape, as part of its selection by the EPA to the prestigious Superfund Innovative Technology Evaluation (SITE) program. The reports are increasing recognition and support for UV/oxidation technology.

The California Department of Health Services is sponsoring a major environmental cleanup project -- the first of its kind in the nation -- with Ultrox. The project will restore a South Gate, Calif., contaminated drinking water well to municipal use. UV/oxidation destroys chemicals found in many contaminated drinking water wells nationwide.

"The $1.75 million backlog represents a substantial step up in sales of our water treatment equipment," said David B. Fletcher, president of ON-SITE Toxic Control. "We are well-positioned to benefit from current regulatory trends and increasing market demand."

ON-SITE Toxic Control Inc. subsidiary Ultrox International manufactures and sells advanced oxidation water and air purification equipment. Pesticides, PCBs, industrial cleaning solvents, gasoline components and other toxic organics found in industrial groundwater, wastewater or municipal water wells are destroyed on-site with a patented technique, relieving customers of the long-term liabilities associated with handling, storing and transporting hazardous wastes. There are currently 12 full-scale UV/oxidation facilities nationwide.

For more information, contact Trudy M. Self at 213-559-7652, or David B.

Fletcher at 714-545-5557.

MINNETONKA, MINN. (SEPT. 4) PR NEWSWIRE - Advance Circuits, Inc. (NASDAQ: ADVC), Minnetonka-based manufacturer of printed circuits, announced today (Sept. 4), that it had reached agreements with the United Steelworkers of America, AFL-CIO in two separate agreements covering its hourly employees. One agreement covers its hourly employees in its Minnetonka plant and the other agreement covers its hourly employees in its Hopkins and Roseville plants. Both of the agreements are for three years and expire Sept. 25, 1993.

Heller indicated that the agreements assure the company of uninterrupted production for the next three years and allow the labor force to participate in successful operations through a series of incentives. The incentives are based on the company achieving specified levels of gross

profit which if achieved allow the work force increased compensation while not distorting the company's historical operation ratios.

The company's common stock is traded on the NASDAQ National Market System under the symbol - ADVC.

NEW YORK (SEPT. 4) PR NEWSWIRE - Fujitsu Limited announced today that it is commencing marketing of the "M-1800 Model Group" of large- scale computers, which consists of five models and includes the highest performance general purpose computer in the world.

The large-scale computer line is the first product introduction within the framework of "Mission/DC" (Multi-environment Information Systems Solution by Domain Concept), Fujitsu's newly unveiled concept for mainframe use in the 1990's. Mission/DC represents a comprehensive approach to satisfying customers' requirements for system construction and development and to providing them with effective systems in today's multi-vendor environment. Accordingly, Mission/DC will have a major influence on Fujitsu's future product introductions.

In conjunction with the mainframe announcement and based on the overall Mission/DC concept, Fujitsu is introducing several software enhancements to its previously announced MSP-EX mainframe operating system that will promote high-speed processing and ease of operation. The enhancements include compatibility with IBM's ESA; a high-speed batch processing system called "Excel Batch," which utilizes a system storage unit (SSU); and an integrated storage management system referred to as "GSM/MNGR." Fujitsu is also introducing an integrated supervision system called "FTOPS," which facilitates efficient monitoring and control of complex systems and remote operations.

Background

The mainframe system is taking on a more and more important role as a global server that supports the basic operations of an enterprise. Conretely speaking, the major functions undertaken by mainframes today include: database processing that encompasses an enterprise's total activities, high-speed application processing, and communication processing to support expanding networks. Moreover, operations management -- namely, monitoring and controlling these three functions -- is becoming increasingly important.

To respond to these changing requirements in an effective and timely

manner, Fujitsu has created Mission/DC, a new concept for mainframe use in the 1990's, which seeks to:

-- Improve efficiency of system development
-- Enable continuous operation
-- Accommodate high-speed and large-volume processing
-- Facilitate multi-vendor and open systems
-- Reduce manpower for system operation and management

MILWAUKEE (SEPT. 4) PR NEWSWIRE - Kevin D. O'Connor, former Milwaukee city alderman, has been appointed to a new position as vice president and manager of public finance in Wisconsin for Norwest Investment Services, Inc. (NISI), a unit of Norwest Corporation (NYSE: NOB). He was vice president, public finance, at First Chicago Capital Markets.

Robert C. Brown, president of Minneapolis-based NISI, said O'Connor's appointment represents the beginning of a significant expansion in Wisconsin of NISI activity in public finance.

In his new position, O'Connor will seek opportunities for Norwest to underwrite and manage taxable and tax-exempt securities for city and county government agencies and for colleges, hospitals and other institutions.

During the past five years, NISI has managed or co-managed more than $6 billion in municipal bonds and other government-related financings in the Upper Midwest, including more than $100 million in Wisconsin.

O'Connor served as Fourth District alderman in Milwaukee from 1974 to 1983 when he joined First Wisconsin National Bank as manager of economic development. He was assistant vice president, public finance, at First Wisconsin National Bank for two years and served as Milwaukee County treasurer before moving to First Chicago in 1989.

A native of Essex Fells, N.J., O'Connor has a B.A. degree from Marquette University (1972) and an M.B.A. degree from the University of Chicago School of Business (1986).

He is president of the Milwaukee Public Library Board of Trustees and is a member of the boards of the Milwaukee Public Library Foundation, the Milwaukee Montessori School and the Milwaukee Symphony Orchestra.

Norwest Corporation is a $26.8 billion diversified financial services organization providing banking, banking-related and specialized financial services through more than 1,290 offices in 47 states and internationally.

LONDON (SEPT. 4) PR NEWSWIRE - The Albert Fisher Group PLC today announced that it has entered into an agreement with Larios S.A. to form a joint company in Spain to be known as Albert Fisher Larios, S.A.

Larios, established in 1866, is a major private Spanish group principally involved in the manufacture and distribution of drink products. In the year to Dec. 31, 1989, it had a turnover of Pts 27,000 million (146 million pounds sterling).

Larios is based in Malaga and has a number of manufacturing and operating locations throughout Spain. They have a wide customer base, serving most supermarkets, cash and carry, catering and wholesale outlets in Spain.

Larios has recently diversified into food and other areas. It has established a number of joint venture and strategic investments in non-food sectors where it is able to use its experience in the areas of commerce and marketing.

The joint company will be formed with an initial capital of Pts 1,000 million (5.4 million pounds). The shares will be owned equally by Albert Fisher and Larios.

The purpose of the joint company will be to acquire and develop companies involved in the processing, sale and distribution of a range of food products in Spain and Portugal.

Immediately after the formation of the joint company, Larios will transfer its interest in Deshidratados y Conservas, S.A. (Trevijano) to the joint company. Trevijano is a well established brand name in Spain and has a factory at Logrono in the region of Rioja in northern Spain.

It is engaged in the production and sale of a range of processed food products in cans and glass jars including conserves, pickles, asparagus and tomato puree.

Albert Fishers said it considers the joint company formed with a group of the stature of Larios the most appropriate way of developing its food processing operations into Spain and Portugal. Larios has strong local management, a broad and well established customer base, and a strong

commitment to the development of the joint company.

This customer base will enable Albert Fisher's Northern European processing companies to market and distribute an increasing range of products through the joint company in Spain. The processing operations within the joint company will in turn provide an additional source of food products for marketing and distribution by Albert Fisher's network of companies in Northern Europe.

IONIA, MI (SEPT. 4) PR NEWSWIRE - Independent Bank West Michigan, a subsidiary of Independent Bank Corporation (NASDAQ-NMS: IBCP), has agreed, in principle, to purchase the White Cloud, Mich., branch banking office of The Peoples State Bank, a subsidiary of Pinnacle Financial Services, Inc. (NASDAQ-NMS: PNFI). The sale will include approximately $28 million in deposits and $18 million in loans and the office's real estate and equipment.

The Peoples State Bank acquired the White Cloud banking office from the Federal Deposit Insurance Corporation in February 1988, after The First State Bank, White Cloud, was closed by the Michigan Financial Institutions Bureau.

The transaction is subject to the execution of a definitive agreement between the two banks and approval by the appropriate federal and state bank regulatory bodies. If the necessary regulatory approvals are received and the sale closes, the White Cloud operation will become a branch of Independent Bank West Michigan.

The purchase price was not disclosed. At this time, it is not known what effect, if any, the sale will have on employment at the White Cloud banking office or at the main office of either bank.

Independent Bank West Michigan's main office is in Rockford, Mich. The Peoples State Bank's headquarters is in St. Joseph, Mich.

In addition to Independent Bank West Michigan, Independent Bank Corporation, an Ionia-based bank holding company, has two other subsidiaries: Independent Bank, Ionia, and Independent Bank South Michigan, which has its main office in Leslie, Mich. Independent Bank Corporation common stock is traded in the over-the-counter market and quoted on the NASDAQ National Market System under the symbol IBCP.

Pinnacle Financial Services, Inc. is a registered bank holding company. The Peoples State Bank is its principal subsidiary. Pinnacle Financial Services common stock is also traded in the over-the-counter market and is quoted on the NASDAQ National Market System under the symbol PNFI.

DETROIT (SEPT. 4) PR NEWSWIRE - Ford Motor Company is modifying its buyer-incentive program by offering cash allowances or annual percentage rate (APR) financing on most of its 1991 cars and trucks.

The new program, which covers both 1990 and 1991 models including the new Ford Escort and Mercury Tracer, will end on Sept. 26, the company's official introduction date for 1991 models. Included in the new program are cash allowances ranging from $500 to $1,000, or low-rate financing from 4.8 to 10.9 percent from 24 to 60 months.

Not included in the program are the 1991 Mercury Capri, the 1991 Ford Explorer and 1991-model Lincolns; the buyer incentives on the 1990 models are unchanged.

"With many 1991 products already available or on their way to Ford and Lincoln-Mercury dealerships and a selective number of 1990 models still in

stock, we intend to keep our dealers competitive on all fronts in a very difficult market," said Robert L. Rewey, vice president -- Ford North American Sales Operations.

Following are details of Ford's new car and truck programs:

Ford and Mercury Car	1990 Models	1991 Models
Crown Victoria (89/90 model)	$1,000 or APR(b)	-
Grand Marquis (89/90 model)	$1,000 or APR(b)	-

WILSON, NC (SEPT. 4) PR NEWSWIRE - BB&T Financial Corporation (NASDAQ-NMS: BBTF) has completed its acquisition of First Federal Savings Bank of Pitt County and its five offices located in Greenville, Ayden, Farmville, and Grifton.

Under the terms of an agreement announced Oct. 23, 1989, BB&T Financial Corporation has issued 1.75 shares of its common stock for each outstanding share of First Federal common stock. BB&T issued 679,875 shares and now has approximately 21,465,000 shares of common stock outstanding. As of June 30, First Federal Savings Bank of Pitt County had total assets of more than $138 million.

The Pitt County acquisition, effective Sept. 1, marks the second time BB&T Financial Corporation has acquired a healthy thrift institution. Earlier this month, BB&T completed the acquisition of Carolina Bancorp Inc. and its subsidiary, First Federal of the Carolinas, F.A. On Aug. 20, the four offices of that thrift opened for business as BB&T Federal Savings Bank of High Point.

Current plans call for First Federal Savings Bank of Pitt County to change its name to BB&T Federal Savings Bank of Pitt County later this year.

"This acquisition will enhance our efforts to provide high-quality service to more customers in the dynamic Pitt County area," John A. Allison, chairman and chief executive officer of BB&T Financial Corporation, said. "First Federal's customers will be served by the same fine employees and receive the same quality service as always. Now, they also will have access to an expanded line of products and services through BB&T."

Burney S. Warren III, president and chief executive officer of First Federal Savings Bank of Pitt County, said joining BB&T Financial Corporation is a good move for everyone associated with the Greenville-based thrift.

"BB&T shares our commitment to putting the customer first," he said. "Our employees have gained a number of exciting new opportunities and our shareholders have acquired stock in a company with a bright future."

BB&T Financial Corporation is the parent company of Branch Banking and Trust Company, the oldest bank in North Carolina and the state's fourth largest; BB&T of South Carolina with 15 offices in the Palmetto State; and BB&T Federal Savings Bank of High Point. Through its subsidiaries, BB&T Financial Corporation now operates 200 offices in 110 cities and towns in North and South Carolina and has assets in excess of $5.2 billion.

The Wilson-based corporation also has announced agreements to acquire three other healthy thrift organizations: Albemarle Savings & Loan Association, Elizabeth City; Gate City Federal Savings and Loan Association, Greensboro; and Home Savings and Loan Association, Durham.

RALEIGH, NC (SEPT. 4) PR NEWSWIRE - Texfi Industries, Inc. (NYSE: TXF) today reported results for the third quarter -- the 17th consecutive profitable quarter -- and the first nine months of fiscal 1990.

Sales increased 24 percent to $73,084,000 for the three months ended Aug. 3, 1990, compared to sales of $58,843,000 for the same quarter of 1989. Operating income was down 9 percent to $4,937,000 from $5,417,000 due primarily to weakness in sales yarn and continued startup costs in the relocation of narrow elastic manufacturing facilities from New England to North Carolina. While this quarter's market was difficult, earnings from finished and greige woven fabric sales were approximately equal to last year's third-quarter results. The fleece wear and jersey T-shirt apparel operations accounted for 28 percent of the operating income for the quarter compared to a small loss for the quarter a year ago. A 91 percent increase in interest expense and taxes reduced operating income of $4,937,000 to net income of $1,544,000, or $.09 per common share. This compares with operating income of $5,417,000 and net income of $3,631,000, or $.36 per common share, for the third quarter of 1989. Additionally, earnings per common share during the third quarter of 1990 were adversely affected by the early retirement of approximately 33 percent of the company's preferred stock.

For the nine-month period ended Aug. 3, 1990, net income was $4,645,000, compared to net income of $9,624,000 during the comparable period in the prior year. Net sales for the three quarters were $195,674,000, an increase of 17 percent from net sales of $166,610,000 compared to 1989. Earnings per common share were $.28 for the nine- month period vs. $.92 per common share a year ago.

Texfi Industries, Inc. is in the business of manufacturing and marketing various textile and apparel products. Texfi's common stock, preferred stock, and convertible debentures are traded on the New York Stock Exchange.

LUND, SWEDEN (SEPT. 4) PR NEWSWIRE - Gambro AB (NASDAQ: GAMBY) today announced that it had acquired the Italian dialysis solution company, Farma SIAP SpA in Pescara, for approximately SEK 20 million or US$3.4

million (Note).

This is the second time in recent years that Gambro has acquired an Italian dialysis solution company. In 1988, Biosol SpA in Bologna was acquired, a company producing solutions with applications in such various forms of dialysis as hemofiltration, hemodiafiltration, biofiltration and peritoneal dialysis.

The increasing demand experienced for dialysis solutions in the Italian market means that Biosol will reach its maximum production capacity as early as 1991. The acquisition of Farma SIAP doubles Gambro's production capacity in this important field.

Gambro's sales of dialysis solutions to customers is estimated to reach approximately SEK 70 million or US$12.1 million during the current year. Within three years, the group expects its sales of this product to have increased to SEK 220 million or US$38 million.

(Note) -- Translation rate is approximately SEK 5.8 to US $1.

CONTACT: Inger Larsson of Gambro AB, 011-46-46-169167, or Jennifer R. Wall or Ken Donenfeld of D.F. King & Co., 212-269-5550, for Gambro

#90247p0987 09/04/1990 ~PR Newswire

RALEIGH, NC (SEPT. 4) PR NEWSWIRE - An Amoco Oil Co. marketing executive told North Carolina state legislators today that his company "has wholeheartedly accepted President Bush's request of all U.S. petroleum companies to show extra prudence and restraint in pricing."

From June 1 to late last week crude oil prices increased more than 20 cents per gallon, "while Amoco's wholesale product prices increased only about 10 cents per gallon nationwide and in North Carolina," John C. Bergman, Amoco's vice president marketing operations - East Zone, said in a statement before the Legislative Commission on Governmental Operations of the North Carolina General Assembly.

According to Bergman, upward pressure on crude oil prices actually began early in the summer -- well before the Iraqi invasion of Kuwait -- based on the decision by OPEC to lower production quotas. "During this time, Amoco's wholesale gasoline prices in North Carolina actually decreased an average of 4.5 cents per gallon," he said.

Since the invasion, he noted, even though wholesale gasoline prices have increased, they still lag behind the increases in crude prices.

"We are continually charged with making an unjustified profit on crude oil

that was pumped out of the ground and paid for some 45 days ago -- the approximate time it takes for a tanker to reach the United States," Bergman said. "This might sound logical, but it doesn't square with the facts. The truth is, there is really no such thing as old oil any more."

He pointed out that 80 percent of the world's crude oil is priced on delivery according to a formula based on spot market prices. "When we contract for a cargo of crude oil, the price is usually not set until it's delivered to one of our refineries."

Bergman said that recent one-day downward price fluctuations in the crude oil futures market do not guarantee quick price drops at the retail level. "We are dealing with more than one market here, and crude oil and retail gasoline markets are distinctly different.

"Other components that must be figured into the price of retail gasoline are supply and demand, quality, environmental costs, and competition. Rest assured that over time, however, if crude prices fall, gasoline prices will reflect the decline."

Bergman pledged that Amoco will continue to price products fairly. To demonstrate its commitment, the company froze wholesale prices from the period of Aug. 9 through Aug. 15. He said that Amoco will not make a practice of pricing below the market.

"Pricing below the market can cause a run on supplies. Above all else, we want to avoid such a situation, which is harmful to Amoco, our dealers and jobbers, and our customers."

Amoco Oil Co. is the petroleum refining, transportation, and marketing subsidiary of Chicago-based Amoco Corp. North Carolina's third-largest marketer, Amoco has 685 branded stations in the state.

JACKSON, MI (SEPT. 4) PR NEWSWIRE - Due to refunds received from natural gas pipeline suppliers, Consumers Power Company is refunding to customers approximately $29.5 million, including interest, based on 1987 gas consumption. At the same time, the utility is billing gas customers $11.7 million, including interest, due to an underrecovery of actual gas costs for 1988.

The utility's typical residential gas customer who has received service since 1987 will receive a net credit of approximately $11.60 as the result

of the adjustments. A typical residential customer consumes approximately 130,000 cubic feet of gas per year.

"This adjustment further reduces gas costs for our customers who already pay rates among the lowest in the nation," said Michael G. Morris, the utility's executive vice president of natural gas and marketing. A recent American Gas Association (AGA) study showed that Consumers Power's rate for a typical residential gas customer was lower than that charged by 81 percent of the nation's gas utilities.

"Stable rates for customers will continue due to unique long-term contracts Consumers Power has negotiated with gas suppliers," Morris said.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties. It is the nation's sixth-largest gas distribution utility serving 215 cities and villages including suburban Detroit, Bay City, Flint, Jackson, Kalamazoo, Lansing, Pontiac and Saginaw in 40 of the 68 Lower Peninsula counties.

#90247p0996 09/04/1990 ~PR Newswire

FARNBOROUGH, ENGLAND (SEPT. 4) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) is bullish on the future of its military helicopters.

Prospects for the company's military helicopters -- the AH-64 Apache and the MD 500 Defender series -- are "very promising," said Tom Gunn, president of McDonnell Douglas Helicopter Co.

Additionally, the McDonnell Douglas/Bell Helicopter Textron SuperTeam

reached a major milestone last week on the U.S. Army's Light Helicopter program when it submitted its proposal for the next phase of the program.

"Military helicopter sales have been the bedrock of company revenues since we first produced nearly 1,500 OH-6A scout helicopters for the Army during the Vietnam conflict in the late 1960s," Gunn said.

"We expect our leadership in the defense industry to remain strong -- even in light of reduced military spending -- while we simultaneously place more emphasis on our commercial products," he added.

Gunn said the helicopter company's reorganization following financial losses in 1989 is enabling McDonnell Douglas to build a team that will be more responsive to customer needs and shifts in the market place.

Gunn recently named Ervin J. Hunter as the new vice president of the company's AH-64 division and boosted its MD 500 program to full division status. Al Haggerty is the vice president and general manager of the LH program. The company is reviewing candidates for general manager of the MD 500 program to replace former general manager Frank Palminteri, who has been named general manager of the company's California Manufacturing Center.

Apache: the world's best
In military markets for attack helicopters, the AH-64 Apache remains a top contender.

Worldwide, the potential Apache market exceeds 500 aircraft, said Max Wiley, director of international business development for McDonnell Douglas Helicopter.

"Western European, Asian and Middle Eastern nations with modern armies are committed to a balance in the military equation throughout the world," said Wiley.

"To maintain a strong defense in today's climate of reduced military spending, there very likely will be trade-offs of heavily armored, forward-based forces in favor of more mobile forces and flexible firepower " he said.

The Apache has multi-mission flexibility -- for reconnaissance, escort, anti-personnel, surveillance and anti-armor -- all with a useful payload of approximately 6,000 pounds of fuel and ordnance, Wiley added.

The Apache can carry that payload in addition to its mission equipment package of pilot navigation and long-range targeting systems, day TV, direct-view optic sight, laser designator/range finder and laser-spot tracker.

To date, more than 600 Apaches have been delivered to the Army. Production of U.S. Army helicopters, now at six aircraft a month, is expected to run through fall 1993.

The milestone 600th Apache was delivered to the Army in a special ceremony at the helicopter company's Mesa, Ariz., headquarters on Aug. 14.

NEW ORLEANS (SEPT. 4) PR NEWSWIRE - Entergy Corp.'s (NYSE: ETR) board of directors acted on Aug. 31 to increase the company's stock repurchase program by $135 million, according to Jerry D. Jackson, Entergy Corp. executive vice president of finance and external affairs.

Amounts previously authorized by Entergy's board for the acquisition of common shares had been expended.

Under the program, instituted in November 1989, Entergy has repurchased over 13.8 million shares of its common stock at a total cost of nearly $275 million. These repurchases have reduced the number of shares outstanding to approximately 190.8 million.

Repurchases are made from time to time depending upon favorable market conditions and there is no assurance as to the actual amount of repurchases that will occur under the program.

SEATTLE (SEPT. 4) PR NEWSWIRE - Asiana Airlines of Korea announced major equipment commitments for the future, selecting four types of Boeing airliners to serve its growing route system over the next decade, Boeing Commercial Airplane Group confirmed today.

The announcement includes firm orders for 27 aircraft and options for 24 more. Total value of the 51 aircraft is almost $6 billion (in delivery year dollars), of which about $3 billion is firm. The order includes:

747-400 Passenger/Combi	6 firm	6 options
747-400 Freighter	3	3
767-300	10	8

737-400	8	7
TOTAL	27 firm	24 options

Asiana Chairman I. S. Hwang and Boeing Commercial Airplane Group President Dean Thornton signed the order agreement at the biennial Farnborough International Air Show. Thornton expressed his appreciation to Asiana for their confidence in Boeing and for their commitment to become one of the largest all-Boeing fleet operators in the world.

The carrier holds previously announced orders (valued at about $1 billion) for two 767-300s to be delivered in October this year; two 747-400s with first delivery in late 1991 and five 737-400s with options for an additional five 737-400s.

Asiana presently operates a fleet of 10 737-400s and two 737-500s, all under lease. When all orders and options announced are exercised, the carrier's purchases from Boeing will total 65 jetliners.

"The growth of this airline, which has been in service less than two years is the result of Asiana's dedication, determination and professional approach," Thornton said. "We look forward to working closely with them in introducing the 767 and the 747 into their fleet in the coming months.

"I am confident they will be as successful with these larger aircraft as they have been with the 737," Thornton said. Asiana has recorded a 99.82 percent dispatch reliability rate during the past year, ranking it among the leaders of all carriers operating the 737-400.

BOSTON (SEPT. 4) PR NEWSWIRE - Healthco International, Inc. (NASDAQ: HLCO) and Hicks, Muse & Co., Incorporated jointly announced today that Healthco and Hicks Muse had entered into a definitive agreement providing for a merger of Healthco with HMD Acquisition Corporation, an affiliate of Hicks Muse and Ray C. Davis, at a per share price of $19.25 in cash with a total transaction value of approximately $250 million. Davis is a former senior executive with Colt Industries.

In making the announcement, M. Myer Cyker, chairman and chief executive officer of Healthco, stated: "Healthco's board and management have worked long and hard over the past several months to protect and enhance the value of our stockholders' investment in Healthco. Following a diligent and intensive effort, the board has accomplished its stated goal of maximizing the value of our stockholders' investment in Healthco: we have

obtained for our stockholders an extremely favorable transaction with a first-class organization. We strongly believe that the transaction with Hicks Muse will significantly benefit Healthco's future growth and development, will provide greater opportunities for its employees and will help Healthco better serve its thousands of loyal customers. We were attracted to Hicks Muse because of their record in building companies for the long term and to take advantage of the opportunities a combination with them presented."

"Hicks Muse is a quality organization for which we have the greatest respect and has an unblemished record of successfully completing acquisitions. We are confident that they will continue their record in Healthco's case, and are excited at the prospect of working with them to that end and in the future."

The transaction is currently expected to be effected by means of a cash merger between Healthco and HMD Acquisition, although Hicks Muse may at its option proceed by way of a cash tender offer and second-step merger. The agreement is subject to financing and the approval of Healthco's stockholders. The transaction is expected to close in late fall.

"Healthco is an attractive opportunity because it is the leading provider of products and services in its market niche, the dental profession," according to Thomas O. Hicks, chairman and chief executive officer of Hicks Muse. "We see an excellent opportunity to combine the strong operating leadership of Ray Davis with the knowledge and vision of the Healthco management group led by Myer Cyker. We look forward to building on the Healthco market position to profitably expand its market presence worldwide."

Healthco International, Inc. is a major provider of supplies, equipment and services to dentists and institutional providers of dental care, including dental schools and dental laboratories. Healthco currently has operations in the United States, Canada and Western Europe. In 1989, Healthco had revenues of approximately $437 million.

Hicks Muse & Co. is a Dallas-based investment firm. The firm's partners are Thomas O. Hicks, John R. Muse and Jack D. Furst. The principals of Hicks Muse have completed approximately $6 billion of acquisition transactions since 1984. During 1990, Hicks Muse has completed two acquisitions; the purchase of seven life insurance companies through Life Partners Group, Inc. for $530 million in March and the purchase of Neodata Services from The Dun & Bradstreet Corporation and TMI Corporation in a combined transaction for $106 million in August.

CONTACT: Stanley J. Kay or Daniel H. Bruce of Dewe Rogerson Inc., 212-688-6840, for Healthco; or Steve Bruce or Jerry Hostetter of Abernathy/MacGregor Group, 212-371-5999, for Hicks, Muse & Co.

#90247p1008 09/04/1990 ~PR Newswire
WASHINGTON (SEPT. 4) PR NEWSWIRE - The Oversight Board announced today the appointment of several key staff positions. Effective immediately, Kenneth Bacon will serve as director of policy, Donald Billings as director of financial analysis, Ralph Gill as director of oversight and evaluation, Larry Hicks as director of management and Jonathan Petuchowski as special assistant to the president.

As director of policy, Bacon will plan and direct the development and analysis of Oversight Board policies and their implementation by the Resolution Trust Corporation (RTC).

Before joining the Oversight Board, Bacon was vice president of structured finance at New York-based Morgan Stanley & Company since 1987. From 1982 to 1987, Bacon held several key positions with Kidder, Peabody & Company in New York in the asset finance and public finance areas.

Billings will serve as director of financial analysis. He came to the Oversight Board from the board of governors of the Federal Reserve System in Washington, where he was a supervisory financial analyst for the multinational section since 1984.

Prior to working for the Federal Reserve Board in Washington, Billings spent more than two years as an examiner for the international unit in the Los Angeles office of the Federal Reserve Bank of San Francisco. Billings was an associate with Durham Associates, a San Francisco consulting firm, from 1980 to 1981.

Prior to working for the Oversight Board, Gill was vice president for mergers and acquisitions at Wardley Incorporated, an investment bank in New York. From 1987 to 1989, Gill served as assistant vice president in

the corporate finance department at the investment bank of Wood Gundy Inc. in New York.

Before joining Wood Gundy Inc., Gill practiced law with the real estate group at the law firm of Sullivan & Cromwell in New York, where he was involved in the sale of real estate assets and mortgage-backed securities. From 1980 to 1982, Gill was an analyst in the mergers and acquisitions department of New York-based Morgan Stanley & Co. Inc.

As director of management, Hicks will serve as the Oversight Board's chief administrative officer, responsible for personnel, business services and financial and information resource management.

Hicks most recently served as director of personnel resources for the Department of Treasury in Washington since 1986. From 1984 to 1986, Hicks was a personnel officer for the U.S. Commission on Civil Rights. For seven years, Hicks served as a personnel specialist and supervisor for various federal agencies.

Petuchowski will serve as special assistant to Oversight Board President Monroe. Since 1987, Petuchowski was a corporate attorney with the New York firm of Stroock & Stroock & Lavan, where he specialized in mortgage-backed securities. From 1980 to 1984, Petuchowski was a portfolio manager for Bankers Trust Company in New York.

The Oversight Board formulates the policy, approves the funding and provides the general oversight of the Resolution Trust Corporation, the agency responsible for resolving the nation's failed thrifts.

#90247p1010 09/04/1990 ~PR Newswire

LOS ANGELES (SEPT. 4) PR NEWSWIRE - British Airways salutes the Battle of Britain, a turning point for the Allies in its battle for freedom during World War II. The battle, which occurred 50 years ago, is celebrated as the greatest air battle in history.

Commemorating this heroic fight for liberty, two events are scheduled to permit Americans and British ex-patriates alike to glimpse this momentous period when British citizens and pilots together demonstrated their indomitable spirit and determination. The synergy exhibited then was indeed the catalyst that helped them win this critical battle of World War II. James Stewart, distinguished actor and retired U.S. brigadier general will serve as honorary chairman for both programs.

The first function is the Battle of Britain Hangar Dance being held at the Museum of Flight at Santa Monica Airport on Sept. 8. Scheduled from 8 p.m. to midnight at a cost of $25 per person, this unusual gathering re-creates the popular NAFFI dances of World War II. Hangar appointments include a World War II Spitfire, Morgan automobiles, airfield sand bags and a multitude of parachutes. Celebrities are expected and everyone will dance to swing bands, the ever-popular music of the era. British Airways is offering a trip for two to London as a door prize.

The Battle of Britain Black Tie Ball on Oct. 6 is the second fete planned to honor the 50th year of this renowned battle. A formal evening in the perfect setting of the Grand Salon at the Queen Mary in Long Beach will transport attendees to a time when honor, patriotism and the fight for freedom permeated the very air. Dancing and dinner is priced at $100 per person.

Proceeds raised at both affairs go to benefit the Royal Air Force (RAF) Benevolent Fund. Comparable to the U.S. government-sponsored Veteran Administration, the RAF Benevolent Fund finances shelter, medical treatment and educational scholarships for present and past members of the RAF. Other recipients of these benefits include members of the Women's Services, the Royal Auxiliary Air Force, the Royal Air Force Auxiliary Air Force and the Royal Air Force Reserves. Widows, children and other dependents of members of the aforementioned organizations also receive assistance.

British Airways pays tribute to the 50th Anniversary of the Battle of Britain in honor of its British Heritage. "We at British Airways are proud to pay homage to the Battle of Britain, one of history's finest moments. We are honored to support an occasion that is representative of our country's spirit and devotion to liberty."

#90247p1014 09/04/1990 ~PR Newswire

LYNN, MA (SEPT. 4) PR NEWSWIRE - GE (USA) (a) Aircraft Engines has appointed DLT A.E.R.O. Services GmbH as an authorized CF34 repair and overhaul facility.

The DLT A.E.R.O. Services' shop in Alzey, Germany, about 50 km SW of Frankfurt, will expand its current capabilities to support the entry of GE's CF34 turbofan engine into airline service powering the Canadair Regional Jet. The CF34-powered Regional Jet (RJ) is expected to enter European service in 1992.

Wolfgang Hergesell, chief executive of DLT A.E.R.O. Services, said, "The addition of the CF34 to our facility is part of our long-term plan to become a major shop supporting the expanding regional airline business in Europe. The major shareholder of our 100 percent mother company DLT Airlines (Deutsche Luftverkehrgesekkschaft) is Lufthansa. Lufthansa and GE have had a long and successful engine shop relationship for large engines in Hamburg, so our partnership with GE on the CF34 becomes more obvious as our mother company, DLT Airlines, prepares to acquire a large fleet of CF34-powered Canadair RJs."

Theo Hilger, chief executive of DLT A.E.R.O. Services, added that the final go-ahead of the shop extension is subject to final approval by DLT A.E.R.O. Services' supervisory board and Lufthansa's supervisory board approval of the Canadair Regional Jet purchase; both are expected in the near future.

The new CF34 facility is part of GE's product support plan to strategically locate repair and overhaul facilities consistent with the expansion of its markets around the world. The current major maintenance shop is GE's Aircraft Engine Maintenance Center at Strother Field in Arkansas City, Kan.

DLT A.E.R.O. Services GmbH was founded in 1987 to maintain DLT Airlines PWC 100 series engines powering their Fokker 50 and Embraer 120 fleet. Since then, DLT A.E.R.O. has obtained long term contracts with major regional aircraft operators for overhaul and repair of the engines installed in the Fokker 50, Embraer 120, Boeing/De Havilland-8, and the ATR 42 aircraft.

Beginning in October, DLT A.E.R.O. will also take care of Lufthansa's and other customers APU PWC 901 A on the Boeing 747-400 aircraft. DLT A.E.R.O. Services in Alzey presently has a workshop floor space of 43,000 square feet plus offices.

This shop is new and modernly equipped with cleaning and crack detection, balancing, all assembly/disassembly tools and fixtures, up-to-date measuring equipment, three dimensional computerized measuring machines, painting, blasting, machine shop and parts repair facilities. The shop is also equipped with a fully computerized engine test stand which can take turboshaft engines, APU's and jet engines up to 24,000 pounds of thrust. The facility is situated on property which will accomodate a fourfold shop expansion as business grows.

#90247p1015 09/04/1990 ~PR Newswire

DUBLIN, IRELAND (SEPT. 4) PR NEWSWIRE - The directors of CRH plc, the international building materials group, today reported profits of

32,131,000 Irish pounds before tax, for the six months ended June 30, 1990 compared with 27,184,000 pounds in the corresponding period last year. Basic earnings per share amounted to 8.86p as against 7.35p in 1989, an increase of 21 percent. Fully diluted earnings per share amounted to 8.80p, an increase of 22 percent.

The results reflect a further strong improvement in operating profits in Ireland and Mainland Europe and very modest increases in the United States and the United Kingdom, both helped by acquisitions.

The board has decided to pay an interim dividend of 2.00p per share on the ordinary and income capital of the company in respect of the year ending Dec. 31, 1990. The dividend of 2.00p compares with an interim dividend of 1.75p for 1989, an increase of 14.3 percent. Dividend warrants will be posted on Oct. 5, 1990, in respect of ordinary shares and on Oct. 9, 1990, in respect of income shares, to shareholders registered at the close of business on Sept. 20, 1990.

In Ireland, the recovery in construction activity experienced in 1989 continued. The company's cement sales volumes on the home market showed a good advance over the same period last year, while volumes of some of its other construction materials registered stronger increases. Exports decreased, mainly due to the cessation of low-margin clinker exports to Britain.

Premier Periclase's seawater magnesia sales volumes were similar to 1989 levels. However, sales mix and currency effects had an adverse impact on average prices with the result that profits were lower.

The T.B.F. Thompson group benefited from strong demand in northern Ireland and a good performance from their stone importing and blacktop operations in the South of England.

In Britain, the continuing decline in housing activity has had an increasingly depressing effect on the company's Keyline merchanting operations, most particularly in the south east of England. Forticrete enjoyed a relatively good demand for its masonry block and slate products in the first quarter and, despite deteriorating demand since then, turned in a good performance against a difficult background. Anchor Tile also experienced difficult markets although demand for its specialized roofing products was helped as a result of severe storms experienced earlier in the year.

In the United States, activity in the pacific states continued strongly while the mountain states registered a slight improvement on depressed 1989 levels. While CRH markets in the southern states generally remained weak, the newly acquired Betco Block and Goria Enterprises enjoyed good demand for their concrete masonry and paving products. In the northeast,

Callanan traded at a similar level to 1989. The reduction in related company losses mainly reflects an improved performance from Pike Industries in New England.

In the Netherlands, all operations reported improved trading. The Van Neerbos Gamma division was again outstanding. In Spain, although high interest rates are affecting the residential construction sector, activity in the commercial, industrial and infrastructural sectors in the company's markets continues to be strong and the Catalan Concrete Group reported good progress.

The debt ratio of 24.9 percent reflected both seasonal working capital requirements and the issue of convertible capital bonds in March 1990. Expenditure on acquisitions, investments and capital projects in the first six months of 1990 amounted to 114.7 million pounds.

Since June 30, the downturn in U.K. construction activity has intensified and a slowing in demand in the agricultural sector is likely to impact on the rate of volume growth in Ireland. In addition recent events in the Middle East have further clouded the international economic outlook. Nevertheless, the company's strategy of geographic, sectoral and product balance should ensure that the full year results show an improvement on a record 1989.

HOUSTON (SEPT. 4) PR NEWSWIRE - As the first major airline subsidiary to consolidate under one operating certificate, Continental Express announced today the operational integration of its regional partners.

Although other major airlines have various marketing agreements and code-sharing arrangements with regional airlines, Continental is the first to consolidate its owned partners into one operating entity. The airline pursued this course to realize the benefits of standardization and the associated operational and financial efficiencies. These efficiencies translate into more reliable and economical operations. Continental Express remains a subsidiary of Continental Airlines, with the primary mission of providing connecting traffic through Continental's hubs at Cleveland, Denver, Houston, and New York/Newark.

Stephen J. Kolski, president of Continental Airlines' Commuter Division, said, "With our integration complete, we have transitioned from operational consolidation to operational excellence. Continental Express is committed to serving our customers with state- of-the-art aircraft,

on-time performance, outstanding customer service, and convenient connecting schedules to all parts of the world via Continental Airlines."

As a result of integration, Continental Express realizes significant cost savings through the establishment of a technically advanced operations center located in Houston. This center was originated by Continental Express as the "nerve center" of its domestic and international flight system. All operating functions, including aircraft system control, management of technical manuals, crew scheduling, crew training, maintenance control, quality control, and record keeping are performed in one facility. Previously, the carrier had three operating facilities in separate regions of the country.

With the consolidation, Continental Express has achieved greater flexibility and reliability with its fleet of 102 state-of-the-art turboprop aircraft. For example, aircraft can now be transported to any region throughout the system to meet fluctuations in demand. Continental Express can readily remove capacity from the Western Region's Denver hub after ski season, and reallocate seats to the Cape Cod operation during summer months.

Integration also benefits the airline's customers, as Continental Express utilizes its modern 46-passenger Aerospatile/Aeritalia ATR-42, and 30-passenger Embraer 120 Brasilia to provide greater frequency of comfortable service to many Continental cities.

NEW YORK (SEPT. 4) PR NEWSWIRE - Futuristic Innovations Inc. (OTC "Pink Sheets") today announced that it had executed a letter of intent for a reverse merger with Asia Pacific Communications Corp. (APC). APC is a publishing and communications company which provides strategic business information about the Asia Pacific region to English language users in North America, Europe and Asia.

APC, through its affiliate, Asia Pacific Communications Inc., currently publishes Venture Japan, a business journal similar to the Harvard Business Review which covers topics relating to Japan and its international investment and trading partners. APC also produces investment directories, newsletters and "white papers" which are focused on individual countries and industries within the Asia Pacific region.

In an independent transaction, APC previously signed a letter of intent with Billion Publishing Ltd. (BPL), a Hong Kong company, to amalgamate BPL with APC. BPL has been the publisher of Billion magazine,

a business publication that provides business data and feature stories on leading companies and individual entrepreneurs who are shaping the "Pacific Century."

James Borton, editor and publisher of Venture Japan, believes that the acquisition of Billion would help APC achieve a critical mass of subscribers, advertisers and sources of information which should assist the company to reach its goal of becoming a leading provider of strategic information about the Asia Pacific area for the English-speaking world.

John W. Allen, chairman of APC, and Peter Moix, president of Futuristic, believe that the company, which will utilize the name Asia Pacific Communications Corp., will become a highly regarded and profitable communications link between countries in the Asia Pacific region and their North American and European counterparts.

Peter Yip, president of Info Pacific Ltd., a Hong Kong-based investment bank, initiated and assisted in the various transactions.

The letters of intent referenced above are subject to final agreement and approval by the boards of directors of the respective organizations.

FARNBOROUGH, ENGLAND (SEPT. 4) PR NEWSWIRE - The success of McDonnell Douglas' (NYSE: MD) commercial helicopter programs continues as certification nears for the company's newest aircraft, the MDJ520N/530N, each of which uses the revolutionary NOTAR(tm) system for anti-torque and directional control.

With U.S. military budgets decreasing, a strong commercial marketplace worldwide is important to McDonnell Douglas Helicopter Co., according to Max Wiley, director of international business development for the Mesa, Ariz., manufacturer.

"We are well positioned to take advantage of this growth in the commercial market," Wiley said, "because we have invested heavily over the past few years in developing new products, such as MDX and our MD 520N and MD 530N helicopters.

"Our goal is to have a 50-50 mix of military and commercial helicopter sales by the year 2000."

Progress on McDonnell Douglas Helicopter's new MDX helicopter, an eight-place, twin-engine aircraft that will fly first in 1992, is continuing.

The company recently completed 1/25th scale model wind tunnel tests at Texas A & M University that verified all anticipated performance data.

The MDX, which also uses the NOTAR system, will include participation of several international partners. These include Hawker de Havilland of Australia, which is building the airframe; Kawasaki Heavy Industries of Japan, which is manufacturing the transmission; and two engine suppliers, Pratt & Whitney of Canada and Turbomeca of France.

Certificates of interest have been received for approximately 280 MDX aircraft.

Flight testing of the MD 520N/530N continues to verify the company's enthusiasm for the NOTAR system, according to program manager Jim Van Horn.

With more than 50 flight hours on the two aircraft in the test/certification program, "performance data for fuel consumption and power requirements are very encouraging," he said.

A third NOTAR system-equipped aircraft joined the test program in late August. The MD 530N is scheduled to perform daily at the Farnborough Air Show.

BATTLE CREEK, MI (SEPT. 4) PR NEWSWIRE - Kellogg Company (NYSE: K) today announced three executive promotions:

Donald W. Thomason to executive vice president - technology and employee services;

Jay W. Shreiner to vice president - corporate information technology; and

Michael J. Teale to executive vice president - operations, U.S. Food Products Division (U.S.F.P.D.). Teale also will continue as corporate vice president.

"These appointments further strengthen our management team and better position our organization to meet the challenges we face in the marketplace and to take greater advantage of the growth opportunities that

lie ahead," said William E. LaMothe, Kellogg Company chairman of the board and chief executive officer.

Thomason has served as corporate vice president and executive vice president, U.S.F.P.D., since January of 1989. He joined Kellogg as a student summer employee during 1963 at the Memphis, Tenn., cereal production facility. He has held many positions in plant and executive management.

Shreiner has served as vice president - financial planning and analysis since August of 1989. He previously was vice president and treasurer. He joined the company in March 1983 as assistant treasurer.

Teale has served as vice president - corporate technology since July 1989, and has had the additional responsibility of senior vice president - manufacturing and technology, U.S.F.P.D., since January of 1990. He joined Kellogg Company of Great Britain in 1966 at the Manchester cereal production facility.

GERMANTOWN, MD (SEPT. 4) PR NEWSWIRE - Microlog Corporation (NASDAQ: MLOG) reported a net income of $4,366 or $.00 per share, on revenues of $3,766,394 for its third fiscal quarter ended July 31, 1990.

This compares with a net income of $475,150, or $.20 per share, on revenues of $4,498,693 in last year's comparable quarter.

The results of the nine months ended July 31, 1990 are a net income of $88,768, or $.03 per share, compared to a net income of $137,741, or $.06 per share, for the prior comparable period.

"While the current quarter's voice processing segment bookings improved over the second quarter, we are less optimistic about meeting our original plan for the full fiscal year," commented J.G. Hartwell, chairman and chief executive officer. "Sales through our distributors have been particularly disappointing. However, we are working to improve this situation," concluded Hartwell.

TULSA, OK (SEPT. 4) PR NEWSWIRE - Kinark Corporation (AMEX: KIN) announced today that the agreement to sell the Camelot Hotels in Tulsa and Little Rock, Ark., for $12 million was terminated. The buyer, Wilmae, Inc., breached terms of the agreement resulting in forfeiture of a $50,000 deposit. Paul Chastain, co-chief executive officer of Kinark, said the company intends to continue its efforts to sell the hotels.

Chastain said, "We are re-evaluating the hotel investment and additional holding costs in light of this development, and expect to recognize any financial impact in the third quarter ending September 30." In earlier releases, the company had reported that Wilmae was encountering delays in closing the transaction. Kinark Corporation, with corporate headquarters in Tulsa, operates chemical facilities in Chicago and Montgomery, Ala., and supports industrial/commercial construction and metals corrosion protection with galvanizing plants in Denver; Louisville, Ky.; Nashville, Tenn.; St. Louis; Houston and Hurst, Texas.

SAN FRANCISCO (SEPT. 4) PR NEWSWIRE - Beginning today, Sept. 4, Wells Fargo is launching a three-phase program to eliminate smoking from all of its buildings and branches in California. It is the first bank in California to do so.

"Project Smoke-Free" is a result of an employee task force formed two years ago to review the bank's initial 1984 smoking policy that allowed smoking only in designated areas. The task force was formed from various line groups within the bank.

"Smoking in the workplace has been one of the most discussed employee issues at Wells Fargo for years," said Steve Enna, executive vice president of Wells Fargo's personnel division. "This issue generates more letters to our confidential opinion program than any other topic in the company."

Starting today, the cigarette vending machines at Wells Fargo will disappear. In November, smoking will be permitted only in designated smoking rooms and lounges. By April 1, 1991, smoking will not be permitted within any Wells Fargo building, period.

The three-stage program was announced to employees early in August. So far according to Enna, overall reaction has been very positive. "Smokers and non-smokers alike recognize the health issues surrounding smoking and the effects of secondhand smoke," said Enna. "They understand that we are doing this from a health and wellness standpoint and in response to overwhelming employee demand."

The bank is providing resources to help smokers adjust gradually to a non-smoking environment before April 1. It will sponsor American Lung Association seminars for employees beginning in September, and employees can order self-help workbooks and motivational video programs through the bank's work/family resource center.

Smokers are not required to quit smoking, but as of next April they will

have to go outside their building if they want to indulge. "Employees can use their breaks or lunchtime to smoke," said Enna. "We've actually heard from a number of employees who are hoping this program will be incentive to help them quit, once and for all."

CALGARY, ALBERTA, (SEPT. 4) PR NEWSWIRE - Shell Canada Ltd. (Montreal, Vancouver, Toronto: SHC) will join with other private sector organizations this month to help lead the Canadian national fight against illiteracy.

Shell will sponsor the launch of the ABCanada Foundation on Sept. 8, International Literacy Day, at Harbourfront in Toronto. Shell is also announcing a sale of children's books across Canada, beginning Sept. 17 in Western Canada and Oct. 1 in the East. Some of the proceeds will be donated to ABCanada to develop literacy programs at the community level.

The Gold Collection of Well Loved Tales comprises the 10 best- selling children's stories published by Ladybird. Shell will offer an initial book free with a gasoline purchase to nearly eight million Canadians.

Other books will be available for 99 cents throughout the duration of the sale until late December.

''The Gold Collection of Well Loved Tales fits perfectly with the aims of literacy groups to encourage reading to and teaching children to read,'' said Carmine Falcone, executive vice-president, Shell Canada Ltd. ''From the proceeds of the book sale, Shell will donate a minimum of $80,000 to the ABCanada Foundation. If the sale of books exceeds our projections, Shell's contribution to ABCanada will increase accordingly.''

Shell will join with Secretary of State Gerry Weiner and other prominent Canadian companies to officially launch the ABCanada Foundation and participate in the Toronto Celebration of Literacy on Saturday, Sept. 8. In addition, Shell will participate in select Peter Gzowski Literacy Golf Tournaments to raise funds for community literacy programs.

#90247p1039 09/04/1990 ~PR Newswire

BLUE BELL, PA (SEPT. 4) PR NEWSWIRE - American women make up more than half the country's population and have significantly contributed to the more than $600 billion spent on health care in 1989. Yet, if recently released statistics are accurate, they receive far less than their fair share when it comes to medical services and attention.

The disparity between men and women is reflected in reports from the National Institutes of Health (NIH). In 1987, the NIH spent only 13.5 percent of its total research budget on women's health.

U.S. Healthcare (NASDAQ: USHC), one of the nation's largest health maintenance organizations (HMOs), said it has been curing what the company called inequities in the nation's medical system for many years, with the goal of improving programs that the organization offers to its own members.

According to U.S. Healthcare Chief Executive Officer Leonard Abramson, "This inequity is even more unfair when you consider the fact that women spend more on health care than men, and yet they are excluded from major medical studies and clinical trials."

For instance, research on the protective qualities of aspirin was performed on 22,071 men, and women were totally excluded from the study. As a result, if a woman asks her doctor if she should start taking "an aspirin a day" to decrease the risk of heart attack, the doctor has to be honest and say he doesn't know what the impact will be since women have never been studied.

Likewise, a recent study measuring the links between high cholesterol, lack

of exercise, smoking, and heart disease involved 12,866 men and no women. "Once again," said Abramson, "this means that there remain far too many unanswered questions when it comes to key risk factors for women when it comes to heart disease, simply because they're not included in enough clinical studies."

It's estimated that if current trends continue, in five years, there will be more American women than men who are smokers. With more women smoking, the incidence of smoking-related diseases, such as lung cancer, are rising dramatically.

Yet, once again, most research on quitting smoking has focused on men. "This is particularly alarming because according to recent health care reports, women have a tougher time quitting smoking," said Abramson.

Finally, there are many important preventive health care measures women can take, such as those to detect breast cancer. The incidence of breast cancer is rising among American women, and it's estimated that one woman in ten will eventually get this disease.

Almost a fifth of the 40,000 deaths each year due to breast cancer are preventable with the aid of a timely mammogram. Yet, according to the Centers for Disease Control, as many as nine out of ten doctors do not follow the American Cancer Society's guidelines on recommending mammograms.

EL SEGUNDO, CA (SEPT. 4) PR NEWSWIRE - Thomas D. Shepherd has been named vice president - international market development for Rockwell International Corporation (NYSE: ROK).

Shepherd will be responsible for corporate representation and the regional offices in Europe, the Middle East and the Far East and for coordinating business development activities in those regions as well as Canada and Latin America. He will be based at the corporation's Washington D. C. office.

Prior to this appointment, he served as Rockwell's regional director -- Europe, Middle East and Africa, a post he held since 1983.

In 1964, Shepherd joined the Collins Radio Company, acquired by Rockwell in 1973, as a telecommunications engineer. He has served in Europe and the Middle East for extensive periods and has held various engineering, marketing and management positions during his career, including that of

director of Rockwell's subsidiary in Riyadh, Saudi Arabia.

A native of Texas, Shepherd received a bachelor's degree in electrical engineering and a master's degree in business administration from Southern Methodist University.

Prior to joining Rockwell, he held engineering positions with Texas Instruments and the National Aeronautics and Space Administration.

Rockwell International is a $12 billion, multi-industry company applying advance technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

SHIPPINGPORT, PA (SEPT. 4) PR NEWSWIRE - Duquesne Light Co.'s Beaver Valley Power Station Unit No. 2 was removed from service Monday, Sept. 3, 1990, at 9:59 p.m. for scheduled refueling and maintenance operations, it was announced today.

The station will be out of service for about ten weeks. During this time, adequate electricity for customers will be provided by the company's other generating units.

In 1990, Beaver Valley No. 2 generated more than three billion kilowatt-hours of electricity for Duquesne Light customers. The unit has an availability factor of 97 percent for the year and set a new company record for continuous operation of 354 days.

This will be the unit's second refueling since beginning operation in 1987. The unit's last refueling was in March 1989. The refueling operation occurs about every 18 months and will involve replacement of about 40 percent of the uranium fuel in the reactor core. This fuel has the energy equivalent of about 2.6 million tons of coal.

In order to maximize the use of time that the unit will be out of service, various maintenance projects also have been scheduled. These projects include inspection and maintenance of the steam generator and reactor coolant pump, overhaul of the steam turbine, and other tests and inspections.

KANATA, ONTARIO (SEPT. 4) PR NEWSWIRE - Newbridge Networks Corporation announced that the company's Kanata Operations today received ISO 9002 registration.

Larry Rogers, president of Quality Management Institute (QMI), a division of the Canadian Standards Association (CSA), presented the registration plaque to Newbridge Chairman Terence Matthews today at the Newbridge Operations facility in Kanata. The Canadian Standards Association ensures that domestic applicants conform to the standards set by the Geneva-based International Standards Organization.

The ISO 9002 registration is a quality standard providing companies a benchmark against which their operational policies and procedures are assessed. It is receiving increasing levels of attention as it becomes adopted by more countries around the world. ISO 9002 has become a prerequisite to doing business in many parts of Europe.

ISO 9002 certification provides Newbridge customers with the assurance that the Newbridge facilities conform with the most comprehensive quality procedures. Commenting on the award, Graham Neathaway, vice president of operations at Newbridge stated: "We are delighted to receive this recognition. Policies, procedures and a global management information system have been implemented througout our operations to ensure consistent processes for manufacturing the Newbridge product line. Our commitment to ISO 9002 certification will guarantee that the company's operations conform to the highest international quality standard."

The registration was sought to meet growing customer demand in Europe for products manufactured abroad to meet the same standards as those for products manufactured in Europe. The ISO standards were developed in large part to ensure that products being traded amongst EEC countries would meet a common standard.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States, and Europe. Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

ROCHESTER, NY (SEPT. 4) PR NEWSWIRE - Eastman Kodak Company's (NYSE: EK) Health Sciences Division has taken an equity position in Vortech Data, Inc. of Reston, Va. Vortech is a leading supplier of open architecture medical image management systems.

The two companies are establishing a strategic alliance that will include a joint technology and product development program and a joint marketing program.

"Our alliance with Vortech, a company that has demonstrated real leadership in information management, will allow us to provide systems solutions to image and information handling in the hospitals and other facilities," said Robert T. Hamilton, vice president and general manager, Health Sciences Division.

"Vortech is extremely pleased to join forces with Kodak," said Allan R. Griebenow, president and CEO of Vortech. "Kodak is clearly the recognized leader in radiology departments worldwide and we are looking forward to working with them to develop systems that will provide customers with the best path to the future in image management systems and services."

Vortech image management systems are designed to capture, network, store and retrieve, and display and print images generated by magnetic resonance imaging (MRI), computed tomography (CT), and other digital and analog modalities.

Vortech systems conform to the ACR-NEMA (American College of Radiology - National Electrical Manufacturers Association) standard for image format specifications. The company's systems are distinguished by their ability to provide real-time, full-fidelity, image management for both intra-hospital communications and remote primary diagnosis.

Vortech operates a research and development facility in Dallas and maintains sales offices in the New York, Washington, D.C., Atlanta, Chicago, Dallas and San Francisco areas.

Robert W. Hartland, medical business general manager and division vice president, Kodak's Health Sciences Division said, "Kodak and Vortech will be working together to find customer-driven, cost-effective systems solutions to the challenge of image and information management."

Michael S. Shiff, vice president, marketing and sales for Vortech said, "The addition of Kodak's worldwide sales and service organization will make Vortech's high technology systems more readily available to customers everywhere."

Kodak is the leading supplier of medical diagnostic imaging systems, including electronic products, x-ray film, chemistry and traditional equipment.

#90247p1055 09/04/1990 ~PR Newswire

HOUSTON (SEPT. 4) PR NEWSWIRE - Quanex Corp. (NYSE: NX), a leading manufacturer of specialty metal products, today announced that its Viking Metallurgical (Viking) subsidiary has signed a three year contract to supply gas turbine engine components to Rolls-Royce Plc London, England. The overall agreement, valued at about $30 million (U.S.), was signed by Rolls-Royce Plc and Quanex management at the Farnborough Air Show, Farnborough, England. The contract was signed in a ceremony with Rolls-Royce Plc director of purchasing, Ian A. Lloyd, and Quanex officials led by Robert C. Snyder, president and chief operating officer.

The three year agreement, commencing January 1, 1991, requires Viking to manufacture seamless contoured rolled titanium rings at its Verdi, Nev. plant for the Rolls-Royce Aero Engine types, TAY, RB211 Series 535E4 and 524 G and H plus the new Trent engine. The commercial aircraft engines, manufactured in the United Kingdom, are high thrust, fuel efficient engines currently fitted to Boeing 747, 757, 767 and Fokker 100 aircraft and Gulfstream GIV. The Trent is designed to meet the needs of the next generation of two and three engine wide body airframes, such as the Boeing 777, MD-11 and AIRBUS 330, that seat over 350 passengers.

The success of Rolls-Royce engines have enabled it to double its market share for commercial engine orders in the past few years to nearly 20 percent. Rolls-Royce aims to increase the market share to at least 30 percent. The British engine maker had over two billion (Pound Sterling) in aero-gas turbine sales civil and military.

Robert C. Snyder, president and chief operating officer, said, "This contract, with a world class customer like Rolls-Royce Plc, proves that smaller companies like Viking can compete in a global market place when the total focus is on manufacturing the best products for our customers. Quanex and Viking products compete globally with the best quality, service and value in specialty metals. We are proud of our long term relationship with Rolls-Royce and will continue to strive for excellence in performance.

Quanex is a technological leader in the manufacture of steel, aluminum and titanium specialty metal products for transportation, capital equipment, home building and remodeling and energy processing markets. Latest twelve

month data: sales; $620.3 million, operating earnings; $52.1 million, net income; $25.2 million, cash from operations; $68.8 million, earnings per primary common share; $1.80, quarterly common dividend rate; 10 cents per share, book value per common share; $11.76, long lerm debt/capitalization; 30 percent, return on common shareholders' equity; 16.1 percent, common stock price range (52 week High/Low) $18.625 and $11.50.

IRVINE, CA (SEPT. 4) PR NEWSWIRE - Allergan Inc. (NYSE: AGN) announced today that its board of directors approved two programs which will result in the repurchase of up to a total of 1,200,000 shares of the company's common stock for the company's treasury. Allergan currently has 67.6 million shares outstanding.

One program entails treasury stock purchases made over time in the open market. All purchases will be made through Goldman Sachs & Co. as exclusive agent.

A second program, to be established at a future date, will involve the purchase for cash of the corporation's outstanding common stock held by stockholders owning less than 100 shares. Shares repurchased under these two programs will be available for use under the company's employee benefits programs.

Allergan Inc. is a worldwide health care company concentrated in eye care. Allergan supplies prescription and over-the-counter pharmaceuticals, contact lenses and lens care products, and ophthalmic diagnostic products. Based in Irvine, the company employs more than 6,500 people.

DALLAS (SEPT. 4) PR NEWSWIRE - Edisto Resources Corp. (AMEX: EDS) today announced that ESCO Energy Inc., a wholly-owned subsidiary of Edisto, entered into an agreement with Laclede Gas Co. which provides for the expansion of both companies' pipeline facilities into Franklin County, Missouri, and for the purchase by Laclede of up to 55 million cubic feet of gas per day from ESCO and its affiliates.

Robert C. Jaudes, executive vice president of Laclede, said, "The agreements reached between Laclede and ESCO will provide natural gas to major parts of Franklin County, but will also provide an additional gas supply to Laclede's existing service area, and increase the capacity of the gas distribution system in St. Charles County and in West St. Louis County."

James R. McNab, chairman of Edisto, commented that he was delighted with the agreement. "This agreement provides the basis for a major expansion of ESCO's gas marketing and transportation facilities.

It establishes a nucleus around which to build future expansion efforts throughout our primary market region in the Mid-Continent states. The acquisition of ESCO and its related activities adds a new dimension to Edisto's operational profile and enhances our long-term ability to add value to our growing natural gas reserve base."

Separate filings were submitted on Aug. 31 to the Missouri Public Service Commission by Missouri Pipeline Co., a wholly-owned subsidiary of ESCO, and Laclede requesting authority to expand their respective gas pipeline facilities.

Upon obtaining the necessary regulatory approvals, construction will commence on approximately 56 miles of pipeline at an estimated cost of $17 million and will provide additional gas delivery points to Laclede. The project is expected to be completed in the fourth quarter of 1991. Funding of expansion activities will be provided through operating cash flow and existing credit facilities.

Under the terms of the gas purchase and transportation contract, ESCO will sell and deliver to Laclede (via Missouri Pipeline Co.) up to 55 million cubic feet of gas per day, after proposed expansion activities are complete.

Commencing Sept. 1, 1990, Laclede has agreed to purchase 15 million cubic feet a day from ESCO through Nov. 1, 1990. Thereafter, the firm commitment for the sale of natural gas will increase to 25 million cubic feet a day until the proposed expansion of pipeline facilities is complete.

Laclede Gas Co. is a publicly held natural gas utility (NYSE: LG) headquartered in St. Louis and serving the St. Louis area. Its principal business is the retail distribution and transportation of natural gas in the city of St. Louis and eight counties in eastern Missouri.

CONTACTS: Rhonda L. Wright of Edisto Resources Corp., (214) 880-9330 or Tom M. Taylor of Missouri Pipeline Co., (918) 582-1812.

NEW YORK (SEPT. 4) PR NEWSWIRE - Colgate-Palmolive Company (NYSE: CL) has completed its purchase of the dental therapeutic business of Scherer Laboratories for approximately $22 million. Scherer is the U.S. market leader in fluoride brush-on gel products for the professional dental community, sold under the Gel-Kam trademark. Based in Dallas, Scherer sells its therapeutic products to approximately 20,000 dental offices across the U.S. The new business will be run by Colgate-Hoyt Laboratories, a supplier of products to the dental profession. "Colgate is the global leader in oral care. Capitalizing on this leadership, we are building our presence not just with consumers but with dental professionals. The addition of Scherer's dental therapeutic business enhances our program to develop this important business globally, beginning with the U.S., Europe and Australia," said Cyrill R. Siewert, President of Colgate-Hoyt Laboratories.

Colgate is the leader in the global oral care market with the world's number one selling toothpaste and full line of toothbrushes, mouthrinses and dental professional products. In addition, it is one of the world's leading consumer products companies, marketing its quality products in over 160 countries. The company's internationally recognized brand names include Colgate, Palmolive, Ajax, Fab, Irish Spring, Hill's Science Diet and Hill's Prescription Diet.

MESA, AZ (SEPT. 4) PR NEWSWIRE - The Philippine Air Force has added the McDonnell Douglas (NYSE: MD) MD 500 Series Defender to its combat helicopter fleet.

The Philippine Air Force, which joins a growing number of nations worldwide flying the combat-proven aircraft, took delivery of four Defenders late last month.

In all, McDonnell Douglas Helicopter Co., which builds the aircraft in Mesa, Ariz., will deliver 22 Defenders through 1990 to the air force unit, which is modernizing its fleet of fixed- and rotary-wing aircraft. A follow-on contract for an unspecified number of Defenders has been approved.

The purchase of the aircraft is being handled by the U.S. government as a foreign military sale. Total cost of the aircraft and related support equipment and training has not been released.

"This sale is significant because it confirms the Defender as a potent weapon for military forces in that region," said Max Wiley, director of international business development for McDonnell Douglas Helicopter. "We see this sale as expanding deployment of the Defender in the South Asia-Pacific arena, as well as in other markets around the world," he said.

The Philippine Air Force Defenders, the latest version of the combat-proven MD 500 Series scout/attack helicopters flown by the U.S. Army's elite 160th Special Operations Regiment, are equipped with Allison 250-C20R turbine engines. The C20R engine provides the Defender with increased performance capabilities over earlier C20 engines.

The helicopters, which will be used for a variety of military assignments, will be equipped with universal weapons mounts that can accommodate machine guns, rockets, and missiles, depending on the specific mission requirement.

Defenders are in service by several nations around the world, including Colombia, Israel, Kenya, South Korea and Japan.

ROCHESTER, NY (SEPT. 4) PR NEWSWIRE - Genesee Corporation (NASDAQ: GENBB) today announced consolidated sales and earnings for the first three months of its current fiscal year ended July 31, 1990.

First quarter gross sales were $46,348,000 compared to $45,109,000 during the first quarter of the prior year. Net earnings for the quarter were $2,208,000 or $1.38 per share compared to last year's first quarter of $1,690,000 or $1.06 per share.

Company officials noted that overall sales were up primarily due to increased sales by the foods division, but the increase in earnings was attributed to improved performance by the brewing division. John L. Wehle Jr., president and chief executive officer, stated, "Our efforts to efficiently contain expenses while maintaining aggressive marketing programs are reflected in the improved profitability for the first quarter."

COMPARATIVE STATEMENT OF EARNINGS

($ in Thousands except for per Share Data)

	THREE MONTHS ENDED	
	7/31/90	7/31/89
GROSS SALES	$46,348	$45,109

Less: Excise Taxes and Allowances	8,606	8,038
NET SALES	$37,742	$37,071

VANCOUVER, BRITISH COLUMBIA (SEPT. 4) PR NEWSWIRE - Jack E. Thompson, President of North American Metals Corp. ("NAM") announced today that the company has arranged a U.S. $12 million forward sale of gold to Homestake Mining Company of California.

This transaction is on terms similar to those in the forward sale made by NAM to Homestake in July, 1989 for C$31 million. Proceeds from the sale will be used to repay a short-term bridge loan and to fund operating cash shortfalls resulting from the start-up problems at the Golden Bear Mine.

Thompson stated, "The transaction which has received all regulatory approvals will involve the forward sale of approximately 39,000 ounces of gold. Although very similar to the earlier transaction, it differs in that there are no current deliveries.

The entire amount is scheduled to be delivered in five years unless additional reserves are found or if the company makes early delivery shipments.

The price used was the average London PM fix in the previous three weeks, or U.S. $401, adjusted 5.0 percent per annum to reflect the fact that the gold will be delivered in the future. All in all, the financial terms of the transaction are very favourable to the company."

On Aug. 16, 1990, Thompson announced that due to equipment difficulties production at the mine would be cut by 50 percent. Today he confirmed that repairs to the roaster would take approximately three months.

"We are milling lower grade oxide ores in the interim to maintain some cash flow and to hold the operating crew together. Over the last two weeks we have averaged 400 tons per day through the plant which is well in excess of

design."

Engineering and procurement are under way for a refractory brick arch to replace the steel alloy plate that buckled in the roaster. The supplier of the equipment has agreed to cover substantially all the costs of the repair.

NEW YORK, (SEPT. 4) PR NEWSWIRE - AVX Corporation today announced the appointment of Benedict Rosen to president of the electronic components manufacturer.

In his new position, Rosen will report to the company's chief executive officer, Marshall D. Butler and will be responsible for AVX's worldwide operations. Rosen was previously executive vice president responsible for the operations in the United States and Southeast Asia.

"Mr. Rosen is uniquely qualified for this position, due to his understanding of the company, his manufacturing background and knowledge of the worldwide markets for components," stated Butler.

Rosen has been with AVX for more than 19 years and has held various manufacturing management and executive positions. He will remain based in the company's Myrtle Beach facility.

Rosen replaces Charles Dill, who resigned from the company to pursue other business interests.

AVX Corporation, a Kyocera Group company, is a leading international manufacturer of multilayer ceramic, tantalum and glass capacitors. AVX/Kyocera's extensive line of passive components, including timing devices, resistor networks and hybrid circuits, is one of the largest in the world.

Kyocera Corporation (NYSE: KYO) is a global advanced ceramic and high technology company with annual sales of $2.7 billion.

ROCHESTER, N.Y. (SEPT. 4) PR NEWSWIRE - Sterling Drug Inc., an Eastman

Kodak Company (NYSE: EK), has transferred its Cook-Waite Laboratories line of dental anesthetics and accessories to Kodak Dental Products in the Health Sciences Division.

Kodak will market these products under the Cook-Waite brand name through a network of dental dealers who handle Kodak dental films and accessories. Sterling Drug will continue to manufacture the Cook-Waite products on a contract basis.

"The joining of these two strong, established forces in the dental marketplace means customers will continue to receive the highest quality dental anesthetics through an established supplier offering a full range of dental products," said Donald Hartman, general manager, Kodak Dental Products.

"And customers will be ordering through dental dealers who currently market Kodak dental products."

Cook-Waite products include Carbocaine (mepivacaine), Marcaine (bupivacaine), and Ravocaine (propoxycaine) anesthetics, the Cook-Waite aspirator syringe and accessories.

Kodak is the leading producer of high-quality dental radiography products that include intraoral and extraoral dental x-ray films, chemicals for automated and manual processing and accessories.

The combination of Cook-Waite Lab's pharmaceutical innovation and Kodak's marketing expertise brings over a century of collective experience and service to the dental market.

"The names Kodak and Cook-Waite have come to stand for quality. We plan to continue to expand upon that tradition of excellence. The combined resources at our disposal will allow us to be more versatile in our commitment to meet the growing demands made on dental practices," said Hartman.

NEW YORK, (SEPT. 4) PR NEWSWIRE - G.L. Hodson & Son, Inc.(GLH) announced today that Michael R. Parker has joined GLH as a senior vice president and manager of the Surety & Fidelity Division, a newly formed unit of the company.

Prior to joining GLH, Parker was an officer of another major reinsurance

intermediary, where he specialized in reinsurance for contract and miscellaneous surety and financial institution fidelity programs.

The Surety & Fidelity Division has been established as a national resource of GLH. As such, the division will assist GLH broker teams nationwide in serving ceding company clients and prospects with surety or financial institution programs.

Stephen A. Crane, president and chief executive officer of G.L. Hodson, said, "The creation of this new division, and Michael Parker's assumption of the division manager's position, is an important step in executing our strategy of adding value by establishing expertise in specialized areas of reinsurance."

G.L. Hodson & Son, one of the ten largest reinsurance intermediaries in the U.S., was founded in 1924 and was acquired by Corroon & Black Corporation (NYSE: CBL) in 1970. GLH is headquartered in New Hyde Park, N.Y., and has branch offices in Atlanta, Boston, Burlington (N.C.), Los Angeles, Minneapolis, and San Francisco. GLH is primarily a treaty broker but provides facultative reinsurance services through several of its offices.

#90247p1077 09/04/1990 ~PR Newswire

TORONTO (SEPT. 4) PR NEWSWIRE - Goldex Mines Limited (NASDAQ: GDXMF) and Ormico Explorations Ltd. announced today the results of the recently completed exploration program on their joint venture property in Val d'Or, Quebec. Goldex is the operator and has a 60 percent interest in the joint venture. Ormico has a 40 percent participating interest in the joint venture.

An underground exploration program commenced in January 1990 and was completed in July 1990. The program has successfully extended the Goldex Extension Zone, discovered in 1989, from section 2 + 00 East to section 6 + 00 East. Diamond drilling also extended the zone up dip to the 1250 level on the Goldex Property on section 5 + 00 East and 6 + 00 East. Encouraging results have been encountered and two drill indicated mineral inventories have now been calculated. The Goldex Extension Zone remains open to the east and at depth on the joint venture property and to the east and at depth to the west on the Goldex property.

A drill indicated mineral inventory of 19,396,000 tons grading .075 ounces of gold per ton (.070 ounces of gold per ton cut to one ounce per ton) has been calculated between sections 2 + 00 West to 6 + 00 East using the

geological limits to the Goldex Extension Zone. These limits enclose all the vein structures of the deposit including low and high grade areas.

A separate drill indicated mineral inventory has been calculated using a .08 ounces of gold per ton cut-off grade but including lower grade material where necessary to produce a smooth envelope to mineralization. This method results in a drill indicated mineral inventory of 9,931,000 tons grading .094 ounces of gold per ton (.087 ounces of gold per ton cut to one ounce per ton).

Goldex and Ormico have today announced their intention to continue with a $1.9 million exploration program which will commence in September 1990. This program will require a further eastward extension to the 1250 level drift, underground diamond drilling to section 10 + 00 East and a surface diamond drilling program at section 15 + 00 East.

Goldex is managed and operated by Agnico-Eagle Mines Limited, which currently holds a combined direct and indirect interest in Goldex of approximately 30 percent.

HOUSTON (SEPT. 4) PR NEWSWIRE - Republic Waste Industries Inc.'s (NASDAQ: RWIN) common stock was included in the NASDAQ National Market System (NMS) on Sept. 4, 1990, James D. Lee, president, announced. Lee pointed out that Republic Waste's entry into NMS provides investors with the best of both worlds -- the continuous transaction data of the exchanges and the vigorous competition among multiple market makers that is the hallmark of NASDAQ.

Stockbrokers will be able to provide last-sale prices and up-to-the-second volume information on the company's common stock for their customers throughout the trading day. Republic Waste, a leading Houston-based company specializing in the collection, processing and disposal of solid waste, will be included in the NMS newspaper stock table which shows high, low and closing prices for the most active and prominent NASDAQ securities.

James D. Lee noted that in addition to increased market information that NMS provides, a significant advantage of being quoted on NASDAQ is the existence of multiple market makers competing with each other to execute customer orders, as opposed to a single specialist on the floor of a stock exchange. There are currently 16 firms making a market in Republic Waste Industries Inc.

Republic Waste Industries Inc. is a Houston-based company specializing in the collection, processing and disposal of solid waste. The company's common stock is traded over-the-counter under the NASDAQ symbol RWIN.

ORLANDO, FL (SEPT. 4) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) has been awarded a $93 million contract to supply the Commonwealth Atlantic Limited Partnership with a 312-megawatt power generating plant to be built in Virginia.

The Commonwealth Atlantic Limited Partnership is a partnership between a subsidiary of Mission Energy Co., Fairfax, Va., and a subsidiary of Long Lake Energy Co., New York, N.Y.

Westinghouse will supply the plant on a turnkey basis. The natural gas-fired power plant will be built in Chesapeake, Va. R. Peter Lalor, executive director of the Commonwealth Atlantic Limited Partnership, said that Virginia Power Co. would buy the power produced by the plant. The Federal Energy Regulatory Commission and state regulatory authorities have approved the transaction.

"This project has broken new ground in the independent power market," said Paul Elston, chairman of Long Lake Energy Co. "The plant will be one of the first true independent power producers in the United States. It is a utility-grade plant that will produce fully dispatchable power within an innovative regulatory framework."

"Virginia Power provides its ratepayers with cost-effective, reliable power through its innovative mix of utility and independent power generation," said James S. Pignatelli, president and chief executive officer of Mission Energy Co. "We're happy to be a part of the Virginia Power generating network, and we're looking forward to contributing reliable power to it."

Three Westinghouse model 501D5 combustion turbines will comprise the plant's power block. During the past five years, Model 501D5 combustion turbines have performed at a cumulative availability of more than 95 percent in independent power applications.

"We are pleased that Commonwealth Atlantic chose Westinghouse to supply this plant," said Frank Bakos, vice president and general manager of the Westinghouse Power Generation Business Unit. "Our 501D5 combustion turbines are among the best performing machines on the market. They will make a substantial contribution to the project's success."

Equipment deliveries are expected to be complete in August 1991. Commercial operation is scheduled for March 1992.

NEW YORK (SEPT. 4) PR NEWSWIRE - CS First Boston, Inc. today announced that Archibald Cox, Jr. will be named president and chief executive officer, and James R. Maher will be named vice chairman of the First Boston Corporation, a wholly owned subsidiary, effective Sept. 6.

Cox, 50, joined First Boston in May of this year, and succeeds John M. Hennessy, 54, who continues as president and chief executive officer of CS First Boston, Inc. Maher, 40, joined the firm in 1976 and has served as managing director and co-head of the investment banking department since 1988.

Hennessy said, "Archie Cox shares our commitment to CS First Boston's global strategy. He has demonstrated an extraordinary insight into our firm and our business. This, plus his previous experience in building and running one of the largest, most profitable international securities businesses for another major Wall Street firm, makes him ideal for this position."

Previously, Cox served as chief executive officer of Morgan Stanley International, where he launched and ran the firm's international operations based in London for more than 10 years.

From 1986-88, he served as a member of the board of the Securities and Investment Board (SIB), the regulatory body which oversees all financial service companies doing business in the United Kingdom.

Hennessy said, "Jim Maher will concentrate on our worldwide M&A effort and will continue to oversee our domestic investment banking business. He will also become more involved with the overall management of the firm.

CS First Boston, Inc. is a full-service international investment banking firm serving both suppliers and users of capital around the world. Through its wholly owned subsidiaries -- The First Boston Corporation operating in the Americas, Financiere Credit Suisse-First Boston operating in Europe and the Middle East, and CS First Boston Pacific operating in the Pacific Rim -- CS First Boston provides comprehensive financial advisory services, develops innovative financing structures and strategies for public and private institutions, and employs its own capital resources

to trade and underwrite securities and to engage in merchant banking and other principal transactions.

DENVER (SEPT. 4) PR NEWSWIRE - The Soviet government issued an announcement today stating that for the first time, Western companies are being invited to bid for the rights to explore for and produce oil and gas in large sections of the Soviet Union.

According to a joint announcement made by the USSR Ministry of Geology and the government of the Republic of Turkmen, the territories being offered are located in the South Caspian and Amu-Daria Oil and Gas Provinces in Turkmen SSR. Approximately 90,000 square kilometers are involved and are rated as "highly prospective," according to the announcement.

"There is existing major hydrocarbon production in the area and a well-developed infrastructure, with favorable climatic conditions," the announcement stated.

Small tract competitive bidding will be used to select the participating Western companies. Exploration and production agreements will be signed with the successful bidders and will conform with existing Soviet legislation on joint ventures.

The annoucement stated that all rules, regulations, conditions and commitments guiding the bidding process and the resulting exploration and production ventures will be fully defined and made available to Western companies prior to the first round of bidding.

Exploration data on the territories will be made available to interested companies exclusively through the joint venture between VNIGNI of the Ministry of Geology of the USSR and Wavetech Geophysical Inc. of Denver. Wavetech is an oil and gas exploration services company.

"It is the intent of the appropriate Soviet organizations to make the Invitation to Bid available in late 1990 during a visit to the United States by Soviet oil and gas officials.

"The purpose of this visit will be to disclose details related to the potential of the offered territories and to provide answers to inquiries of oil company representatives in relation to oil and gas exploration and production ventures in the Soviet Union.

"Extensive exploration data sets will also be available at this time," the announcement concluded.

CONTACT: Dr. K.A. Kleschev or Dr. V.A. Teplitsky both of the Ministry of Geology of the USSR, 273-26-51; or Edward Gendelman of Wavetech Geophysical Inc., 303-839-9488

STERLING HEIGHTS, MICH. (SEPT. 4) PR NEWSWIRE - Atlas Copco Assembly Systems and Chicago Pneumatic Systems Division have merged to form Advanced Fastening Systems, Inc.

In making the announcement, David M. Johnson, president of the new company said, "Advanced Fastening Systems will operate as a systems integrator using products from Atlas Copco and Chicago Pneumatic. All current and past products will continue to be offered and supported, and they will continue to be marketed under the well-known Chicago Pneumatic and Atlas Copco brand names."

Combining the two companies merges the technologies of two industry leaders in fastening systems. As a result of the merger, Advanced Fastening Systems becomes the largest manufacturer of multiple spindle nutrunners in North America. The new company's major products include:

-- DC and air powered multiple spindle nutrunner units for high- volume assembly of large products

-- Assembly stations -- Quality control electronics for nutrunners -- Components for machine tool builders -- Laboratory testing and joint analysis -- Fastener feeding equipment -- On-line friction testing equipment -- On-line pressing equipment Johnson continued, "Our products will benefit from the combined development efforts. The individual companies' established expertise in threaded fastener technology and automation will be pooled into a single, much stronger resource that will challenge the industry. Advanced Fastening Systems will be a stronger organization with a larger market share and is expected to be the market leader in the 1990s."

At this time, the companies' products are sold primarily to the automobile industry, automotive components plants, independent suppliers to the automobile industry and off-road vehicle and truck manufacturers.

In forming the new company, A. Erik Thorsrud was named vice president of sales, and Donald F. Hense becomes vice president of operations.

The change is effective Jan. 1, 1991. During the transition, the two

companies will continue to operate autonomously.

Headquarters and technical center for Advanced Fastening Systems are at 5500 18 Mile Road, Sterling Heights, Mich., 48314.

LYNN, MASS. (SEPT. 4) PR NEWSWIRE - GE (USA)-(a) Aircraft Engines' CF34-3A1 turbofan engine will power the 10 firm and 10 option Canadair Regional Jets ordered by Ansett Worldwide Aviation Equipment, in an engine order valued at $80 million.

This order confirms a memorandum of agreement that was signed last year between Ansett and Canadair. Ansett is expected to take delivery of its first aircraft in 1993.

Two 9,000-pound thrust class CF34-3A1 turbofan engines will power the 52-passenger Regional Jet. This latest version of the CF34 is being modified with product improvements and added life to ready it for regional airline service. The CF34-3A1 engine will begin flight testing on the Regional Jet in the spring of 1991.

Ansett is the second customer to announce a purchase agreement for the CF34-powered Regional Jet. Lufthansa Airlines partner, Deutsche Luftverkehrgesekkschaft (DLT) of West Germany, signed for 13 firm and 12 option aircraft last May.

Since entering commercial service in 1983 on Canadair's Challenger business jet, the CF34 has accumulated more than 387,000 engine flight hours, powering 125 aircraft in service with 106 operators in 15 countries.

NOTE: (a)-General Electric Company of the United States is not connected with the English company of a similar name.

#90247p1100 09/04/1990 ~PR Newswire

FARNBOROUGH, ENGLAND (SEPT. 4) PR NEWSWIRE - The production rate of McDonnell Douglas (NYSE: MD) MD-80 twin-jet airliners has risen steadily in 1990, and this year's deliveries of MD-80 series aircraft to customers will reach an all-time high, the company announced today.

James R. Phillips, vice president and deputy general manager, MD-80/90 program, said at the Farnborough Air Show in England that McDonnell

Douglas has increased its twin-jet production rate to three aircraft per week from two per week earlier in the year.

"We're on schedule to deliver 139 this year," Phillips said. "This will be the highest production year for McDonnell Douglas twin-jets since the company delivered 193 DC-9s in 1968.

"We've turned the corner on rate," Phillips said. "We have increased our capacity in both sub-assembly and final assembly processes, and we are working to improve first-time quality in all areas." Commercial airliners are built by the Douglas Aircraft division of McDonnell Douglas in Long Beach, Calif.

Phillips said that the company plans to maintain the current rate through most of 1991. "We considered going to a higher rate next year, but at the current rate we can meet all of our customer requirements while ensuring the highest quality."

Phillips also said that maintaining the current production rate through next year will allow the company to focus more of its engineering capacity on MD-90 development, which is now under way. The MD-90, the latest aircraft in McDonnell Douglas' twin-jet series, was launched in November 1989.

"We have accelerated our development schedule for the MD-90, and we have decided to build an MD-90 prototype aircraft on the MD-80 assembly line," Phillips said. "Instead of using an older fuselage as the prototype as we had planned, we will add a new MD-80 line position. This will provide an aircraft that conforms far more closely to MD-90 specifications and configurations."

Phillips said McDonnell Douglas expects the MD-90 prototype to enter development flight test in early 1993. Production of the MD-90 will begin in early 1994 with first deliveries scheduled for the fourth quarter of 1994.

In addition, Phillips said, the company is continuing to focus attention on identifying suppliers who provide quality, service and technical leadership. "At McDonnell Douglas we view the supplier as a partner. In fact, we are building long-term relationships with suppliers who we can count on for availability, flexibility and commitment to continuous improvement," he said.

RICHMOND, VA (SEPT. 4) PR NEWSWIRE - Best Products Co., Inc. today announced that the New York Stock Exchange has responded favorably to its request to delist the company's 12 5/8 Senior Subordinated Notes due Dec. 1, 1996.

The exchange has said it will suspend trading of the notes on Sept. 14, 1990 and file an application with the Securities and Exchange Commission to delist the issue.

Best requested in July that the notes be delisted because fewer than $2.4 million of the $200 million in notes issued in December 1986 remain outstanding and trading has been minimal. Best notified note holders in June of its intention to seek delisting.

The notes may still be traded in the over-the-counter market. Best, one of the nation's largest catalog showroom retailers, operates 195 Best showrooms in 27 states. The company also operates Best Jewelry, a chain of 35 fine jewelry and giftware stores, and Tele-Mail, a nationwide mail-order service.

MINNEAPOLIS (SEPT. 4) PR NEWSWIRE - Aladdin International, Inc., today reported year-end audited results. Sales were $3,460,377 for the fiscal year versus the previous year's sales of $3,598,932. Net income was $863,876 versus $353,356. Of the $863,876 in earnings, $576,948 was attributable to an extraordinary credit and $205,327 was due to reorganization items. Net income per share was $.71 versus $.29 for the previous year.

The extraordinary credit and reorganization items were a result of the successful resolution of an $812,000 net loss in one of the company's discontinued subsidiaries.

The company stated that sales were adversely affected by remodeling costs at one of its higher volume restaurants and discounting by the major restaurant chains in the company's market area.

The company, with headquarters in Minneapolis, operates five Arby's Roast Beef restaurants in the Milwaukee, Wis. area.

ALADDIN INTERNATIONAL, INC. YEAR END RESULTS

LONG BEACH, CA. (SEPT. 4) PR NEWSWIRE - HQ Office Supplies Warehouse Inc. (NASDAQ: HQOSA) announced today the commencement of an overseas Private Placement through Global America Inc., which will act as exclusive placement agent for the company. The offering consists of a minimum of 150 units and a maximum of 400 units. Each unit will consist of 40,000 shares of Series A Convertible Redeemable Preferred Stock and 4,000 Redeemable Class D Common Stock Purchase Warrants. Each share of Series A Preferred will be convertible into one share of the company's Class A Common Stock. The Offering will be made solely overseas and there will be no public market for the Units in the United States. The purchase price for a unit will be $100,000. If the minimum of 150 units is sold, $15,000,000 will be raised in the offering.

The company also announced that it is currently engaged in preliminary discussions regarding a possible business combination with its affiliate and former subsidiary, HQ Office International Inc. The company believes that a business combination with HQ Office International Inc. would result in operational efficiencies between the two companies and allow the company to penetrate the Canadian market for office supplies and related products. Neither the terms nor the form of the proposed business combination with HQ Office International Inc. have been determined.

HQ Office Supplies Warehouse Inc. has retained Global America Incorporated as its investment banker and financial adviser for the proposed transaction. Bateman, Eichler, Hill, Richards, Inc. will serve as an investment banking and financial advisor to HQ Office International Inc. for the proposed transaction.

HQ Office Supplies Warehouse Inc.'s merchandizing strategy is to offer a wide selection of quality, brand-name office products, including general office supplies, business machines, office furniture and other business-related products at discount prices primarily to small and medium-sized businesses. The stores average at least 25,000 square feet of selling space with an inventory of approximately 8,000 stock keeping units.

HARTFORD, CT (SEPT. 4) PR NEWSWIRE - Linda S. Brewer, formerly director of the California Office of Administrative Law, has been appointed counsel in the Law Division of Hartford-based Aetna Life & Casualty (NYSE: AET).

In her new role, Brewer will counsel Aetna on regulatory and legislative matters for several western states including California, Washington, Oregon, Arizona, Alaska and Hawaii. She will be headquartered in Sacramento.

"Ms. Brewer brings to Aetna extensive knowledge of the regulatory and legislative process which will be a considerable asset to us in our efforts to develop a better understanding of the governmental process," said Francis X. Bruton, Jr., vice president and counsel.

"Her background makes her well-suited to help Aetna respond to the growing complexity of the state regulatory and legislative process," Bruton said.

Prior to her appointment by Gov. Deukmejian as director of the Office of Administrative Law in 1983, Brewer worked in public affairs for Chevron.

She is a graduate of the University of the Philippines and holds a juris doctor from Notre Dame Law School. She is the author of a number of articles dealing with the regulatory process.

WASHINGTON (SEPT. 4) PR NEWSWIRE - Nycal Corporation (NASDAQ: NYCL) announced on Aug. 16, 1990, that it had signed a letter of intent with Airship Industries Limited ("Airship") (NASDAQ-NMS: AIRSY) with a view to arrangements being made which could lead to Nycal acquiring more than 50 percent of Airship's share capital. These arrangements included the immediate advance of a secured loan by Nycal of approximately $4.3 million to meet near-term working capital requirements of Airship.

Nycal today announced it has been unable to obtain from Airship adequate security for the working capital loan, or advance in a timely fashion acceptable resolution of other outstanding issues.

Whilst Nycal regrets that this potentially promising acquisition, restructured, refocused, and refinanced by Nycal will not now be

consummated, its other recent acquisitions, and pending acquisitions, eliminate any question of Nycal taking an unacceptable risk.

Nycal Corporation is a U.S. holding company with mining and energy resources and insurance interests.

BOSTON (SEPT. 4) PR NEWSWIRE - Freedom Capital Management Corporation has created a team of investment specialists to manage its global fixed-income portfolios, including the top-performing open-end mutual fund, Freedom Global Income Fund.

Maria Fiorini Ramirez, a leading international money market economist and executive vice president of Freedom, will serve as chief investment strategist for the team, according to Hugh Dunlap, president of Freedom Capital.

Freedom Capital is a Boston-based money management firm with $3.2 billion under management. It is an indirect, wholly owned subsidiary of The John Hancock Mutual Life Insurance Company.

Portfolio Manager and Trader From Global Investment Institutions

Day-to-day management of Freedom Capital's global fixed-income will be handled by two specialists who come from major global securities and asset management institutions.

Robert M. Kowit, a senior non-dollar, fixed-income specialist, was elected senior vice president of Freedom Capital and will serve as portfolio manager for the team.

Before joining Freedom Capital, Kowit was a managing director at Midland Montagu Securities in New York for nearly two years. He specialized in non-dollar and U.S. government security products as well as a wide range of derivative instruments to U.S. and international clients. Kowit was also a vice president and international fixed-income sales manager at Kidder Peabody & Company from 1978 through 1987.

Paul E. Luedig, who was named vice president of Freedom Capital, will assume all trading responsibilities for the team. Luedig worked as a foreign fixed-income trader and analyst at CIC Union Europeenne for four years before joining Freedom. Prior to joining CIC Union- Europeenne, Luedig worked at Credit Lyonnais and Chase Manhattan Bank.

Thomas H. Urmston, a Freedom Capital managing director and a fixed-income

portfolio manager, will be coordinating global and domestic fixed-income investment activities from Freedom's headquarter in Boston while trading and portfolio functions are headed by Ramirez in New York.

On Nov. 1, the new team will assume control of Freedom Global Income Fund, with $191-million under management. The fund and its companion Freedom Global equity fund were recently named the best performing members of the Freedom mutual fund family by Kanon Bloc Carre, a firm that evaluates mutual fund performance. In the same study, Freedom's family of funds ranked 17th out of the top 50 best-performing fund families.

LONG BEACH, CA. (SEPT. 4) PR NEWSWIRE - HQ Office Supplies Warehouse Inc. (NASDAQ: HQOSA) announced today that its board of directors has elected George J. Handgis to succeed Brad R. Tukey as the company's president and chief executive officer, effective Sept. 1, 1990. Handgis is the president and chief executive officer of the company's former subsidiary HQ Office International Inc. and has served as a director HQ Office Supplies Warehouse Inc. since its inception.

Robert J. McNulty, chairman, stated, "George Handgis is a dynamic leader who has many years of management and merchandising experience in the retailing industry. George was the co-founder of HomeClub and was instrumental in the start-up and management of that company. HomeClub currently generates well over $1 billion in annual sales. He has been associated with a number of successful high-volume retail companies and retail formats including W.R. Grace, Builders Emporium, and the FedMart Corp. I am fully confident in George's ability to lead the company's expansion and growth in the 1990s."

Tukey resigned as president and chief executive officer, effective Sept. 1 1990, to pursue other interests. He will continue to serve on the board of directors and as a consultant to the company.

McNulty added, "Brad was a valuable asset to HQ Office Supplies Warehouse Inc. during its development and start-up phase and we welcome his ongoing contributions as a director and as a consultant."

HQ Office Supplies Warehouse Inc.'s merchandising strategy is to offer a wide selection of quality, brand-name office products, including general office supplies, business machines, office furniture and other business-related products at discount prices primarily to small and medium-sized businesses. The stores average at least 25,000 square feet

of selling space with an inventory of approximately 8,000 stock keeping units.

#90247p1125 09/04/1990 ~PR Newswire

FORT WORTH, TX (SEPT. 4) PR NEWSWIRE - Snyder Oil Corp. ("SOCO") (NYSE: SNY) announced that a definitive agreement had been reached under which Pennzoil Exploration and Production Co. ("Pennzoil"), a subsidiary of Pennzoil Co., will purchase a 37.5 percent interest in SOCO's Pawnee Project.

The project incorporates a 143,000 net acre position in the Niobrara Trend of northern Colorado and southern Wyoming. The Niobrara is a vertically fractured chalk formation widely believed to be highly prospective for horizontal drilling. The addition of Pennzoil completes the joint venture inititated with the previous sale of a 25 percent interest in the project to Coda Energy Inc.

SOCO has retained a 37.5 percent interest in the joint venture and is the designated operator. Closing of the purchase is expected in 30-45 days. The agreement provides for a $1.1 million seismic program and the parties contemplate that drilling will commence by yearend.

John Snyder, the chairman of SOCO, in announcing the agreement said, "We are delighted to have finalized the Pawnee joint venture and pleased that Pennzoil shares our enthusiasm for the area's potential. This large project was conceived and initiated by our exploration staff almost a year ago. At that time, the potential economics of horizontal drilling in the Niobrara appeared compelling, even at a $15 to $20 oil price."

SOCO further indicated that it holds an additional 100,000 net acres in the Niobrara Trend which are outside the Pawnee project. It is expected that additional joint ventures will be formed in the course of the next

few months to explore that acreage.

SOCO is an independent oil corporation engaged in the acquisition, production, development and exploration of oil and gas properties and in natural gas processing and transporation. The company's common stock is traded on the New York Stock Exchange under the symbol "SNY."

#90247p1144 09/04/1990 ~PR Newswire

CLARENDON HILLS, IL. (SEPT. 4) PR NEWSWIRE - MAF Bancorp, Inc. (NASDAQ-NMS: MAFB) announced today that members of the Koranda family have filed with the Office of Thrift Supervision (OTS) for permission to increase their holdings in MAF Bancorp common stock from approximately 9

percent to up to 18 percent over the next ten years.

Included in the filing are Allen Koranda, chairman of the board and chief executive officer of MAF Bancorp; Kenneth Koranda, president of MAF Bancorp and a director of the company; Janann Koranda, a vice president of a subsidiary company; and Hugo Koranda, father of Allen, Kenneth and Janann Koranda and the former chairman of the board of Mid America Federal Savings Bank, the wholly owned subsidiary of MAF Bancorp. Other family members are also included in the filing.

OTS regulations require that any person or group intending to acquire ownership of greater than 10 percent of a savings and loan holding company must obtain prior approval before making such an acquisition. Although OTS regulations define such a filing as a change in control application, members of the Koranda family indicated they have no intention of acquiring all of the stock of the company or making any other changes in management or company structure. They also indicated that part of their increase in stock ownership will come through their participation, over a number of years, in stock benefit plans of the company. These plans were approved by the OTS in connection with the January 1990, conversion of Mid America from a federally chartered mutual savings bank to a federally chartered stock savings bank.

Allen Koranda emphasized that shareholders and customers should not misinterpret the intent of the filing. "We view this as complying with an administrative process rather than as a significant corporate event. We realize our family ownership will inevitably increase to over 10 percent given that family members purchased over 9 percent in the initial public offering, our anticipated participation in stock benefit plans of the company over a number of years and possible open market purchases in the future. We felt it was an appropriate time to disclose this and to provide an estimate of our long term plans for acquisition of MAF Bancorp stock."

In an unrelated matter, MAF Bancorp announced that its 1990 annual meeting of shareholders will be held on Oct. 31, 1990, at The Carlisle, 435 East Butterfield Road, Lombard, Ill., at 10 a.m.

Mid America Federal Savings Bank is a federally chartered stock savings bank. The bank operates a network of 13 retail banking offices primarily in the western suburbs of Chicago.

CHICAGO (SEPT. 4) PR NEWSWIRE - R. R. Donnelley and Sons Company (NYSE:

DNY) has acquired the Meredith/Burda Companies from the Meredith Corporation (NYSE: MDP) of Des Moines, Iowa, and Franz and Frieder Burda of West Germany.

John R. Walter, Donnelley chairman, president and CEO, said: "We are gratified to finally complete the transaction, which began in late 1989. The acquisition of Meredith/Burda combines two strong, high quality printers of excellent reputation."

The purchase price of approximately $550 million includes approximately $65 million of debt. The terms of payment were changed from payment in full at closing to payment of $180 million at closing with the balance to be paid in two installments without interest: $157,300,000 on May 24, 1991 and $149,300,000 on Oct. 9, 1991. Donnelley will issue debt to finance the transaction.

Meredith/Burda, with 1989 sales of $456 million, is a major printer of catalogs, newspaper advertising inserts and magazines. Its employs nearly 3,100 persons in printing operations in Des Moines, Iowa; Lynchburg, Va.; Casa Grande, Ariz.; Newton, Hickory and Greensboro, N.C. As part of this transaction, Donnelley will produce Meredith Corporation publications, including Better Homes and Gardens, Metropolitan Home and Country Home.

Donnelley, with 1989 sales of $3.1 billion, is North America's largest printer of catalogs, newspaper advertising inserts, magazines, books, directories, computer documentation and financial printing. The company, which employs 27,000 persons, operates in nearly 100 locations worldwide.

DENVER (SEPT. 4) PR NEWSWIRE - John R. King, president of Gold Express Corp. (NASDAQ: GDEX), today announced the signing of separate agreements with Mountain States Mineral Enterprises Inc. and with N. A. Degerstrom Inc. The Mountain States agreement calls for them to develop:

1. a fixed price contract for the total reconstruction of the Copper Flat mill, complete with guarantees of capabilities and time to full commissioning
2. an operating cost estimate and operating contract under which they will operate the mill on a cash cost basis with performance guarantees and incentives.

Mountain States Mineral Enterprises is an international process engineering company based in Tucson, Ariz. Mountain States is an acknowledged expert in design and construction of copper processing

facilities and was responsible for the removal of the former Copper Flat mill and reconstruction of that mill at Ok Tedi, Papua New Guinea.

The N. A. Degerstrom agreement calls for Degerstrom to act as the contract miner for the Copper Flat mine, delivering ore to a coarse-ore stock pile and waste to the dumps, on a cash cost basis.

N. A. Degerstrom is an industry recognized and experienced, hard-rock contract miner with a solid reputation for being one of the most efficient operators in the United States. N. A. Degerstrom based in Spokane, Wash., has been in the earth-moving and construction business for over 86 years.

King comments, "With the establishment of these relationships with Mountain States and Degerstrom, we have come one major step closer to fulfilling the plans to bring the Copper Flat mine into full production within 12 to 16 months.

"Paribas Corp., our exclusive investment banking agent who is arranging the financing for the Copper Flat project (see news release of Aug. 2, 1990) supports the relationships with Mountain States and Degerstrom, and like Gold Express, is pleased to see the advancement of the copper project in today's strong copper market.

"On an average annual basis, the Copper Flat project is forecast to produce 41,000,000 pounds of copper, 12,000 ounces of gold, 850,000 pounds of molybdenum and 300,000 ounces of silver. Given the current projected operating costs and with a proven reserve of 53,000,000 tons of open-pit ore at an average grade of 0.45 percent copper, the Copper Flat mine should be a very profitable operation for the next decade."

Gold Express is a publicly owned, diverse mining company trading on the Over-the-Counter NASDAQ market with the symbol GDEX.

LOS ANGELES (SEPT. 4) PR NEWSWIRE - Orion Pictures' powerful and compelling drama, "State of Grace," starring Sean Penn, Ed Harris, Gary Oldman and Robin Wright, opens in selected markets on Sept. 14, 1990.

"State of Grace" is the story of friendship, family, love, loyalty and betrayal in New York's Hell's Kitchen. Terry Noonan (Penn) returns to his childhood neighborhood. There he is pulled in two conflicting directions by two different societies and must choose between his past and the present -- the girlfriend, family, friends, and cold-blooded Irish

street gang he left behind, and the law.

An Orion Pictures Release of a Cinehaus Production, "State of Grace" was directed by Phil Joanou ("Three O'Clock High," "U2: Rattle and Hum") from a screenplay by Dennis McIntyre. Produced by Ned Dowd, Randy Ostrow and Ron Rotholz, the film has a musical score by Ennio Morricone.

"State of Grace" opens on Sept. 14 at the following theaters in Los Angeles: UA Coronet, AMC Century 14, Hollywood Pacific and the Cineplex Beverly Center.

WAYNE, NJ (SEPT. 4) PR NEWSWIRE - GND Holdings Corporation, the indirect parent of the Grand Union Company, one of the nation's largest retail food chains, today announced a 14.3 percent increase in operating cash flow (EBDIAT - earnings before LIFO provision, depreciation and amortization, unusual items, interest and income taxes) for its 16-week first quarter ended July 21, 1990.

EBDIAT totaled $56.7 million for the quarter, a 14.3 percent increase over EBDIAT of $49.6 million for the same period of the prior year. EBDIAT as a percentage of sales was 6.16 percent in the first quarter, compared to 5.49 percent for the same period last year.

The company's continuing improvement in EBDIAT resulted in part from efficiencies as the result of the opening of a new 59,000-square-foot frozen distribution center in Chester, N.Y., and improved buying and merchandising programs.

Sales for the first quarter were $919 million, 1.8 percent increase over sales of $903 million in the prior year. Sales in stores which were operated during the entire periods in both years increased 1.8 percent as well. Net losses for the quarter were $15.56 million versus $16.7 million in the same period last year.

Joseph J. McCaig, president and chief executive officer of Grand Union, said, "Our company's EBDIAT performance during the first quarter exceeded our projections, and we continue to perform above our current financial goals.

"We are confident that our operating results will continue to reflect comparable cash flow growth for the balance of the year as the contribution from major capital projects opened during the first quarter augments the consistent growth in our existing sales base,"

McCaig noted that operating income comparisons with the prior year are not comparable due to the additional non-cash charges associated with last year's acquisition of Grand Union by GND Holdings.

On July 31, McCaig noted, Grand Union entered into an agreement to lease 13 former P&C Food Markets in Vermont and New Hampshire and is now operating those stores as Grand Union food stores. At the same time, a total of five Grand Union stores were sold to satisfy certain conditions related to last year's acquisition of the company imposed by state and federal anti-trust authorities.

In addition, McCaig said, "Our capital expenditure program is on schedule with two new stores, three enlargements and four renovations accomplished during the quarter."

ST. PAUL, MI (SEPT. 4) PR NEWSWIRE - Zeos International, Ltd. (NASDAQ/NMS: ZEOS) today announced that Donald W. Cartwright, the chief operating and financial officer of Zeos, has resigned to pursue other business interests. Cartwright also resigned from the board of directors of Zeos.

Gregory E. Herrick, the chief executive officer of Zeos, expressed his appreciation for Cartwright's services to Zeos over the past one and one-half years as the company's operations have grown from less than $12 million in net sales to over $54 million for the first half of 1990.

William T. Bartley, vice president of operations and Judy L. Larkin, controller, will assume Cartwright's responsibilities in their respective areas until a successor is named. In addition, Cartwright has agreed to provide consulting services to Zeos on a short term basis.

Zeos International, Ltd., manufactures and markets, direct to end users, ISA and EISA (Industry and Extended Industry Standard Architecture) personal computer systems and workstations based on the Intel 80286, 80386 and 80486 microprocessor world wide under the Zeos name. The company also provides contract manufacturing services under the name NPC Electronics and distributes passive electronic components through its Parts1 distribution division.

COARSEGOLD, CA (SEPT. 4) PR NEWSWIRE - Leading the way for other software developers, Sierra On-Line Inc. (NASDAQ: SIER) announced today that its Japanese subsidiary, Sierra Japan, will release the first in a series of interactive, multi-media software for the Fujitsu FM-Towns CD-ROM computer. The CD-ROM version of 'Mixed-Up Mother Goose' will be available in Japan in late November of 1990.

President and CEO Ken Williams said: "'Mixed-Up Mother Goose' is the first true multi-media product on the market. In addition to the high resolution 256 color graphics, it has digitized voices singing and speaking and speaking all the parts. We have only just begun to develop and market for this field; this is a ground-breaking project for Sierra and for the entire industry."

Utilizing the vast disk storage capabilities of the CD-ROM, this version of 'Mixed-Up Mother Goose' will feature painted background graphics, full voice in both Japanese and English, and animation on a level not previously available.

The release of 'Mixed-Up Mother Goose' in late September will be followed by other interactive multi-media entertainment from Sierra in the coming months.

Sierra develops and publishes interactive adventure software for the high end of the consumer market, including IBM PC, IBM compatibles, Apple, Atari ST and Commodore Amiga systems. The company's products feature high quality graphics, music and sound effects.

#90247p1176 09/04/1990 ~PR Newswire
ST. LOUIS (SEPT. 4) PR NEWSWIRE - Two studies of McDonnell Douglas' Employee Assistance Program (EAP) have found that the program's personalized approach to helping employees with emotional, mental health and substance abuse problems has reduced health care costs while improving the quality of care employees receive.

One study of a pilot managed health care program that used EAP technology to provide mental health and chemical dependency care showed that the approach reduced per capita mental health and substance abuse costs by 34 percent.

The second report updates a study of EAP cost-effectiveness for 1985 through 1988 that was published last year. The updated results project

that the EAP will save more than $6 million over the next four years in health care costs for employees who entered the program in 1989. This savings is a three to one return on McDonnell Douglas' investment in EAP.

The studies were conducted by Health Strategies Group of Alexander and Alexander Consulting Group, Westport, Conn. Copies of both reports are available upon request.

More than 80 percent of McDonnell Douglas employees who use EAP have mental health or substance abuse problems. The McDonnell Douglas EAP, founded in 1970, serves as a liaison between these employees and health care insurers and providers.

The EAP counselors assess an individual's situation and recommend programs covered by the person's insurance that best suit his or her needs. The counselors then provide personal, long-term case management support for the individual.

This approach was used in the ASSIST pilot program, which involved nearly 7,000 employees of McDonnell Douglas Helicopter Co. in Mesa, Ariz., and Culver City, Calif. In the pilot program, mental health and chemical dependency care benefits were separated or "carved out" from employees' medical indemnity or HMO coverage.

A managed behavioral health care system with a small high-quality network of providers, with whom reasonable discounts were negotiated, was established. The EAP then provided the means for individuals to access the system on a personal level and gave each person long-term case management support.

During the first year of the ASSIST program, McDonnell Douglas was able to reduce per capita mental health and substance abuse costs by 34 percent, cut the same costs for employees in the inde/mnity medical plan by 51 percent and provide access to care for employee and dependents enrolled in HMOs for $51 per person. In addition, the 1,172 individual clients and their families served by the program had no significant complaints about the quality and accessibility of care.

MIAMI (SEPT. 4) PR NEWSWIRE - DWG Corporation (AMEX: DWG) announced today that DWG and Granada Investments, Inc., and certain third-party defendants, including Granada's chairman, Andrew N. Heine, have reached a settlement of both Granada's lawsuit brought derivatively against DWG's directors in the Federal District Court for the Northern District of Ohio and DWG's

counterclaim against Granada and its third-party complaint against the other settling parties.

If approved by Chief Judge Thomas D. Lambros, the settlement will resolve all issues raised in the lawsuit except certain claims by DWG against certain non-settling parties. The settlement was the subject of lengthy negotiations.

Among other things, the settlement provides for certain changes in the corporate governance of DWG. The terms of the settlement are embodied in a Stipulation of Settlement filed with the court, which remains subject to the approval of the court, and will be conveyed to the shareholders of DWG in a notice to be mailed as prescribed by the court.

No date has been set by Judge Lambros for a hearing on the proposed settlement.

DALLAS (SEPT. 4) PR NEWSWIRE - Southwest Airlines kicks off its 20th anniversary celebration with a $20 One Way Take Along Fare being offered in conjunction with American Express Travel Related Services.

For just $20 one way, a regular fare customer can "take along" a companion to any Southwest Airlines destination, no matter how far away - whether it be from San Antonio to Dallas or from Nashville to San Francisco - when both tickets are purchased with the American Express Card.

The $20 One Way Take Along Fare is available for reservations beginning Sept. 5 for travel from Sept. 6 through Dec. 19, 1990. The fare is good for flights Monday through Friday from 9 a.m. to 3 p.m. and 7 p.m. to 6:59 a.m. plus noon Saturday to noon Sunday.

Reservations are required at least one day in advance, and both passengers must travel on the same itinerary. Both the regular fare and "take along" fare are fully refundable. All segments of travel must be completed by Dec. 19, 1990, and the full fare customer must be 18 or older.

"We think our customers deserve the chance to get away for a long weekend with their spouse or 'significant other,'" said Don Valentine, vice president-sales and marketing for Southwest.

"As a reward for 20 years of patronage, we are telling customers they can pay only $20 one way to take their companion anywhere on our system - with

reservations only ony day in advance and tickets that are fully refundable " Valentine continued.

Southwest Airlines began service in 1971 between Dallas, San Antonio, and Houston. It is now the eighth largest carrier in the nation in terms of passengers carried, and is now a "major airline" by virtue of its over $1 billion in operating revenues for 1989. The $20 One Way Take Along Fare is just one of several celebrations planned for the 1990-91 anniversary year.

"We know that this offers an irresistible opportunity for those customers who are willing to travel when we have the seats available and at the same time increase our traffic during a time when business generally slacks off " concluded Valentine. For further details and reservations, contact the local Southwest Airlines reservations number.

MCLEAN, VA. (SEPT. 4) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) today announced that the United States Air Force has purchased a VITAL (Virtual Image Take-Off and Landing) MULTIVIEW visual display system for its latest C-5B aircraft simulator.

The VITAL MULTIVIEW system is built by the McDonnell Douglas Electronic Systems Co. (MDESC). VITAL is the company's line of computer generated visual systems for pilot training. MULTIVIEW is its state-of-the-art cross cockpit viewing system that displays the computer generated images to the pilots training in a simulator. The MULTIVIEW display selected by the Air Force is a five-channel system that will display five separate

images side by side, forming an uninterrupted panoramic field-of-view 225 degrees wide. The resulting picture seen by the aircrew in the simulator is fully collimated. Another MULTIVIEW feature is digital edge blending, which provides a transparent transition between adjacent channels. The MULTIVIEW picture is very bright and sharp because the system uses commercially available 9-inch projection tubes. These CRTs combine high light output with long life at more affordable prices.

"This sale solidifies MULTIVIEW's position in both the commercial and military aircraft simulator market," said Kenneth Anderson, director of MDESC's Visual Simulation Systems Business Center.

McDonnell Douglas will integrate the VITAL MULTIVIEW system with a simulator to be built by CAE in Montreal, Canada. The system will then be delivered to the U.S. Air Force, where it will be integrated with the C-5B crew training systems.

MINNEAPOLIS (SEPT. 4) PR NEWSWIRE - IDS Financial Services announced today that Jeffrey E. Stiefler has been named president of the company. Harvey Golub, currently president and chief executive officer, becomes chairman and chief executive officer.

Stiefler, executive vice president of sales and marketing, will retain responsibility for those areas and will have additional responsibility for the company's product areas, namely mutual funds, insurance and annuities, certificates, limited partnerships, tax services, consumer banking and brokerage services. IDS' service quality assurance function will also report to him.

He remains a member of the IDS board of directors and will become a member of the American Express planning and policy committee, a group of senior executives that works with Chairman James D. Robinson, III on issues affecting that company.

In a related move, Golub will become vice chairman of American Express Company, which acquired IDS in 1984. He will be elected to the American Express board of directors and be a member of its finance committee. As vice chairman, he will oversee American Express' corporate finance and strategic planning functions as well as coordinate the planning and policy committee.

As chairman and CEO of IDS, where he's been since October of 1983, Golub

will continue direct responsibility for human resources, investment services, finance, legal, and communications functions and the American Express financial planning business in London, Acuma Ltd.

IDS is America's largest financial planning company. Sales and earnings have grown rapidly since its acquisition by American Express. The company's strategy is to help clients meet their financial goals through financial planning. More than two million individuals, small businesses, and institutions are served through a nationwide field force of 6,200 financial planners.

Golub said that IDS will continue to be committed to its current strategy and that linking the firm's manufacturing, distribution, marketing, and service quality functions together will help the firm execute that strategy even better.

Stiefler joined IDS in 1983 as head of the marketing department. He left in 1986 to become president of Philadelphia Savings Fund Society, the country's largest and oldest savings bank. In 1987, he returned to IDS in his current job.

#90247p1187 09/04/1990 ~PR Newswire

SAN FRANCISCO (SEPT. 4) PR NEWSWIRE - S.A. Megeath, III today announced his resignation from the Board of Directors of PLM International Inc. of San Francisco (AMEX: PLM), which he tendered to the company yesterday, Sept. 3, 1990.

In his resignation letter, Mr. Megeath, 44, cited intense disagreement with the board of directors over the company's operations, policies and practices and his unwillingness to accept what he views as significant deviation from sound and responsible management and fiduciary standards.

Megeath said the Board made it impossible for him to fulfill his responsibility to the shareholders by depriving him of information necessary to the fulfillment of his duties as a director. He cited the company's management directors and especially Robert Tidball, PLM International's President and Chief Executive Officer, who has served in this capacity since March 9, 1989.

Megeath said this situation became critical during the past week when the Board removed him from all of his positions in the company, except his directorship, including his positions as Chairman of the Board of Directors, Chairman of the Executive Committee of the Board and a member

of the Audit Committee.

Megeath served in those capacities from Oct. 14, 1988 until Aug. 29, 1990. Megeath became Chairman of PLM International immediately after Mark C. Hungerford resigned under pressure brought by all of the then outside directors, for what PLM International described in an SEC filing, dated March 16, 1989 as a misappropriation of company property by him and Transcisco Industries Inc. Hungerford is the Chief Executive and controlling stockholder of Transcisco. Transcisco owns 36 percent of the common stock of PLM International.

Megeath is and has since 1985 been the Managing General Partner of LEF&C Partners of Carson City, Nev., which is engaged in corporate strategic and advisory services, risk capital and investments. From 1979 through 1985, he was Chief Executive Officer of LEF&C Corp. of San Francisco, a diversified company with investments in rail transportation; including ownership of the Lake Erie, Franklin and Clarion Railroad railroad equipment leasing, natural resources, real estate and securities.

(SEPT. 4) UPI - The Pentagon says the pilot of an Air Force F-16 jet that crashed in the Persian Gulf Tuesday ejected from the plane and escaped injury. The afternoon crash occurred during a routine training mission. The Pentagon says a panel of officers will look into the crash. The plane was deployed to the Middle East as part of Operation Desert Shield.

The 15 percent of voters said to be ''undecided'' in one poll may control the outcome of Tuesday's Democratic gubernatorial primary in Florida. The poll shows former Senator Lawton Chiles leading Representative Bill Nelson 55 percent to 30 percent. The winner will face incumbent Repulican Governor Bob Martinez in November. Recent polls show both Democrats outpolling the Republican in head-to-head matchups.

A plan offered Monday by French President Francois Mitterand would boost the amount of aid the globe's economically advanced nations provide to the world's poorest countries. Mitterand called upon industrialized countries to follow France's lead of funneling two-tenths of one percent of its gross national product to the world's 42 poorest countries.

More than two-dozen animal rights activists were arrested Monday in east-central Pennsylvania for protesting an activity they didN'T think was for the birds. The demonstrators were taken into custody as they tried to disrupt the annual Fred Coleman Memorial Day Pigeon Shoot... a yearly activity in which seven-thousand pigeons are gunned down. Participants each pay 90 dollars to take a crack at birds that are released from cages 32 yards away.

#90247u0156 09/04/1990 ~United Press International

(SEPT. 4) UPI - Former Chilean President Salvador Allende will receive a formal burial Tuesday... exactly 17 years after he died in a bloody coup. Officials of the newly elected Chilean government say the re-burial is ''an act of reparation.'' However, members of the military regime that took power from the socialist leader refer to the reburial as ''grotesque.''

Many students in El Salvador received an UNexpected holiday Monday as an estimated 80 percent of the Central American nation's public school teachers began a five-day strike. The educators remained away from their classrooms to protest controversial educational reforms, as well as to demand a 33-percent pay hike. Currently, the average teacher's salary is 190 dollars a month.

#90247u0227 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - Eight young men looking for money to get into a dance hall were charged Monday in the stabbing death of a 22-year-old Utah tourist killed on a subway platform as he tried to protect his mother, police said.

Yull Garry Morales, 19, of Queens, and seven other young men were all charged with murder and robbery Monday night, detective Joseph DeMartino of the Midtown North Precinct told a news conference.

The youths were charged in the death of Brian Watkins, 22, of Provo, Utah, who was fatally stabbed as he waited on the D train platform of a midtown Manhattan subway station at 10:20 p.m. Sunday, DeMartino said.

Police believe Morales, who goes by the street name ''Rockstar,'' wielded the knife, DeMartino said.

The others arrested were Anthony Anderson, Emilo Fernandez, 17, whose street name was ''Trauma,'' Louis Fernando Montiero, 20, and Jonnie Hincapie, 18, all of Queens, Pascal Carpenter, 18, of Brentwood, N.Y., Ricardo Nova, 18, who had no known address, Ricardo Lopez, 18, whose address was given tentatively as Queens.

''While waiting for the train the family was approached by a group of males who demanded money,'' DeMartino said. ''A struggle ensued during which Mr. Watkins' father was assaulted and slashed across his buttocks.

''His mother was knocked to the ground and kicked in the head. Brian came

to his parents' aid and was stabbed in the chest. He died on the way to the hospital,'' DeMartino said.

Watkins died at St. Vincent's Hospital at 11 p.m. Sunday. His mother and father, who also were injured, were treated and released from the same hospital.

Todd Watkins, who also came to his mother's aid, and his wife, Michelle, were not injured.

The Watkins family had assisted in the investigation and were planning to stay in New York to assist prosecutors in the case. ''They want to see this thing through. They will be available for the prosecution,'' DeMartino said.

Detectives believe the youths were part of a group that had come from Queens to go to Roseland, a popular Manhattan dance hall, and had attacked the family to get money to enter the hall, DeMartino said.

The men were traced to Roseland just blocks from the subway station. Some were followed there and two were arrested shortly after the incident, said Capt. Steve Davis.

Three others were arrested coming out of Roseland about 4 a.m., shortly after police cleared the club following an unrelated shooting, Davis said.

Morales and Hincapie were arrested late Monday.

The family had been traveling by subway after an evening at the U.S. Tennis Open in nearby Flushing Meadows, for a late dinner at Central Park's Tavern on the Green restaurant, O'Leary said.

The father, Sherman Watkins, 46, was cut in the leg as one mugger slashed his pants pocket to grab a money clip containing $200 and credit cards, and the mother, Karen Watkins, 45, was punched in the mouth, said Sgt. Tina Mohrmann, a police spokeswoman.

Mayor David Dinkins expressed his sympathy to the family.

''Of course we are saddened by this occasion and there is little comfort to this particular family that we have crime and violence elsewhere in this country,'' Dinkins said.

DeMartino said police recovered several weapons, including a knife he described as a sheetrock cutter and a butterfly knife, believed to have been used in the stabbing. A third knife was also recovered.

Police said some of the suspects made statements saying that what started

out as a robbery turned into a stabbing.

Watkins was the 18th person killed in the city's subway system this year, compared with 20 victims by this time in 1989.

TOKYO (SEPT. 4) UPI - Soviet Foreign Minister Eduard Shevardnadze called Tuesday for an international conference to resolve the Persian Gulf crisis without resorting to force in the Middle East, local news reports said.

Shevardnadze, delivering a policy speech in Vladivostok, said the gulf crisis should be resolved through non-military means and the foreign military presence should be eliminated from the region, Kyodo News Service reported.

Shevardnadze apparently provided no details nor timetable for the proposed conference.

The Soviet Union has supported U.N. sanctions against Iraq for its Aug. 2 invasion of Kuwait, but Moscow has been critical of the U.S. military buildup in Saudi Arabia and Middle East waters in an effort to deter an Iraqi attack on the oil-rich kingdom.

During his policy speech, Shevardnadze also proposed a conference of Asian and Pacific nations' foreign ministers be held in Vladivostok in 1993 to discuss establishing a security forum in the region, local news reports said.

He proposed to hold a preparatory session among the foreign ministers in New York where the United Nations General Assembly will be held this month the reports said.

Shevardnadze also said he hoped to see progress in talks between South and North Korea.

The Soviet foreign minister is due to arrive Japan Tuesday evening for talks with his Japanese counterpart, Taro Nakayama, during a four- day visit to Japan.

#90247u0245 09/04/1990 ~United Press International

FALLON, Nev. (SEPT. 4) UPI - A light plane lost power on takeoff and crashed in a field, killing one person and injuring four others, including Republican candidates for lieutenant governor and treasurer in Tuesday's primary election.

State Sen. Sue Wagner, a front-runner for lieutenant governor, and Robert Seale, a GOP candidate for state treasurer, were seriously injured in the Monday crash and flown to Washoe Medical Center in Reno for treatment. Seale's wife, Judy, who was the co-pilot of the plane, was killed.

Wagner and Seale, both listed in serious condition Monday night, suffered multiple trauma, concussions, and serious lung injuries, said a spokeswoman at Washoe Medical Center. Hospital attendants said both Wagner and Seale were conscious when they were airlifted 60 miles from the crash site to Reno.

Wagner also suffered spinal fractures, said the hospital spokeswoman. Seale suffered facial injuries, a fractured wrist and two broken ankles. Both Wagner and Seale ''are improving'', said the hospital spokeswoman.

Undersheriff Greg Nelson said the wreckage, near Rattlesnake Reservoir, was scattered over a large area. The plane's left wing was torn off and the fuselage was badly damaged. The crash occurred shortly after noon about 3 miles northwest of the Fallon airport in western Nevada.

Stephanie Tyler, a campaign aide to Wagner, also was injured in the crash. She said Seale was piloting the Cessna 411 twin-engine plane when it lost power shortly after takeoff.

''It never got full power,'' she said. ''He (Seale) was turning around and one engine started to smoke.''

Tyler said Seale ''did a hell of a job'' in trying to control the plane. After the crash, she said she was able to get free of the wreckage. Another passenger, Brian Krolicki, an aide to Seale, was thrown clear of the plane. But Tyler said Wagner, Seale and his wife were pinned in the wreckage.

Krolicki walked 2 miles to a ranch house where he phoned for help. Both Tyler and Krolicki were taken to the Churchill County Regional Medical Center.

Tyler, who suffered a broken vertebra, was later taken by ambulance to Washoe Medical Center. Krolicki suffered cuts on the back of his head but was treated and released, though he accompanied Tyler in the ambulance to Reno.

Wagner and Seale had been campaigning at the Labor Day festivities in Fallon. They had taken off for Carson City, about 60 miles to the west, to attend the traditional GOP Labor Day picnic later in the day.

Ironically, Wagner's husband, Pete, an electronics engineer at the Desert Research Institute, was killed in a plane crash in March 1980 in a cloud seeding flight during a weather modification program in the Sierra Nevada mountains.

Wagner, 50, is an odds-on favorite to win the GOP primary Tuesday against anti-abortion candidate Andy Anderson. She has served in the Nevada Legislature since 1975, first in the Assembly and in the Senate since 1981.

She is special assistant to president of Desert Research Institute of the University of Nevada in Reno.

Seale, 48, certified public accountant from Reno, is running for state Treasurer against incumbent Ken Santor in the Tuesday primary election.

Political leaders, including Gov. Bob Miller, a Democrat, and Senate Majority Leader William Raggio, R-Reno, showed up at the hospital to see how they could help. Miller assisted in locating and notifying Wagner's daughter, Kristina, and son, Kirk, who were away at college.

#90247u0268 09/04/1990 ~United Press International

TOKYO (SEPT. 4) UPI - The Tokyo stock market put on a repeat performance Tuesday, dropping by 2 percent in thin trading.

The Nikkei average of 225 selected shares dropped 512.79 points, or 2.0 percent, to end the day at 24,907.64. The market's leading indicator fell 557.94 points Monday, equivalent to 2.1 percent of the Nikkei as it stood at the end of last week.

The broader Tokyo Stock Price Index plummeted 35.54 points to close at 1,910.38. TOPIX, which measures all major shares, had fallen 28.05 points the day before.

Volume continued to be low with an estimated 330 million shares changing hands, compared with 368.96 million Monday.

Buying interest dried up as investors of all types retreated to the sidelines to await new developments, brokers said.

The combination of investment-fund purchases and dealer buying that drove the market up over 7 percent last week disappeared Monday, brokers said.

This in turn discouraged individual investors.

Concern about the Middle East continued to plague the market, said analyst Masashi Kubota of Kokusai Securities.

''There's a tenseness in the market as the Middle East news flows out to us,'' he said.

Investors have given up hope of a diplomatic breakthrough in the immediate future, brokers said.

The market was also hurt by another rise in bond yields. The yield on the benchmark Japanese government bond inched up 0.015 percentage points to 8.130 percent.

Declining stocks eclipsed advances by about 8:1.

Selling centered on large-capital and blue chip stocks. Especially hard-hit were steel, shipbuilding, machinery and electric issues.

What little buying there was focused on smaller, incentive-backed issues, that is, those with potentially high earnings or gratis dividends.

(SEPT. 4) UPI - Around the world... around the clock... the morning news from United Press International:

Diplomats are having problems getting more foreign women and children out of Iraq and occupied Kuwait. Iraqi officials insist that if other countries send planes to pick foreigners up, Iraq should be able to send planes abroad to ferry its citizens to Baghdad. Western diplomats insist that would violate the U-N sanctions against Iraq.

An 18-year-old college student, a suspect in the five grisly Gainesville, Florida, co-ed murders has a bond hearing today. Edward Humphrey is being held on assault charges for beating his grandmother. His lawyer will demand a bond reduction unless more serious charges are brought. Classes resume at the University of Florida in Gainesville today.

Two Republican candidates in today's Nevada primary were injured yesterday in a light plane crash at Fallon, Nevada. They were Sue Wagner, a front-runner in the race for lieutenant governor, and Robert Seale, a candidate for treasurer. Both were seriously injured. Seale's wife, Judy, the co-pilot was killed. Two others were injured.

Florida Democrats choose a gubernatorial candidate in a primary today. The choice is between former Senator Lawton Chiles and Representative Bill Nelson. The Florida Newspaper Poll says Chiles is leading. The Republican candidate is incumbent Governor Bob Martinez.

About 100 wounded war veterans took over the national television station in Nicaragua yesterday and forced it off the air. Most of them were in wheelchairs. The veterans demand higher pensions and an audience with the president. The disabled Nicaraguan veterans now get a pension of 25 dollars a month.

(SEPT. 4) UPI - Another trial begins today in northeast Ohio's cult slayings. 19- year-old Damon Paul Lundgren will be tried for the kidnappings and murders of a man and wife and their three daughters.

Damon's father, a cult leader, and his mother were convicted in previous trials.

New York City police have charged eight young men in the weekend stabbing death of a 22-year-old tourist from Utah in a subway station. The police say the suspects robbed the man's family for money to get into a Manhattan dance hall. The youths- aged 17 to 20- were charged with murder and robbery.

Air Force meteorologists predict an 80 percent chance of acceptable conditions for Thursday's scheduled launch of the shuttle Columbia. The countdown resumed yesterday. Today, engineers are pumping in fuel to produce electricity for the shuttle. Rocket fuel is to be loaded tomorrow.

City officials in Virginia Beach, Virginia, say the weekend Laborfest '90 was a success. Laborfest '90 was an organized event put on for thousands of black college students to prevent violence such as occurred last Labor Day weekend. The officials say there were NO major incidents during the weekend.

The annual Labor Day Muscular Dystrophy Telethon raised more than 44-Million dollars. The 21-hour telethon hosted by Jerry Lewis exceeded last year's pledges by two-Million dollars. Some 200 television stations carried the show, which was broadcast from the Aquarius Theater in Hollywood.

NEW YORK (SEPT. 4) UPI - A 10-year-old boy standing on a Brooklyn street was shot and wounded by a stray bullet, police said Tuesday.

The boy was the 13th shot by stray gunfire since July 22 in the city's violent summer. Five of those children have died.

The child, who was not identified, was shot in the right shoulder as he stood at a street corner in the Brownsville section, said Sgt. Mary Wrensen, a police spokeswoman.

''After he was shot, he ran about one block east and then collapsed,'' Wrensen said.

The boy was taken to Brookdale Hospital where he was in stable condition and was expected to live, Wrensen said.

Witnesses said they heard five gun shots fired at the time of the shooting Wrensen said.

#90247u0315 09/04/1990 ~United Press International

BANGKOK, Thailand (SEPT. 4) UPI - Two top resistance leaders said Tuesday they will skip planned peace talks in Jakarta unless Cambodian Prime Minister Hun Sen reverses his decision to stay away, threatening the talks with collapse before they even start.

The Jakarta talks, meant to set up a joint national council and discuss a U.N. peace plan, had been seen as a good chance to take advantage of rare superpower agreement on how to end the 11-year-old conflict.

The squabbles over who would attend the meeting scheduled to start Thursday have underlined the difficulties of working out a lasting settlement in Cambodia.

Tuesday, Hun Sen, leader of the Vietnamese-installed government, announced he would not attend the talks because top resistance leader Prince Norodom Sihanouk declined to participate.

A Sihanouk official explained that the prince was not attending the meeting because it was only the initial step in what would be a long negotiating process expected to culminate in Paris.

Sihanouk nominated his son and army commander Prince Norodom Ranariddh to take his place.

That sparked Hun Sen's decision to send a minister attached to his office in his place and set off a chain reaction of cancellations.

Khieu Samphan, nominal leader of the Khmer Rouge - the most powerful of the three resistance groups - distributed a statement that said he had been ready to go to Jakarta until hearing of Hun Sen's change of plans.

He said he would go to Jakarta for the meeting ''whenever Hun Sen accepts to join it.''

''Hun Sen's boycott of the meeting shows that Vietnam and Hun Sen are not sincere in the search (for) a solution to put an end to the Vietnamese war of aggression,'' the statement said.

Khieu Samphan said Hun Sen's failure to attend the meaning also showed that he did not accept the U.N. peace plan.

That plan, worked out by Britain, China, France, the Soviet Union and the United States, provided for separation and disarmament of all forces, a massive U.N. supervisory role and free general elections.

Ranariddh then made a similar announcement on the resistance radio station Voice of the Khmer.

The radio said Ranariddh regretted Hun Sen's decision not to attend and would therefore also stay away, sending a lower-ranking official in his place.

The cancellations frustrated diplomats and officials who have labored to solve the long-running conflict.

''If they don't go to the meeting, we would be disappointed,'' said Thai government spokesman Suvit Yodmanee.

''But it's their funeral - really their people's funeral,'' he said.

Fighting has stepped up in Cambodia in the past 11 months since Vietnam withdrew most, if not all of its combat troops from Cambodia in September 1989.

The Vietnamese-backed government still controls most of the population, but it has not been able to stop guerrilla attacks deep inside the country.

Vietnam invaded Cambodia in 1978, ousting the Khmer Rouge government that was blamed for border attacks on Vietnam and harsh policies that led to the deaths of more than 1 million Cambodians.

#90247u0355 09/04/1990 ~United Press International

SEOUL, South Korea (SEPT. 4) UPI - North Korean Prime Minister Yon Hyong-muk arrived in Seoul Tuesday for unprecedented talks with his South Korean counterpart, Kang Young-hoon, on how to improve relations and push unification of the two Koreas divided for 45 years.

Yon and six other North Korean officials crossed the border about 10 a.m. at the truce village of Panmunjom, 35 miles north of Seoul, accompanied by 33 support personnel and a 50-member press corps.

The Northern delegation in an arrival statement issued through a spokesman hoped to meet family members of South Korean dissidents jailed for unauthorized trips to the North.

''We came to Seoul seeking reconciliation and unity as one nation. We came to open the door to national reunification together,'' the statement said. ''National reunification can not be achieved by relying on foreign influences, by efforts of either side alone or by the powers of (government) authorities only.

''To open the door to reunificiation, a state of political and military confrontation must be brought to an end as soon as possible and projects promoting reconciliation and unity must be pushed actively.''

While promising proposals for peaceful reunification, the North Korean statement referred to Presbyterian pastor Moon Ik-hwan, student Im Su-kyong and Catholic priest Moon Kyu-hyun serving prison terms of seven

to five years for illegal visits to North Korea.

''Our stay is short, but we hope to meet and exchange views with leading personalities in politics and various social strata. We also hope to see the family members of those jailed for visits to the North and convey sympathies from the North Korean people,'' it said.

Yon was all smiles as he crossed into the South and received a lei from a child from Seoul in traditional Korean dress.

While the North Korean officials were driving through Seoul, a traffic accident occurred and two of the Northern delegates suffered slight injuries, a spokesman for the Seoul side said.

Kang met his guest at the Intercontinental Hotel in southern Seoul where the North Koreans arrived around noon. The two prime ministers shook hands and went up to Yon's room and chatted for about 10 minutes.

The 34-story hotel will be the official quarters and meeting place for the delegates attending the prime ministers meeting, the highest- level contact ever between South and North Korea divided in 1945.

The first session of the prime ministers talks will be held at 10 a.m. Wednesday and open to news coverage. A second meeting will take place Thursday in private.

The agreed agenda is a comprehensive one - how to end political and military confrontation and promote many-sided exchanges and cooperation between the two sides.

Seoul officials said the they ''will try to achieve substantive results by offering relatively easy-to-implement projects for exchanges and cooperation while keeping away from any moves that would likely embarrass or annoy the North Koreans.''

North Korea, meanwhile, has indicated through official news outlets that it is more interested in military issues such as the questions of arms control and a non-aggression pact including the withdrawal of 43,000 U.S. troops stationed in South Korea.

North Korea has also listed as a major issue the question of U.N. membership for the two Koreas. Seoul prefers simultaneous but separate membership for both sides but the North insists that the South and the North share a single seat in the world body because separate membership could perpetuate Korea's division.

Following the Thursday session, Yon and other official North Korean delegates are scheduled to pay a courtesy call on President Roh Tae-woo.

The North Koreans will return home Friday.

Under an exisiting agreement, the second round of the prime ministers talks will be held in Pyongyang, the North Korean capital, Oct. 16-19. Subsequent meetings will take place alternately in the two capitals on dates yet to be set.

#90247u0398 09/04/1990 ~United Press International

(SEPT. 4) UPI - Flash flood watches were in effect across the Southwest Tuesday as thunderstorms with heavy rain and high winds blanketed the area and clear, warm weather covered much of the nation.

The storms in California, Arizona and Nevada came on the heels of a sudden electric storm that hit Boulder City in southern Nevada Monday evening, setting on fire a supermarket and a residence.

The storm surprised 100,000 Labor Day visitors to the Lake Mead Recreational Area behind Hoover Dam, near Las Vegas, where rangers broadcast marine warnings to boaters shortly before 50-mph winds hit. On land, sheets of rain forced motorists to the side of the road.

The storm was churned up from a low-pressure area over northern Mexico, and in the metropolitan Phoenix area the same storm brought high winds Monday night that uprooted trees, flooded streets and downed power poles.

The National Weather Service warned Arizonans to watch the sky, stay out of flash-flood prone areas and to stay away from objects that attract lightning.

Thunderstorms continued into Tuesday throughout southern Nevada and flood watches were posted for Lincoln and Clark counties, but the storms eased toward daybreak.

A flash flood watch was posted Tuesday for the eastern half of San Bernardino County in Southern California as isolated, heavy thunderstorms hit the desert areas.

The storms contained gusty winds that reached 45 mph and frequent lightning as they continued through the morning. A second area of storms was located in northern Baja and in the mountains of San Diego County.

A weak high pressure system brought cloudiness to the South and some scattered thunderstorm along the North Carolina coast, Tennessee, Mississippi and Alabama.

Memphis, Tenn., received up to half an inch of rain, dropping temperatures from a record 100 degrees to the lower 70s. The heat remained in Mississippi, with Columbus and Meridian both reaching 101 degrees and Jackson, Tupelo and Greenwood recording 100.

The Midwest had a variety of weather ranging from cool temperatures with rain in Michigan, to hot sun and highs in the 90s in Illinois, and clear skies covered most of the rest of the region.

Thousands of children returning for the first day of school in the Northeast did so with cool temperatures and clear skies.

#90247u0416 09/04/1990 ~United Press International

BEIJING (SEPT. 4) UPI - A move to bar Iraq from this month's Asian Games to avert a boycott by some Arab nations has left host China struggling to avoid an embarrassing political confrontation, officials acknowledged Tuesday.

Senior Chinese sports officials, at a news conference, said they were still studying the implications of a telex sent to Asian Games nations by the Olympic Council of Asia to poll them on whether Iraq should be excluded from the competition.

''No one is very clear,'' said Wei Jizhong, director of the Liaison Department of the Beijing Asian Games Organizing Committee, when asked about the procedure under which Iraq could be excluded. ''It will call for consultations.''

With the OCA counting major Arab and Persian Gulf countries among its 38 members who will participate, the fallout on the Games from the Iraqi invasion of Kuwait last month appears to have paralyzed Chinese officials fearing it could mar the event.

The two-week extravaganza beginning Sept. 22 is China's first major international competition. The government sees it as a means of recovering national prestige lost when Chinese troops brutally crushed the democracy movement last year.

But after Arab nations indicated they might boycott the Games if Iraq participates, the Olympic Council of Asia's secretary general, C.L. Mehta, sent telexes last week to Games nations asking if Iraq should be barred. Replies are due by Thursday.

''It is not very clear if this is a sounding out of views or asking for a vote,'' Wei said, noting the Iraqi Olympic Committee had demanded an OCA meeting before any decision is taken.

''At this moment we are studying the (OCA) constitution in line with his telex,'' he said. ''As for a boycott, sports circles in the international community do not want such a boycott to happen.''

Officials said none of the OCA nations had yet withdrawn over the gulf crisis, but they refused to say whether China would support barring Iraq even to avoid a boycott or a confrontation during the Games if Iraq attends.

''The International Olympic Committee does not stand for introducing political disputes into sports,'' said Wu Zhongyuan, deputy secretary-general of the Beijing organizing committee.

''Likewise, the Chinese Olympic Committee and the Asian Games Organizing Committee do not stand for it,'' he said.

Chinese officials are known to be horrified over the prospect of an embarrassing political dispute just before the Games, but Wu insisted that a number of technical problems caused by the gulf crisis ''will not affect the Games in a fundamental way.''

Officials said Iraq has entered 12 events with a delegation of 95 athletes and officials, and an Iraqi soccer team is already in Beijing.

Kuwait, whose athletes were training outside the country when the invasion occurred, has also entered five events, with its application sent by officials from exile in Saudi Arabia.

Jordan, Saudi Arabia, the United Arab Emirates, Syria and other nations directly or indirectly involved have also submitted entries, they said.

Zhu Zhangling, another organizing committee official, said all 38 OCA countries and territories had agreed to take part and 37 have sent in full applications with namelists of delegations, totaling nearly 6,500 athletes and officials.

The committee has not yet received a complete entry from Palestine, which the council recognizes as an independent entity, apparently because its application was sent via a route that was disrupted, Zhu said.

''The Palestinians mailed it to us through Kuwait,'' Zhu said. ''So maybe it's on the way.''

-30- 3886

#90247u0477 09/04/1990 ~United Press International

TOKYO (SEPT. 4) UPI - Soviet Foreign Minister Eduard Shevardnadze

traveled to Tokyo Tuesday to lay the groundwork for a historic visit by his boss, Mikhail Gorbachev, next year.

Before his departure from Vladivostok for the four-day visit to Japan, Shevardnadze reportedly called for an international conference to deal with the Persian Gulf crisis. The Middle East is one of many subjects Shevardnadze, who arrived in Tokyo Tuesday evening, is expected to discuss with his Japanese counterpart, Taro Nakayama.

But the Japanese are mainly hoping they can make Gorbachev's 1991 visit the occasion for ending a territorial dispute that has kept Japan lagging behind Western nations in rapprochement with the Soviets.

On the eve of Shevardnadze's arrival, Eiji Suzuki, head of one of Japan's most influential business organizations, said Japan should show more flexibility in dealing with the Soviets.

The Japanese and Soviets have never made a formal peace following the end of World War II. Their relations have stalemated over four island territories off the eastern tip of Hokkaido, Japan's northernmost main island.

At the end of World War II the Soviet Union seized the islands - roughly comparable in size to Oahu, Maui and their surrounding islands in Hawaii - and expelled the 17,000 Japanese who lived there.

Japan has been demanding the return of the islands ever since. But the Soviets say Japan lost all rights to the territories when it gave up claims to the Kuril Islands in the 1951 San Francisco Peace Treaty it signed with the United States.

The islands have little economic importance, apart from the fishing waters around them, but carry tremendous emotional significance for the Japanese.

Prime Minister Toshiki Kaifu, who won recognition of Japan's ''Northern Territories'' claim at the Houston Summit in July, told a political rally Monday the issue cannot be set aside for the sake of better relations with the Soviets.

Japan has reportedly offered a 10-point plan to swap return of the islands for various points of cooperation, including help for victims of the 1986 Chernobyl nuclear disaster.

Kaifu warned fellow members of his Liberal Democratic Party against optimism for a quick settlement.

The Soviet Union, while eager for Japanese aid, fears that surrendering territory in the Far East could compound its troubles with breakaway

republics, analysts said.

But both sides are clearly maneuvering to make a deal.

Japan balked at economic aid to the Soviets during the Houston summit but will probably offer what it is terming ''intellectual cooperation'' in management training to Moscow during Shevardnadze's visit.

To sweeten the pot, Kaifu has reportedly persuaded the Defense Agency to delete its stock references to the Soviet Union as a ''threat'' in its annual white paper, due out this month.

The Soviets, who for decades denied the existence of the dispute have floated various compromise proposals under the rubric of ''a third way.''

Among these have been hints at joint administration of the islands and a suggestion they be turned over to U.N. trusteeship.

#90247u0541 09/04/1990 ~United Press International

(SEPT. 4) UPI - Seven buses carrying more than 300 British citizens left Kuwait City early today on a 500-mile trip to Baghdad. The B-B-C says the 148 women and 155 children are hoping to receive exit visas so they can leave Iraq for the West after being trapped for more than one month in occupied Kuwait. The caravan was organized by the British Embassy.

The New York Times reports the United States has secretly deployed combat aircraft to several Persian Gulf nations to help defend Saudi Arabia against Iraqi forces poised near the kingdom's border. Only a few of the deployments have been publicly disclosed because of the gulf nations' continued sensitivity about inviting the U-S military into their countries.

A 10-year-old boy who was standing on a Brooklyn street has become the 13th child shot by stray gunfire in New York City since July 22nd. Police say the UNidentified child was hit in the right shoulder as he stood at a corner in the Brownsville section. Police say the child ran about one block and collapsed. He's hospitalized in stable condition and is expected to live.

New York City police say eight young men are charged with murder and robbery in the stabbing death of a 22-year-old Utah tourist who was killed as he tried to protect his mother. Police say the attackers apparently were looking for money to get into a Manhattan dance hall when they attacked the family on a subway platform Sunday night. Police say they believe 18-year-old Yull Garry Morales wielded the knife.

Police in Jacksonville, Florida, say three gunmen who held an UNknown

number of hostages inside a Red Lobster restaurant surrendered early this morning. The hostage drama began during an aborted robbery attempt last night. Authorities say they were notified of the robbery when a witness saw a man with a shotgun go into the back of the restaurant.

-30- 2032

#90247u0623 09/04/1990 ~United Press International

(SEPT. 4) UPI - Relief officials in Jordan are pleading for international help for some 80-thousand refugees who fled Iraq and Kuwait and can NOT get home. They say food, medicine and shelter are needed. It is the largest refugee repatriation effort since World War Two.

A bus convoy carrying some 300 British women and children left Kuwait City on a 500-mile trip across the desert to Baghdad today. The group has been trapped in occupied Kuwait for one month and is seeking exit visas to get out of Iraq.

A Kuwaiti ship is being held at port in Newark, New Jersey. Port Authority police said it was detained by Customs officials, but Customs officials would NOT say why.

Three gunmen held hostages at a Red Lobster restaurant in Jacksonville, Florida, through the night, but surrendered early this morning. The incident apparently started when a holdup attempt failed.

Classes resume at the University of Florida in Gainesville today. College officials say they are trying to make conditions as normal as possible despite concern over the five young people found slain last week near the school.

At Cape Canveral, NASA workers plan to load fuel for the space shuttle Columbia's electrical generators today. The launch date is now set for Thursday. Seven astronauts are to spend 10 days in space on an astronomy mission.

Eight young men have been charged with attacking a visiting Utah family in a New York City subway station Sunday and stabbing one 22- year-old tourist to death. Police say the motive was to get money to go to a Manhattan dance hall.

French President Francois Mitterrand says France will give two-tenths of one percent of its gross domestic product to help poor nations. Mitterrand made the pledge yesterday in Paris as he opened a conference on poor nations.

A delegation from North Korea, led by the prime minister, arrived in Seoul today for talks with the South Korean government. The official talks on

re-uniting the two nations start tomorrow.

-30- 2174
#90247u0633 09/04/1990 ~United Press International
(SEPT. 4) UPI - New Zealand's Prime Minister Geoffrey Palmer resigned today. External Affairs Minister Michael Moore succeeded him. Palmer's resignation is expected to improve his Labor Party's chances in next month's election.

The Institutional Revolutionary Party, which dominates Mexican politics, has made the selection of candidates more democratic. The changes hurt the power of Mexico's labor unions which were able to nominate candidates.

Peruvian President Alberto Fujimori says Peru's inflation will drop this month to nearly zero. It has been running 12-thousand percent a year. Another Peruvian official says Peru will weak its currency to increase exports.

South African President Frederik de Klerk visited Soweto today. Soweto is the black Johannesburg township that has been the scene of much of the recent fighting between rival black groups.

The cabinet of Somalia was fired yesterday. It was the second time President Mohamed Siad Barre has ousted his ministers this year. The Somali news agency announced the change, but gave NO explanation.

Heavy thunderstorms brought flash flood watches to California, Arizona and Nevada. Last night, an electric storm set a supermarket and a house on fire in Boulder City, Nevada. High winds hit Lake Mead behind Hoover Dam.

-30- 1460
#90247u0658 09/04/1990 ~United Press International
TOKYO (SEPT. 4) UPI - Japan Tuesday flatly rejected an apparent overture by Iraq to release Japanese hostages held in Baghdad in return for supplies banned under U.N. sanctions.

''We have no intention of making a deal on this issue,'' Taizo Watanabe, chief spokesman for the Japanese Foreign Ministry told reporters.

He said Japan continued to insist that Iraq unconditionally release the hostages.

Iraq's overtures would not alter Japan's commitment to help the U.S.-led forces enforcing the embargo, Watanabe said.

Preparations for Japan's material and human contributions to the

multilateral forces confronting Iraq were going on ''day and night,'' he said.

Medical personnel were being interviewed, he said, and the government hoped to send its first medical team to the Middle East in about 10 days.

The $1 billion that Japan has pledged to support logistical efforts in the Gulf was not ready for distribution, but efforts were under way to procure vehicles and equipment on credit, he said.

Iraq's offer to swap hostages was reported by Japan's Kyodo News Service Monday out of the Iraqi capital of Baghdad.

All 141 Japanese men being used as part of Iraq's human shield will be freed if Japan sells Iraq food and medicine and buys its oil, Kyodo quoted Iraqi Information Minister Latif Nasif al-Jasim as saying.

A diplomat at Iraq's embassy in Tokyo said he knew nothing about such an offer.

The Japanese government has received no official proposal from Iraq, Watanabe said, although he acknowleged awareness of the media report.

-30- 1764

#90247u0687 09/04/1990 ~United Press International

(SEPT. 4) UPI - British officials say more than 300 Britons are traveling across the desert from Kuwait City to Baghdad today in search of exit visas and a way home. Seven buses and one car are carrying 148 women and 155 children on a 500-mile journey in very hot weather. The women and children were urged to bring along enough food and water for the trip.

Port Authority police in Newark, New Jersey, say a Kuwaiti ship is being detained at Port Newark. A Port Authority police spokesman says customs officials are handling the situation, but adds he's NOT sure why the ship was being held. Customs officials are refusing to comment on the situation.

Soviet Foreign Minister Shevardnadze is in Tokyo this morning to lay the groundwork for a historic visit by Soviet President Gorbachev next year. During his four-day visit, Shevardnadze is expected to discuss the Persian Gulf crisis with his Japanese counterpart.

Senior Chinese sports officials in Beijing are trying to avoid an embarrassing political confrontation regarding a move to bar Iraq from the Asian Games. Some Arab nations say they woN'T participate in the games if Iraq does. Chinese officials are counting on the sports games to recover national prestige.

South African President Frederik de Klerk made a surprise visit to the black township of Soweto today. It was De Klerk's first visit to a black township since he took office one year ago and only the fourth time in more than 10 years that a South African head of government has visited a satellite city.

(SEPT. 4) UPI - Authorities in Jacksonville, Florida, say three gunmen who held an UNknown number of hostages inside a Red Lobster restaurant overnight surrendered to police this morning. The gunmen apparently took the hostages after an UNsuccessful robbery attempt.

New York City police say two 10-year-old boys were shot during separate incidents, becoming the 13th and 14th children to be wounded by random gunfire in New York City since July 22nd. One boy was injured as stood on a street corner in Brooklyn. The other child was shot as he watched a Labor Day parade in the Bedford Stuyvesant section of Brooklyn.

New York City authorities have charged eight young men with murder and robbery in the stabbing death of a 22-year-old Utah tourist. The incident occurred Sunday night on a Manhattan subway platform as the youths allegedly attacked the young man's family. Police say the family intends to stay in New York to assist in the investigation.

Florida polls opened this morning for the Democratic gubernatorial primary. Voters will choose either retired Senator Lawton Chiles or Congressman Bill Nelson to square off against incumbent Republican Governor Bob Martinez in November. Recent polls show Chiles leading Nelson.

The Jerry Lewis Muscular Dystrophy Telethon- a Labor Day weekend tradition for 25 years- broke its fund-raising efforts this year, receiving pledges of more than 44-Million dollars. The telethon was broadcast live from the Aquarius Theater in Hollywood and was carried by some 200 television stations across the country.

(SEPT. 4) UPI - Stock prices on the Tokyo Stock Exchange closed lower Tuesday, with the key Nikkei average losing 2 percent of its value in thin trading.

The Nikkei average of 225 selected shares dropped 512.79 points to end the day at 24,907.64. The loss added to a drop of 557.94 points Monday.

The Nikkei has lost 1,070.73 points already this week compared with its

close Friday - a 4 percent loss.

The broader Tokyo Stock Price Index plummeted 35.54 points to close at 1,910.38. TOPIX, which measures all major shares, had fallen 28.05 points the day before.

Declines stocks pounded advances 8 to 1.

Volume continued to be low with an estimated 330 million shares changing hands, compared with 368.96 million Monday.

Elsewhere in Asia, share prices closed slightly lower on the Hong Kong Stock Exchange in very thin trading.

The Hang Seng Index dropped 12.65 points to close at 3041.16. The loss followed a drop of 20.69 points Monday.

Volume was extremely light at 636 million Hong Kong dollars, down from Monday's turnover of 778 million Hong Kong dollars.

Prices closed weaker in thin and featureless trading on the Singapore Stock Exchange as investors continued to stay on the sidelines.

The Straits Times Industrial Index dropped 12.79 to 1252.81.

The All Singapore Index dipped 3.18 to 350.17.

The exchange recorded a turnover of 30.93 million units.

(SEPT. 4) UPI - A major test in the countdown of the shuttle Columbia comes tomorrow. Engineers will load half-a-Million gallons of super-cold liquid oxygen and liquid hydrogen rocket fuel into the spaceplane's big external tank. It was during this process on May 29th that hydrogen gas leaked into the engine room, causing the flight to be postponed. Columbia is to take a seven-man crew on a 10-day trip to study X-rays and ultra-violet light in space.

Cambodia's peace talks are in trouble even before they begin. The talks are scheduled to start Thursday in Jakarta, Indonesia. But two top resistance leaders say they will NOT attend unless Prime Minister Hun Sen attends. Hun Sen says he will NOT go because the top resistance leader, Prince Sihanouk, is NOT going. Sihanouk is sending his son instead. A Sihanouk official says Sihanouk considers the meeting only an initial step in a long process.

Some University of Florida students have been improving security in their off-campus apartments over the holiday weekend. Five slayings near the Gainesville campus have made the community apprehensive. Police say that despite eight suspects, people should assume the killer still is in the area. Classes resume after the Labor Day break today.

Heavy thunderstorms struck the southwest yesterday. About 100- thousand people were at Lake Mead Recreational Area in Nevada celebrating Labor Day when heavy winds hit and rocked boats. Motorists were forced to the side of the road by sheets of rain. Lightning set a supermarket and a house on fire in Boulder City in southern Nevada. The thunderstorms are followed by flash flood watches today in parts of California, Arizona and Nevada.

(SEPT. 4) UPI - There are reports that the United States has chartered an Iraqi jetliner that will bring 30 Britons from Iraq to Jordan. But the State Department won't confirm the report. It also won't say whether any Americans will be aboard. All of this comes as thousands of refugees remain stranded along the Iraqi-Jordanian border in conditions that are said to be deteriorating on a daily basis. .

Seven buses containing 148 British women and 155 children have left occupied Kuwait for the 500-Mile journey to Baghdad, Iraq. They are the latest foreigners headed to the Iraqi capital in hopes of getting the exit permits needed to get them out of the area. Most were trapped in Kuwait by the August 2nd Iraqi invasion.

Even the weather is co-operating as the countdown clock ticks off the hours and minutes to Thursday's early morning launch of the shuttle Columbia. Forecasters say there is an 80 percent chance of good weather at blastoff. The 10-day mission already is three months behind schedule, thanks to a pesky fuel leak and then electrical problems. But the payload doors now are closed and the fuel cells are being powered up.

(SEPT. 4) UPI - Soviet Foreign Minister Shevardnadze traveled to Japan to lay groundwork for President Gorbachev tn zisit Tokyo next year. Shevardnadze is expected to discuss the Middle East crisis in meetings with his Japanese counterpart. The Japanese hope to make Gorbachev's visit a time to end a dispute over four islands off the eastern tip of Japan's northernmost main island. The Soviet Union seized the islands at the end of World War Two and expelled 17-thousand Japanese who lived there.

A hostage drama in Jackson, Florida, ended when a police SWAT team captured three gunmen and freed 12 people held inside a seafood restaurant. Officials say none of the hostages was hurt. But one of the gunmen was shot in the leg trying to flee. The other gunmen surrendered to police after a six-hour stand-off. The drama began when a passer-by notified police there was a man with a shotgun entering the restaurant. A SWAT team surrounded the building and a hostage negotiating team was called in.

Professors at Temple University in Philadelphia are walking picket lines today instead of leading classes in what they say could be a protracted strike. About 100 unionized professors, librarians and other professional are on picket lines this morning demanding higher wages and benefits. Leaders of the Temple Association of University Professionals say officials are more interested in football and real estate than education.

#90247u0971 09/04/1990 ~United Press International

EAST BERLIN (SEPT. 4) UPI - The two Germanys and the four wartime allies, taking another step toward German unification, Tuesday started putting the final touches on an agreement covering external aspects such as the withdrawal of Soviet troops from East Germany.

The document will give Germany full sovereignty and effectively end the post-war occupational rights held by the four victorious World War II powers - Britain, France, the Soviet Union and the United States. Berlin was divided up between the four after the war.

The draft treaty also lays down ''the final character of Germany's borders'' - a formal recognition that Germany has no claim on lands ceded to Poland, Hungary and Czechoslovakia after World War II.

The Foreign Ministry officials of the two Germanys and the four allied powers started their final round of negotiations in East Berlin's Niederschoenhausen Palace Tuesday morning and said the talks will be held behind closed doors until Friday.

Sources close to the talks said the negotiators agreed on most issues but needed to resolve details including the wording of the document, which will give the two Germanys the final go-ahead for their Oct. 3 merger.

Observers believe the officials still need to thrash out the procedure for withdrawal of the 380,000 Soviet troops stationed in East Germany.

West German officials recently denied they had offered to pay $1.6 billion toward the cost of the withdrawal but did not deny Germany would pay a substantial amount to transport the troops to the Soviet Union.

The last major hurdle on the way to unification was cleared when Soviet leader Mikhail Gorbachev told West German Chancellor Helmut Kohl in the Soviet Union in early July that he had dropped his objections to a united Germany being a member of the North Atlantic Treaty Organization.

Under the agreement reached by the two leaders and backed by the other three Western allies, Soviet troops will remain in East Germany for the next three to four years. No NATO troops will be deployed on East German

territory during that period.

Soviet Foreign Minister Edvard Shevardnaze said on Aug. 17 that a few issues, which he did not specify, remained to be settled.

The foreign ministers of the six nations are to sign the document Sept. 12 in Moscow before presenting it to the Conference on Security and Disarmament in Europe at a meeting in New York Oct. 1-2.

U.S. officials have indicated they considered the pact would be sealed once it is signed, but it remained unclear if the Soviet Union would insist on parliamentary ratification of the treaty.

The draft document also limits an all-German army to 370,000 troops, less than two-thirds of the present, combined strength of the two German armies.

A united Germany will be banned from producing nuclear, chemical or biological weapons.

The two German governments signed their last bilateral unification treaty last week but both German parliaments must ratify it. The East German parliament Tuesday started debating the treaty setting out the legal, financial and technical aspects of unification.

A first treaty on economic unification took effect July 1, when the Deutsche mark was introduced in East Germany to replace the weak East mark.

Although political unification still has to be enforced, border barriers between the two Germanys, including the Berlin Wall, have already been removed.

WASHINGTON (SEPT. 4) UPI - U.S. construction spending climbed 0.4 percent in July to $442.2 billion, mainly on money invested in non-residential buildings, the Commerce Department reported Tuesday.

The advance follows revised declines of 0.9 percent in both June and May, according to the data compiled by the department's Census Bureau.

Total spending on private construction edged up 0.6 percent in July after dropping 1.5 percent in June while spending on public construction fell 0.2 percent in July after gaining 0.7 percent in June.

#90247u1033 09/04/1990 ~United Press International

AMMAN, JORDAN (SEPT. 4) UPI - Crown Prince Hassan Wednesday contradicted U.N. claims about an encouraging international response toward about 100,000 foreigners stranded in Jordan after fleeing Iraq and Kuwait, saying the crisis has evoked ''the faintest of responses.''

The brother of King Hussein stunned a U.N. news conference with his statement and then went further by appearing to dismiss the efforts of U.N. Disaster Relief Coordinator Mohammed Essaafi, named by U.N. Secretary-General Javier Perez de Cuellar to oversee relief efforts.

With Essaafi and other relief officials seated next to him, Hassan said he was considering asking Perez de Cuellar to appoint a ''humanitarian representative specifically for this case of refugees.''

Hassan's scathing remarks visibly embarrassed the officials and appeared rooted in the Jordanian government's growing frustration over worsening financial pressures caused by the refugee problem and U.N. trade sanctions on Iraq, Jordan's main trading partner.

Revising upwards the extent of the refugee crisis, Hassan said at least 420,000 foreigners, mostly Asians employed as laborers in Kuwait and Iraq, had fled into Jordan since the Iraqi invasion of Kuwait on Aug. 2.

Of those, he said, about 100,000 remain stranded in overcrowded, unsanitary makeshift relief camps, because they lack the funds to purchase air tickets and their governments are too poor to afford to repatriate them.

He said it was ''encumbent'' on the countries of the stranded foreigners to ''contribute immediately'' to the largest repatriation effort since World War II and on the international community to provide adequate amounts of medicines, food and other necessities.

''The down-trodden of the earth, the plight of those persons, mostly nationals of the countries of the Indian subcontinent and of the Philippines and Thailand, has evoked only the faintest of responses from the world community,'' said Hassan, who walked in halfway through the news

conference.

He accused the international press of being ''more interested in war senarios than in humanitarian relief,'' although hundreds of journalists are in Jordan and many have been covering the plight of the refugees for weeks.

Hassan said while Jordan was ''grateful'' for the assistance it has received so far, ''it is obvious that much more is needed and much remains to be done.''

After reading his statement, Hassan walked briskly out of the room, declining to answer questions and bringing to an abrupt close the news conference in the fortess-like palace compound of the king, who appointed his brother regent when he left Jordan to pursue a diplomatic solution to the gulf crisis.

Before Hassan arrived, the relief officials admitted efforts to gear up their operations had been slow, but said Jordan had not officially requested international assistance to cope with the influx until Aug. 22.

Since then, Essaafi said, ''on the whole, the response has been encouraging. (But) I must say, it is never enough.''

The officials were somewhat critical of Iran for waiting until Monday to open its borders to 100,000 refugees, saying the fastest and cheapest way home for those from the subcontinent is by bus through the Islamic republic to Pakistan.

Essaafi put the number of stranded people in Jordan at 105,000 and said another 56,000 were waiting to enter from the 25-mile-wide strip of burning desert ''no man's land'' between the tiny kingdom and Iraq.

Relief officials reiterated that conditions in the desert strip and other refugee areas were deteriorating and that as many as 1 million more people could attempt to make the trip home through Jordan, requiring massive international assistance.

''It is clear that we do not know at this stage how big the problem will grow,'' said Dr. R.K. Jenny, head of the International Organization for Migration, which is overseeing a day-old airlift for Sri Lankans and Bangladeshis, who constitute the largest segment of refugees.

Jenny said his group had received $7 million from the European Community, Sweden, Japan, Norway, Canada, the United States and Switzerland and has chartered Jordanian, British and Soviet aircraft to provide 55 repatriation flights for 14,000 people.

But, he said, his group needs $50 million to reach a target of 100,000 repatriations.

#90247u1036 09/04/1990 ~United Press International

SEOUL, SOUTH KOREA (SEPT. 4) UPI - Hundreds of South Korean students hurled firebombs at riot police Tuesday in a protest against a ministerial meeting between Seoul and Pyongyang officials aimed at improving mutual relations and ending the 45-year division of the Korean peninsula.

South Korean Prime Minister Kang Young-hoon and his North Korean counterpart, Yon Hyong-muk, were scheduled to begin the unprecedented talks on Wednesday.

About 500 dissident youths marched out of Korea University in eastern Seoul following a rally at mid-afternoon and battled police for an hour, hurling firebombs into the officers' ranks, the domestic Yonhap News Agency said.

In a statement, the students accused the government of ''trying to solidify its fascist system by taking advantage of the South-North talks '' and vowing to stage militant struggles against attempts to suppress labor movements, Yonhap said.

The Seoul talks will end Friday and under an exisiting accord, a second round of the ministerial talks will be held in the North Korean capital of Pyongyang Oct. 16-19. Later sessions will take place alternately in the two capitals on dates to be set later.

Yon and six other North Korean officials arrived in Seoul at noon Tuesday after crossing the border at the truce village of Panmunjom, 35 miles north of Seoul, accompanied by 33 support personnel and a 50- member press corps.

A few hours after their arrival, the student protest erupted.

The North Korean delegation in an arrival statement said it came to Seoul ''seeking reconciliation and unity as one nation'' and ''to open the door to national reunification together.''

''To open the door to reunificiation, a state of political and military confrontation must be brought to an end as soon as possible and projects promoting reconciliation and unity must be pushed actively,'' the statement said.

While promising ''progressive'' proposals for reunification, the northerners hoped to meet relatives of Presbyterian pastor Rev. Moon Ik-

hwan, woman student Im Su-kyong and Catholic priest Rev. Moon Kyu-hyun, who are serving prison terms for illegal visits to North Korea.

Seoul government spokesman Hong Sung-chul said the dissident issue had nothing to do with the talks.

The first meeting between Kang and Yon, the highest-level contact ever between the two Koreas divided since 1945, will be held Wednesday morning, followed by a second session behind closed doors on Thursday.

The agreed agenda is a comprehensive one - how to end political and military confrontation and promote many-sided exchanges and cooperation between the two sides.

Seoul officials said they ''will try to achieve substantive results by offering relatively easy-to-implement projects for exchanges and cooperation while keeping away from any moves that would likely embarrass or annoy the North Koreans.''

North Korea, meanwhile, has indicated through official news outlets that it is more interested in military issues such as the questions of arms control and a non-aggression pact including the withdrawal of some 40,000 U.S. troops stationed in South Korea.

On Tuesday, the official North Korean Central News Agency (KCNA) in a report monitored in Tokyo quoted a commentary published in the Rodong Shinmun, official organ of North Korea's Workers (communist) Party, stressing military aspects for the Seoul talks.

As the United States is chiefly responsible for ensuring peace in Korea, it must come out for talks with North Korea or for three-party talks involving South Korea as well ''and must withdraw its troops and nuclear weapons from South Korea,'' the commentary said, according to KCNA.

''It cannot but be abnormal that the United States keeps more than 40,000 U.S. troops in South Korea against the North which has not a soldier of foreign troops and not a piece of nuclear weapon.''

Prime Minister Kang hosted a dinner for the visitors and 130 other guests and delivered a speech saying that the world today is moving toward detente and cooperation in the interest of peace, encouraging divided nations to reunite in the cause of prosperity.

''Nothing ventured, nothing gained,'' he said. ''The courage to start can provide the driving force... We will emerge winners together, if we continue to conduct open-minded dialogue, reach accords and resolutely carry them out.''

In his speech, North Korea's Yon referred to a confederation formula which North Korea has been proposing for reunification of the divided land.

''We never force what we have on others. Forcing the system and ideology of one side on the other invites confrontation and clash inevitably bringing a national catastrophe,'' he said.

''For this reason we have been proposing a confederation (of the two Koreas) leaving different ideologies and systems as they are.''

Yon was all smiles as he crossed into the South and received a lei from a child from Seoul in traditional Korean dress.

While the North Korean officials were driving through Seoul, a traffic accident happened and two of the Northern delegates suffered slight injuries, a spokesman for the Seoul side said.

The 34-story Intercontinental Hotel will be the official quarters and meeting place for the delegates attending the prime ministers meeting.

North Korea has also listed as a major issue the question of U.N. membership for the two Koreas. Seoul prefers simultaneous but separate membership for both sides but the North insists that the South and the North share a single seat in the world body because separate membership could perpetuate Korea's division.

#90247u1073 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - The U.S. manufacturing economy showed renewed signs of sluggishness in August, the National Association of Purchasing Management reported Tuesday.

The Purchasing Managers' Index dropped to 47.0 percent in August, down from 47.4 percent in July.

A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth. A reading above 50 usually indicates that the manufacturing portion of the economy is expanding.

''The manufacturing economy declined further in August,'' said Robert J. Bretz, chairman of the group of purchasing executives and director of materials management at Pitney Bowes Inc. ''The sharp decline in New Orders in July resulted in the first first decline in Production in seven months.''

The association predicted a further decline in the U.S. economy ''unless purchasers artificially stimulate the economy by building up inventories

in petroleum-related commodities in order to assure availability and to delay anticipated price increases.''

The manufacturing economy declined in August for the second consecutive month, said the association in its latest ''Report on Business.''

''Production declined for the first time since January 1990, while New Orders declined for the second consecutive month ... and employment declined in August for the 18th consecutive month and at the greatest rate since January 1990,'' the association said.

New Export Orders were the only sector of optimism for the sluggish U.S. economy.

''New Export Orders increased in August for the 32nd consecutive month, but at a slower pace than last month,'' the association said.

The New Export Orders index was above the 50 mark, and had a reading of 53.0, down from 57.0 in July, and the lowest figure since the beginning of the year.

Most indexes in the PMI's Report on Business were at their lowest level since January.

Imports declined for the fourth consecutive month, signaling some hope that the United States would be able to reduce its trade deficit.

The Imports index slipped to 47.5 percent, down slightly from 48 percent in July.

The New Orders index declined in August for the second consecutive month, although at a lesser rate than last month. The index rose to 46.4 percent, up from 46.2 percent in July.

The July drop in New Orders led to a decline in the Production Index in August.

''The sharp drop in New Orders in July resulted in the first decline in Production in seven months,'' the association said. ''The Production Index declined in August to 48.5 percent, down from 52.1 percent in July and was the lowest since January 1990.''

Supplier deliveries were slower in August for the second time in three months. The Supplier Deliveries Index rose to 51.1 percent, up from 47.3 percent in July, but was similar to June's 51.2 percent.

Among the products managers reported as being in short supply were a number of oil-related products, reflecting the shortfall in oil supplies

resulting from the embargo against Iraqi and Kuwaiti oil.

August was the first month to reflect the impact of the Middle East conflict which broke out Aug. 2 when Iraqi troops invaded Kuwait.

Inventories continued to decline for the 21st consecutive month, although at a lesser rate than in the past seven months, the association said.

The Inventories Index had a reading of 44.1 percent, up significantly from 39.3 percent in July.

The Price Index soared to 58.2 percent, from July's 50.9 percent, indicating that inflation is likely to pick up momentum following the sharp increase in oil prices.

''Price rose in August largely because of anticipated, if not actual, price increases in crude oil and petrochemical feed stocks,'' the association said. ''Industries feeling the brunt of the August price increases were plastics, primary metals, paper, petroleum and ''re plastic

Employment decreased in August for the 18th consecutive month at a slightly greater rate than in July.

The Employment Index fell to 44.1 percent, from 47.2 percent last month, and the lowest reading since January.

The average lead time for capital expenditures and for maintenance, repair and operating supplies was mostly unchanged in August from July.

WASHINGTON (SEPT. 4) UPI - The federal government's failure to adequately respond to the homeless may mean it is violating the international human rights standards outlined in the Helsinki human rights accord, the U.S. Commission on Security and Cooperation in Europe said Tuesday.

The commission, made up of members of the Congress and the administration, usually monitors other nations' compliance or lack of compliance with the international human rights set forth in the Helsinki Final Act.

But in a 77-page report, ''Homelessness in the United States,'' the staff of the commission said the response of the U.S. government to the growing problem of homelessness does not stand scrutiny under international human rights laws.

''The failure to formulate effective policies and provide government assistance to help those most in need become self-sufficient, contributing

members of society is not justifiable and will simply not withstand close examination along the lines of Helsinki and other international commitments,'' the report said.

''If the United States does not show significant improvement in this area, then we must be prepared to answer why, not only to the nations of the world but, more importantly, to our own people,'' the report said.

The report noted that the United States, as one of 35 signers of the 1989 Vienna Concluding Document, is committed to the recognition that ''the promotion of economic, social, (and) cultural rights as well as of civil and political rights is of paramount importance for human dignity and for the attainment of the legitimate aspirations of every individual.''

The Vienna statement also committed the United States to ''achieving progressively the full realization of economic, social and cultural rights by all appropriate means, including in particular by the adoption of legislation.''

In the past, American policy makers have been reluctant to give social and economic human rights the same importance as political rights, suggesting that democratic political procedures, including free speech and elections, were sufficient to ensure human rights.

The report surveyed much of the vast literature on homelessness in the United States and the failures of federal policies over the past 10 years of the Reagan and Bush administrations.

It estimated that on any given night there are some 735,000 individuals without shelter.

''The true measure of how well a nation meets the needs of its citizens ... is not just the amount of resources expended, but also the fair and effective management and distribution of such resources,'' the report said.

''And while resources may be limited, equity should never be,'' it added. ''By this standard, there is no justification for the precipitous decline in recent years in available housing for America's poor citizens.''

While noting that ''many socialist nations'' have failed to provide adequate economic and social supports and that Americans living in poverty ''are relatively rich in the world as it exists today,'' the report nevertheless said, such arguments ''cannot justify deficiencies in aid to poorer citizens of this nation.''

''The United States government should not, as in the past, simply respond that discussions of economic and social policies of Commission on Security and Cooperation in Europe states detracts from more urgent civil and

political liberty issues,'' the report said.

''All are important, interrelated issues of genuine concern to governmetns and people of the Helsinki process,'' it added.

The commission is co-chaired by Sen. Dennis DeConcini, D-Ariz., and Rep. Steny Hoyer, D-Md. Among its executive branch members are Richard Schifter assistant secretary of state for human rights and humanitarian affairs.

WASHINGTON (SEPT. 4) UPI - A U.S warship in the Gulf of Oman seized an Iraqi freighter carrying tea from Sri Lanka Tuesday and ordered it to go to the Omani port of Muscat where it was being held, defense sources said.

It was the first seizure in the U.S. naval interception program that began Aug. 16 to enforce the U.N. embargo against Iraqi goods, imposed because of Iraq's Aug. 2 invasion of Kuwait.

No violence was reported during the seizure, the defense sources said.

Shipping sources in the gulf said the name of the freighter was the Zenobiya, though that could not be immediately confirmed.

The Pentagon was expected to issue an announcement later Tuesday.

#90247u1127 09/04/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (SEPT. 4) UPI - At least 35 people died and nearly 100 others wounded in fighting Tuesday in the black township of Sebokeng, including 11 found dead after soldiers opened fire on crowds surrounding a hostel for migrant workers, police said.

Police spokesman Col. Frans Malherbe said more than 100 people also were arrested.

Police sources said a prominent local leader of the Zulu movement Inkatha, Themba Khoza, was among those detained - allegedly found in the hostel area passing out AK47s from his vehicle to supporters.

The fighting in Sebokeng and two eastern townships intensified as President Frederik de Klerk visited Soweto - his first trip into a black township since his election as president a year ago.

''It is not in the interests of all the people of this country that people should die as they did last night,'' De Klerk told reporters Tuesday. He said the killings ''must come to an end.''

Malherbe said the death toll since shortly before midnight was 35, including 24 killed in clashes between Zulus and supporters of the African National Congress.

The 11 others, he said, were found over a wide area outside the hostel after a ''shooting incident'' involving army troops.

''I cannot comment on this shooting incident any further. The African Defense Froces has appointed a board of inquiry to investigate SADF involvement,'' he said.

Army troops evidently fired when a mob of township residents massed outside the hostel, trapping police and hostel dwellers inside, around 9:20 a.m.

One section of the hostel was occupied by hundreds of workers affiliated with the National Union of Metalworkers of South Africa. A Union official said the hostel was allegedly attacked by Zulus of the movement Inkatha before dawn and police had failed to intervene to halt the assault.

A photographer with the daily Sowetan newspaper, Len Khumalo, said he watched army troops take up positions in the area and suddenly shots rang out. He said, ''many of the people ran, some of the people fell.''

Khumalo said he counted 11 bodies outside and inside the hostel compound buildings.

State-run radio said a number of weapons were seized from the hostel after the incident.

Mandela and an entourage of senior officials of the African National Congress visited a number of township areas affected by the strife between Inkatha and the ANC that has left at least 573 dead in three weeks - the worst outbreak of urban factional strife recorded in the country.

Mandela met senior police officers in Sebokeng for more than an hour on the situation.

De Klerk's visit to Soweto marked only the fourth time a South African head of government has visited a black township in more than a decade. Former President Pieter W. Botha visited three townships during his 10 years in power, including Soweto, the country's largest black residential area.

Police reported factional fighting also flared overnight in townships east of Johannesburg, Kathlehong and Vosloorus, where four people died.

#90247u1143 09/04/1990 ~United Press International

PARIS (SEPT. 4) UPI - Iraqi President Saddam Hussein is willing to withdraw from Kuwait if allowed to keep some Kuwaiti land and if the exiled Kuwaiti emir is stopped from returning to power, a senior PLO official said in an interview published Tuesday.

Palestine Liberation Organization intelligence chief Abu Iyad told the Paris daily Liberation that Saddam wanted a negotiated settlement to the Persian Gulf crisis, but not one that could be interpreted as a personal defeat.

''Saddam Hussein is ready to negotiate and to withdraw from Kuwait if he receives certain guarantees,'' said the PLO's second-highest ranking member. ''It is not certain that if he evacuates Kuwait and frees the hostages that Iraq will not be attacked anyway.''

The PLO official said Saddam is convinced the United States did not mobilize troops under a U.S.-led multinational force just because of Kuwait but also ''to take advantage of this crisis to weaken the Iraqi

army as much as possible by destroying its conventional forces and preventing the use of the oil weapon for political ends.''

''He (Saddam) believes that his remaining or leaving Kuwait will not change this American determination,'' said Abu Iyad, who also goes by the name Salah Khalaf. ''That is his real problem today.''

Asked what was not negotiable for Saddam, Abu Iyad said, ''Two things - the regions of Boubiane and ... one (Saddam) has called the 'Saddamia,' on the one hand, and the return to power of the emir ... on the other.''

Saddamia refers to a strip of land on the Kuwaiti-Iraqi border renamed by Saddam after himself, while Boubiane was an apparent reference to the strategic Bubiyan Island off the coast of Kuwait.

Iraq invaded Kuwait Aug. 2 during an oil and border dispute and later declared it an Iraqi province.

On Aug. 12, Saddam proposed a regional solution that would include an Israeli withdrawal from ''occupied Arab lands'' and a Syrian withdrawal from Lebanon, with ''arrangements'' to be made on the question of Kuwait.

The PLO official said U.N. Secretary-General Javier Perez de Cuellar's efforts to negotiate a peaceful settlement to the conflict had failed because he had insisted on discusing the hostage issue first rather than last.

''Saddam wants a negotiated settlement, but not one that can be interpreted as a defeat for him,'' Abou Iyad said referring to the hostage crisis.

''Kuwait, at any rate, must admit that there are Iraqi interests in Kuwai '' Abu Iyad said. ''It is the only way of arriving at a solution.''

Abu Iyad said the PLO's position in the gulf crisis was widely misunderstood, insisting the organization headed by Yasser Arafat had never supported Iraq's annexation of Kuwait but was also against the U.S. military presence.

''There is not a single Palestinian in Jordan or in the occupied territories that can accept this brutal military intervention,'' he said. ''Especially when there doesn't exist, and has never existed, a similar international mobilization over U.N. resolutions concerning the Palestinian question.''

He said the PLO had refused to condemn Baghdad's invasion of Kuwait because it would have meant losing a possible mediation role and he charged the Arab countries that wanted to condemn Iraq at an Arab summit

in Cairo last month were in reality hoping for war.

''A war would be tragic. For the United States, but even more for Europe, which would pay more. Don't forget that the price of a barrel of oil could reach $60 to $70,'' he said.

The PLO official said one of the most tragic consequences of a war would be the likely return of international terrorism, which Iraqi Foreign Minister Tariq Aziz threatened to support in a newspaper interview published last week.

#90247u1176 09/04/1990 ~United Press International

CHICAGO (SEPT. 4) UPI - Soybeans were higher and grain futures were mostly lower at midmorning on the Chicago Board of Trade.

Soybeans opened higher and continued to rally on fairly active buying interest. Professionals were featured buyers, although moderate delivery notices kept a lid on the market.

Higher prices for soybean meal futures contributed to the gains in soybeans. Meal rallied on persistent rumors that the Soviet Union had bought a large quantity from Brazil.

Corn was pressured by commercial selling but had underlying support from light buying interest at the lows.

Both corn and soybeans were depressed by predictions of above- normal temperatures and normal rainfall this week in the Midwest.

Follow-through selling and harvest activity weighed on wheat prices.

Country movement was light except for moderate to heavy farmer selling of wheat in Minnesota and the Dakotas where the harvest is under way.

Interior and Gulf basis levels generally were steady.

The midmorning prices:

Corn Sep 2.40 1/2 off 2 3/4; Dec 2.33 off 1/4; Mar 2.42 unch.

Soybeans Sep 6.04 1/2 up 3 1/2; Nov 6.19 up 5 1/4; Jan 6.32 1/2 up 5 1/4; Mar 6.45 1/2 up 5 1/2.

Wheat Sep 2.57 1/4 off 5 1/4; Dec 2.74 off 3 1/2; Mar 2.86 off 2 1/4.

Oats Sep 1.06 3/4 up 1 3/4; Dec 1.18 3/4 up 1 1/4; Mar 1.30 1/2 up 1 1/4.

SEATTLE (SEPT. 4) UPI - The Boeing Co. knew in 1983 it had a serious problem with the guidance system on its cruise missile, but decided not to fix about 1,000 of the nuclear-tipped weapons already delivered to the Air Force, a Seattle newspaper reported Tuesday.

Instead, Boeing sold about 700 more of the missiles to the government, despite mounting evidence that the weapon's guidance system failed to perform at the extremely low temperatures required by military specifications, according to company documents obtained by the Seattle Post-Intelligencer.

Ultimately, Boeing sold the government 1,715 cruise missiles for $1.8 billion.

The missile is a key component of the U.S. nuclear weapons arsenal. It is designed to be launched at high altitudes from a B-52 bomber, drop to ground level and maneuver to its target using information relayed by a gyroscope-controlled flight data transmitter. Air Force and industry experts say that a failure of the transmitter would send the weapon off course, causing it to crash.

Boeing has said it didn't learn about the missile's guidance-system problems until mid-1987. That was after the Justice Department launched a criminal investigation of Northrop Corp., the subcontractor responsible for assembling the flight data transmitter's gyroscope package. Boeing spokesman Milt Furness repeated that statement Friday.

But documents contradict Boeing's assertion, the newspaper reported. Boeing declined to comment on the documents, which include confidential Boeing and Northrop test reports. They are part of the government's file against Northrop and haven't been made public previously.

They show that Boeing engineers wrestled with cold-temperature failures of the cruise missile's flight data transmitter as early as 1983. They raise questions about whether Boeing should have continued selling the missiles, knowing it had such a flaw.

The requirements of Strategic Air Command in 1980 included a successful launch after prolonged exposure at minus 65 degrees Fahrenheit. Air Command B-52s carrying cruise missiles can encounter such temperatures during hours of high-altitude cruising.

The Air Force has said it has tested the cruise missile 74 times under ''subzero'' conditions without a failure. But Air Force officials declined to say whether their testing has met the military's minimum- temperature launch specifications of minus 65.

Now, the service is refitting all of its cruise-equipped B-52s with a rotary launcher carried in the plane's bomb bay, where it won't face freeze-up problems.

Former Northrop employees have told federal investigators that Northrop faked tests on the cruise guidance system that showed it performed at low

temperatures.

Those allegations triggered a federal investigation. Last February, Northrop pleaded guilty to 34 counts of fraudulent testing of the cruise and the Marine Corps' Harrier jet and paid $17 million in fines and penalties. But the government curtailed its charges related to Northrop's cold-temperature testing.

A House Energy and Commerce subcommittee last month accused of Northrop and the Air Force of covering up problems with the cruise tests.

U.S. Attorney William Fahey, chief of the public corruption and government fraud section of the U.S. Justice Department's Los Angeles office, said the investigation into fraudulent testing of the cruise- guidance system remains open, although Northrop is no longer involved. Fahey declined to say whether Boeing is under investigation.

Boeing spokesman Furness said the company doesn't know of any federal investigation of its handling of the cruise-missile program. He said Boeing won't comment because of a separate civil lawsuit filed by the Northrop whistle-blowers. Boeing is not a party to that lawsuit. A spokesman for Herbert Hafif, the whistle-blowers' attorney in Claremont, Calif., has said the lawsuit may be amended to include Boeing.

(SEPT. 4) UPI - Iraq announced Tuesday three post office box numbers where relatives and friends can send letters to ''foreign guests hosted by Iraq.''

Calling them ''the Peace P.O. Boxes,'' the official Iraqi News Agency said the addresses were P.O. Box 39090, P.O. Box 50300 and P.O. Box 50285, all in Baghdad, Iraq.

Iraq, which has said is holding citizens of ''aggressive nations'' at strategic installations in an effort to prevent an attack by U.S. and other forces that have massed in the region, has continued to round up foreign men in the Iraq and occupied Kuwait.

In addition, an estimated 10,000 Western women and children remain stranded in Iraq and Kuwait despite Iraq's promise to release them.

-30- 897

#90247u1315 09/04/1990 ~United Press International

MACHIAS, Maine (SEPT. 4) UPI - Two school districts have put off starting classes for one week so students and teachers can help bring in perhaps the area's largest harvest of wild blueberries ever.

The school boards in Machias and in Cherryfield near on Maine's far eastern coast agreed to put off the start of classes from Sept. 3 to Sept. 10 because of the bumper crop of blueberries.

Hundreds of local people, including youngsters and teachers, take part in the harvest every year, but so many blueberries are expected to be harvested that picking is expected to continue well into September unless it is cut short by frost.

The boards were asked to put off the start of classes by officials from Jasper Wyman and Son Inc., the state's largest grower and processor of wild blueberries.

''We went to the school board meetings earlier this year and asked for a delay for a few days, and they agreed,'' said Gary Willey, an executive

for Jasper Wyman and Son. ''We hire both students and teachers and we depend on them to work the harvest each year.''

Robert Phillips, Wyman's president, said his company is somewhat mystified by the size of this year's crop.

''For our company this is the biggest year we have ever seen by far, and we are not sure why that is,'' he said. ''We have done some management things that should have increased yields, but a number of things have happened this year that should have worked against us.''

''We had a lot of winter injury, and we had some poor pollinating periods where we had cold and rain for seven days in a row,'' he said. ''We also had three days of frost that should have killed off a lot of the plants. We don't know why it is so good, but we are sure grateful for it.''

The students and teachers aren't the only ones taking part in this year's harvest. Robert Phillips, Wyman's president, said hundreds of pickers from around the country are in Washington County for this year's blueberry harvest, and hundreds of local people are also raking the small blue fruit.

The harvesters always include a large number of Micmac, Passamaquoddy and Penobscot Indians, with many of the Micmacs coming in from New Brunswick and Nova Scotia.

''It's very hard to give a cross-section of our harvesters,'' Phillips said. ''This year we have people from 25 states and from three other countries. In one crew we have a minister, a fellow who just got out of prison for manslaughter, two Mexicans, and five women who wear long dresses and bonnets, Mennonites, maybe.''

Using youngsters to harvest crops has a long tradition in Maine. In Aroostook County, public schools for many years have begun classes in August and then recess for several weeks in late September and early October so students can help harvest potatoes.

#90247u1337 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - Firing a pre-emptive dissent at anti-drug czar William Bennett, a drug law reform group said Monday the first year of the administration's much ballyhooed get-tough program has been a failure.

''So far, the get-tough approach hasn't worked,'' said Arnold Trebach, president of the Drug Policy Foundation and a co-author of a 31-page report analyzing the first year of President Bush's national drug control strategy.

''Until National Drug Control Policy Director William Bennett realizes that drug abuse is a health problem that gets worse when treated with a heavy hand, we can only expect more atrocities in America,'' Trebach added.

Bennett is scheduled to give his own assessment of the administration's war on drugs at a news conference Wednesday and to release a ''white paper'' on what he called ''leading drug indicators.''

According to the Drug Policy Foundation study, despite the get- tough approach of Bennett and Bush, drug-related crime continues to rise, the criminal justice system has been overloaded, heroin is making a comeback among drug users and treatment programs languish without funds while money is poured into prison construction.

''Czar Bennett will say that we've only just begun to fight, that we're beginning to turn the corner,'' Trebach said. ''Don't be fooled. The United States has implmented tough-on-drugs plans many times since the Harrison Narcotics Act was passed in 1914.

''None of these plans has worked. None of them ever will,'' he said. Trebach and co-author Kevin Zeese noted that during the Reagan administration's war on drugs, the prison population was doubled - the sharpest rise in the number of people incarcerated in modern history - yet ''no one claims that ... has made our streets safer or reduced the adverse health effects of drug abuse.''

They said that despite Bennett's making the District of Columbia a test case for his anti-drug strategy, the arrest of over 40,000 people for drug offenses in the past several years and some of the toughest prison sentences being handed out, the city is still breaking last year's homocide rate of more than 400 deaths and drug abuse has not decreased.

''The administration's proposal to spend millions of dollars to increase rates of incarceration should not be implemented until it is able to explain why the spiraling increase in incarcerations over the last two decades has failed,'' the report said.

The report also faults the administration's efforts at interdiction and eradication, or cutting off the drug supply at its source, arguing it has expanded the U.S. marijuana crop and spurred the development of Latin American drug lords behind the cocaine and crack markets.

But the report said the administration could learn from three notable successes in the war on drugs over the past decades - the great glue sniffing scare of the 1960s, the move to decriminalize marijuana in the 1970s and the sharp reduction in the percent of the U.S. population hooked on tobacco.

''Today glue sniffing is no longer a drug problem,'' the report said. ''We succeeded without eradicating glue at its source, without interdicting it and without mass incarcerations. We did not take away the driver's licenses of convicted glue sniffers.''

On marijuana decriminalization, the report noted that by 1978, 11 states with one third of the nation's population had decriminalized marijuana and 30 other states made a first offense punishable without jailing.

''Since 1978, there has been a dramatic decline in marijuana use among all age groups, including our adolescents,'' the report said. ''While it is impossible to say what caused the dramatic decline in marijuana use, it is fair to say that relaxing the laws did not prevent the decline.''

At the beginning of the two-decade current war on drugs, the report said, 40 percent of the American people used tobacco. Today that use has dropped to 29 percent.

''Almost half of all living American adults who have ever smoked tobacco have quit,'' the report said. ''This has also been accomplished without mass incarcerations, eradication programs and without any reduction in tobacco availability.''

#90247u1366 09/04/1990 ~United Press International

(SEPT. 4) UPI - No violence was reported the first seizure of an Iraqi vessel since a U-S naval interception program began last month to enforce a U-N embargo against Iraq. It happened today in the Gulf of Oman. A U-S warship seized an Iraqi freighter carrying tea from Sri Lanka and ordered the ship to the Omani port at Muscat where it is being held. The Pentagon is expected to issue an announcement later today. .

A Bush administration official confirms the United States is footing the bill for an Iraqi Airways jet to leave Baghdad carrying about 30 Americans and 100 foreign nationals. The official says the United States hopes to be re-imbursed by other nations whose citizens are being freed. Earlier, the British Foreign office said 30 Britons are traveling from Baghdad to Amman Jordan, on an Iraqi Airways jet chartered by the United States.

Violence ripped through black townships in South Africa today where at least 35 people died and nearly 100 others were wounded. Police say 24 people were killed in fights between the Zulus and African National Congress supporters. Another 11 people were found dead after troops fired on crowds near a migrant workers' hostel. Police say the violence intensified as President de Klerk visited Soweto in his first visit to the black township since his election last year.

There are many reasons that school often does NOT start on schedule but two school districts in Maine have come up with a new twist. They've called a one-week delay in what was to have been the opening of school today. The reason, and it is official, is that there is a bumper crop of wild blueberries this year and the students and teachers are needed for the harvest.

WASHINGTON (SEPT. 4) UPI - Meatpacker John Morrell & Co. faces a fine of $345,125 under the 1986 immigration reform law for allegedly hiring illegal aliens and failing to verify employees were eligible to work, the government said Tuesday.

The Immigration and Naturalization Service said the proposed fine was one of the largest against any employer since the law was passed.

The fines were levied against Morrell operations in Sioux City, Iowa, and Arkansas City, Kan. The Sioux City plant was fined $243,200 and the Arkansas City operation, a subsidiary named Ark City Packing Co., $101,925.

Under the immigration reform law, employers are required to verify the work eligibility of all employees hired after Nov. 6, 1986, and to refrain from hiring people not authorized to work in the United States. Verification records must be shown to federal officials on request.

In a statement, the INS said an investigation that began in March 1989 at Sioux City found 353 instances in which Morrell had failed to comply with the verification rules, had done so improperly or, in one case, continued to employ a person not authorized for U.S. work.

At Ark City Packing, INS officers said they found 257 instance in which no employment verification had been conducted on newly hired employees and 135 instances in which verification was done improperly. Three illegal aliens were employed at the plant, officials alleged.

Morrell has 30 days to contest the fine or request a hearing on the charges.

(SEPT. 4) UPI - Retailing giant K Mart, and a subsidiary in Taiwan, have been fined six-Million dollars on charges of violating textile import quota controls. The Customs Service says the fine is one of the largest ever collected in a textile case. K mart allegedly manipulated prices of various imported textile articles as far back as 1982.

Austria is moving to stop what it calls the movement of thousands of illegal Polish workers into the country. Polish nationals now will have to have visas if they want to get into Austria after Thursday. It's estimated that as many as 70-thousand Poles are illegally working in Austria, many in the black market.

Two women employees at an adults-only club in Jacksonville, Florida, have returned large tips after learning the money may have been part of the loot from the robbery of an elderly woman. Three men are charged in the theft of 25-thousand dollars in cash and 100-thousand dollars in jewlery. Half of the money reportedly was spent in Jacksonville bars, including the Centerfold Lounge where the two women work.

TOKYO (SEPT. 4) UPI - They've already got Rockefeller Center, a symbol of U.S. capitalism. Now the Japanese are trying to buy a token of Soviet Communism: Lenin.

A Japanese has been negotiating with the city government in Bucharest, the capital of Romania, to purchase a huge statue of Vladimir Lenin taken down after last year's fall of dictator Nicolae Ceausescu, Kyodo News Service reported.

Neither the name of the bidder nor the size of the offer for the 33-foot, 7-ton bronze statue has been released, Kyodo reported.

The Romanian statue of the founder of the Soviet state has been for sale since March with an asking price of $1 million.

(SEPT. 4) UPI - The apparent failure of the weekend talks between the U.N. secretary general and Iraq's foreign minister in achieving any movement toward a peaceful settlement of the Persian-Gulf crisis drove oil prices up Tuesday.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude of October delivery was up $1.55 at midday over Friday's close to $28.87 a barrel after trading as high as $29.05 a barrel.

Unleaded gasoline for October delivery had gained 7.87 cents to 94.05 cents a gallon, while October home heating oil had added 6.64 cents to 83.20 cents a gallon.

''I think the reason for the move is that a lot of people had put a lot of faith in U.N. Secretary General Javier Perez de Cuellar's weekend meeting with Iraq's Foreign Minister Tariq Aziz and he left disappointed,'' said Tom Bentz, director of trading at United Energy Inc. in New York.

''The market is acting like a magnifying glass. It is magnifying the fact that nothing happened,'' said Michael Wilner, president of Hilltop Trading Co., New York. ''It's an over-sensitive market.''

The analysts said the Merc, which was closed Monday for the U.S. Labor Day holiday, opened stronger on the European market's reaction Monday to the failure of the talks.

Wilner said it was difficult to understand the rise in gasoline for delivery in October, when that is the first month for the lifting of stricter air-pollution vapor standards that should ease the supply of gasoline.

''People may be holding on to gasoline because they are concerned over what's going to happen down the road,'' Wilner said.

On the U.S. Gulf Coast spot market, where crude is bought and sold to the highest bidder, prompt delivery WTI had gained $1.50 at midday to $28.80 a barrel.

On the European spot market, United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - had climbed $1.50 to $26 a barrel.

Britain's widely traded North Sea Brent had gained $1.78 to $29.98 a barrel.

In the Middle East, a U.S. warship in the Gulf of Oman seized an Iraqi freighter carrying tea from Sri Lanka Tuesday, American defense sources said, and a U.S.-chartered plane was expected to carry about 130 Westerners out of Iraq where they had been held as shields against attack.

In addition, more than 300 Britons left Kuwait City by bus for a long journey to Baghdad in search of exit visas and a way home, while thousands of refugees remained stranded in dismal conditions along the Iraqi-Jordanian border as ''hostages of the desert.''

#90247u1408 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - Ansett Airlines of Australia has ordered 10 Airbus Industrie A321 jetliners, the stretch version of the A320, the European aircraft manufacturer said Tuesday.

The price was not disclosed; Airbus said deliveries will begin in the third quarter of 1995.

The A321s will be powered by CFM International CFM56-5Bs jet engines and seat up to 175 passengers for use on the Ansett domestic service, including non-stop flights between Sydney and Perth.

Ansett operates eight Airbus A320s and has four more on order for delivery during 1991. In addition, the leasing company Ansett Worldwide Aviation Equipment has six A300-600R jetliners on order.

#90247u1414 09/04/1990 ~United Press International

ANKARA, TURKEY (SEPT. 4) UPI - Pakistani refugees from Kuwait entering Turkey at the rate of about 1,000 a day told officials they were made to stay in terrible living conditions in Iraqi camps and saw people die from lack of medical care.

The semi-official Anatolia News Agency Tuesday quoted Pakistan's military attache, Arshad Zathi, as saying thousands of Pakistani citizens who left Kuwait after the Aug. 2 Iraqi invasion had to cross Iraqi territory to reach the Turkish border.

He said the Pakistanis were forced to stay in camps on the Iraqi side near the Habur border gate, and conditions of hygiene in the camps were terrible. Refugees said some people died from lack of medical care in the camps.

Zathi is stationed at the Habur border checkpoint to receive the refugees from Kuwait arriving after the long overland trek across Iraqi territory.

He said the Iraqi authorities were seizing vehicles bearing Kuwaiti licenseplates, and had confiscated about 4,000 so far.

Pakistani Ambassador to Turkey Aziz Khan told United Press International that 15,000 Pakistani nationals have crossed into Turkey from Iraq since Aug. 24 and were being given assistance to get them into Iran.

Last week, Iran pledged to allow foreigners from Kuwait to transit its territory on their way home and reports from Tehran said reception camps were set up on the Iranian side of the border at the Bazargan crossing point.

''We are doing whatever we can to aid our citizens to leave Turkey as fast as they can, from the Iranian border,'' Khan said.

Another 55,000 Pakistanis were reportedly waiting in camps inside Iraq for permission to cross into Turkey, he said.

''I am running a 10-person camp office in Habur,'' the ambassador said of the relief work.

The U.N. Disaster Relief Organization in Geneva said about 200,000 foreign refugees from Kuwait may be heading for the Turkish border across Iraqi soil.

The Red Crescent Society, Turkish equivalent of the Red Cross, set up a medical center near the border gate at Habur to assist the refugees, and Turkey has canceled visa fees for citizens of Asian countries to speed up their entry.

#90247u1437 09/04/1990 ~United Press International
(SEPT. 4) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

More than 300 Britons left Kuwait City by bus Tuesday for their long journey to Baghdad in search of exit visas and a way home. British Foreign Office Minister William Waldegrave said a fleet of seven buses containing 148 women and 155 children departed the occupied city early Tuesday to begin their 500-mile journey, organized by the British Embassy in Kuwait. A private car, carrying two women and one child, also accompanied the convoy, the British Broadcasting Corp. reported. The women and children were urged to bring along enough food and water for the journey, which will take them through through extremely hot climate.

NEW YORK - The United States has secretly deployed combat aircraft in several Persian Gulf nations to help defend Saudi Arabia, The New York Times reported Tuesday. ''Every one of the gulf states is taking stuff,'' an American official said, referring to the stationing of combat aircraft in Bahrain, the United Arab Emirates, Qatar and Oman. Only a handful of the deployments had been publicly disclosed because of the gulf nations' continuing sensitivities about inviting the Americans. The arrangements were quietly worked out by Defense Secretary Dick Cheney during his recent visit to Saudi Arabia and the gulf nations.

AMMAN, Jordan - Relief officials appealed for massive international assistance to fund the largest refugee repatriation effort since World War II, warning of a ''catastrophe'' for some 80,000 foreigners stranded in Jordan after fleeing Iraq and Kuwait. Jordan has been restricting the flow of refugees from Iraq to about 20,000 a day, and those caught in the backlog have to wait in desert areas with no sanitation and sometimes no

food and water. ''There are tens of thousands, perhaps hundreds of thousands, waiting to come,'' said Xavier Emmanuelli, director of the Paris-based Doctors Without Borders. ''These are people who are the hostages of the desert.''

TOKYO - Soviet Foreign Minister Eduard Shevardnadze called Tuesday for an international conference to resolve the Persian Gulf crisis without resorting to force in the Middle East, local news reports said. Shevardnadze, delivering a policy speech in Vladivostok in the far eastern Soviet Union, said the gulf crisis should be resolved through non-military means and the foreign military presence should be eliminated from the region, Kyodo News Service reported.

BEIJING - A move to bar Iraq from this month's Asian Games to avert a boycott by some Arab nations has left host China struggling to avoid an embarrassing political confrontation, officials acknowledged Tuesday. Senior Chinese sports officials, at a news conference, said they were still studying the implications of a telex sent to Asian Games nations by the Olympic Council of Asia to poll them on whether Iraq should be excluded from the competition.

BRUSSELS, Belgium - European Community foreign ministers will hold an emergency meeting on the Persian Gulf crisis in Rome on Friday. The session will focus on an EC aid package to countries suffering economic hardships because of U.N. sanctions on Iraq, particularly Jordan, Egypt and Turkey.

JERUSALEM - On the eve of his first trip to Washington as Israeli foreign minister, David Levy says the Persian Gulf crisis and not the stalled Israel-Arab peace process will be the primary topic of his talks with Secretary of State James Baker.

#90247u1455 09/04/1990 ~United Press International

SAVANNAH, GA (SEPT. 4) UPI - Vice President Dan Quayle said Tuesday the Georgia gubernatorial race is the premier Republican campaign in the South giving the GOP its best chance this year to capture a new governor's seat.

Quayle appeared Tuesday morning in Savannah at a $1,000-a-plate breakfast fund-raiser for Republican gubernatorial nominee Johnny Isakson - the first stop in a two-day campaign swing through Georgia, Alabama and Texas on behalf of GOP candidates.

The vice president also met with reporters, dropped into a diner for a cup of coffee and capped off his Georgia visit with a speech at a rally of about 500 Isakson supporters in a city square.

Isakson faces Democratic Lt. Gov. Zell Miller in the November general election.

''We feel that this is a key state which we can capture the governor's chair.'' Quayle told reporters. ''When you look at the South, this is the premier race in which the Republicans have a chance to replace a Democratic governor.''

Quayle said Republicans hope to add Georgia to the GOP's list of southern governorships, which include Alabama, Florida, North Carolina, South Carolina and Texas.

''We look around at the rest of the South ... and we ask why Georgia should be an exception. We intend to do something about it. This is our priority race,'' the vice president said, calling Isakson ''an outstanding candidate'' and ''a class act.''

Quayle said he doesn't believe the Persian Gulf crisis will become an issue for Republicans in the general election because of strong bipartisan support for President Bush's handling of the matter.

He said it is crucial to end Iraqi aggression against Kuwait to avoid setting ''an unfortunate precedent'' in the post-Cold War era. Iraq invaded Kuwait Aug. 2, and Bush has sent U.S. military forces to Saudi Arabia to protect that country from a possible Iraqi invasion.

''Iraqi President Saddam Hussein is plundering tiny Kuwait and casting ominous glances at Saudi Arabia,'' Quayle said. ''It is important that we resolve this favorably because it is the first post- Cold War crisis. And if we do not resolve the first post-Cold War crisis favorably, it will be an unfortunate precedent established for resolving future crises.''

The vice president also warned oil companies not to use the crisis to gouge American consumers by inflating gasoline prices. Quayle said the Justice, Energy and Commerce departments are closely monitoring gasoline prices, and any company found to be gouging will be dealt with by federal authorities.

''Let me reiterate any warning to those who want to gouge the consumer on the price of gasoline and the price of oil. It will not happen on the president's watch,'' Quayle said. ''Beware, don't do it.''

Quayle also said the Bush administration is optimistic that a budget agreement can be reached with Congress before the fiscal year ends Sept. 30. He blamed the failure to obtain a budget on Congress.

''They've been dragging their feet for the last several weeks and the last several months,'' he said. ''We're now in crunch time. We basically have

30 days left before Congress wants to adjourn for the elections to get a budget agreement.''

The vice president's motorcade made an unscheduled stop at Ronnie's, a local diner, en route from Savannah International Airport to the Isakson fund-raiser so Quayle could get a cup of coffee. Quayle shook hands with Ronnie's employees and chatted briefly with a customer before the motorcade got under way again.

Ronnie's employees refused to accept Quayle's payment for the coffee, but they did take a $1 tip from the vice president.

LONG CREEK, SC (SEPT. 4) UPI - A man who took up temporary residence in a tree to block construction of a logging road in the Sumter National Forest was released on bond Tuesday, one day after he came down from his lofty perch.

U.S. Forest Service officials said Hunter Hastings Sams, 24, of Long Creek who had been calling himself ''Forest Green,'' voluntarily came down from a platform in a 100-year-old pine tree Monday morning. He told authorities he still had food and other supplies but was exhausted.

Sams was arrested immediately on charges of interfering with a federal officer in the performance of his duties and placing an impediment or hazard to the safety of a person. The federal charges are comparable to misdemeanors in state court and carry a maximum penalty of six months in jail and a $500 fine.

Sams appeared Tuesday morning before U.S. Magistrate William Catoe in Greenville and was freed on his own recognizance. No trial date was set.

Sams climbed into the tree last Wednesday in an effort to block construction of a logging road on federal land along the Chattanooga River. He and other protesters on the ground objected to a Forest Service decision to allow clear-cutting of timber in the area, claiming it would hurt the environment and wildlife.

The Forest Service delayed construction of the road for two days while deciding how to deal with Sams, but the work resumed Friday when officials decided to work around the tree occupied by the local environmentalist.

By the weekend, the ordeal apparently had begun to wear on Sams.

''On Saturday, he told us he was ready to come down,'' said Melissa Brame, a member of South Carolina Forest Watch, an environmental group

headquartered in Long Creek. ''Psychologically, he just needed to come down.''

But Sams, who survived on bananas and peanut butter sandwiches and braved two thunderstorms in his tree stand, already had succeeded in drawing attention to the planned timber operation at the federal park. His efforts even prompted a visit from Democratic gubernatorial candidate Theo Mitchell.

However, the personal cost of the protest could be steep. Forest Service officials said Sams could be held liable for costs caused by the delay in road construction, an amount estimated at $8,000 a day.

#90247u1477 09/04/1990 ~United Press International

BOGOTA, Colombia (SEPT. 4) UPI - President Cesar Gaviria believes the United States is wasting an opportunity to make substantial gains in the war on cocaine trafficking through inaction on trade and economic issues, top government officials said.

A senior administration official also accused U.S. diplomats of ''insensitivity'' to Colombia's internal political situation. He warned a lack of concrete U.S. initiatives could contribute to waning public support in Colombia to continue the battle against powerful cocaine cartels.

Gaviria assumed office Aug. 7 promising to strengthen Colombia's effort against cocaine trafficking, a billion-dollar business.

But at the same time, his administration has taken a more aggressive, stridently critical tone in confronting U.S. pressure over cocaine production. The tone reflects the new government's belief the Bush admininstration's assistance in fighting powerful cocaine cartels has been mainly rhetoric aimed at the U.S. public rather than concrete measures of support.

''They are not helping us, they are using us for internal political reasons,'' one top official said recently.

And another said the United States ''has not done anything (in the drug war) that has ended successfully.''

The government believes U.S. inaction on trade initiatives with Colombia, Peru and Bolivia are wasting a ''window of opportunity'' that makes possible a substantial reduction in cocaine production, the official said in an interview.

The three nations at a Feb. 15 anti-drug summit at Cartagena, Colombia, proposed to Bush a program where farmers who grow the coca leaf, cocaine's main ingredient, would change to food crops. U.S. markets were to be opened to those products.

The price of coca leaf in Peru and Bolivia now is at record lows, sometimes below production costs, providing a opportunity to convince farmers to grow other crops, said one of the officials, who asked not to be named. But the U.S. has failed to act, he said, pointing to Congress's recent rejection of a new quota import system for sugar, which can be successfuly substituted for coca in some areas.

''Because of a lack of aggressive, dynamic action by the United States, we are losing an opportunity,'' the official said.

He also warned that without specific initiatives to open the U.S. market to Colombian products, the United States risks losing public support within Colombia to continue the battle on cocaine cartels.

''American diplomats forget Colombia is a democracy'' where public opinion can influence policy, he said, accusing the U.S. officials of ''insensitivity.''

''They (U.S. officials) think this policy is easy to carry out,'' he said.

A senior U.S. official said the U.S. government has been actively promoting Colombian exports to the United States and cautioned that benefits from any trade agreement would be slow in arriving.

''The fact is we are doing a lot,'' he said.

Gaviria plans to travel this month to the United States where he wants to meet with key congressman to discuss the cocaine war and trade issues, officials said. And U.S. and Colombian officials are to sit down this month to begin talks on trade issues.

In a confidential memo to Bush, Gaviria pressed for new trade initiatives and asking for help in obtaining $1 billion to continue fighting the cartels.

The memo, handed to Vice President Dan Quayle when he attended Gaviria's inauguration, was reported by El Tiempo newspaper. The memo's existence was confirmed by administration officials who also explained the contents.

The memo called for international cooperation, with emphasis on special trade arrangements, to share the costs of the drug war between cocaine producing and consuming nations.

It also asked the Bush administration to lead an effort by industrialized, cocaine-consuming nations to obtain $1 billion in financing. The government estimates the cocaine war cost it $1 billion in direct costs in the past year, with another $1 billion in economic damage in such areas as tourism.

Details of the financing proposal have not been worked out, but could be based on the sale of Colombian bonds to industrialized nations, officials said.

#90247u1496 09/04/1990 ~United Press International

BONN, WEST GERMANY (SEPT. 4) UPI - A West German tabloid claims the Soviet Union will grant asylum to several top East German spies who are likely to be arrested for their former espionage acitivities after German unification Oct. 3.

The mass circulation tabloid ''Bild'' claimed the agents of the former East German State security police - known as Stasi - will seek refuge in the Soviet Union because they had closely worked with Russian intelligence.

''A circle of 50 highly professional and talented leading Stasi officers who handled important agent work for the Soviet intelligence service KGB for decades, are preparing their inconspicuous transition to the Moscow center,'' the paper said in a report to be published Wednesday.

No arrest warrants have been issued yet for former Stasi members, but it seems likely that at least some of the top people will be indicted after unification.

Bild said the group seeking refuge in the East could include former Stasi chief Markus Wolf, who it said could hide in the Soviet Union until the warrant for his arrest is quashed.

Wolf has repeatly emphasized he wanted to stay in East Germany.

The daily said the former chief of espionage in the West German intelligence service, Hans-Joachim Tiedge, who had fled to East Germany when he was caught spying for the Stasi, has already left for the Soviet Union.

Bild quoted West German intelligence sources as saying that Tiedge is already considering job offers from the Syrian, Lybian and Iranian intelligence services.

MWANZA, TANZANIA (SEPT. 4) UPI - Huge crowds Tuesday flocked to hear Pope John Paul II denounce what he called ''the unspeakable crime of abortion

'' birth control, polygamy, witchcraft and bride-selling.

In the lakeside Tanzanian town of Mwanza on the fourth day of the pope's 11-day African tour, thousands from neighboring Kenya and Uganda swelled the Tanzanian congregation for the open air mass. Witnesses estimated the milling crowds in the port town on the shores of Lake Victoria at several hundred thousand.

In his sermon, the pontiff called for an end to witchcraft - common throughout East Africa - because he said it led to ''forms of enslavement and false worship.''

Referring to the widespread African custom of bride-price - a form of reverse dowry in which the groom gives the bride's family a gift of money or cattle before the marriage - the pope denounced the temptations of materialism.

''Don't let the excesses and abuses of these customs lead to attitudes which judge the dignity and worth of persons only on the basis of wealth and possessions,'' John Paul said.

He spoke out strongly against artificial birth control, which many Western aid organizations are promoting throughout Africa in the face of the continent's population explosion.

''Moral duty is urgent today in the face of new dangers and threats to innocent human life and the sanctity of marriage,'' he said.

''Among those threats I include the unspeakable crime of abortion and methods of birth control that are contrary to the truth of married love, as a gift by which a husband and wife become collaborators with God in giving life to a new human person.''

''It is God's will that this sacred union exists only between two people. When a man marries a woman he pledges to give his love to her and her alone,'' the pontiff added on polygamy, which is common throughout the region.

This is the Pope's seventh visit to Africa, but his first to Tanzania and its 5.34 million Catholics.

The Pope's themes Tuesday were new on this trip. He had hitherto chosen to stress the need for Moslems and Christians to work together since his arrival in East Africa Saturday. Tanzania is 21 percent Catholic, 25 percent Moslem and the balance follow traditional, animist beliefs.

Tanzania has seen growing tension between its mainly coastal Moslems and up-country Christians since President Ali Hassan Mwinyi, a Moslem,

succeeded devout Catholic Julius Nyerere in 1985.

''As believers in one, merciful God it is essential that we develop a relationship of justice, brotherhood and mutual respect,'' John Paul said Monday to Moslem and Christian leaders.

He said birth control was ''contrary to the truth of married love.''

On previous African tours, the Pope has caused controversy by his stand against the use of all contraceptives.

Tanzania, like many other African countries concerned by their high birth rates, encourages the use of birth contol.

Many governments also advise the use of condoms in combatting the spread of Acquired Immune Deficiency Syndrome, AIDS.

Tanzania has reported more than 5,000 cases of AIDS, one of the highest per capita country totals in the world, according to the World Health Organization, which says that reported third world cases are probably only one third of actual cases.

The Pope's whistle-stop tour of Tanzania continued Tuesday afternoon when he flew 180 miles south from Mwanza to Tabora.

There he gave crucifixes to lay preachers at a gathering in a sports stadium.

In the late afternoon his itinerary took him miles northeast to Moshi, situated in the shadow of Mount Kilimanjaro, the highest mountain in Africa.

Moshi, a tourist center and base for climbing to the 19,340-foot summit of the free-standing mountain immortalized by Earnest Hemingway in his book ''The Snows of Kilimanjaro,'' has a population of 65,000 and more than 60 percent of its inhabitants are Catholics.

Police estimate more than 300,000 people, including 1,000 who have come from neighboring Kenya, may attend a mass Wednesday morning celebrating 100 years of the Roman Catholic Church in northern Tanzania.

The pope flies Wednesday afternoon to Burundi, which borders Tanzania to the West, and from there to Rwanda.

His tour is scheduled to finish in Ivory Coast in West Africa, where he plans Sept. 10. to consecrate an enormous basilica built at the controversial cost of $150 million by Ivorian President Felix Houphouet-Boigny.

WASHINGTON (SEPT. 4) UPI - Non-farm productivity increased a revised 1.5 percent in the second quarter of 1990 after falling 1.9 percent in the first quarter of the year, the Labor Department said Tuesday.

But productivity - or the hourly output per worker - was off 0.9 percent when compared with the second quarter of last year.

''The basic message is still the same,'' said Robert Dederick, chief economist at Northern Trust in Chicago. ''Production gains are inadequate to offset the wage increases.''

''The result we have is an increase in unit labor costs that are consistent with inflation that is locked in the 4 percent bracket,'' Dederick said. ''Production still seems to be a weak spot in the economy.''

The government initially reported in August that non-farm productivity advanced by 1.6 percent in the second quarter.

Worker output was up 1.5 percent in April, May and June while total hours worked were unchanged, according to the latest report by the department's Bureau of Labor Statistics.

Hourly compensation rose 5.8 percent, but when counting inflation was ahead by only 2 percent, the government said.

In January, February and March, hourly compensation increased 3.2 percent while ''real compensation per hour'' fell 4.5 percent. Second quarter unit labor costs were up 4.3 percent vs. a gain of 5.2 percent in the first quarter.

The implicit price deflator, a barometer of inflation tied to the productivity report, rose 4.6 percent in the second quarter following a 3.8 percent increase in the first quarter.

Manufacturing productivity, meanwhile, increased more rapidly that other sectors of the economy, growing by a revised 4 percent in the second quarter of 1990 after a 5.1 percent increase in the first quarter.

Manufacturing output rose 4 percent and total hours worked edged up 0.1 percent.

''All of the productivity gain occurred in durable goods industries, where output rose 6.8 percent, average weekly hours declined 0.5 percent, and employment rose 0.1 percent,'' the Labor Department said.

Hourly compensation for factory workers was up 6.3 percent in the second quarter, but when counting inflation was up only 2.5 percent. Unit labor costs for manufacturing gained 2.2 percent.

All the data in the report was adjusted for seasonal factors.

(SEPT. 4) UPI - A U.S warship in the Gulf of Oman seized an Iraqi freighter carrying tea from Sri Lanka Tuesday and the United States chartered an Iraqi plane to ferry out 30 Americans and 100 other nationals from Baghdad later in the day.

Hundreds of Britons left Kuwait City on a grueling bus journey to Baghdad in search of exit visas and a way home, while Iraq said several nations with citizens stranded in Iraq and occupied Kuwait have offered to provide food in defiance of the U.N. trade embargo.

In the first seizure in the U.S. naval interception program that began Aug. 16 to enforce the U.N. economic sanctions imposed on Iraq after the Aug. 2 invasion of Kuwait, the guided missile destroyer USS Goldsborough ordered the Iraqi vessel Zanoobia, to go to the Omani port of Muscat where it was being held, Pentagon spokesman Pete Wiiliams said.

In Washington, White House press secretary Marlin Fitzwater said U.S. officials had been working to arrange an airlift out of about 30 Americans and 100 other foreign nationals, but that the hostages had not yet been allowed to leave.

He accused the Iraqis of trying ''to frustrate our efforts'' to get out as many Americans as possible and dismissed suggestions that chartering an aircraft from the Iraqis was a violation of the economic sanctions against Iraq.

The release of foreign women and children promised by Iraqi President Saddam Hussein ran into fresh obstacles following the weekend airlift of several hundred Westerners when Iraq insisted that any country sending planes must grant reciprocal landing rights to Iraqi aircraft - an arrangement that would contravene the U.N. sanctions.

An estimated 2,000 Americans are among thousands of Westerners and Japanese who remain trapped in Iraq and occupied Kuwait.

Iraq, which has said is holding citizens of ''aggressive nations'' at strategic installations as ''shields'' to prevent an attack by U.S.- led forces in the region, has continued to round up foreign men.

The British Foreign Office said 18 more British men were taken into custody by Iraqis during the past few days and detained at strategic installations, probably oil refineries.

In addition to the Westerners, about 80,000 refugees - mostly laborers from poor Asian countries - are living in deteriorating conditions near the Jordanian border because they cannot afford flights home and their governments lack sufficient funds to arrange transportation.
In other developments:

- The New York Times reported the United States has secretly deployed combat aircraft in several Persian Gulf nations to help defend Saudi Arabia. Only a handful of the deployments had been publicly disclosed because of the nations' continuing sensitivities about inviting in the U.S. military.

-The White House announced that President Bush will ask Congress to forgive Egypt's $7.1 billion military debt to the United States in recognition of Egypt's support in the Gulf and the losses it faces from sanctions against Iraq,

- The French newspaper Liberation cited PLO official Abu Iyad as saying the Iraqi president would be willing to withdraw from Kuwait in exchange for guarantees Iraq would not be attacked, promises that Iraq could keep two parcels of Kuwaiti land and that Kuwait's exiled emir not be allowed to return to power. Fitzwater dismissed the offer by repeating the U.S. demands for ''unconditional withdrawal'' from Kuwait and the restoration of its ''legitimate government.''

''We have seen Saddam Hussein make all kinds of overtures of one kind or another in the last several days,'' Fitzwater said, ''but they never seem to hold up and they never meet our basic objectives. That situation has not changed.''

-Fitzwater acknowledged that some goods continue to reach Iraq by overland route through Jordan, but insisted that was ''not a major problem in terms of the total effectiveness of the sanctions, which we believe are beginning to bite.''

- The United States requested airlift as well as sealift help from NATO allies to transport troops and material to the Gulf in line with Bush's appeal for financial support, and at least three countries agreed, NATO sources said.

- Jordan's King Hussein wound up a four-hour visit to Rome. Italian officials announced the monarch will fly to the Iraqi capital of Baghdad ''within 48 hours'' to continue his one-man diplomatic effort for a

solution to the crisis.

- Egypt, which sent between 3,000 to 5,000 troops into Saudi Arabia, sent an unspecified number of soldiers to the United Arab Emirates ''to boost the defensive capabilities of the UAE against any external aggression,'' Egypt's semi-official Middle East News Agency said.

- The 21-member Arab League named as its interim leaders As'aad el- As'aad a Lebanese assistant to Arab League Secretary-General Chadli Klibi who resigned Monday amid deep divisions over the Persian Gulf crisis.

#90247u1597 09/04/1990 ~United Press International

LONDON (SEPT. 4) UPI - A British company Tuesday began marketing an electronic device that can be mounted on a car's dashboard and warns of traffic jams ahead, giving the driver a chance to choose an alternate route.

The Trafficmaster - a 6-by-5-inch electronic map that reads traffic information from a network of infrared speed sensors planted on highway bridges - is the first of its kind, according to the company, General Logistics.

Designed for mounting on vehicle dashboards to help drivers save time and avoid wasting fuel by revealing less congested routes, Trafficmaster also can provide information to drivers already stuck in a traffic jam.

''Before, if you were late for a meeting, you just looked at your watch,'' said Susan Beverley, spokeswoman for General Logistics. ''They're not claiming it will reduce traffic congestion, but at least you'll know how long you are going to be stuck in it.''

The system now covers 200 miles of roads within a 35-mile radius of central London, including part of the busiest motorway network in Europe, the M25. The entire country is to be covered by 1993.

The price tag for snarl-free driving is hefty. First-year installation and equipment costs for Trafficmaster are estimated at about $1,128.

The sales pitch is high-tech.

''An audible tone will alert you each time new traffic information is received. The display will automatically zoom in to show a close-up of the problem zone and reveal the extent of the hazard ... indicating the average traffic speed,'' a Trafficmaster brochure explained.

The system works through sensors mounted on roadways that monitor traffic

flow, then feed the information to a 24-hour control center for evaluation.

The control center puts traffic data into the system, updating it every few minutes. Drivers decide which road network they want to use, then press a button on their Trafficmaster to find the most traffic-free route.

General Logistics expects to sell more than 1,000 Trafficmasters a month during the next year.

#90247u1612 09/04/1990 ~United Press International

KATMANDU, NEPAL (SEPT. 4) UPI - King Birendra has failed to review Nepal's proposed constitution that will severely limit his powers while creating a multi-party democracy, sources close to a constitutional committee said.

The Harvard-educated king, Prime Minister Krishna Prasad Bhattarai and the chairman of a nine-member Constitutional Recommendations Commission had been scheduled to meet Monday at the Royal Palace to finalize the date of formally announcing the draft constitution, but the meeting was canceled.

Sources close to the commission quoted an aide to the monarch as saying, ''The king has yet to go through the draft of the constitution.''

The sources said the government and the commission were to meet Tuesday to put the final touches on the draft, submitted to the palace last week.

The commission - consisting of members of the Nepali Congress Party and the United Left Front, a coalition of seven communist parties - completed its work by a Sept. 1 deadline. Palace officials said the deadline had been extended until Sept. 6.

As word spread of the delays, posters appeared in several parts of Katmandu Tuesday demanding the immediate promulgation of the new constitution. Some leftists threatened to unilaterally disclose the draft of the constitution if the palace did not release it.

Newspaper reports indicated the palace wanted an auspicious date to promulgate the constitution, itself the result of massive street demonstrations last February that forced the king to accept limitations on his power and multi-party elections.

One possible explanation for the delay was that Hindu custom requires the living to offer remembrances to the dead during a 16-day period starting Wednesday, a solemn period for announcing such a document.

However, others saw the delay as an attempt by the palace to stall the

transition to multi-party democracy and restriction of the king's authority.

Commission members reportedly have suggested under the new charter, the king will exercise executive powers only on the recommendation of the government, and his control over the once-loyal army will be weakened.

NEWARK, NJ (SEPT. 4) UPI - A Kuwaiti cargo ship that was returning Iraqi-bound cargo to the United States was detained briefly Tuesday until it was reflagged in the United Arab Emirates, U.S. Customs officials said.

The Al-Wattyah was held in the Port of Newark after it arrived about 10 p.m. Monday night, but was released before noon on Tuesday when its registry was changed to the UAE, said Joan Baran, a Customs spokeswoman in New York.

''The registry has been changed, so it is free to go whenever it wishes,'' she said.

The ship unloaded three containers of machinery and engine parts that were destined for Iraq that were loaded in Baltimore before the Aug. 2 invasion of Kuwait by Iraq, she said.

''It was a Kuwaiti ship, it picked up goods before the embargo and was on the high seas and it made its ports and then it came here and returned the goods,'' she said.

Customs officials declined to release the name of the company that produced the equipment and Ed O'Reilly, with shipping agent Kerr Steamship Co. Inc. in New York, refused to discuss the ship, owned by the United Arab Shipping Co.

Cargo manifests listed the equipment as ''machine parts, engines, engine parts and turn valve machinery,'' Baran said.

As part of the economic embargo imposed against Iraq and Kuwait following the Iraqi invasion of its southern neighbor, President Bush has frozen all of the two countries' assets in the United States.

Under the embargo, Customs agents are charged with examining - and possibly seizing - products being exported by the two countries.

''The reason it was detained because we were enforcing the embargo,'' Baran said. ''Now everything has been settled and the ship is '''Now everyt

In the months since it left Baltimore, the ship called at Bombay, India, Karachi, Pakistan, Dubai, UAE, and Italy, Baran said.

Members of the Pakistani crew, shouting to a television reporter on a nearby tugboat, said they had most recently been in Spain before arriving in the United States.

The crew members complained they have been denied shore leave since the invasion because of the ship's registration.

#90247u1666 09/04/1990 ~United Press International

PHILADELPHIA (SEPT. 4) UPI - Temple University professors Tuesday walked picket lines instead of teaching in what they vowed could be a protracted strike unless their demands on wages and benefits are met.

Many students, most of whom moved onto the campus over the weekend, expressed surprise and anger that the professors' strike could delay their education.

Some 100 unionized professors, librarians and other professionals toted picket signs reading ''Temple unfair to education'' at entrances to a dozen campus buildings.

The university did not officially cancel classes for its 34,000 students, but many students left their classes after finding that professors were not there.

Art Hochner, president of the 1,100-member Temple Association of University Professionals, vowed to keep classes from convening.

''I want to tell everybody in Philadelphia that classes are not going to be held here,'' Hochner said.

The sticking point in the negotiations was the school's proposal that union members chip in $260 a year to pay part of their health insurance premiums, said Temple negotiator Robert Harrington.

Harrington criticized the union for going on strike without first submitting to a fact-finding process.

''This is absolutely unfair for the students, particularly when the law that we operate under provides for fact finding as a way to study issues, as a way to examine them and as a way to have somebody from an impartial stance make a recommendation,'' he said.

Hochner pledged to maintain the walkout until the administration caved in to the union's demands.

''We are out here with overwhelming support,'' Hochner said.

The rejected contract proposal also called for a 5 percent base pay raise, Hochner said. The university insists its averages 6 percent a year, because it includes a merit pay pool and funding to equalize salaries of veteran professors.

University officials were asking cooperation and compromise to settle the strike but Hochner charged that the administration ''had not changed its position'' since its proposal was rejected.

Average faculty salaries at Temple range from $35,800 for assistant professors to $54,600 for full professors, the university said.

#90247u1674 09/04/1990 ~United Press International

NEW DELHI, INDIA (SEPT. 4) UPI - Thousands of high-caste Indians staged rallies, strikes and demonstrations across the northern part of the country Tuesday to protest a decision that would reserve 27 percent of all government jobs for members of so-called backward classes.

Protests in Patna, the capital of Bihar state 530 miles southeast of New Delhi, degenerated into violence. Youths torched vehicles, damaged shops and hurled bricks at police, who fired tear gas and charged into the mob wielding batons and rifles.

The Press Trust of India news agency said two protesters were killed in the incident, including a youth who died after being clubbed with rifle butts. The agency said scores of other people were injured in the encounter.

The protests and strikes, which also affected New Delhi and several other states, came as part of a continuing reaction to a government decision to reserve 27 percent of public jobs for backward classes.

The administration of Prime Minister V.P. Singh created a storm of controversy Aug. 7 when it decided to implement the 10-year-old proposal, which calls for reserving civil service jobs in a bid to improve the social condition of the underprivileged.

The decision touched off a series of violent protests and polarized the country and its politicians. Critics of the plan charge that it enshrines the caste system in government policy and will make the bureaucracy more inefficient by granting jobs on the basis of caste rather than qualifications.

Proponents of the program say it will give members of backward and disadvantaged classes an opportunity to enter a government bureaucracy that is dominated by members of the higher castes.

An estimated 15,000 high-caste youths in new delhi protested the plan tuesday despite a driving rain that soaked the crowd of demonstrators gathered at the boat club lawns near parliament.

''We want them (the government) to universalize education so that they (the backward classes) can be on par with us,'' said Ashwini Shankar, a spokesman for students opposed to the job reservation scheme. ''We don't believe that reservations based on caste is a solution to the problem.''

Some students charged that the decision was part of a government tendency to try to appease politically powerful groups by handing out jobs. In the 1950s, authorities reserved 22 percent of government jobs for harijans, or untouchables, who are at the lowest end of the caste system.

''If this policy of appeasement continues, it will bring the country to the brink of disaster,'' said one student.

Protesters opposed to the government decision staged strikes in several towns and villages in the western state of rajasthan, the Press Trust reported. the agency said no violence was reported during the strikes.

In Haryana state just north of the capital, protesters opposed to the job reservation scheme set ablaze 20 vehicles and six trains, PTI said. The agency said protesters also damaged 32 government vehicles.

In Bhubaneswar, the capital of eastern Orissa state 840 miles southeast of New Delhi, police arrested members of the state Congress (I) Party as they began a procession to protest the job reservation plan.

The party's national organization is headed by former prime minister Rajiv Gandhi, who has criticized the government for the manner in which it tried to implement the plan but has not rejected it outright.

#90247u1695 09/04/1990 ~United Press International

RIVERHEAD, NY (SEPT. 4) UPI - A burglar seeking money for a trip stabbed a woman as she slept and then sat on her body and counted her heartbeats until she died, a prosecutor charged Tuesday.

Suffolk County District Attorney James Catterson said in his opening statement in the trial of Thomas Lyden, 22, and co-defendant Daniel Toal, 21, that the two went to an apartment in St. James on Long Island on July 18, 1989, seeking money to go to Puerto Rico.

Lea Greene, 35, a nurse, was asleep in her bed when the two men entered through an unlocked door looking for valuables, Catterson told jurors.

Catterson pointed to Lyden.

''He saw her sleeping in the bedroom, went in and sat on the bed and checked to see if she was breathing,'' the prosecutor said.

''He took that knife and plunged it into her neck until you could hear the larynx crack,'' he said. ''He held her down and counted her heartbeat until he got to 74. Then they stopped.''

Greene's father, Robert Greene, assistant managing editor of the newspaper Newsday, sat in the front row of the courtroom and listened without apparent emotion.

Catterson told jurors a neighbor saw the two loading stolen items into Lyden's car and called police.

The pair drove to Lyden's house in Rocky Point, he said. On the way, he

said, they tossed out Greene's checkbook and jewelry they thought was worthless. They cleaned up, changed their clothes and headed for Queens to sell the stolen goods, Catterson said.

On the way, he said, they stopped in Medford for gas. Police spotted their car and arrested them. After they were caught, both men gave written and videotaped confessions to police.

Lyden's lawyer, Steven Lupow, told the jury Lyden was a chronic alcoholic who suffered from blackouts and ''altered personality'' and was not responsible for his actions.

He said Lyden, a former sailor, was born to alcoholic parents and had been judged emotionally disturbed as a child. Lyden failed the ninth grade three times and dropped out of high school at 16, he said.

''He has no recollection of what happened that morning,'' Lupow said. ''The alcoholic pathology prevented the intent for the burglary and definitely the murder. He couldn't (have) intent to kill under those circumstances.''

DOVER, DE (SEPT. 4) UPI - The victims of the C-5 transport plane crash last week in West Germany arrived back in the United States through Dover

Air Force Base during the holiday weekend, officials said Tuesday.

In keeping with Air Force procedures, there was no public ceremony to mark the return of the 13 servicemen and reservists who died when the giant plane crashed on takeoff at Ramstein Air Base.

Air Force officials said eight of the bodies arrived at the Delaware base Tesday aboard a C-141 from Rhein Main Air Base in West Germany. Four other crash victims arrived Monday night, and the body of Capt. Bradley Schuldt of Arlington Heights, Ill., arrived Sunday aboard a C-5.

Four other crewmen aboard the plane survived the crash, which remains under Air Force investigation.

The plane was being flown by a crew of Air Force Reserve members from the 433rd Military Airlift Wing based at Kelly Air Base near San Antonio, Texas. Crew fatigue has been suggested as a possible cause of the crash.

One of the pilots on the plane was Maj. John Gordon, 46, of Spring, Texas, who had served with the Delaware Air National Guard for 17 years.

The remaining victims of the crash included: Maj. Richard Chase, pilot; Sgt. Rosendo Herra, flight engineer; Sgt. Carpio Villarreal, flight engineer; Sgt. Daniel Perez, loadmaster; Sgt. Edward Sheffield, loadmaster; Maj. Richard Price, first pilot; Sgt. Lonty Knutson, crew chief; and Sgt. Daniel Garza, crew chief.

While ceremonies honoring the victims of military actions or accidents have traditionally been held at Dover Air Force Base in recent years, there have never been any for Air Force members who died in action or in accidents.

''They do leave with an escort and the service members are entitled to military honors at the request of the next of kin and typically, that takes place at graveside,'' said Capt. Chris Geisel, a base spokesman.

BY LEE STOKES - UPI

CAIRO, EGYPT (SEPT. 4) UPI - The resignation of the Arab League secretary general over his handling of the Gulf crisis may spark the biggest split in the 21-member organization since Egypt signed a controversial peace treaty with Israel 11 years ago, analysts said Tuesday.

Chedli Klibi, a Tunisian, was the first non-Egyptian to get the job of secretary general since the Arab League was founded in 1945.

''Klibi angered the Saudis, the Egyptians and the Syrians by his handling of Iraq's invasion of Kuwait,'' said one Cairo-based Arab diplomat.

''His resignation could cause the biggest rift in Arab ranks since Egypt signed the peace treaty (with Israel in 1979),'' the diplomat said. ''Pro-Iraq Arab nations could conceivably set up their own parallel Arab League.''

Egypt, Syria, Morocco and other pro-Kuwait Arab nations were the most vociferous at recent Arab League meetings in Cairo to demand that Klibi press members to send troops to Saudi Arabia to defend it against Iraqi aggression.

In the face of Klibi's reluctance to do so Egypt, Syria and Morocco went ahead and sent troops to Saudi Arabia anyway.

But Iraqi anger at the move apparently prompted Klibi's home country Tunisia, as well as Yemen, Jordan, the Palestine Liberation Organization, Sudan, Algeria and Mauritania to stay away from the last Arab League session in Cairo. Only 13 out of 21 Arab delegations showed up.

The reasons why individual Arab countries either criticize or support Iraq are varied. Syria is Iraq's arch Arab ideological foe. The PLO maintains close political ties with Baghdad. Jordan has strategic and economic reasons for keeping on good terms with its bigger neighbor, and Yemen has traditionally maintained close ties with Iraq as a counterbalance against its neighbor Saudi Arabia.

Another complicating factor is Egypt's own position within the Arab League. After it signed a peace treaty with Israel, the League's headquarters were moved in 1979 from Cairo to Tunis.

And even though a majority of Arab states have now voted to move League headquarters back to Cairo, making the transition ''a formality'' according to Cairo Radio, Iraq's allies within the organization were expected to oppose the move.

Klibi resigned to avoid being associated with such a maneuver, diplomatic sources in Tunis said, which would be seen as a victory for Egypt over Iraq and its supporters.

But Egypt would prefer that all members remain within the organization even if there are disagreements, to give greater clout to the Arab League when its headquarters were moved back to Cairo later this year, Egyptian foreign ministry officials said.

''I don't think this is the end of the Arab League,'' Egyptian Foreign

Minister Esmat Abdel Meguid told reporters this week.

Political analysts in Beirut said Cairo was maneuvering to ensure an Egyptian would soon be voted the next permanent secretary general of the organization.

The analysts said ''the naming of Lebanese Assad al Assad as acting secretary general would allow Egypt to assign an Egyptian for this post very soon.''

Assad, whose country is allied with Syria against Iraq, is the eldest among the assistant secretary generals and was expected to retire within a year.

Former Arab League Secretary General Mahmoud Riad agreed with Meguid, telling the Arabic Service of the British Broadcasting Corp. Tuesday that he did not believe the organization would split into two groups, one based in Cairo and a pro-Iraqi group based in Tunis.

Riad admitted that the Arab League was now ''paralyzed.''

The Egyptian daily El Messa Tuesday blamed the split on an Iraqi ''plot to set up a parallel, pro-Iraqi organization.'' But the newspaper said Egyptian diplomacy was capable of confronting such a plot and ensuring such a damaging split did not occur.

#90247u1772 09/04/1990 ~United Press International

ON THE SAUDI ARABIAN FRONT (SEPT. 4) UPI - Some people think the Saudi desert a godforsaken place, but not Lt. Samir Saleh, a Saudi officer for whom the mission against Iraq has more to do with theology than territory or oil.

''America has a good strong army, but if we go to the army it is because we want to die here,'' the bearded soldier, who serves as a religious affairs officer, said during a Tuesday press visit to frontline Arab positions.

''Americans don't want that,'' he explained. ''Maybe they want oil. Maybe they want to kill Saddam (Hussein). But Allah will help the Moslems ... our heart is not in the ground, it is in the sky.''

If war erupts, these men from the Saudi army and eight other Arab militaries under Riyadh's command will surely see the first ground action and take the first casualties.

It is a different military experience from the American deployments, which are further south in other defensive positions should Baghdad order its estimated 170,000 soldiers and 1,000 tanks to roll across the border from occupied Kuwait.

The Arab forces are strewn near the Kuwaiti frontier across a vast, unyielding pancake-plateau of sand, on which the only protrusions are man-made objects, usually shimmering on the horizon in the 113-degree heat.

Encampments consist of a scattered circle of vehicles and tents, with armor nestled into deep trenches to conceal and protect them from any advancing ground forces.

At one camp, a group of Saudi soldiers rested in their shelter, sipping tea and listening to Islamic prayer ballads on radio.

Troopers five times a day emerge and honor the time-bound ritual of praying to Mecca. They stand devoutly against the backdrop of never-ending desert, before prostrating toward Islam's holiest site.

The atmosphere may be more low-key, the weapons less high-tech and nasty than the U.S. arsenal, but as Saleh attests, there is no shortage of resolve among men who are defending not only their country, but their faith.

For them, the stakes are high because they are motivated by deep feelings of culture and religion.

Most Iraqis are fellow practicing Sunni Moslems, but the Arab soldiers said the root of their rightousness is objection to Saddam's secular socialist Ba'athist ideology.

The Iraqi leader lost credibility by calling on all Moslems to rebel against the Saudi government for allowing defiling western soldiers into the nation of Mecca and Medina.

Although few Arab troopers expressed any great love for the West, Saddam's tactic has been viewed as a ploy to exploit Islam for personal and political goals.

Saddam's invasion of another Arab nation was an unprecedented event this century, and many soldiers expressed hopes that beyond the geopolitical turmoil, the affinity of Arabs would remain intact.

''We have come here to defend the Arab nation but we hope that there won't be a war,'' said an Egyptian paratrooper, brandishing a Kalashnikov assault rifle. ''Arab blood is too precious.''

But the question of how American and Arab forces would meld on the battlefield remains moot.

Defense Minister Prince Saud's Saturday statement that the kingdom would only be host for operations in defense of the nation has also raised questions about whether Riyadh would oppose any unilateral U.S. plan against Iraq, perhaps to free Western hostages.

Brig. Gen. Mohammad Shehri said about 60,000 Arab soldiers were now deployed, of whom some 20,000 were from friendly Arab nations.

Officials said there are about 3,000 Syrians, 3,000 Moroccans, 2,000 Egyptians, some 2,000 each from the Gulf states of Oman, Qatar, Bahrain and the United Arab Emirates, with the rest coming from the remanents of Kuwait's defeated army. Pakistani units will arrive soon.

Baghdad has shown great caution since the U.S. military began pouring in, and analysts believe it will not attack Saudi Arabia because this would be an act of national suicide, certain to incur retaliatory attacks on strategic targets deep inside Iraq.

But should Saddam make that risky decision, northern Saudi Arabia is perfect tank terrain of flat baked sand that is the next best thing to a freeway and would allow Iraqi's Soviet armor to invade at near full speed.

#90247u1809 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - The failure of state governments to regulate child care operations is jeopardizing the health and safety of millions of American children, a study released Tuesday by the Children's Defense Fund said.

The report on state efforts to assure quality child care found that nearly half of the more than 6 million American children in out-of-home child care settings ''remain unprotected'' despite state assurances.

''At first glance, nearly every state appears to have a system that responds to parental concerns about quality,'' said Gina Adams, the report's author. ''But a closer look reveals that states do not provide even minimal health and safety protections for nearly one-half of all children being care for outside their homes.''

Adams urged final approval of federal child care legislation passed by the

House and Senate but now languishing in a conference committee. The legislation would help parents and states meet the cost of child care and enhance the quality of child care programs.

In general, Adams said more serious problems are found in southern and central western states in terms of whether licensing is required, the adequacy of licensing requirements and level of enforcement of laws on the books.

Historically, the South has not had enough money to finance programs affecting children and the West's attitude often has been that '''we don't want people telling us what to do,''' Adams said.

One of the biggest loopholes, the report said, is that many states just regulate child care programs that receive public funds, while other programs are exempt from state laws or operate illegally.

Adams said 2.6 million children, or 43 percent of those in out-of- home child care, are in programs exempt from state regulation. ''These programs often are not subject to any state regulation, and therefore are not required to meet even basic health and safety requirements,'' Adams said.

Another problem involves ''family day care'' programs, which are operated out of a provider's home, the report found. About half of all children in day care are served in these settings, and the majority of them are cared for in homes serving fewer than six youngsters. Yet 22 states exempt from regulation, including inspection, programs serving five or fewer unrelated children. Thirty-six states exempt programs serving three or fewer children.

''This is all the more alarming because infants and toddlers - the most vulnerable of young children - are more often cared for in family day care homes than in other child care settings,'' Adams said.

Adams also said about one-third of all child care centers are operated by religious institutions, but 13 states fully or partially exempt such programs from regulation. Also, 29 states fully or partially exempt child care programs operated by public schools. These exemptions, Adams said, leave an estimated one in six children in child care centers without state protection.

Even where there is state regulation, Adams contended, it often falls below minimum levels to assure young children's health, safety and full development, Adams said.

For example, Adams found:

-13 states do not require children in licensed or registered family day

care homes to be immunized against measles or other preventable childhood diseases.

-Parents in 29 states do not have the unqualified right to visit their child's family day care home unannounced.

-19 states allow child care centers to operate with five or more infants per adult, and 13 states allow a single provider to care for five or more infants and toddlers. Idaho, for instance, allows a single provider to care for as many as 12 infants. Adams said child development experts recommend one care-giver for up to four infants.

-22 states have no group size limits.

#90247u1814 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - President Bush has canceled a long-planned appearance at the dedication of Ellis Island because of his just-scheduled meeting with Soviet President Mikhail Gorbachev, and has appointed Vice President Dan Quayle to take his place, officials said Tuesday.

Bush announced over the weekend he will meet with Gorbachev in Helsinki Sunday to discuss the Persian Gulf crisis and other issues. Barbara Bush, who also had been scheduled to take part in the Ellis Island ceremonies, will accompany her husband, officials said.

Ellis Island officials said Sunday's festivities would proceed on schedule.

''Nothing has changed, except the fact that Vice President Quayle will be substituting for the president,'' National Park Service spokesman Manny Strumpf said.

Quayle will dedicate the new National Museum of Immigration and the 27 acres surrounding it in the memory of the millions who passed through Ellis Island in the 62 years it was open as an entry point for immigrants.

In addition to a speech by Quyle and Secretary of the Interior Manuel Lujan Jr., the ceremonies will include music from around the world and the swearing-in of new American citizens.

Also to be dedicated will be the American Immigrant Wall of Honor, inscribed with thousands of names of those who came to this country.

The island, in Upper New York Bay a half-mile from the Statue of Liberty, will be opened to the public Monday.

Sunday's festivities will cap an eight-year campaign to bring the famous facility back from decay and neglect.

The National Park Service property, which had been abandoned for nearly 30 years, has been renovated and its ornate main building restored.

Inside, workers to raced put the finishing touches on the three- story Museum of Immigration that, with film, artifacts, exhibits and taped oral histories, will tell the story of the greatest migration in human history.

The painstaking restoration work cost almost $160 million in private funds raised by the Statue of Liberty-Ellis Island Foundation created by automotive executive Lee Iacocca.

#90247u1824 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - With the Persian Gulf crisis as a focal point, President Bush is looking toward a new unity of purpose in his weekend summit with Soviet President Mikhail Gorbachev, the White House spokesman said Tuesday.

The third formal meeting of Bush and Gorbachev - a one-day, free- form affair - is scheduled Sunday in Helsinki, Finland, and press secretary Marlin Fitzwater cast the session in somewhat grandiose terms, saying, ''A new foundation for a new world order is being built and the spadework begins in Helsinki.''

''It is somewhat ironic that the prospect for war is forging a new blueprint for world peace,'' he added. ''Both leaders will want to apply some new brush strokes to this emerging blueprint.''

Earlier, Soviet Foreign Minister Eduard Shevardnadze had described the upcoming summit as a ''landmark meeting.''

''We want to show unity and support by the two superpowers to stop (Iraq's president) Saddam Hussein,'' Fitzwater said. ''We agree with Shevardnadze it will be important and constructive.''

While Bush was expected to return to Washington after his meeting with Gorbachev, Fitzwater told reporters he would not rule out ''other cities'' as possible presidential stops, including Brussels where NATO has its headquarters.

White House advance teams are in Finland working on logistics and national security advisers are discussing substantive details with Soviet counterparts.

But Fitzwater said that Bush ''liked the unstructured-agenda nature of the Malta summit meeting'' last December and ''we will attempt to approximate that again in Helsinki.

Bush plans to leave Washington Friday evening - his inaugural flight on the new jumbo jet Air Force One - and fly overnight to Finland. He is to meet with President Mauno Koivisto Saturday, then spend five hours with Gorbachev on Sunday.

The superpower talks are set for morning and afternoon sessions with a lunch in between.

The coordination of the superpowers' response to Iraq's occupation of Kuwait is the major topic, and Fitzwater noted, ''The Soviets have been very supportive at the United Nations and have let the world know they oppose Saddam Hussein's aggression.''

''This summit should provide an even stronger bond of unified oppositon to aggression,'' he added. ''It also offers an important opportunity for both leaders to assess superpower interest in the post- Cold War period.''

Among other matters on the agenda is an accord to reduce conventional forces in Europe, but Fitzwater stressed the two presidents will not be negotiating details of the agreement.

The leaders' goal, he said, would be to goad the process toward completion in time for a meeting of the 35-nation Conference on Security and Cooperation in Europe expected to be held in Paris in November or December.

In addition to discussions ''about the changing pattern of East- West relations,'' the leaders also will review Soviet economic reforms, Fitzwater said.

Referring to an review team sent to the Soviet Union after the Economic Summit in Houston to assess the Kremlin's need for Western help, Fitzwater added, ''The president will be interested in the progress that has been made in that assessment and Gorbachev's views on the reform effort.''

#90247u1844 09/04/1990 ~United Press International

VIENNA (SEPT. 4) UPI - Parliament ruled Tuesday that Polish nationals now will need visas to enter Austria in an attempt to curb what was called an influx of thousands of illegal Polish workers, black marketeers and smugglers operating in the country.

The decision takes effect on Thursday.

The government also moved to stem the flow of illegal refugees from Eastern Europe by using the military to patrol its border with Hungary.

Three army battalions will be sent to eastern Austria near the Hungarian border, the Vienna daily newspaper A-Z reported.

''The decision runs contrary to our policy aiming at the free traffic of people across Europe,'' Foreign Minister Krzysztof Skubiszewski said in a statement on Polish radio. ''Our assessment of the decision is decidely negative.''

An Austrian embassy spokeswoman in Warsaw said the decision will produce a long line of Poles waiting for visas at embassy but added, ''We are ready to handle the problem.''

''The Iron Curtain is not getting rusted,'' said the independent youth newspaper Sztandar Mlodych of Warsaw, commenting on Austria's move.

Polish Foreign Ministry spokesman Wladyslaw Klaczynski said reintroducing visas would defy the present European trend toward building a ''common European house.''

Last month, about 3,000 refugees crossed the Hungarian-Austrian border, more than 2,000 of them from Romania, A-Z reported.

The border troops will patrol the frontier but will be allowed to use their weapons only in self-defense, it said.

The leader of the Green Party, Andreas Wabl, described the movement of the army battalions as ''an inhuman act against people looking for help,'' A-Z reported.

Jorg Haider, leader of the extreme right-wing Freedom Party, told Parliament the move was too late and recommended convening a security summit to discuss the protection of the border.

It is expected refugees and illegal immigrants in Austria will become a major issue in advance of next month's parliamentary elections. Up until now permanently neutral Austria has had an open-door policy for political refugees.

Since the revolutions of Eastern Europe, however, genuine political refugees from Eastern Europe have been difficult to identify and public opinion has moved against the large number of immigrants into Austria.

The Kronen Zeitung newspaper described the Polish black marketeers in Vienna, still operating despite heavy fines, as an ''unacceptable characteristic.''

Vienna's mayor, Helmut Zilk, told the A-Z daily a part of the inner city was ''misused by Poles as a marketplace and camping ground.''

He said although the visa law was a difficult decision, ''there are between 4,000 and 6,000 black marketeers in Vienna and I had to recommend that they are forced to get visas.''

The city of Vienna recently launched a billboard campaign aimed at encouraging racial tolerance.

Poles previously could travel to Austria without visas for three years under the former communist regime before the imposition of martial law on Dec. 13, 1981 to crush the independent Solidarity labor union. Free movement between the two countries was re-introduced four years ago.

The former communist government of Czechoslovakia also banned free traffic of Poles to Czechoslovakia despite their former status as ''fraternal neighbors.'' The status has not yet changed although non- communist Czechoslovak President Vaclav Havel said he favors open borders.

Mass traffic of Poles to Austria who smuggled in various goods and worked illegally was the main objection against the visa free movement. An estimated 70,000 Poles are believed to work illegally in Austria.

Warsaw officials said Poland, in retaliation, could apply administrative measures against thousands of East Germans who cross the East German-Polish border and buy up cheaper Polish gasoline, food and other products. He added, however, Poland would not do it.

WASHINGTON (SEPT. 4) UPI - Supreme Court nominee David Souter received the American Bar Association's highest rating of ''well qualified,'' the ABA announced Tuesday.

Ralph Lancaster Jr., chairman of the ABA Standing Committee on the Federal

Judiciary, reported his committee's findings Tuesday morning to Senate Judiciary Committee Chairman Joseph Biden, D-Del., and to William P. Barr, Deputy Attorney General.

In a brief note, Lancaster said the ''committee has unanimously concluded that Judge David H. Souter is 'well qualified' for appointment to the Supreme Court of the United States.''

Well qualified is the highest of three ABA ratings. The other two are qualified and not qualified.

White House spokesman Marlin Fitzwater said the ''president is pleased to receive this news and looks forward to a speedy ''ws and looks

Confirmation hearings for the federal appeals court judge and native of New Hampshire are set to begin Sept. 13 before the Senate Judiciary Committee.

WASHINGTON (SEPT. 4) UPI - Cocaine and marijuana use among American teenagers has declined sharply in the past year, reflecting a growing trend of antagonism toward drugs and drug users, said a study released Tuesday.

The study, released by the Partnership for a Drug-Free America, found that both teenagers and adults are turning away from cocaine and marijuana as part of ''a profound cultural shift occurring as Americans decide that using illegal drugs is no longer acceptable behavior in any regard,'' said James Burke, partnership chairman.

Among the findings of the study were:

-5.9 percent of teenagers (ages 13-17) reported having used cocaine at least once in the past year, a 44 percent decrease over a year ago, with 5.5 percent of adults reporting similar usage, a 35 percent annual drop;

-21.3 percent of teenagers reported having used marijuana in the past year a 27 percent decline over a year ago, with 13.8 percent of adults reporting similar usage, a 6 percent annual drop;

-71 percent of teenagers reported believing there is a moderate or great risk in using cocaine, a 15 percent increase over last year, and 72 percent of teenagers reported a similar belief about marijuana, a 12 percent annual increase;

-Both teenagers and adults reported having fewer friends who use drugs and 52 percent of teenagers agreed with the statement that ''people on drugs act stupidly and foolishly,'' an increase of 18 percent over last year.

William Bennett, President Bush's drug policy chief, called the study's findings ''largely encouraging.'' On Wednesday, Bennett is slated to deliver a detailed update on the federal drug war one year after the announcement of the president's drug control strategy.

The study's findings come amid escalating homocide rates in some urban centers attributed to an increasingly violent drug trade and a projection by the Senate Judiciary Committee that the nation will suffer a record murder toll in 1990 in part due to drug violence.

The study's results, derived from responses from more than 8,000 Americans in March and April, did not include alcohol or drugs other than cocaine and marijuana.

The study stated that the decline in drug use crosses racial barriers, with similar trends among white, black and Hispanic populations.

The Partnership for a Drug-Free America, a non-profit group that creates

anti-drug advertising, has released studies annually since 1987. The new study reveals the largest single-year drops in teenage usage of cocaine and marijuana. Use of both drugs has fallen the past two years among both teenagers and adults. Among teenagers, reported marijuana use stood at 31.3 percent in the 1988 survey and reported cocaine use stood at 11.5 percent that year.

The study also found that increasing numbers of parents and teachers are discussing the drug problem with children aged 9-12.

''The number of users of illegal drugs is dropping - and dropping probably more rapidly than most people believed possible several years ago,'' said Gordon Black, who heads the Rochester, N.Y., firm that conducted the study.

#90247u1926 09/04/1990 ~United Press International

COCOA BEACH, FL (SEPT. 4) UPI - The lawyer for a University of Florida student suspected in the killings of five college students in Gainesville said Tuesday that investigators had skirted the law and perhaps broke it to question the man.

James Russo, a public defender appointed to represent Edward Lewis Humphrey, 18, said state investigators talked their way early Sunday past employees of Brevard County Jail, where Humphrey was being held on charges unrelated to the serial killings.

They apparently questioned Humphrey for two hours despite the suspect's

petition to halt questioning outside the presence of an attorney, Russo said.

''It has certainly been very, very unusual, maybe improper, maybe illegal '' Russo said.

The investigators apparently had obtained a court order to authorize the questioning, Russo said, but did it secretly late Saturday or Sunday, then refused to show the order to jailers.

''I don't know what they asked the judge to do. I wasn't there to argue against it,'' he said.

Authorities have identified Humphrey, a University of Florida freshman, as a suspect in the spree of killings that has shocked the quiet university town of Gainesville and sent students scrambling for ways to protect themselves.

The bodies of five victims, all college students who lived within 2 miles of each other and within 2 miles of the University of Florida campus, were discovered within a 48-hour period early last week.

Authorities said it appeared the killer or killers forced their way into the victims' apartments and sought out slender young women with brown hair.

All the victims fit that discription except one, a young man who was a roommate of one of the women.

The victims were Christina Powell, 17, of Jacksonville, Sonya Larson, 18, of Deerfield Beach, Christina Hoyt, 18, of Gainesville, Tracy Paules, 23, of Palm Springs North and Manuel Taboada, 23, of Carol City.

Larson and Powell were found stabbed to death in their apartment Aug. 26. Hoyt was found shortly afterward. All three had been stabbed and their bodies mutilated. The others also were stabbed to death.

Russo said he was not sure what type of information Humphrey may have given investigators.

He refused to give any details about Humphrey's mental state or behavior, but last week Brevard County Sheriff Jake Miller said Humphrey had been segregated from other inmates and had exhibited ''psychotic'' behavior.

''I saw Mr. Humphrey yesterday at the jail, yesterday afternoon. I'm not at liberty to discuss with you what he said, nor is it my inclination to discuss his state of mind or behavior,'' Russo said.

Humphrey was being held Tuesday on $1 million bond at the Brevard County

Detention Center in Sharpes. He was charged Thursday in Brevard County, southeast of Gainesville, with aggravated battery in the alleged beating of his grandmother, with whom he had lived.

A bond reduction hearing was postponed until Thursday morning in Brevard County Circuit Court in Melbourne.

Russo called the $1 million bond ''exorbitant'' and said that, at Thursday's hearing, he would ask that the state be forced to attempt to justify it.

''I think at that point in time they need to stand up and say why he's a danger to the community,'' Russo said.

He said that, in a normal aggravated battery case, Humphrey's bond would probably be set at $2,500 or $5,000.

''I've never been directly told that he's a prime suspect. I've never been told that he wasn't,'' Russo said.

Authorities in Gainesville barricaded the enterance to Humphrey's apartment last week, and searched garbage for evidence, but had not obtained a search warrant to enter the apartment.

''It would seem to me you need some amount of probable cause to get a search warrant, and the fact that they haven't obtained a search warrant indicates they don't have probable cause,'' Russo said.

Shortly after Humphrey was arrested Thursday, the aggravated battery charge was dropped, then a few hours later it was refiled, Russo said.

''What was obvious to me was what law enforcement wanted to do was detain him and question him without having to give him access to an attorney,'' Russo said.

Russo said he believed Humphrey would be acquitted or the aggravated battery charge would be dropped.

Meanwhile, University of Florida officials in Gainesville estimated that about 80 percent of the university's student body returned to classes Tuesday despite police warnings that the killer may still be on the loose.

''We have no way of getting an accurate measurement for how many of our students are back,'' said Larry Humes, spokesman for the university.

''We've done some spot checking in class to get some feel for attendance '' he said. ''What we're getting is a majority of our students are back. I've heard 80 percent or plus.''

Humes said it appeared more students were back on campus this week than last week.

''That's my personal feeling,'' he said. ''I think as time goes on and once this situation is resolved, more students will return because this could and has happened at other campuses.''

''Ironically, the amount of crime on the UF campus is down 15 percent from last year,'' he said. ''But this is a random situation.''

Housing director Jim Grimm said an unusually high number of students are seeking to enter on-campus housing.

''We've had probably a total of 11 people come in over the last two days wanting to enter (the dormitories),'' Grimm said. ''We also have 13 reservations. ... Normally, what we're doing at about this time is releasing people to join sororities or to live off campus,'' he said. ''A lot of the students are saying they feel more secure in on-campus housing.''

He said that, while accommodations for men are full, 33 beds in the women dormitories were available. He said ''about 10 or 12'' female students have checked out.

Emerson Poe, manager of Cooperative Security Services in Gainesville, said his pool of 40 guards have been booked up since the killings.

''With the starting of the school year, we usually get a large number of requests,'' he said. ''With the situation here, we've had an unusually high number of requests for personal bodyguards and such.''

#90247u1937 09/04/1990 ~United Press International
HARTFORD, CT (SEPT. 4) UPI - Federal prosecutors filed suit Tuesday charging United Technologies Corp. with repeatedly violating hazardous waste laws at six of its Connecticut plants.

The suit seeks fines in the millions of dollars for improper handling of waste, storing wastes without permits, inadequate training of personnel and other violations, officials said.

The Environmental Protection Agency found more than 100 violations during inspections at five Pratt & Whitney plants and at Hamilton Standard in Windsor Locks, officials said.

U.S. Attorney Stanley A. Twardy Jr., who filed the suit in Hartford federal court, said the importance of the case was the number of violations and not necessarily the severity of individual violations.

''We want to make sure repeated violations by a company of this stature do not go unprosecuted, if you will,'' Twardy said. ''It makes no difference how big or strong you are, we're going to come after you.''

United Technologies issued a statement saying it considered environmental protection a major priority and was ''distressed at the filing of the suit.''

''UTC has committed significant resources - more than $220 million over the past five years - for example, on environmental programs,'' the statement said.

''We will continue to provide the resources, both human and financial, and will work with the Environmental Protection Agency to do whatever is required to protect the environment,'' the company said.

United Technologies is the state's largest private employer. Its products include Pratt & Whitney jet engines, Sikorsky helicopters, Hamilton Standard space systems, Otis elevators and Carrier air conditioners.

Julie D. Belaga, the New England regional EPA administrator, said the suit sought fines that could reach ''into the millions'' of dollars.

''We are going to make sure this company handles its waste in an intelligent way,'' Belaga said. ''At this point we don't see a health threat, but the violations are cumulative and we don't want to see a health threat develop.''

UTC was cited for violations at Pratt plants in East Hartford, North Haven

Middletown and two locations in Southington and for the Hamilton Standard plant in Windsor Locks.

The wastes at the Pratt facilities included acids, solvents and other wastes generated by machining and plating processes used in the manufacture of jet engines, officials said.

PHILADELPHIA (SEPT. 4) UPI - Scientists reported Tuesday they have found evidence that the debilitating chronic fatigue syndrome, commonly called the ''yuppie flue,'' may be linked to a virus.

Elaine DeFreitas, an associate professor at the Wistar Institute, and two colleagues found evidence in the blood of syndrome patients of a type of virus known as a retrovirus.

Retroviruses are viruses that use an unusual genetic mechanism to reproduce. The virus that causes AIDS is a retrovirus while another retrovirus has been linked to a rare form of leukemia.

The researchers said they had not yet identified the virus or shown it actually causes the disease.

''At the very least, we will sequence the gene of the virus that we have found and determine its relationship to other retroviruses and its biologic behavior,'' DeFreitas said. ''Only then will we be able to define the role of this agent in (chronic fatique syndrome).''

The researchers found evidence of a retrovirus in the blood cells of 82 percent of 11 adults with chronic fatique syndrome and 74 percent of 19

children.

In addition, many close relatives and friends of patients also had evidence of a virus in their blood, although they had no symptoms. That suggests that the disease could be passed from person to person, DeFreitas said.

DeFreitas cautioned the virus is similar but not identical to the virus that causes AIDS, which is only passed through sexual conduct or the exchange of body fluids.

''The data do not conclusively show that any retroviral agent is casually (non-sexually) transmitted in chronic fatigue syndrome,'' she said.

The researchers hope to isolate the virus as a first step in finding a way to prevent or treat the syndrome, DeFreitas said.

The research was presented Tuesday at the 11th International Congress of Neuropathology in Kyoto, Japan, by DeFreitas and Drs. Paul Cheney of Charlotte, N.C., and David Bell of Lyndonville, N.Y.

Chronic fatique syndrome is characterized by debilitating fatique, often accompanied by flu-like symptoms, that substantially reduce a person's ability to functions normally and may persist for years.

Scientists thought the syndrome may be caused by a virus known as the Epstein-Barr virus, which causes mononucleosis. But subsequent research largely ruled out any association between that virus and the syndrome.

#90247u1957 09/04/1990 ~United Press International
LITTLE ROCK, AR (SEPT. 4) UPI - A federal panel Tueseday took under advisement a stay of execution request for a man convicted as an accomplice in the rape and shooting death of a 22-year-old nurse.

A three-judge panel of the 8th U.S. Circuit Court of Appeals held a telephone conference to hear defense attorney arguments on why a stay of execution should be given to Barry Lee Fairchild, 36, of North Little Rock.

Fairchild is scheduled to be executed by lethal injection at 9 p.m. (CDT) Wednesday at Cummins state prison. If the execution goes as scheduled, it will be the state's third in less than three months.

Arkansas went 26 years without an execution before it sent John Edward Swindler to the electric chair June 18. A week later mass murderer Ronald Gene Simmons was executed by lethal injection. Swindler was given a choice between the two methods because he was sentenced to death before the state

implemented a new law mandating lethal injections.

Fairchild's attorneys based their plea on a contention that his confession as an accomplice in the 1983 death of 2nd Lt. Marjorie ''Greta'' Mason, a nurse at Little Rock Air Force Base, came during a police beating. Law enforcement officers have denied beating Fairchild and a federal judge in Little Rock who heard the issue last week refused to issue a stay of execution.

Fairchild was sentenced under an Arkansas law that provides the death penalty for accomplices in most capital cases. He made a taped confession in which he said he helped kidnap Mason and that he raped her, but an accomplice actually shot her. Authorities have never arrested a triggerman.

Mason, a former Panama City, Fla., homecoming queen and cheerleader, was kidnapped, robbed, raped and shot twice in the back of the head. Her body was left outside an abandoned farmhouse east of Little Rock.

Fairchild was moved during the weekend to a cell next to the death chamber.

Though he went halfway through the ninth grade, Fairchild never learned to read or write. A year ago, he made a video for school children about the importance of education and how his life might have ended up differently if he had been educated. A psychologist once estimated his IQ at 56-64 but later said the score probably was 10 points higher.

#90247u2014 09/04/1990 ~United Press International
NEW YORK (SEPT. 4) UPI - World stock markets were depressed Tuesday on renewed concerns about the situation in the Middle East and further pessimism about the U.S. economy.

Trading was thin from Tokyo to Wall Street with investors, including institutions, cautiously remaining on the sidelines while waiting for new developments in the Persian Gulf crisis. Analysts said world stock markets will not see any substantial action until the conflict is resolved.

Wall Street witnessed its lightest trading activity of the year following the three-day Labor Day weekend, with investors giving no indication they intended to return to the market.

Pressured by higher oil prices and a weak economic report, share prices closed lower on the New York Stock Exchange. The Dow Jones industrial average, which rose 21.04 Friday, lost 0.99 to 2613.36, with only about 93 million shares changing hands in the slowest trading of the year.

The Tokyo Stock Exchange earlier had witnessed a far sharper decline, with the key Nikkei average losing 2 percent of its value in modest trading.

The decline in Tokyo set the tone for London, Frankfurt and New York where share prices retreated from the opening bell.

The Nikkei average of 225 selected shares dropped 512.79 points to end the day at 24,907.64. The loss added to a slide of 557.94 points Monday.

The Nikkei has already lost 1,070.73 points this week - a 4 percent loss

compared with the close Friday.

As declines pounded advances 8 to 1, the broader Tokyo Stock Price Index plummeted 35.54 points to close at 1,910.38. TOPIX, which measures all major shares, had fallen 28.05 points Monday - an overall 3.3 percent drop.

Concern about the Middle East continued to plague the Tokyo market, said analyst Masashi Kubota of Kokusai Securities, pointing to ''a tenseness in the market.''

Kubota added that investors had given up hopes of a quick diplomatic breakthrough in the Middle East.

The Tokyo market was also hurt by another rise in bond yields, with the benchmark Japanese government bond inching up 0.015 to 8.130 percent.

Share prices drifted lower on the London International stock exchange amid continued worries over the situation in the Middle East and concerns about Britain's economy.

The blue-chip Financial Times 100-stock index closed down 18.6 points to 2148.0. The narrower top 30 industrial average fell 16.5 points to 1670.9, in very thin trading with only 286.2 million shares changing hands.

Volatility dominated the London market, dealers said, with fears of a war breaking out in the Gulf further depressing trading volume.

Wall Street's lower opening followed the three-day Labor Day weekend. A string of profit warnings and concerns about interest rates and inflation in Britain all contributed to the index drop which began early in the session.

Frankfurt had worries of its own, with many investors expressing doubts about the future of the German economy in view of the reunification, scheduled for Oct. 3.

Stock prices closed sharply lower as the closely watched German Stock Index, or Dax, lost 39.15 points, or 2.4 percent, to end the day at 1,590.07 points in moderate trading.

Traders said renewed concerns about the German reunification and the lack of major developments in the Middle East drove the Dax below the 1,600 level in the last hour of trading. Higher oil prices and declining exports resulting from the strong German mark contributed to the dull mood, they said.

Elsewhere in Europe, the Paris' Bourse closed lower on fears of higher oil prices, with the key Agefi index shedding 1.5 percent of its value to

close at 371.36 in thin trading.

Major investors also stayed away from the Zurich and Milan markets, both of which retreated significantly on added domestic concerns.

As usual, Hong Kong, Singapore and Sydney took their indications from Tokyo and declined in sympathy.

In Hong Kong, the Hang Seng Index dropped 12.65 points to close at 3041.16 following a drop of 20.69 points Monday. On the Singapore Stock Exchange, the key Straits Times Industrial Index dropped 12.79 to 1252.81, with investors staying on the sidelines. In Sydney, share prices retreated in a trendless session, with the All Ordinaries index closing down 10.8 to 1493.5.

WASHINGTON (SEPT. 4) UPI - The United States has put Iraq back on its list of nations that support international terrorism, Secretary of State James Baker said Tuesday.

The addition to the list has purely symbolic importance, since the only impact would be to prevent the sale of military items to the Baghdad government. Such sales are already banned by an executive order issued by President Bush and the mandatory sanctions imposed by the United Nations Security Council since the Aug. 2 invasion of Kuwait.

Baker was asked, during a hearing of the House Foreign Affairs Committee, when the administration would put Iraq on the list.

Baker responded flatly, ''They're back on it.'' The reason, he said, was ''actions against the interests of the United States, Britain and France.''

He did not mention any specific actions but there have been reports that some Palestinian groups associated with terrorist actions, including those headed by Abu Nidal and George Habash, of the Palestinian Popular Liberation Front, have moved their headquarters to Baghdad, where they operate under the protection of the Iraqi government.

In addition, the administration now defines the foreigners being held against their will in Iraq as hostages, thus making Iraq a hostage- taker.

Baker described such behavior as ''inhumane and indecent'' and said that the international community will not tolerate it.

He said the possibility remains open to seeking prosecution of Iraqi government officials for their action after the crisis is over.

Iraq was removed the terrorist state list early in the 1980s, during its long war with Iran.

Other countries currently on the State Department list are Cuba, Libya, North Korea, Iran and Syria.

#90247u2048 09/04/1990 ~United Press International

MAYNARD, MA (SEPT. 4) UPI - Digital Equipment Corp. Tuesday said a long-expected voluntary severance program will slash up to 6,000 employees from its worldwide work force.

The job loss is bound to be substantial in Massachusetts and New Hampshire where the giant computer maker has more than half its U.S. workers. Digital is the largest employer in both states.

More than half the cuts will be in the United States and most of that should be completed by January, said company spokesman Jeffry Gibson.

The cuts, combined with attrition and restricted hiring, would bring the company's worldwide employment total to between 118,000 and 119,000 from the current 124,000, Gibson said.

Though still generous, the terms of the deal are substantially less than one that eliminated about 1,800 employees last fiscal year.

This time, a worker with 20 years or more with the company will receive 77 weeks pay compared with 104 weeks under the earlier program. Those with less than two years at Digital will get 13 weeks pay instead of the 40 weeks the first group got.

Meanwhile, health, dental and life insurance will be continued for a year just as in the first offer, the company said.

Digital, the nation's No. 2 computer maker, outlined the new terms to employees over its internal communications system Tuesday afternoon, said Gibson. The first employees to be offered the package will be notified this month and will have four weeks to decide, Gibson said.

He said the company had not decided specifics about what locations or company activities would be affected. No plant closings or layoffs are planned, he said.

He declined to estimate the cost of the severance program to Digital.

LIMA, PERU (SEPT. 4) UPI - The Peruvian national currency slipped to an exchange rate of 430,000 intis to one U.S. dollar Tuesday, fulfilling a warning by a high-ranking official the goverment would dilute the currency on the exchange market for export purposes. A dollar sold for 370,000 intis Monday but on Tuesday morning traded for as much as 430,000 intis.

Financial analysts said the Central Reserve Bank forced the dollar up with a "dirty float," buying large quantities of dollars and flooding the currency exchange market with intis.

Industry and Commerce Minister Guido Pennano said Sunday the government would intervene in the market to further lower the value of the inti to 450,000 for $1.

Pennano said the lower inti would help exporters and would be more in line with official prices set for commodities like gasoline. The official gas price was set by the government in August based on a dollar exchange of 450,000 intis.

NEW YORK (SEPT. 4) UPI - At least 10 cities hoping to land one of two National League expansion teams were expected to apply with the league office before Tuesday's deadline.

The NL office would not say which cities applied or how many applications were received until the expansion committee screens the applications. However, several groups have made their intentions known.

Buffalo, N.Y.; Denver; Miami, Tampa/St. Petersburg and Orlando, Fla.; Washington, D.C.; Phoenix; Sacramento, Calif.; Nashville, Tenn.; and Vancouver, British Columbia, are among cities that have expressed interest.

Investers must come up with a $95 million franchise fee to land a club. The NL will expand by two teams for the 1993 season, and the new franchises probably will be announced next spring. The cities are expected to make their formal presentations to the committee later this month, and the list will be pared by the end of the year.

Buffalo, Denver, Nashville and Vancouver have Triple A clubs, and the three Florida cities are spring training bases. Washington was the home of the American League's Senators until 1972.

The Buffalo ownership group let its mascot, Buster T. Bison, hand deliver the $100,000 application fee to the NL office Tuesday morning before the noon EDT deadline. The Buffalo group, headed by Bob and Mindy Rich, includes talk show host Larry King.

Like many of the candidate cities, Buffalo is the home of a successful minor-league team.

''We're tremendously excited to move another step closer to realizing our dream of major-league baseball in upstate New York,'' Bob Rich said.

''In many respects, this process is similar to completing the regular season and making the playoffs. The first objective is to give a successful presentation and win the pennant by making the short list of

expansion candidates.

''The ultimate goal, the only goal, is to work hard and to realize our dreams by winning the World Series and becoming the next National League expansion franchise.''

Orlando Pro Baseball Inc. Tuesday announced Richard Devos replaced William Dupont 3rd as managing partner. Devos, 64, was a co-founder of the Amway Corp. in 1959.

A longshot application was filed by America's Baseball Team, Inc., a Boyn4on Ceach, Fla., group led by Malcolm Glazer. American's Baseball Team would play its home games in Buffalo, Denver, Miami, Tampa/St. Petersburg, Washington and a handful of smaller cities that would change each year.

''America's Baseball Team is not only good for baseball, it's good for America,'' Glazer said.

#90247u2081 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - While seeking donations abroad to defray the costs of the Persian Gulf crisis, President Bush compounded fiscal problems at home Tuesday with a bid to reward Egypt for supporting the

U.S.-led stand against Iraq.

The White House announced that Bush would ask Congress to erase an estimated $7.1 billion in U.S. military loans to Egypt in appreciation of support for efforts to drive Iraq out of occupied Kuwait.

The move, telegraphed last week, would free Egypt of a $750 million payment due this year. It raised new questions and stirred fresh concern about the ultimate price of the campaign to isolate and intimidate Iraq.

On Capitol Hill, Secretary of State James Baker said the crisis could cost the United States $6 billion during 1990, but said that sum ''doesn't seem to be too much to exert a rather noble leadership role in this instance.''

Baker assured the House Foreign Affairs Committee the United States would ''have a lot of help'' in the Gulf and promised efforts ''to ensure that the cost and responsibilities are shared equitably.''

For the record, the debt forgiveness was intended to ease the financial burden Egypt faces from its commitment of troops to Saudi Arabia and enforcement of U.N.-ordered economic sanctions against Iraq.

There was a political message as well in the White House announcement, which lauded Egyptian President Hosni Mubarak for helping unite much of the Arab world against Iraqi President Saddam Hussein.

White House press secretary Marlin Fitzwater praised ''the unique strategic contribution by Egypt to peace and security in the Middle East, a role that Egypt has played with courage, determination and consistency.''

The proposed debt forgiveness was only the latest example of the costs the United States has agreed to shoulder, including an estimated $46 million a day for military operations, in its confrontation with Iraq.

It came as Treasury Secretary Nicholas Brady, soon to be assisted by Baker began soliciting contributions from wealthy U.S. friends and allies to support military deployments in the Gulf region and aid poorer countries like Egypt, Jordan and Turkey that suffer from lost trade or tourism or the return of expatriate workers or refugees from Kuwait and Iraq.

Estimates of what that multinational commitment may require run as high as $25 billion.

Fitzwater called the canceled Egyptian debt payments ''a small price to pay for the cooperation and leadership we've gotten from Egypt.'' The loan forgiveness, he said, was ''a special situation'' and not a precedent.

But House Republican leader Robert Michel of Illinois warned that ''it

might be a little bit premature'' to approve the request ''without consideration for other areas where we've got to be doing things foreign aid-wise.''

''I think before I commit myself to supporting this or that forgiveness, I'd like to have a full accounting of just what is our status with all the other countries around the globe,'' Michel said.

His concern did not seem totally unfounded. There were signs the gesture to Mubarak could prompt demands for similar concessions to Israel. At minimum, it complicated the already bleak deficit picture.

Fitzwater noted that Egypt, like Israel, receives substantial American aid apart from military loans and predicted that assistance would ''continue to grow.'' Egypt owes $6 billion to the United States for other loans.

With the administration and Congress set to resume negotiations Friday on how to cut the deficit, Fitzwater hinted additional aid also was being readied for Jordan, which has been hit by trade losses and a flow of refugees from Iraq.

#90247u2083 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - First lady Barbara Bush is expecting a boost from television glamour Wednesday to promote her literacy program.

Mrs. Bush plans to speak briefly at 1:15 p.m. EDT at a luncheon during a education conference sponsored by CBS News on the campus at Georgetown University. CBS correspondent Charles Kuralt is acting as host of the conference in connection with a series of education-related broadcasts.

Giving equal access to ABC, Mrs. Bush then will go to that network's Washington studios to join ABC News anchorman Peter Jennings for a call-in broadcast on the ABC Radio Networks from 2 to 3 p.m. EDT.

ABC said Mrs. Bush will discuss her plans for reading children's stories in the upcoming radio series, ''Mrs. Bush's Story Time,'' that starts Sept. 16 and continues for 10 Sundays.

BALTIMORE (SEPT. 4) UPI - The Intelstat communications satellite consortium has filed a $400 million countersuit against Martin Marietta Corp. for allegedly botching the launch of a $157 million satellite last March, officials said Tuesday.

The action against Martin Marietta alleges negligence, breach of contract and misrepresentation. It claims that Martin Marietta miswired the satellite, failed to detect the faulty wiring in pre-flight tests and lied that the computer and wiring were compatible.

Intelstat's countersuit comes on the heels of a lawsuit that Martin Marietta filed in July against the consortium, seeking a judgment declaring that Martin Marietta does not have to pay Intelstat for the problem.

Since the ill-fated launch the satellite has been stranded about 300 miles above Earth, much lower than its intended orbit of 22,000 miles, officials said.

Intelstat claims losses of $400 million from the cost of the satellite, the amount paid to Martin Marietta before the launch and some $130 million in revenues Intelstat expected to make from international television and phone services.

HOUSTON (SEPT. 4) UPI - Viking Metallurgical has signed a $30 million, three-year contract to supply gas turbine engine components to Rolls-Royce PLC of London, Viking's parent company, Quanex Corp., said Tuesday.

The agreement, which begins Jan. 1, 1991, requires Viking to manufacture seamless contoured rolled titanium rings at its Verdi, Nev., plant for several Rolls-Royce Aero Engine types.

The commercial aircraft engines, made in the United Kingdom, are high-thrust, fuel-efficient engines currently fitted to Boeing 747, 757, 767 and Fokker 100 aircraft and Gulfstream GIV.

The company's new Trent engine is designed to meet the needs of the next generation of two- and three-engine widebody airframes, such as the Boeing 777, MD-11 and Airbus 330.

Quanex manufactures steel, aluminum and titanium specialty metal products for transportation, capital equipment, home building and remodeling and energy processing markets.

NEW YORK (SEPT. 4) UPI - Stocks edged lower Tuesday in another session of record-low volume for the year, as some late program buying wiped out sharp losses in the Dow industrials.

The Dow Jones industrial average, which rose 21.04 Friday, eased 0.99 to close at 2613.37. The market was closed Monday for the Labor Day holiday.

Among broad market gauges, the New York Stock Exchange composite index rose 0.16 to 177.13 and Standard & Poor's 500-stock index was up 0.53 to 323.09. The price of an average share added 3 cents.

Declines led advances 802-656 among the 1,947 issues crossing the NYSE tape. With many players still away for the Labor Day holiday, volume was 92,940,000 shares, breaking the previous record for volume for the year, the 96,490,960 shares traded Friday. Trading has not been this light since the day after Christmas, when 77,610,000 million shares changed hands.

''As pathetic as Friday was, today was worse,'' said Larry Greenwald, a block trader with Sanford C. Bernstein & Co. ''No one wants to make a move. Everyone's waiting for the next move in the Mideast.''

The Dow had been down 20 points with an hour of trading left after having been off as much as 30 points in earlier trading. In the last few minutes, thelosses, which had been cut to about 10 points, were virtually wiped out by a combination of late buying and program buying.

But traders stressed that the move was of almost no significance, since the effect of the late buying was exaggerated by the slow trading activity.

Weekend developments from the Persian Gulf pushed oil prices higher Monday and pressured stocks. Hopes waned for a diplomatic resolution to the crisis after U.N. Secretary General Javier Perez de Cuellar said over the weekend he had not made headway in negotiations with Iraq's foreign minister. October oil futures soared to about $29 a barrel Tuesday.

A report showing more weakness in the U.S. economy also pushed stocks down sharply and helped keep them there for most of the day.

The National Association of Purchasing Management's index of economic activity declined to 47 percent in August from 47.4 percent in July. The purchasing managers' index was expected to be unchanged. Any reading below 50 percent means that the manufacturing economy is declining.

But some analysts downplayed the importance of the data and said they did not expect economic news to have much of an effect on the market as long as events remain unsettled in the Gulf.

''The market is still based on the uncertainty in the Mideast and the price of oil,'' said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y.

Even though some in the market are looking to the weak data in hopes that it will push the Federal Reserve to cut interest rates, Doran said he doesn't expect any such cut for a while.

''I hope it won't be too long, but I think it could be even a month before we see any action,'' he said, ''because economic data is going to show higher inflation because of higher oil prices.''

On the trading floor, Pinnacle West Capital was the most active issue, sinking 3 3/4 to 12 3/8 after Pacificorp agreed to drop its efforts to acquire the company.

General Electric followed, down 3/4 to 61 1/4. Continental Corp. was third unchanged at 24 1/4.

Among the other blue chips, Philip Morris was unchanged at 45 1/8 in active trading, while AT&T lost 3/8 to 32 and General Motors fell 5/8 to 39. But IBM rose 3/4 to 102 5/8 in active trading.

Oil and oil-related issues were strong with crude oil prices gaining. Texaco rose 1/4 to 62, Amoco jumped 1 1/4 to 56 1/4 and British Petroleum gained 3/4 to 82 7/8.

Prices fell in light trading on the American Stock Exchange.

The Amex Market Value index lost 0.65 to 322.74. Declines led advances 298-198 among the 746 issues traded. The price of an average share lost 2 cents. Volume was 8,790,000 shares vs. 8,254,750 shares traded Friday.

Salomon's put warrants on the Tokyo market's Nikkei index led the Amex issues, up 5/8 to 16 1/4.

The National Association of Securities Dealers composite index rose 0.46 to 381.67.

#90247u2118 09/04/1990 ~United Press International

(SEPT 4) UPI - Showers and thunderstorms doused much of the nation Tuesday, raising the threat of flooding in the West, while a record heat wave sizzled at least three states.

The National Weather Service said flash flood watches were posted across parts of Southern California, southern Nevada and Arizona.

Rainshowers and thunderstorms extended along the South Carolina and Georgia coast Tuesday afternoon along Florida, the Texas Gulf coast and southern Texas.

Showers were scattered over northeast Ohiom northeast Wisconsin, northern lower Michigan, western South Dakota, south-central Montana, western Wyoming and eastern Idaho. Showers and thunderstorms also scattered across the southern portions of California, Arizona and New Mexico.

By Tuesday afternoon, the temperature in Meridian, Miss., climbed to a record 102 degrees, breaking the Sept. 4, 1954, mark of 100 degrees. In

Milwaukee, it was a record 91 degrees, besting by one degree the high established in 1871 and 1941. In Mobile, Ala., the barometer rose to 99, breaking the 1954 high of 98 degrees.

The low temperature for the nation Tuesday morning was 29 degrees at Truckee, Calif.

The wet weather in the West came on the heels of a sudden electric storm that hit Boulder City in southern Nevada Monday evening, setting on fire a supermarket and a residence.

No injuries were reported.

The storm surprised 100,000 Labor Day visitors to the Lake Mead Recreational Area behind Hoover Dam, near Las Vegas, where rangers broadcast marine warnings to boaters shortly before 50-mph winds hit. On land, sheets of rain forced motorists to the side of the road.

The storm was churned up from a low-pressure area over northern Mexico, and the same storm brought high winds Monday night that uprooted trees, flooded streets and downed power poles in the metropolitan Phoenix area.

WASHINGTON (SEPT. 4) UPI - A diet high in corn appears to sharply increase the risk for oral and throat cancer among men who drink heavily, an Italian study showed Tuesday.

A study of nearly 800 men in northeastern Italy found high intake of corn, mostly in the form of the Italian cornmeal dish polenta, appeared to about triple the risk for cancer of the mouth, pharnyx and esophagus among heavy drinkers.

High corn intake may increase the risk for those cancers by causing deficiencies in nutrients such as niacin and riboflavin, which studies

have indicated may increase the risk for such cancers, the researchers said.

''Particularly if it is refined, maize (corn) is less nutritious than other grains and can cause deficiencies of several micronutrients,'' Dr. Silvia Franceschi of the Avianco Cancer Center in Avianco, Italy, and colleagues reported in the Journal of the National Cancer Institute.

The findings, which could not be explained by other lifestyle criteria like age, occupation, tobacco use or other dietary habits, confirm previous studies conducted in Africa, Italy and China, they said.

Because the increased risk was only found in men who drank large amounts of alcohol - more than 42 drinks a week, the researchers speculated alcohol consumption may aggravate the nutritional deficits.

''While we can only speculate on such mechanisms, the present data suggest that maize retains a role in the etiology of (such) cancers even in developed areas of the world, where maize is still a major staple food and/or where the occurrence of alcohol-related diseases is high,'' Franceschi said.

WASHINGTON (SEPT. 4) UPI - The Navy, brushing aside Iraq's invasion and annexation of Kuwait, awarded McDonnell Douglas Corp. of St. Louis a $140 million increment Tuesday on a $1.2 billion contract for 32 F/A-18C and eight F/A-18D fighters for Kuwait.

''We still recognize the government of Kuwait,'' said Lt. Cmdr. Ken Satterfield, a Pentagon spokesman.

He said the Bush administration is hopeful the government of Kuwait will be back in power in the one to two years it will take to build the planes. But if not, he said, the planes could be sold to another country.

The $1.2 billion contract for the 40 jets was negotiated with the government of Kuwait more than a year ago, he said.

Work will be performed in St. Louis and is expected to be completed in November 1993, the Navy said.

-30- 998
#90247u2176 09/04/1990 ~United Press International
LOS ANGELES (SEPT. 4) UPI - A federal judge Tuesday tossed out the biggest payola trial in decades, bringing to an end the government's case against former record promoter Joseph Isgro after finding that key evidence was improperly withheld from the defense.

U.S. District Judge James M. Ideman had suspended the trial last week after being informed that six volumes of testimony given in an earlier trial by a key government witness, Dennis Di Ricco, has not been given to either the defense or the grand jury that indicted Isgro.

Also indicted with Isgro were former CBS Records executive Ray Anderson and Isgro associate Jeffrey Monka.

Court rules require the prosecution to make available to a defendant any information that might aid in his defense.

Ideman on Tuesday dismissed the case ''with prejudice,'' meaning that the charges cannot be refiled by the federal government against any of the defendants.

The stunning development in the five-year-long payola, mail fraud and racketeering case came in what would have been the third week of the high-stakes trial, which has been widely followed by the radio and recording industries.

Isgro, one of the most powerful independent record promoters of the 1980s, was accused of making cash and cocaine payments to radio station employees in California and Texas in exchange for their promises to broadcast certain records promoted by Isgro.

If convicted on all charges, he would have faced 200 years in prison and $1.4 million in fines.

#90247u2182 09/04/1990 ~United Press International

(SEPT. 4) UPI - World crude-oil prices rose by more than $2 a barrel and U.S. gasoline by more than 8 cents a gallon Tuesday in a rally triggered by the apparent failure of weekend Persian Gulf peace talks.

''I think the reason for the move is that a lot of people had put a lot of faith in U.N. Secretary General Javier Perez de Cuellar's weekend meeting with Iraq's Foreign Minister Tariq Aziz, and he (Perez de Cuellar) left disappointed,'' said Tom Bentz, director of trading at United Energy Inc. in New York.

''The market is acting like a magnifying glass. It is magnifying the fact that nothing happened,'' said Michael Wilner, president of Hilltop Trading Co., New York. ''It's an over-sensitive market.''

On the European spot market, where crude is sold to the highest bidder, Britain's widely traded North Sea Brent surged $2.58 over Friday to $30.78 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - rocketed $2.30 to $26.80 a barrel.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for October delivery shot up $1.80 over Friday's close to $29.12 a barrel after trading as high as $29.31 a barrel.

Unleaded gasoline for October delivery jumped 8.34 cents to 94.52 cents a gallon, while October home heating oil added 5.83 cents to 82.39 cents a gallon.

On the New York Harbor spot market, prompt-delivery unleaded gasoline shot up 7.4 cents to $1.04 a gallon.

Analysts said the Merc, which was closed Monday for the U.S. Labor Day holiday, opened stronger on the European market's reaction Monday to the failure of the talks.

''The U.S. market was just catching up with what the European market had

done,'' said George Konikowski of Smith Barney Upham Harris & Co., New York.

James Steel, energy analyst with New York's Refco Inc., said he thought prices would have fallen back in the afternoon from traders taking profits on earlier gains. But congressional testimony by Secretary of State James Baker indicating that a solution to the crisis was a ways off forestalled this, he said.

In the first official report to Congress on Bush administration policy in the Persian Gulf crisis, Baker said that Iraq's ''unprovoked aggression is a political test of how the post-Cold War world will ''ical

He said that the American people need to: ''Stand firm. Be patient. And remain united.''

Another analyst said, ''There is a lack of selling in the marketplace. The sellers are not there.'' The rising market and Persian Gulf crisis have created a fear-of-selling psychology, he said.

Wilner noted it was difficult to understand the rise in gasoline for delivery in October. This is the first month for the lifting of stricter, summertimeair-pollution vapor standards and should ease the supply of gasoline, he said.

''People may be holding on to gasoline because they are concerned over what's going to happen down the road,'' Wilner said.

Sun Co., of Radnor, Pa., along with Marathon Oil Co., USX Corp.'s Findlay, Ohio-based unit and Du Pont's Conoco Inc. in Houston all raised the posted price they will pay for crude at the wellhead by $1.75 to $27.50 a barrel for WTI.

On the U.S. Gulf Coast spot market, where crude is sold to the highest bidder, prompt-delivery WTI gained $1.80 to $29.10 a barrel.

In the Middle East, a U.S. warship in the Gulf of Oman seized an Iraqi freighter carrying tea from Sri Lanka Tuesday, American defense sources said, and a U.S.-chartered plane was expected to carry about 130 Westerners out of Iraq, where they had been held as shields against attack.

In addition, more than 300 Britons left Kuwait City by bus for a long journey to Baghdad in search of exit visas and a way home, while thousands of refugees remained stranded in dismal conditions along the Iraqi-Jordanian border.

-30- 4115

#90247u2186 09/04/1990 ~United Press International
(SEPT. 4) UPI - The White House says President Bush will ask Congress to forgive an estimated seven-point-one-BILLION-dollars in military loans to Egypt for Cairo's support of the U-S-led stand against Iraq. The announcement came as Bush sought donations from allies abroad to defray the costs of the Persian Gulf crisis. The confrontation with Iraq is costing the United States an estimated 46-Million-dollars a day in military operations alone. The debt forgiveness is seen as compounding the fiscal problems already existing at home.

Secretary of State Baker says the United States has returned Iraq to its list of nations supporting international terrorism. The move is purely symbolic because the only impact would be to prevent the sale of military items to the Baghdad government. Military sales already are banned by an executive order and the mandatory sanctions imposed against Iraq by the U-N Security Council following the Iraqi invasion of Kuwait.

The countdown for the shuttle Columbia is past the halfway point... clearing the spacecraft for the loading of its fuel tomorrow. Thursday's scheduled launch is already more than three months behind... mainly because of a hydrogen fuel leak. Engineers today tested Columbia's flight control system in preparation for the pre-dawn blastoff.

Government scientists are refuting claims by two Atlanta doctors, who report that an experimental blood-heating procedure has been affective in treating the AIDS virus. One patient says all his symptoms disappeared after undergoing the treatment known as hyperthermia, but another died after treatment and others remain infected. Investigators today issued a report saying there ''appears to be NO clinical'' support for use of hyperthermia in ''the treatment of H-I-V disease.''

-30- 1960
#90247u2194 09/04/1990 ~United Press International
(SEPT. 4) UPI - The violence in South Africa's black townships continued today with more factional fighting in Sebokeng. Police say at least 35 people were killed... 11 when soldiers opened fire on a crowd surrounding a hostel for migrant workers. Another 100 people were wounded as the fighting intensified despite a statement from President Frederik de Klerk saying the killing ''must come to an end.''

Pope John Paul the Second was in Tanzania on the fourth day of his 11-day African tour. Thousands from neighboring Kenya and Uganda swelled the Tanzanian congregation for the open air mass. The huge crowds flocked to hear the pope denounce what he calls ''the unspeakable crime of abortion '' birth control, polygamy, bride-selling and the still common practice of witchcraft. The trip is the Pope's seventh to Africa, but his first to Tanzania.

A New York company has agreed to pay what officials describe as one of the largest settlements in the 10-year history of the federal toxic waste Superfund. A-V-X Corporation will pay 66-Million dollars for its role in polluting New Bedford Harbor in Massachusetts. A-V-X, which operated an electronics manufacturing plant next to the harbor, was one of four companies accused of discharging toxic P-C-B's into the harbor.

A man who had been calling himself ''Forest Green'' was released on bond today in Long Creek, South Carolina... one day after being arrested for taking up residence in a tree. Green, who's real name is Hunter Sams, climbed the tree last Wednesday in an effort to block construction of a logging road in the Sumter National Forest. He was arrested yesterday after coming out of the tree because he was exhausted.

-30- 1862

#90247u2201 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - Lost among the hoopla and hysteria that has greeted Jennifer Capriati's debut is the trivia that Mary Joe Fernandez remains the youngest player ever to win a match at the U.S. Open.

She was 14 years and one month in 1985 when she defeated Sara Gomer in a first-round match, and Fernandez even got as far as the third round.

On Tuesday, Fernandez registered another significant victory, outlasting Manuela Maleeva-Fragniere 6-2, 2-6, 6-1 to become the first semifinalist at this year's Open. She never before had made it past the third round.

To Fernandez, who turned 19 a month ago and graduated from high school only last year, the victory felt ''fantastic. I'm really ''year, th

Fernandez, the eighth seed, recalls vividly the reception she received as a 14-year-old.

''I remember, I remember, it wasn't that long ago,'' she said. ''I remember it being a lot of fun, and it still is. Playing against people like Martina (Navratilova), Chris (Evert), you've grown up watching them on TV and then going to Wimbledon, the U.S. Open, they're big thrills.''

In the semifinals, Fernandez will face either Gabriela Sabatini or Leila Meskhi, who were to play Tuesday night.

The semifinal bracket will be completed Wednesday with Steffi Graf, the two-time defending champion and No. 1 seed, playing No. 12 Jana Novotna and No. 4 Zina Garrison going against No. 6 Arantxa Sanchez Vicario.

Maleeva-Fragniere, the No. 9 seed, was coming off her major upset of

Navratilova,

''I'm not sure if it's the win against Martina that was the problem today, but I was so nervous and couldn't find the way to put her under pressure '' said Maleeva-Fragniere, whose voice was breaking and who appeared near tears.

''I'm so disappointed that I lost because I felt I really could have won that it's difficult to talk. I blame only myself right now.I don't put it on her game, it was my serves, my strokes. I thought I was really prepared. Physically, I'm not tired.''

Fernandez, loser in this year's Australian Open final to Graf, started strong on a soft, sunny afternoon, racing to a 4-0 lead. Maleeva-Fragniere won the next two games to cut her deficit in half, but Fernandez broke at love and held at 15 to end the set in a half hour.

The second set was a virtual carbon copy of the first, except that this time it was Maleeva-Fragniere taking the first four games and the last two.

Maleeva-Fragniere held serve to open the deciding set and had a break point in the second game, but was unable to convert. Fernandez then broke at love in the third game, withstood another break point against her in the fourth, and was untouchable the rest of the way.

''My game plan was to play aggressive and come in when I could,'' said Fernandez, who was more comfortable from the baseline but still ventured forward on 35 occasions. ''Even in the second set I felt I was in control.''

Maleeva-Fragniere, stopped in the quarterfinals of the Open four of the last five years, commented, ''It's very hard to know what happened in the third set. I was feeling fine and then the match was over.

''It's a lesson and hopefully there will be another time I'll be in the quarterfinals.''

Fernandez, who lives in Miami, has endured a series of frustrating injuries this year, causing her to retire from three of her previous six tournaments. Among the aches and pains have been tendinitis in her right shoulder, a pulled hamstring, a sore back and a tear of the inside cartilage in her right knee.

''It was frustrating,'' she said. ''The times I'd be playing I'd be playing well, enjoying myself, getting a lot of confidence...then I'd have to start all over again.''

With the early exits of Navratilova and Monica Seles, the second and third

seeds, the rest of the field will be hard put to prevent Steffi Graf from annexing a third consecutive Open crown.

Graf's combined record against the seven other quarterfinalists is 58-6, including 8-0 against Jana Novotna, her opponent Wednesday.

Of course, the unexpected always is a possibility. In the semifinals, Graf could go against Zina Garrison or Arantxa Sanchez Vicario. She has a combined 13-3 mark against them, but lost to Sanchez Vicario in the 1989 French Open and to Garrison in this year's Wimbledon semifinals.

The top seed remaining in the bottom half of the draw is Sabatini. If they are to meet in the final, Graf will go in with an 18-3 career record against her occasional doubles partner.

The men's draw is more unpredictable, although there are three unseeded players among the final eight. The most prominent is John McEnroe, a four-time Open champion who faces another unseeded player, David Wheaton, in the quarterfinals Wednesday night.

Third seed Ivan Lendl will play No. 12 Pete Sampras in Wednesday's other match.

The quarterfinals will be completed Thursday with No. 2 Boris Becker, the defending champion, going against No. 9 Aaron Krickstein and No. 4 Andre Agassi opposing unseeded Andrei Cherkasov.

WASHINGTON (SEPT. 4) UPI - The aircraft carrier USS Eisenhower, which had been in the Red Sea and the Mediterranean in support of Operation Desert Shield, was in the Atlantic Ocean Tuesday and heading home, U.S. officials said.

It had been replaced in the eastern Mediterranean by the aircraft carrier USS John F. Kennedy and its battle group.

U.S. officials said about 70,000 U.S. troops are now on the ground in

Saudi Arabia. More than 100,000 are expected to be on the ground by the first week of October.

As of Tuesday, the United States had committed the following forces to Saudi Arabia and nearby waters in support of Operation Desert Shield. The forces in the gulf region or headed there include:

Navy
Joint Task Force-Middle East
(In the Persian Gulf - 12 ships)

1 joint task force command ship: USS LaSalle

1 battleship: USS Wisconsin

2 cruisers: USS England and USS Antietam

2 destroyers: USS David R. Ray, one other

5 frigates: USS Vandegrift, USS Rentz, USS Robert G. Bradley, USS Barbey, USS Brewton

1 amphibious command ship: USS Blue Ridge, flagship for the commander of U.S. naval forces, U.S. Central Command.

Independence Battle Group
(In the Gulf of Oman - 7 ships)

1 carrier: USS Independence

1 cruiser: USS Jouett

1 destroyer: USS Goldsborough

1 frigate: USS Reid

3 supply ships

-2 other ships of the battle group have detached to conduct shadowing operations.

Amphibious Ready Group Alpha
(In the northern Arabian Sea - 5 ships)

5 amphibious ships carrying the 2,500-man 13th Marine Expeditionary Unit from Okinawa, headed for the Persian Gulf.

Saratoga Battle Group

(In the Red Sea - 8 ships)

1 carrier: USS Saratoga

2 cruisers: USS Philippine Sea and USS Biddle

1 destroyer: USS Sampson

3 frigates: USS Elmer Montgomery, USS Thomas C. Hart and USS Samuel B. Roberts

1 fast combat ship

13 Marine amphibious ships carrying the 15,000-man 4th Marine Expeditionary Brigade headed to the Middle East are in the Red Sea, headed for the Persian Gulf.

Kennedy Battle Group
(In the Mediterranean - 7 ships)

1 carrier: USS John F. Kennedy

3 cruisers: USS Mississippi, USS San Jacinto, USS Thomas S. Gates

1 destroyer: USS Moosbrugger

2 auxiliary ships

Four ships of the Mediterranean Amphibious ReQdy Group 3-90 carrying the 2,500-man 26th Marine Expeditionary Unit ae in the Mediterranean.

Other U.S. warships, including the 6th Fleet flagship, the USS Belknap, are in the Mediterranean.

Air Force

-Military Airlift Command C-141, C-5 and C-130 cargo aircraft are involved in moving personnel and equipment to the Middle East

-Strategic Air Command KC-135 and KC-10 aerial tankers are refueling aircraft en route to the Middle East.

-F-15 Eagle fighters from 1st Tactical Fighter Wing, Langley Air Force Base, Va.

-F-15E Eagle fighters from 4th Tactical Fighter Wing, Seymour Johnson Air

Force Base, N.C.

-F-16 Fighting Falcon fighters from 363rd Tactical Fighter Wing, Shaw Air Force Base, S.C.

-E-3 Airborne Warning and Control System planes from 552nd Airborne Warning and Control Wing, Tinker Air Force Base, Okla.

-RC-135 reconnaissance aircraft.

-F-117A stealth fighter-bombers from 37th Tactical Fighter Wing, Tonopah Test Range Airfield, Nev.

-A-10 Thunderbolt II ground-attack aircraft from 354th Tactical Fighter Wing, Myrtle Beach Air Force Base, S.C.

-F-111F fighter-bombers from 48th Tactical Fighter Wing, Royal Air Force, Lakenheath, England.

-F-4G Wild Weasel fighters from 35th Tactical Fighter Wing, George Air Force Base, Calif.

-C-130 Hercules cargo aircraft from 435th Tactical Airlift Wing, Rhein Main Air Base, West Germany; 317th Tactical Airlift Wing, Pope Air Force Base, N.C.; and 314th Tactical Airlift Wing, Little Rock Air Force Base, Ark.

-Air Transportable Hospitals from MacDill, Langley, Shaw, Seymour Johnson and Myrtle Beach Air Force Bases.

-F-16 jets from 401st Tactical Fighter Wing, Torrejon Air Base, Spain, to Qatar.

Army - Elements of:

-1st Cavalry Division, Fort Hood, Texas

-2nd Armored Division, Fort Hood.

-82nd Airborne Division, Fort Bragg, N.C.

-24th Infantry (Mechanized) Division, Fort Stewart, Ga.

-101st Airborne Division, Fort Campbell, Ky.

-1st Corps Support Command, Fort Bragg, N.C.

-197th Infantry Brigade (Mechanized), Fort Benning, Ga.

-3rd Armored Cavalry Regiment, Fort Bliss, Texas.

-11th Air Defense Artillery Brigade, Fort Bliss, Texas.

-101st Aviation Brigade, Fort Campbell, Ky.

-Headquarters, 3rd U.S. Army, Fort McPherson, Ga.

-3rd Corps Artillery, Fort Sill, Okla.

-7th Medical Command, West Germany.

-13th Corps Support Command, Fort Hood, Texas.

-12th Combat Aviation Brigade, West Germany

-3rd Armored Division, West Germany

Marines - Elements of:

-1st Marine Expeditionary Force, command element from Camp Pendleton, Calif.

-1st Marine Expeditionary Brigade, Marine Corps Air Station, Kaneohe Bay, Hawaii.

-4th Marine Expeditionary Brigade, headquartered at Norfolk, Va.; includes units of 2nd Marine Division and 2nd Force Service Support Group from Camp LeJeune, N.C., and the 2nd Marine Aircraft Wing at Cherry Point and New River, N.C.

-7th Marine Expeditionary Brigade, Twenty-nine Palms, Calif.; includes units of 1st Marine Division and 1st Force Service Support Group, Camp Pendleton, Calif.; 3rd Marine Aircraft Wing, El Toro, Calif.

NEW YORK (SEPT. 4) UPI - The dollar closed mostly higher against major world currencies Tuesday in sluggish trading as investors awaited significant economic data due out later this week.

Late in the New York trading session, the dollar was quoted at 1.58 German marks, up from 1.5764 Friday, and at 143.35 Japanese yen, off from 143.80 Friday. The market was closed Monday for the Labor Day holiday.

Other New York dollar rates: 1.3130 Swiss francs, up from 1.3080; 5.2950

French francs, up from 5.2870; and 1,178.75 Italian lire, up from 1,165.

The British pound dropped to $1.88 from $1.8890 Friday.

''The dollar was a real sleeper today,'' said David Gilmore, a foreign exchange analyst with McCarthy, Crisanti & Maffei Inc. ''There was no news out of the Middle East, and everyone was sidelined ahead of the employment report Friday.''

Many market participants believe the government's data on U.S. employment in August, if weak enough, could prompt the Federal Reserve to ease interest rates, he said.

The release Tuesday of the National Association of Purchasing Management's monthly index showed further signs of sluggishness in the economy, he said. The index dropped to 47 percent in August from 47.4 percent in July.

A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth.

Most of the Tuesday's trading activity involved mark-yen cross- trading, which sent the mark lower and caused the dollar to close weaker against the yen but stronger against the mark, analysts said.

Driving the cross-trading were Japanese banks, securities firms and investors taking profits in non-yen currencies such as the German and Swiss marks and Britain's pound, analysts said.

Continued nervousness over the German unification process also served to weaken the mark, they said.

In European currency trading, the dollar closed marginally lower in narrow quiet trading as markets focused on weaknesses in the U.S. economy.

The dollar softened in both Frankfurt, at 1.5825 German marks against Monday's close of 1.5840, and Zurich, at 1.3130 Swiss francs from 1.3160. Zurich traders said the dollar came under a bout of profit- taking as market players covered their positions.

In London, the pound rose slightly against the U.S. unit, to $1.8750 from $1.8720.

The dollar slipped in Paris and Milan, to 5.2820 French francs vs. 5.3115 and 1,172.90 Italian lire vs. 1,177, but was unchanged in Brussels at 32.52 Belgian francs.

Earlier in Tokyo, the dollar rose against the yen as bargain hunters snapped it up thinking it had been underpriced against all major

currencies. The dollar closed at 144.05 yen, up from Monday's close of 143.55 yen, the Bank of Japan said.

Dealers said they expected the dollar's rise to be short-lived, given the unfavorable U.S. employment figures expected later in the week.

Gold closed lower in Zurich, at $383.50 an ounce against $387.50, and inLondon, at $382.25 an ounce against $387.

Republic National Bank in New York closed cash gold at $384.75 an ounce, up from $382.75 Friday. The New York Commodity Exchange settled contract gold at $383.70 an ounce, up from $382.30.

Silver moved down in Zurich at $4.75 an ounce from $4.80 and also was weaker in London at $4.75 an ounce from $4.84.

Republic closed cash silver at $4.76 an ounce, off from $4.79. Comex silver finished at $4.719 an ounce, off from $4.759.

#90247u2266 09/04/1990 ~United Press International

OTTAWA (SEPT. 4) UPI - Indian Affairs Minister Tom Siddon said Tuesday the government is willing to negotiate greater powers for Canada's Indian groups if defiant Mohawks south of Montreal disarmed themselves.

Siddon said the government already funds Indian peacekeeper units in Quebec, but would discuss other policing powers as soon as the group of Mohawks on the Kanesatake reserve surrender their weapons.

''That is certainly one of several aspects we are quite prepared to discuss with Mohawks as an element of self-government which we are going to be taking steps to move on,'' Siddon said, adding that policing was ''an important component'' of self-government.

Saturday, armed forces conducted a lightning strike on the Kanesatake reserve and began bulldozing barricades put up nearly two months ago by Mohawks to protest a planned golf course expansion on lands the Indians claimed was an ancient burial ground.

Soldiers continued Tuesday to surround a detoxification center at the settlement in Oka, Quebec, which serves as the last post for about 50 militant Mohawk warriors, women and children refusing to disarm.

One of the militants, known only as Beekeeper, said in a televised interview Tuesday the Warriors were committed to defending the land and the Mohawk nation.

''It must be understood,'' he said, ''that we shall either live or die in the process.''

Beekeeper said, however, the group was also committed to a peaceful solution and the natives would surrender if the federal and Quebec governments were willing to negotiate fundamental issues such as self-government and sovereignty.

The standoff between Mohawks and armed forces in Quebec began as a relatively simple land dispute in July, but quickly escalated over the weeks into complex demands for self-government, improved economic conditions and recognition of the Mohawks as a sovereign nation.

Although the armed insurrection appears to be fizzling out without any real display of violence between soldiers and Indians, some experts believe the number of incidents will escalate unless the government is willing to negotiate greater powers for the native groups.

At the Kahnawake reserve near Chateauguay, Quebec, armed forces allowed reporters to look at dozens of weapons seized Sunday from the Longhouse, a site of traditional Mohawk government.

Among the weapons were AK-47 assault rifles, a weapon used by most Eastern European countries, Uzi pistols and Barrett sniping rifles.

Marlene Castellano, who heads the native studies program at Trent University in Peterborough, Ontario, said the standoff between Mohawks and armed forces in Quebec raises a number of important questions, among them whether the government will use soldiers to quell future unrest or agree to address important issues.

Other experts said most native groups have rejected the idea of a sovereign state, independent of Canada, but are seeking greater powers for native peoples rather than independence.

In particular, Mohawk leaders have cited the need for their own police force and a separate justice system more consistent with the native culture and traditions.

#90247u2273 09/04/1990 ~United Press International

WASHINGTON (SEPT. 4) UPI - Secretary of State James Baker, in the first official report to Congress on Bush administration policy in the Persian Gulf crisis, said Tuesday that Iraq's ''unprovoked aggression is a political test of how the post-Cold War world will work.''

Baker used his appearance before the House Foreign Affairs lawmakers not

only to outline U.S. goals in the Middle East, but also to point out the foreign policy opportunities he believes the crisis is providing and that the United States should exploit.

''It is not enough to demonstrate aggression and intimidation don't pay,'' Baker said. ''We must show that a pathway to reconciliation and peace does exist.''

That requires, he said, three things of the American people: ''Stand firm. Be patient. And remain united.'' In addition, Baker said the deployment would cost ''a lot of money'' - about $6 billion through the end of the year.

Baker received more signs of bipartisan support for President Bush's military buildup in Saudi Arabia and the Persian Gulf, which was sparked by the Iraqi invasion of Kuwait and the threat to Middle East oil supplies.

Rep. Dante Fascell, D-Fla., chairman of the committee, led a chorus of members in congratulating Baker on the response to the Iraqi occupation, saying, ''The Congress is unified in support of the president.''

But Fascell suggested Bush address a joint session of Congress to ''report fully and officially to the American people.'' Some other Democrats pressed Baker on whether the president would comply with the War Powers Resolution.

Baker repeated the administration's position that parts of the 1973 measure are unconstitutional and said the president would not invoke the resolution, which could - in theory - allow Congress to force a withdrawal of U.S. forces.

Fascell said Congress ''must act at some time'' to share responsiblity for the U.S. military involvement. But Fascell said how Congress would do so could be decided later, most likely outside the context of the War Powers Resolution.

Baker repeatedly stressed that the standoff along the Saudi-Kuwaiti border should be seen as a historic turning point and called the invasion of Kuwait ''one of the defining moments of a new era - an era full of promise but also one replete with new challenges.''

''Iraq's unprovoked aggression is a political test of how the post- Cold War world will work,'' said Baker.

He laid out the basic administration strategy:

-''To lead a global political alliance to isolate Iraq - politically, economically and militarily. In this way, we aim to make Iraq pay such a

high price for its aggression that it will be forced to withdraw from Kuwait and release Americans and others held hostage.''

-To improve opportunities for long-term security and stability in the Persian Gulf and to deter a military attack on Saudi Arabia and its neighbors. He told the committee that ''over 25 countries'' are now supplying troops and other assistance to the effort against Iraq.

He made it clear that the administration will insist that Iraqi President Saddam Hussein ''must not be allowed to hold on to what he stole.''

Asked if one American goal would be the removal of Saddam from power, Baker said, ''That is not one of our objectives.''

-In building an international consensus, Baker said the Soviet Union has ''proven a responsible partner, suggesting new possibilities for active superpower cooperation in resolving regional conflicts.''

He did not mention any specific examples of how that might work or discuss details of the surprise Sunday summit in Finland between Bush and Soviet President Mikhail Gorbachev.

But White House spokesman Marlin Fitzwater told reporters, ''A new foundation for a new world order is being built and the spadework begins in Helsinki.''

In another Capitol Hill development, Rep. Les Aspin, D-Wis., chairman of the House Armed Services Committee who just returned from the Persian Gulf said the Pentagon should consider calling up National Guard and reserve units that have combat roles as a test of whether the restructuring of the military after the Vietnam War works.

Aspin's suggestion was echoed by another senior member, Rep. G.V. Montgomery, D-Miss., who also made the trip and has been a strong guard and reserve advocate. Units called up so far have been support forces.

''There's a great deal of interest to make sure there are some combat units that are called up. We want to see how good the combat units are,'' Aspin said, noting, ''We all know the skepticism of the active duty forces about the value of the reserves. We ought to test it, find out.''

LOS ANGELES (SEPT. 4) UPI - Ambassadors and other representatives of 12 African nations ventured beyond Washington Tuesday to make contact with Americans who could help bring investment and business opportunities to their developing nations.

''We are here ... to arouse some interest in whatever we have to offer,'' Paul Desire Kabore, Burkina Faso's ambassador to the United States and the designated spokesman for the group, said.

The delegation, which included eight ambassadors, came to Los Angeles to explore trade and economic opportunities with local businesses, develop cultural exchange projects and expand student exchange programs with local universities.

Since February 1989, the ambassadors have periodically left their embassies to visit several U.S. states, including Michigan, Texas, Ohio and Colorado, in an ongoing bid to attract business investments.

''We thought instead of staying in Washington and partaking in the daily routine of seeing people on Capitol Hill, we ought to create a new momentum in the fields of commerce, economics and cultural exchanges,'' Kabore said.

''Our main purpose is to create some feeling for Africa,'' he said.

Kabore said he wanted to remind business and government officials that Central and West Africa is a 2.5-million-square-mile area of 70 million people and is closer to North America than Japan.

During a short private reception with Mayor Tom Bradley, members of the delegation presented the mayor with a traditional mask created by a tribe bordering the nations of Burkina Faso, Mali and Ivory Coast.

Kabore said that many of the nations represented by the diplomatic group became independent 30 years ago. Many are state-managed economies that

need help in opening their markets to the international community.

''Not only help us improve the public sector but we also need to create a new private sector,'' Kabore said. ''We know that being here in the United States that instead of Uncle Sam running everything here, it's the private sector.''

He also said the nations need help introducing high technology and managerial skills to their populations.

The delegates will tour Southern California through Sunday, visiting local universities, business leaders, major city operations like the Port of Los Angeles and other sites. They are from Benin, Burkina Faso, Burundi, Chad, Central African Republic, Ivory Coast, Guinea, Mali, Niger, Rwanda, Senegal and Togo.

#90247u2299 09/04/1990 ~United Press International

AUSTIN, TX (SEPT. 4) UPI - A special panel investigating the controversial use of Texas convicts to train tracking dogs Tuesday defended the exercises, but recommended that prisons buy better protective gear and review policies governing the program.

The subcommittee of three board members also suggested that prison officials suspend actual ''engagement'' between inmates and dogs until better protective clothing - including head and neck gear - is provided the prisoners.

The recommendations will be presented to the Texas Board of Criminal Justice at its Sept. 11 meeting.

Prison officials said they would immediately comply with the requested suspension until helmets can be purchased. Inmates currently are not provided any headgear when being tracked by the dogs.

The subcommittee members, Allan Polunsky of San Antonio, Jim Eller of Bryan and Mamie Proctor of Houston, adopted the preliminary recommendations during a telephone conference call.

Prison board Chairman Charles Terrell appointed the subcommittee to review the dog training procedures following news reports that board Vice Chairman Jerry Hodge of Amarillo and two bear hunting buddies participated in a horseback hunt of inmates using the tracking dogs. Following the expedition, Hodge presented his friends with jackets that read ''The Ultimate Hunt.''

The reports prompted the Texas Civil Liberties Union to call for Hodge's

resignation. Critics call the practice demeaning and dangerous.

The subcommittee members, who participated in the ''hunts'' as part of their review, said there appeared to be little danger to the inmates.

''The thing I'm most concerned with ... is the possibility of bites to the neck or to the face or something. I mean it's very unlikely, and it's my understanding that it's very infrequent, but I would like to go that extra step,'' Polunsky said of providing headgear.

''I want to emphasize that I don't consider the procedure now to be dangerous, but it seems that that situation with the face and head and neck is the only real area that the inmate would be subject to the possibility of being bitten or receiving injuries.''

Prisoners began wearing padded gear on the training exercises after two inmates won $14,000 in a settlement with the state for injuries suffered from working with the inmates. Four other inmates seriously injured by dogs have sued the prison system.

#90247u2309 09/04/1990 ~United Press International

(SEPT. 4) UPI - An 18-year-old University of Florida student named as a suspect in the Gainesville serial murders has been implicated in a 1988 sexual assault case. Authorities in Indian River County, Florida, say the victim saw a picture of Edward Humphrey in a newspaper and told investigators he is the man who attacked her two years ago. Gainesville police say Humphrey is one of eight suspects in the murders of five college students last month. Humphrey already is jailed on charges of assaulting his grandmother.

A member of a militant Mohawk Indian group in Canada said in a televised interview today that they are willing to die to protect their land. Canadian troops still surround a detoxification center at the Indian reserve in Oka, Quebec, where about 50 defiant Mohawks are holed up. Canada's Indian Affairs Minister Tom Siddon says the government is willing to talk about greater powers for the nation's Indian groups if the Mohawks agree to disarm.

A West German publication says the Soviet Union plans to grant asylum to several top East German spies. The tabloid says 50 agents of the former East German state security police will seek refuge in the Soviet Union because they are likely to be arrested for their former espionage activities after German unification October 3rd. The agents reportedly worked closely with Soviet intelligence.

Scientists at Philadelphia's Wistar Institute say the debilitating chronic

fatigue syndrome... commonly known as ''yuppie flu''... may be linked to a virus. Researchers found evidence of a type of virus known as a retro-virus in the blood of syndrome patients. The scientists say they have NOT yet identified the virus or shown that it actually causes the disease.

(SEPT. 5) UPI - SPORTS TRANSACTIONS

BASEBALL

Chicago (NL) - Recalled infielder Greg Smith and pitcher Dave Pavlas from Iowa of the American Association (AAA); purchased outfielder Derrick May from Iowa.

Milwaukee - Called up first baseman George Canale from Denver of the American Association (AAA).

New York (NL) - Waived catcher Barry Lyons; recalled pitchers Jeff Musselman and Jeff Innis and infielder Kelvin Torve, purchased contract of infielder Chris Jelic, all from Tidewater of International League.

Pittsburgh - Called up pitchers Doug Bair and Mike York and catcher Dann Bilardello from Buffalo of the American Association (AAA).

San Francisco - Returned outfielder Kevin Bass to disabled list.

BASKETBALL

Denver - Signed guards Clifford Lett and Stevie Thompson.

Detroit - Signed free agent center Tree Rollins.

Houston - Named Ed Schmidt president.

FOOTBALL

Atlanta - Re-signed wide receiver Stacey Bailey, tight end Troy Sadowski and safety Elbert Shelley off waivers; placed on injured reserve tackle Reggie Redding, wide receiver George Thomas, safety Tim Gordon and running back Mike Pringle.

Chicago - Placed linebacker Dante Jones and wide receiver Glen Kozlowski on injured reserve; recalled wide receivers Tom Waddle and Quintin Smith off waivers.

Cleveland - Signed safety Felix Wright; signed free agent defensive back/kick returner Stefon Adams; placed cornerback Mark Harper, defensive lineman Tom Gibson and receiver Lawyer Tillman on injured reserve.

Dallas - Signed running back Emmitt Smith, their first-round draft pick, to 4-year contract; recalled running back Timmy Smith and kicker Ken Willis from waivers; placed wide receiver Michael Irvin and guard Jeff Zimmerman on injrred reserve.

Denver - Recalled linebackers Ty Allert and Anthony Thompson and offensive lineman Scott Beavers off waivers; placed linebackers Tim Lucas and Ronnie Haliburton and tackle Brent Parkinson on injured reserve.

Detroit - Recalled running backs Eric Wilkerson and Greg Paterra, wide receiver Mike Farr and defensive back Herb Welch from waivers; claimed defensive back Sheldon White off waivers from NY Giants; placed on injured were defensive backs William Judson and Bruce Alexander, quarterback Erik Kramer, wide receiver Robert Claiborne and defensive lineman Lawrence Peete.

Green Bay - Agreed to contract terms with quarterback Don Majkowski; signed running back Herman Fontenot; cut cornerback Roger Brown, punter Dale Hatcher, wide receiver Flip Johnson, running back Paul Frazier, tight end William Harris, center George Yarno, defensive end Shawn Miller,

linebacker Greg Clark, quarterback Mike Norseth and safety Stan Shiver; placed on injured reserve wide receiver Erik Affholter, linebacker Bruce Paup and defensive end Mark Hall; relinquished rights to nose tackle Jerry Boyarsky; placed cornerback Dave Brown on physically unable to perform list.

Houston - Signed cornerback Patrick Allen to 1-year contract.

Kansas City - Cut safety James Griffin and cornerback Sidney Johnson; placed on injured reserve tight end Jonathan Hayes, wide receiver Fred Jones, tackle Rob Woods and nose tackle Tom Sims.

Miami - Signed guard Roy Foster; claimed linebacker Clifford Charlton off waivers from Cleveland; placed linebacker Barry Krauss on injured reserve.

National Football League - Fined San Francisco owner Edward DeBartolo Jr. $500,000 for 1986 violations of league ownership policies.

New England - Placed on injured reserve tight end Zeke Mowatt, wide receiver Michael Timpson, guards Sean Farrell and Paul Fairchild, tackle Jon Melander and defensive back Ventson Donelson; recalled off waivers tight end Lin Dawson, kinebacker Ed Williams and guard David Douglas; claimed off waivers center Gene Chilton, guard Stan Clayton and defensive end Marion Hobby.

NY Giants - Signed safety Dave Duerson and placed kicker Matt Stover on injured reserve.

NY Jets - Recalled from waivers running back Freeman McNeil, tight end Chris Dressel and linebackers John Galvin and Dan Murray; claimed linebacker Troy Johnson on waivers from Chicago and tight end Doug Wellsandt from Cincinnati; placed on injured reserve linebacker Alex Gordon, wide receiver Dale Dawkins, running back Patrick Egu, tackle Scott Jones and guard Dwayne White; waived tight end Keith Neubert, linebacker Brad Quast and cornerback Anthony Parker.

Washington - Placed quarterback Jeff Rutledge and offensive linemen Mohammad Elewonibi and Ray Brown on injured reserve; recalled safety Clarence Vaughn, wide receiver Stephen Hobbs and linebacker Jon Leverenze off waivers.

HOCKEY

NY Islanders - Re-signed left wing Derek King to a multi-year contract.

NY Rangers - Signed right wing Jody Hull.

New Jersey - Acquired forward Claude Lemieux from Montreal for forward

Sylvain Turgeon.

#90247u2350 09/04/1990 ~United Press International
TERRE HAUTE, Ind. (SEPT. 4) UPI - BASF Corp., saying it will not wage a long legal battle, Tuesday withdrew its plan for a $150 million automobile paint making facility in Indiana's Vigo County.

The German-based corporation said it had hoped a lawsuit challenging the plant could be settled in its favor quickly. However, a judge has decided to hear the case out, meaning the legalities could drag on for a long time.

''I truly regret that BASF now must abandon consideration of the land at the Vigo County Industrial Park,'' said Jack Wehman, the firm's venture director who has been based in Terre Haute the past two years.

Wehman said BASF would maintain an office in Terre Haute while the firm looks at other possible sites in the Midwest.

''While a small minority might perceive this as a victory, it truly is a loss for the many hard working men and women of the community who were hoping for a better job and a brighter economic future,'' he said.

Although the plant eventually would have employed up to 300 people, it was the target of environmentalists, nearby property owners and others who raised concerns about possible pollution.

The Hoosier Environmental Council claimed the proposed auto paint plant would include an incinerator that would burn more than 22 million tons of waste brought by BASF from other states and more than 13 million tons generated at Terre Haute.

''We don't want the safest plant possible,'' spokesman HEC John Blair said previously, ''because the safest hazardous waste incinerator is still an extremely dangerous proposition.''

Blair contended the issue is political, not regulatory, because 63 percent of the people of the Terre Haute area already have stated in opinion polls that they oppose the plant, despite a massive public relations campaign by BASF.

Terre Haute Mayor Pete Chalos and others supported the proposal as a gain in jobs for the area and a boost for the local economy.

Wehman, in announcing the termination of BASF's effort, praised Chalos and Vigo County Commissioners Jim Adams, John Scott and Jim Diehl because they ''had the courage to stand up for economic development and this project

which they felt was right and good for the community.''

The chemical firm called its incinerator its Midwest Ecology Project, part of the overall plant.

Blair's group contended wastes that would be brought into the county would include heavy metals that are poisons and cannot be destroyed, but only released into the air or placed in a landfill, threatening underground water supplies for a four-county area.

Wehman said he was hopeful other industries would be interested in the Wabash Valley because of its ''workforce, good educational facilities, ample recreational opportunities, forward thinking leaders and the fine quality of life ... ''

CHICAGO (SEPT. 4) UPI - The Florsheim Shoe Co. will begin selling its products in special display centers in selected Sears, Roebuck and Co. stores and hopes to do 5 to 10 percent of its business at Sears within a few years, company executives said Tuesday.

The decision is intended to get Florsheim's product to a new customer base and does not portend a mass closing of Florsheim's specialty shoe shops, Florsheim President Ronald J. Mueller said.

''We have to make our product convenient to the consumer today - and in the right environment,'' Mueller told a news conference.

Mueller said economic and demographic conditions have conspired against the family-run, neighborhood shoe store, which in the past was the basis of Florsheim's marketing. Suburban malls - many anchored by Sears stores - already have taken the place of those outlets, he said.

Now, he said, the Florsheim specialty shops will co-exist with the displays in Sears stores because they will serve different segments of the market.

The Florsheim displays will be set up within Sears men's footware departments. They will offer and stock about 20 styles of Florsheim shoes and, through an interactive video screen, allow shoppers to view and order other styles.

Florsheim also is training Sears personnel to service customers and the sell the Florsheim line, Mueller said.

Sears and Florsheim are both based in Chicago.

Eric Saunders, senior executive vice president of wearing apparel for Sears, said the addition of Florsheim shoes to the Sears product line furthers the move to offer brand names.

''It enables us to reinforce with our customers that Sears has the goods they want, in the right style and at the right price,'' Saunder said.

Sears retail division has been in flux and under pressure for the past few years. In an effort to regain a competitive edge, Sears recently completed implementation of its ''brand central'' store-within- a-store concept for appliances and home electronics.

Sears and Montgomery Wards also announced last month they had broken off talks about a possible merger of some retail operations, although neither firm would reveal the extent of the discussions.

In addition, Sears is in the process of moving its retail division from the Sears Tower, where Tuesday's announcement was made, to northwest suburban Hoffman Estates, Ill..

WASHINGTON (SEPT. 4) UPI - Despite unprecedented North-South talks in Seoul and a massive U.S. troop buildup in the Persian Gulf, the United States plans to keep troops in South Korea ''as long as there remains a threat'' from the North, a State Department official said Tuesday.

The official, who declined to be identified, also said that despite talks between the Korean prime ministers opening Wednesday - the first such in either capital - tension remains high between North and South Korea, and any permanent settlement involving unification of the two appears far off.

The North-South meeting in Seoul comes at a time when a massive U.S. troop deployment to the Middle East has forced Washington to its first call-up of the military reserves in 20 years to build a 70,000- member force on the ground in Saudi Arabia.

Additionally, the Pentagon has begun moving Cold War forces stationed in Europe to join those from the United States already in the Middle East and hundreds of U.S. warplanes and some U.S. 50 warships massed against the threat of an Iraqi invasion of the Saudi oil fields and to enforce a U.N. embargo against Iraq.

Further, Washington also is facing domestic pressure to reduce its military expenditures in line with a sagging U.S. economy and shrinking Soviet military influence.

The 40,000 to 43,000 U.S. troops stationed in South Korea have been a leading grievance in the North, which has insisted they and their suspected nuclear weaponry be withdrawn before agreements can be reached with the South on nearly any other matter.

But despite the need for troops in the Middle East and the thorn those in South Korea pose for the North, the State Department official rejected the North Korean demand to remove them, saying: ''Our basic position is that our forces will remain in Korea as long as there remains a threat, and as long as there is a desire on the part of the South Koreans for them to remain there.''

An expert on the region said Tuesday that South Korea holds virtually all the cards in its meeting with North Korea, as it works to trade its vast economic and political advantages into reduced tensions both at home and abroad.

The South, preparing for Wednesday's highest-level meeting between the two countries since the end of the 1953 end of the Korean War, needs only be concerned with military balances and scattered domestic protests, said Harold Hinton, professor of political science and international affairs at George Washington University.

While the North, he said, faces serious economic problems, its loss of standing in the deteriorating Soviet bloc, and the possiblity of division in its repressive political system when aging President Kim Il Sung is expected to try to turn over power to his eldest son, Kim Jong- Il.

''The South has every asset, every card in its hand,'' said Hinton, who last visited South Korea in June.

U.S. involvement has been a key issue in relations between the North and South, with more than 40,000 U.S. troops stationed in the South to help balance Seoul's army of an estimated 600,000 to 700,000 men against the North's 1 million-man force.

The State Department spokesman said the U.S. government has supported efforts to peacefully reunify the Koreas and is pleased with plans for this week's meetings in Seoul.

''We hope that this will be the beginning of a fruitful dialogue, since the two Koreas must be the principle actors dialogue leading to the peaceful unification of North and South Korea,'''' the State Department said in a prepared statement.

Hinton agreed with the U.S. position, saying, ''We have to see some concrete progress (in relations) before we could safely'' reduce the U.S.

miltary commitment to Seoul.

#90247u2453 09/04/1990 ~United Press International
COCOA BEACH, FL (SEPT. 4) UPI - A University of Florida freshman suspected in the slayings of five college students in Gainesville was linked to a sex attack in 1988, Indian River County authorities said Tuesday.

Meanwhile, the suspect's public defender, James Russo, said investigators had skirted the law and perhaps broken it in questioning his client for two hours without a lawyer despite the defendant's desire to have one present.

The victim of the 1988 attack, whose name was withheld, identified the suspect, Edward Lewis Humphrey, 18, after seeing his photograph in news reports over the weekend, said Maureen Coogan, records clerk with the Indian River County Sheriff's Office.

Indian River investigators cited ''similarities'' between the 1988 attack and the Gainesville investigation, but would not release specifics.

Based on the victim's statement, Indian River authorities issued a warrant charging Humphrey with armed burglary and attempted sexual battery.

Humphrey already was being held in $1 million bond at the Brevard County Detention Center in Sharpes. He was charged Thursday in Brevard County, southeast of Gainesville, with aggravated battery in the alleged beating of his grandmother, with whom he had lived.

Coogan said the new warrant had not been served, but Humphrey was being detained in connection with the 1988 incident.

A man followed the woman into her home on Sept. 6, 1988, tore her blouse and held a hunting knife to her throat. The woman pleaded with the man not to rape her, and the attacker agreed, but told her to take off her pants, Coogan said.

The spokeswoman said a man identified as Robert L. Anderson Jr. apparently saw the attacker outside the woman's house, Coogan said. Indian River investigators refused to say whether Anderson also had identified Humphrey.

Russo, Humphrey's lawyer, said state investigators talked their way early Sunday past employees of Brevard County Jail and apparently questioned the suspect for two hours despite the suspect's request for a lawyer to be present for further questioning.

''It has certainly been very, very unusual, maybe improper, maybe illegal '' Russo said.

The investigators apparently had obtained a court order authorizing the questioning, Russo said, but did it secretly late Saturday or Sunday, then refused to show the order to jailers. ''I don't know what they asked the judge to do. I wasn't there to argue against it,'' he said.

Authorities have identified Humphrey as a suspect in the spree of killings that has shocked the quiet university town of Gainesville. The bodies of five victims, all college students who lived within 2 miles of each other and within 2 miles of the University of Florida campus, were discovered within a 48-hour period early last week.

Authorities said it appeared the killer or killers forced their way into the victims' apartments and sought out slender young women with brown hair. All the victims fit that discription except one, a young man who was a roommate of one of the women.

Russo refused to give any details about Humphrey's mental state or demeanor, but Brevard County Sheriff Jake Miller said Humphrey had been segregated from other inmates and had exhibited ''psychotic'' behavior.

Russo called the $1 million bond for his client ''exorbitant'' and said he will ask that the state be forced to attempt to justify it at a bond hearing Thursday. ''I think at that point in time they need to stand up and say why he's a danger to the community,'' Russo said. He said in a normal aggravated battery case, Humphrey's bond would probably be set at $2,500 or $5,000.

Authorities in Gainesville barricaded the enterance to Humphrey's apartment last week and searched garbage for evidence, but had not obtained a search warrant to enter the apartment.

''It would seem to me you need some amount of probable cause to get a search warrant, and the fact that they haven't obtained a search warrant indicates they don't have probable cause,'' Russo said.

Meanwhile, University of Florida officials in Gainesville estimated that about 80 percent of the university's student body returned to classes Tuesday despite police warnings that the killer may still be on the loose.

''We have no way of getting an accurate measurement for how many of our students are back,'' university spokesman Larry Humes said. ''We've done some spot checking in class to get some feel for attendance. What we're getting is a majority of our students are back. I've heard 80 percent or plus.''

The victims in the University of Florida slayings were Christina Powell, 17, of Jacksonville, Sonya Larson, 18, of Deerfield Beach, Christina Hoyt, 18, of Gainesville, Tracy Paules, 23, of Palm Springs North and Manuel Taboada, 23, of Carol City.

Larson and Powell were found stabbed to death in their apartment Aug. 26. Hoyt was found shortly afterward. All three had been stabbed and their bodies mutilated. The others also were stabbed to death.

#90247u2458 09/04/1990 ~United Press International

CAPE CANAVERAL, FL (SEPT. 4) UPI - The presumably leak-free shuttle Columbia's countdown ticked smoothly into the night Tuesday, setting the stage for fuel loading Wednesday and blastoff before dawn Thursday on a long-delayed astronomy flight.

Running more than three months behind schedule because of a hydrogen fuel leak, Columbia's seven-man crew is scheduled to thunder away at 1:20 a.m. EDT Thursday, one week after the ship was grounded because of trouble with an on-board telescope.

Few shuttle crews have had as much trouble getting off the ground as Columbia's, but NASA test director Albert Sofge said Tuesday the orbiter's third countdown in as many months was proceeding smoothly, with an 80 percent chance of good weather at launch time Thursday.

''Everybody's very comfortable. The firing room's very calm and we're just proceeding down with the count,'' Sofge told reporters. ''It's business as usual.''

Engineers tested the spaceplane's flight control system Tuesday and made preparations for the make-or-break fuel loading procedure Wednesday afternoon that will determine whether NASA resumes shuttle flights after a four-month hiatus or whether the agency's launchless summer lingers on into the fall.

NASA managers, subjected to intense criticism this summer because of flaws in the Hubble Space Telescope and concern about the feasibility of the agency's space station project, are especially eager to get Columbia into orbit. But they insist the shuttle will not be launched unless it is operating properly.

Still, Columbia's delays have pushed the flight to so late in the summer that another major problem, such as a new fuel leak, likely would force NASA to postpone the mission until after the shuttle Discovery takes off around Oct. 5 on a higher-priority mission to ferry the Ulysses solar probe into orbit.

Engineers began hauling Discovery to launch pad 39B Tuesday night to ready the ship for liftoff amid concern about a coolant system leak that threatens to delay the flight. But launch director Robert Sieck said it was too early to tell what impact the problem might ultimately have on the Ulysses mission.

Columbia's astronauts spent the day Tuesday reviewing their complex flight plans and generally relaxing, sleeping and working in shifts to keep their ''body clocks'' adjusted for around-the-clock research in orbit.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, plan to spend 10 days in space training a $150 million battery of telescopes on the most violent objects in the cosmos.

By studying the high-energy X-rays and ultraviolet light emitted by such objects, scientists hope to learn more about the titanic forces that shape the universe and power such cosmic enigmas as quasars, supernovae and theorized but-as-yet-unseen black holes.

First, however, Columbia has to get past fuel loading without springing any leaks.

Engineers planned to roll a huge, rotating gantry away from the shuttle at 6 a.m. Wednesday, exposing the black-and-white orbiter to view. Fuel loading was scheduled to begin at 4:47 p.m.

Columbia was grounded the night before its planned May 30 launch when sensors detected hydrogen gas spewing into the shuttle's engine room. Subsequent tests blamed the leak on damaged seals inside a massive 17-inch-wide ''disconnect'' fitting that allows the external fuel tank to be jettisoned in space.

The damage apparently was caused by scratches from tiny glass beads that somehow got into the fitting, possibly during its construction.

Columbia was equipped with a disconnect asssembly taken from the new shuttle Endeavour and, after the shuttle Atlantis was grounded by a similar leak in July, Columbia was cleared for a second launch attempt.

But plans to begin the long awaited ''Astro-1'' mission last Saturday were postponed when the Broad Band X-ray Telescope, one of four making up Columbia's $150 million payload, suddenly stopped sending data to the ground last Thursday.

The telescope was fixed by installing new circuit boards in an electrical

unit used to relay telescope data to the ground and Columbia was cleared for yet another launch attempt.

#90247u2461 09/04/1990 ~United Press International

WARSAW (SEPT. 4) UPI - The Polish government decided Tuesday to suspend construction on the nation's only nuclear plant, which had been scheduled for completion next year, Polish television said.

Construction of the plant at Zarnowiec, near the northern seaport of Gdansk, drew protests from various ecological groups for years. Protests grew following the disaster at the Soviet Union's Chernobyl nuclear plant in 1986.

''The construction of the plant has been stopped,'' the television said without specifying for how long.

The construction of the plant cost billions of Polish zloties over the last decade.

The decision could worsen the crisis in the Polish energy system, which now relies primarily on low-quality coal, a leading source of pollution in the country.

#90247u2471 09/04/1990 ~United Press International

CAPE CANAVERAL, FL (SEPT. 4) UPI - With Columbia on track for blastoff Thursday, engineers began hauling the shuttle Discovery to nearby pad 39B Tuesday for takeoff around Oct. 5, amid concern about a possible leak in a cooling system that could delay the flight.

Discovery originally was scheduled to be moved to its launch pad last week but a series of minor problems combined to delay the trip to Tuesday, using up all but one day of the spare time built into the ship's processing schedule to handle unexpected snags at the pad.

The shuttle's glacial, six-hour trip from the Vehicle Assembly Building finally began shortly before 7 p.m. EDT. Engineers plan to have the spaceship in place and connected to critical ground systems well before Columbia's ground-shaking launch at 1:20 a.m. Thursday from nearby pad 39A.

NASA can ill afford any additional delays because Discovery must be launched by Oct. 23 at the latest, or its payload, the European Ulysses solar probe, will be grounded for 13 months because of the requirements of its trajectory to the sun.

But Discovery now appears to be suffering from a leak in one of two critical Freon cooling systems used to control the temperature in the crew cabin and elsewhere in the shuttle.

If a leak is confirmed by additional tests, Discovery's Oct. 5 target launch date would appear in jeopardy and, in a worst-case scenario, the shuttle could miss its tight 18-day launch period, grounding Ulysses until late 1991.

Launch director Robert Seick said in an interview Tuesday it was too early to say whether the issue posed a major threat or not, although he added ''we've got to be somewhat concerned.''

Sieck said data indicates Discovery has lost 10 percent of its coolant over the past 10 days. But it is not yet clear where a leak might be located or what it might take to fix it.

''If it's as simple as a fitting like a flex hose on a payload bay door radiator, then yeah,'' he said, the shuttle could be fixed in time to launch Ulysses during its 18-day takeoff period.

''If (the repair) ends up being something invasive like a line that has a crack in it and it has to be cut out and re-welded ... then that gets real tough,'' Sieck said.

Once Discovery is mounted on the launch pad, its electrical systems will be powered up Wednesday and engineers will check to see if any more Freon has leaked away. If so, the hunt will be on to locate the leak and figure out how to fix it as quickly as possible.

''I think tomorrow, when we get this thing powered up at the pad, we're going to find it's probably dropped another 1 to 2 percent,'' Sieck said.

The Ulysses solar probe is the first spacecraft ever built to orbit the poles of Earth's sun and for months its launch has been one of NASA's highest-priority shuttle flights.

To reach the proper trajectory, Ulysses must first fly past Jupiter, using the planet's titanic gravity to whip it down, out of the plane of the solar system and back toward the poles of the sun.

Because of the positions of Earth and Jupiter, Ulysses must be launched between Oct. 5 and Oct. 23, or the fight will be delayed for 13 months.

NASA managers want to have Discovery ready for launch as close to the opening of its relatively short 18-day launch period, or ''window,'' as possible in case problems crop up that might delay takeoff.

#90247u2497 09/04/1990 ~United Press International
(SEPT. 4) UPI - At least 2,300 teachers in Michigan, Illinois and Pennsylvania were on strike Tuesday, the traditional first day of school, in walkouts affecting more than 39,000 students.

Salary and working conditions were the main issues.

In Michigan, 1,961 teachers in six school districts with a combined enrollment of 33,550 students were on strike. The strikebound school districts included Saginaw, 900 teachers and nearly 16,000 students; Troy, 700 teachers and 11,000 students; Gwinn, 175 teachers and 2,900 students; Cheboygan, 114 teachers and 2,400 students; St. Ignace, 48 teachers and 900 students and Engadine, 24 teachers and 350 students.

In Illinois, about 110 teachers in the Chicago suburb of Darien went on strike with salary as the main sticking point. The district's 1,721 students attended three days of school last week before the strike was called. Teachers voted in late August to go on strike after their contract expired on Aug. 25.

In the Mount Zion district near Decatur, Ill., 117 teachers remained off the job Tuesday in a strike that began last week. Talks between teachers and the Mount Zion Board of Education broke off Monday, a school official said. The district has about 1,700 students.

But officials said about 2,200 students in Harrisburg, Ill., and 1,000 in Illini Bluffs, Ill., should be back in school Wednesday with a vote by teachers to end their strikes.

In Pennsylvania, York County's Dover School District was struck by 184 teachers, idling 3,172 pupils, and the staff at Ligonier Valley School said it planned to strike Wednesday, when 2,691 students were supposed to return to class despite the threatened walkout.

George Badner, spokesman for the state's largest teachers' union, the Pennsylvania State Education Association, said there is no way to know whether unsettled contracts in 78 other school districts will be resolved without strikes.

''You can't make any kind of prediction or summation this early as to how things are going to go,'' Badner said. ''With strikes, you're going to have to take each one as they come up. They're all local issues.''

Professors at Wayne State University in Detroit also hit the picket lines Tuesday, but university officials said the majority of classes would begin Tuesday for the sbhcol's 30,000 students despite the walkout.

In Philadelphia, Temple University professors walked picket lines instead of teaching in what they vowed could be a protracted strike unless their demands on wages and benefits are met.

Some 100 unionized professors, librarians and other professionals toted picket signs reading ''Temple Unfair to Education.''

The university did not officially cancel classes for its 34,000 students, but many students left their classes after finding that professors were not there.

#90247u2505 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - NFL Commissioner Paul Tagliabue Tuesday fined San Francisco 49ers owner Edward DeBartolo Jr. $500,000 for violating league ownership policies but ruled the violations do not give the club a competitive edge.

Tagliabue Tuesday sent a letter to DeBartolo's Youngstown, Ohio, office notifying him of his findings. The 49ers won four Super Bowls, including the last two, since DeBartolo purchased the team in 1977.

Tagliabue fined DeBartolo $250,000 for each of two violations regarding a undisclosed Dec. 30, 1986 transfer of ownership to the DeBartolo Corporation. The NFL prohibits corportate ownership of teams, although the league is reviewing that policy. Under league rules, Tagliabue could have fined the club $500,000 on each count for a total of $1 million.

Tagliabue told DeBartolo the transfer constitued a ''serious breach of the club's commitment to the league in two respects.''

Tagliabue ruled DeBartolo improperly transferred controlling interest in the 49ers to the DeBartolo Corporation, which has substantial non-football business operations; and violated league rules prohibiting NFL owners from operation other professional sports leagues. At the time of the transfer, DeBartolo Jr. was a principal owner and active executive of the corporation, which owned the NHL's Pittsburgh Penguins.

In his letter, Tagliabue said the violations played no part in the 49ers' success on the field and did not warrant the commissioner penalizing the club through loss of draft choices.

''I have considered, as I must, whether the 49ers nwbership transfer affected 'the competitive aspects of the game,''' Tagliabue wrote. ''On this issue, I find the 49ers transfer has not to date resulted in any identifiable competitive advantage that would warrant such a sanction.

''In particular, I find the 49ers' extraordinary playing field success during the 1980s - both before and after the December, 1986 ownership transfer - was achieved on the merits and not by reason of any violation of the league constitution or other policies.''

#90247u2521 09/04/1990 ~United Press International

(SEPT. 4) UPI - A State Department official says despite the first-ever talks between the North and South Korean prime ministers, tensions remain high between the two countries. He says U-S troops will remain in South Korea ''as long as there remains a threat'' from the North.

.

The meeting opens tomorrow in Seoul. Today, hundreds of South Korean students hurled firebombs at riot police in Seoul to protest the talks aimed at ending the 45-year division of the Korean peninsula.

South African police say at least 35 people were killed and nearly 100 more wounded in fighting today in the black township of Sebokeng. The death toll includes 11 bodies found after soldiers opened fire on crowds surrounding a hostel for migrant workers.

.

The fighting in Sebokeng and two eastern townships near Johannesburg stepped up as President F-W de Klerk made a surprise visit to Soweto. It was his first trip into a black township since his election as president one year ago.

Federal aviation officials in Alaska say two people were killed and eight injured when a twin-engine plane crashed at the Yukon River village of Kaltag. The accident occurred last night. Kaltag is about 325 miles west of Fairbanks.

-30- 1386

#90247u2528 09/04/1990 ~United Press International

PHILADELPHIA (SEPT. 4) UPI - The American Friends Service Committee Tuesday became the first religious organization in the United States to call for a halt to the U.S. buildup of military forces in the Persian Gulf.

The Quaker group urged President Bush instead to take the lead in diplomatic efforts to end the crisis, which began Aug. 2 with the Iraqi invasion of Kuwait, and recommended that U.S. forces be replaced in the region by an Arab or United Nations peacekeeping presence in the meantime.

Quakers are known for their pacifist convictions, and was one of the first religious organizations to oppose the Vietnam War.

''The AFSC supports the U.N. call for Iraqi withdrawl from Kuwait,'' Chairman Stephen Cary said. ''This call would carry greater weight, I believe, if the United States were to link it to a matching call for the end of other illegal military occupations in the region.''

Cary said the crisis precipitated by the invasion of Kuwait would have been impossible without the worldwide arms trade, and he urged the United States to take the lead in ending that trade.

''Today's crisis provides us with a fresh opportunity to turn about, to replace the politics of war with the politics of peace,'' Cary said.

U.S. churches have been cautious in their reaction to the Persian Gulf crisis, generally condemning the Iraqi invasion but urging the Bush administration to go slowly and to use international organizations in response to the situation.

Last week, the presidents of two major Protestant denominations - the United Church of Christ and the Christian Church (Disciples of Christ) - wrote Bush saying, ''We believe that restraint by the U.S. and other nations in responding to the Iraqi aggression in Kuwait is essential.''

They urged the administration to ''look increasingly at the United Nations for an appropriate response'' and said they were concerned that ''the continuing buildup of an already massive military presence in the Middle East will hamper these efforts and exacerbate tensions.''

The two leaders also were critical of some of the elements of the sanctions imposed against Iraq, saying, ''We urge that food and medical supplies not be withheld from Iraq's civilian population.''

The National Conference of Catholic Bishops, representing the nation's 55 million Roman Catholics, has issued two statements on the crisis, one in early August and the other on Aug. 30.

Neither statement urged particular policy actions but did label the Iraqi invasion ''devoid of provocation or any justification'' that poses ''a severe threat to international peace.''

Noting Bush's request for prayers, the first statment responded to that call, and in the second, Archbishop Daniel Pilarczyk of Cincinnati, president of the bishops conference, urged that those prayers ''also remember ... those men, women and children - Americans and others - who are being held against their will in Iraq and Kuwait.''

In early August, just hours before Bush announced his decision to send forces to Saudi Arabia, the National Council of Churches issued a statement denouncing the Iraqi invasion as an ''unjustifiable act of aggression'' and said it supported ''the demands of the international community for a speedy and complete withdrawal of all Iraqi forces.''

In mid-Augurt the Global Mission Ministry Unit Committee of the Presbyterian Church (USA) said it concurred with statements by other religions bodies - including the World Council of Churches, the National Council of Churches and Churches for Middle East Peace - in criticizing the Iraqi action.

And both Catholic and Protestant agencies have called for relief efforts to aid those fleeing Kuwait and Iraq.

#90247u2621 09/04/1990 ~United Press International

(SEPT. 4) UPI - A judge in Painesville, Ohio, began selecting the jury today in the third trial resulting from the April 1989 cult killings of an Ohio family. Picking the jury for the capital murder trial of Damon Lundgren is expected to stretch into early next week. Lundgren is the son of cult leader Jeffrey Don Lundgren, who was convicted on capital murder charges last week for the slayings.

The Western part of the nation was threatened with flooding today, as a record heat wave baked at least six states. Flash flood watches were posted across parts of southern California, southern Nevada and Arizona as showers and thunderstorms doused those areas. High- temperature records were broken in Meridian, Mississippi... Milwaukee... Mobile, Alabama... Baton Rouge and Lake Charles, Louisiana... Kansas City, Missouri... and Port Arthur, Texas.

An economist says companies wishing to invest abroad should be wary of the euphoria surrounding the thaw in East-West relations. Al Niemi of the University of Georgia says the economic revolution taking place in the Soviet Union will proceed much more slowly than the changes in Eastern Europe. He says Westerners can expect greater and quicker returns on their investments by looking first to the Soviet satellites... such as East Germany.

Chile's former Marxist President Salvador Allende was given a formal funeral today in Santiago... almost 17 years after he was killed in a coup. Allende's body was exhumed from an UNmarked grave 70 miles west of Santiago and a brief ceremony was held, before the coffin was taken to its new place in the capital. The nation's military and other right-wingers voiced opposition to the ceremony.

#90247u2640 09/04/1990 ~United Press International
BANGKOK, Thailand (SEPT. 5) UPI - Khmer Rouge leader Khieu Samphan has agreed to reverse a decision to stay away from Cambodian peace talks due to start in Jakarta, Indonesia, Thai Foreign Ministry sources said Wednesday.

The sources said a senior Thai Foreign Ministry official met Khieu Samphan Tuesday to persuade him to change his plans to avoid the talks that are to start Thursday.

The Khmer Rouge could not be contacted to confirm the account.

The change of heart could save the talks from degenerating into an inconsequential, low-level meeting.

On Tuesday Khieu Samphan issued a statement saying he and his delegation would not participate in the talks unless Cambodian Prime Minister Hun Sen also attends.

Hun Sen said he would not participate unless top resistance leader Prince Norodom Sihanouk joins the negotiations meant to set up a joint council and to consider a comprehensive U.N. peace plan.

In Beijing Tuesday, Sihanouk rejected Hun Sen's proposal that he and Sihanouk attend the Jakarta talks as equals, an arrangement that would increase the Cambodian government's influence at the expense of the resistance.

Sihanouk reiterated the resistance position that each of the three rebel groups and Hun Sen's Hanoi-backed government must have equal status in four-way talks.

''The National Cambodian Resistance shall only accept the formula of four Cambodian factions, each perfectly equal to the others,'' said statement, carried by China's official Xinhua news agency.

A spokesman for Sihanouk said the prince planned to attend the talks at a later stage if progress were made.

The only leader to arrive in Jakarta so far has been Son Sann, the leader of the Khmer People's National Liberation Front, which is allied with Sihanouk and Khieu Samphan.

''I pray to God for those who were the obstacles to the Indonesian efforts to be this time understanding enough to allow the present informal

meeting to be a success,'' Son Sann said in a statement delivered upon his arrival.

Son Sann said he had appealed to Hun Sen to attend the talks despite Sihanouk's absence.

An Indonesian official said the talks would go on regardless whether the leaders attended.

The disputes among the Cambodian factions threatened to derail a peace process that has brought together China and the Soviet Union - the major backers of the opposing sides - behind the U.N. plan.

That U.N. plan, worked out by the five permanent members of the U.N. Security Council, envisions a major U.N. supervisory role in an interim administration headed by the joint council.

It also provides for disarmament of all forces, an end to outside aid and a national election.

#90247u2652 09/04/1990 ~United Press International

GREEN BAY, WI (SEPT. 4) UPI - Quarterback Don Majkowski agreed to a one-year contract with the Green Bay Packers Tuesday that could be worth more than $2 million through incentive clauses.

Majkowski, 26, who originally asked for $2.8 million a year, would be in Green Bay Wednesday to sign the contract and end a 45-day holdout, Packer spokesman Lee Remmel said.

One of Majkowski's agents, Randy Vataha of Boston, said the contract had a base salary of $1.5 million, but could be worth more than $2 million if all incentive clauses were reached.

''It's very close to where we felt it might finish, really it is,'' Packers President Bob Harlan said. ''I think that both sides should be very pleased with it, really, and now let's move forward and see what we can get accomplished.''

Majkowski, the last holdout on the Packers' roster, was named to United Press International's All-NFC second team last year. He completed 58.9 percent of his passes with 27 touchdown passes and 20 interceptions, leading the team to a 10-6 record.

Coach Lindy Infante said second-year quarterback Anthony Dilweg will start the season opener Sunday against the Los Angeles Rams at Lambeau Field. The Packers were expected to seek a two-week roster exemption from the NFL

for Majkowski.

''Certainly, it's good to have everybody in camp now,'' Infante said. ''We can go on with the rest of our lives and quit worrying about things that are insignificant to what we're trying to do and that's to win that championship.

''We're really happy to have it done,'' Infante said. ''I'm glad it's over with so maybe this is the last time we have to talk about it.''

Negotiations with Majkowski resumed Tuesday with the sides $400,000 apart. Majkowski was upset the Packers did not offer a more substantial long-term contract, said Bob Woolf, Majkowski's other agent.

''I'm pleased for Don, but it didn't have to go like this,'' Woolf said. ''It was totally unnecessary. We shouldn't have had to been put through all of this.

''It's reasonably fair. I'd like to hear - if he has a great year - what their excuse is going to be next year. It's fine, really. I'm happy, Don's happy. I think they finally realized that he (Majkowski) just wasn't going to play at what they were offering,''

Majkowski received $400,000 in base salary last year and about $170,000 in performance bonuses. Those incentives were based on statistics such as touchdown passes, yards and passer rating.

#90247u2698 09/04/1990 ~United Press International

NEW YORK (SEPT. 4) UPI - Lost among the hoopla and hysteria that has greeted Jennifer Capriati's debut is the trivia that Mary Joe Fernandez remains the youngest player ever to win a match at the U.S. Open.

She was 14 years and one month in 1985 when she defeated Sara Gomer in a first-round match.

On Tuesday, Fernandez registered another significant victory, outlasting Manuela Maleeva-Fragniere 6-2, 2-6, 6-1 to become the first semifinalist at this year's Open. She never before made it past the third round.

To Fernandez, who turned 19 a month ago and graduated from high school only last year, the victory felt ''fantastic. I'm really ''year, th

Fernandez, the eighth seed, recalls vividly the reception she received as a 14-year-old.

''I remember, I remember, it wasn't that long ago,'' she said. ''I

remember it being a lot of fun, and it still is. Playing against people like Martina (Navratilova), Chris (Evert), you've grown up watching them on TV and then going to Wimbledon, the U.S. Open, they're big thrills.''

Fernandez will play fifth seed Gabriela Sabatini, who out-lasted unseeded Leila Meskhi of the Soviet Union 7-6 (7-5), 6-4 Tuesday night in 2:29, the longest two-set match of the women's tournament.

Sabatini fought off two set points in the first set and rallied from a 5-2 deficit in the tie-breaker. Meskhi, ranked No. 21, was seeking to become the first unseeded player in 14 years to reach the women's semifinals.

The 10-game second set featured seven service breaks. The athletic Argentine won the match by breaking Meskhi in the final game at 30, the Soviet sending a forehand approach shot wide.

''In this kind of match, you have to be very patient,'' said Sabatini. ''It was a long match. I had to be mentally pretty tough.

''Today, she showed she is a very tough player. She didn't miss a ball,'' said Sabatini. ''The difference was I played better on the big points.''

The semifinal bracket will be completed Wednesday with Steffi Graf, the two-time defending champion and No. 1 seed, playing No. 12 Jana Novotna and No. 4 Zina Garrison going against No. 6 Arantxa Sanchez Vicario.

Maleeva-Fragniere, the No. 9 seed, was coming off her major upset of Navratilova,

''I'm not sure if it's the win against Martina that was the problem today, but I was so nervous and couldn't find the way to put her under pressure '' said Maleeva-Fragniere, whose voice was breaking and who appeared near tears.

''I'm so disappointed that I lost because I felt I really could have won that it's difficult to talk. I blame only myself right now. I don't put it on her game, it was my serves, my strokes. I thought I was really prepared. Physically, I'm not tired.''

Fernandez, loser in this year's Australian Open final to Graf, started strong on a soft, sunny afternoon, racing to a 4-0 lead. Maleeva-Fragniere won the next two games to cut her deficit in half, but Fernandez broke at love and held at 15 to end the set in a half hour.

The second set was a virtual carbon copy of the first, except that this time it was Maleeva-Fragniere taking the first four games and the last two.

Maleeva-Fragniere held serve to open the deciding set and had a break

point in the second game, but was unable to convert. Fernandez then broke at love in the third game, withstood another break point against her in the fourth, and was untouchable the rest of the way.

''My game plan was to play aggressive and come in when I could,'' said Fernandez, who was more comfortable from the baseline but still ventured forward on 35 occasions. ''Even in the second set I felt I was in control.''

Maleeva-Fragniere, stopped in the quarterfinals of the Open four of the last five years, commented, ''It's very hard to know what happened in the third set. I was feeling fine and then the match was over.

''It's a lesson and hopefully there will be another time I'll be in the quarterfinals.''

Fernandez, who lives in Miami, has endured a series of frustrating injuries this year, causing her to retire from three of her previous six tournaments. Among the aches and pains have been tendinitis in her right shoulder, a pulled hamstring, a sore back and a tear of the inside cartilage in her right knee.

''It was frustrating,'' she said. ''The times I'd be playing I'd be playing well, enjoying myself, getting a lot of confidence ... then I'd have to start all over again.''

With the early exits of Navratilova and Monica Seles, the second and third seeds, the rest of the field will be hard put to prevent Steffi Graf from annexing a third consecutive Open crown.

Graf's combined record against the seven other quarterfinalists is 58-6, including 8-0 against Jana Novotna, her opponent Wednesday.

Of course, the unexpected always is a possibility. In the semifinals, Graf could go against Zina Garrison or Arantxa Sanchez Vicario. She has a combined 13-3 mark against them, but lost to Sanchez Vicario in the 1989 French Open and to Garrison in this year's Wimbledon semifinals.

LOS ANGELES (SEPT. 5) BUSINESS WIRE - Gerald D. Murphy, chairman of the board of ERLY Industries Inc. (NASDAQ:ERLY), announced Tuesday that the board of directors had authorized the issuance of a 10 percent stock dividend to all shareholders of record as of Sept. 14, 1990, with the distribution of shares to be made Oct. 13, 1990.

Murphy stated that the 10 percent stock dividend is continuation of the

company's dividend policy instituted in 1986.

Murphy also stated, ''Sales in our Comet Rice subsidiary continue to be strong despite the uncertain conditions in the Middle East. In addition, our Chemonics subsidiary is having an excellent second quarter as a result of numerous forest fires in the Western United States.''

SANTA CLARA, CA (SEPT. 5) BUSINESS WIRE - 3Com Corp. Wednesday announced that John H. Hart has been named vice president and chief technical officer.

In this position, Hart will be responsible for providing strategic engineering direction and development decisions for new products and technologies. He will also lead the creation of a European research and development center for the company.

Reporting directly to Les Denend, executive vice president of product operations, Hart will join 3Com's operating committee, the management team responsible for day-to-day operations, in addition to participating on the product operations executive staff.

Prior to joining 3Com, Hart was assistant vice president of network products and vice president of engineering and advanced development at

Vitalink Communications Corp. During his 7 years at Vitalink, Hart managed the groups responsible for developing and maintaining products such as bridges, routers and network management workstations.

Additionally, Hart was the chief architect and manager of the groups responsible for developing the industry's first remote bridge products.

Prior to his tenure at Vitalink, Hart held various executive-level positions with Control Data Corp., South Central Bell and Southern Bell. In these positions he was a principal contributor to design and strategy for network architectures and networking products.

John Hart received a bachelor science degree in mathematics from the University of Georgia in Athens, Ga., in 1969. Currently he is active in committees of the Institute of Electrical and Electronic Engineers (IEEE) devoted to developing the IEEE 802 networking standards.

3Com Corp. is a leading independent global data networking company, providing multivendor connectivity that spans organizations and businesses worldwide. The company designs, manufactures, markets and supports networking systems based on industry standards and open systems architecture.

PALM DESERT, CA (SEPT. 5) BUSINESS WIRE - StratAmerica Corp. announced that its ''Field of Dreams'' Baseball and Sports Memorabilia Division will start to market its authenticity guarantee on certain sports cards and collectibles sold in its retail stores starting this fall.

Presently, ''Field of Dreams'' has one retail location in Palm Desert with approximately ten new locations presently identified for southern California shopping malls.

Sam D. Battistone, StratAmerica's president, said, ''We believe the authenticity guarantee on all appropriate sports cards and collectibles sold by ''Field of Dreams'' will provide collectors an added degree of confidence as they build their collections.

''In the past collectors had to rely on the credibility of an individual collector or store where the item was purchased. Normally this ''guarantee'' was based on a verbal commitment explaining the historical record of the autograph, card or other collectable.''

Battistone added, ''One of the primary purposes of the authenticity guarantee is to provide all collectors, but primarily beginning and intermediate collectors, the assurance that they are buying an original. We see sports card collecting as a hobby and people should not have to worry about the authenticity.''

Also ''Field of Dreams'' guarantees that card packs or boxes of cards have not been searched to remove the most valuable cards. Other retail organizations in the industry have been unwilling to provide this assurance in writing.

It is estimated by leading industry publications that the baseball memorabilia and collectibles market currently exceeds $2.5 billion annually and is rapidly growing. StratAmerica intends to market sport memorabilia for many other sports including baseball and basketball because of their increased popularity, through the ''Field of Dreams'' stores.

StratAmerica previously owned the Utah Jazz Basketball franchise of the National Basketball Association (NBA).

StratAmerica's stock is traded on the NASDAQ system in the over-the-counter market with the symbol STCO.

SEATTLE (SEPT. 5) BUSINESS WIRE - Horizon Air, a subsidiary of Alaska Air Group Inc. (NYSE, PSE), reported Wednesday that its August traffic increased 15 percent to a record 35.6 million revenue passenger miles (RPMs) from the 31.0 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 54.6 percent, compared to 57.4 percent in August 1989.

The airline carried an all-time high 182,510 passengers in August. These passengers represent a 15 percent increase over the 158,064 carried in August 1989. Capacity during the month was 65.1 million available seat miles (ASMs), compared to 54.0 million in August 1989.

For the eight months ended Aug. 31, 1990, revenue passenger miles totaled 234.9 million, a 14 percent increase from the 206.9 million recorded a year earlier. The passenger load factor for the eight months ended Aug. 31, 1990, was 49.6 percent, down from 52.5 percent for 1989.

Capacity (ASMs) for the eight months ended Aug. 31, 1990, increased 20 percent to 474.0 million, up from 393.9 million flown in 1989. The airline carried 1,193,416 passengers through August 1990, up 15 percent from the 1,039,993 in 1989.

MOUNTAIN VIEW, CALIF. (SEPT. 5) BUSINESS WIRE - Sun Microsystems Wednesday announced that it has signed an agreement with ACCESS Graphics of Boulder, Colo., under which ACCESS will distribute Sun's workstations and servers to approximately 200 Sun value-added resellers who sell into technical markets.

ACCESS will become Sun's first master reseller in the United States; Sun previously supplied its products directly to its VARs.

This agreement, along with changes announced today to Sun's VAR program, reflect significant shifts in Sun's channel strategy. For example, Sun recently established a National Value-Added Dealer channel to help penetrate the commercial market and will be selling its systems through approximately 200 NYNEX, MicroAge and Intelligent Electronics outlets.

Under the agreement with Sun, ACCESS Graphics will offer workstations and provide training and support to smaller resellers in the United States only. These firms are authorized by Sun to sell into CAD/CAM and other technical markets.

ACCESS will also act as Sun's distributor to smaller companies that currently fall under Sun's OEM contract, such as independent software developers who resell their applications on Sun workstations.

According to Joe Roebuck, Sun vice president of U.S. sales: ''By creating a master reseller distribution channel, Sun will be in a better position to service smaller resellers. In the past, it's been difficult for us to offer quick turnaround of small-quantity orders.

''ACCESS, by contrast, specializes in one- and two-day delivery. ACCESS already supplies CAD products to a majority of our resellers and has an excellent reputation for serving the CAD/CAM/CAE market.''

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

#90248b0041 09/05/1990 ~Business Wire

IRVINE, CA (SEPT. 5) BUSINESS WIRE - The summer of 1990 marks the first anniversary of an unexpected automotive phenomenon: Miata Mania.

Even before the roadster's introduction in July 1989, an owner's club had been formed by those waiting to purchase the car. Not long after its arrival, the Miata captured an unprecendented number of awards and accolades -- as well as the hearts and imaginations of more than sports cars enthusiasts.

Now, one year later, the mania continues. On Aug. 17-19, 1990, Mazda celebrated the one-year anniversary of the roadster at the Monterey Historic Automobile Races at the Laguna Seca Raceway.

The Monterey Historic Races are recognized as the country's largest gathering of vintage and classic sports and racing cars -- and as such, proved to be a suitable backdrop for a celebration of the Miata's first outstanding year.

Mazda invited members of several chapters of the Miata Club of America, as well as members of the RX-7 club, to take part in three days of hospitality at the Raceway. The clubs' grand turnout helped the manufacturer assert its role as the world's largest manufacturer of sports cars.

Also present were those responsible for making the Miata a reality: Mazda Research and Development of North America (MRA) chief designer Tom Matano; assistant chief designer Mark Jordan; and manager, product planning, Bob Hall.

The three Mazda designers officiated a cake-cutting ceremony of a one-half scale Miata look-alike cake -- after which the crowd broke into a spontaneous chorus of ''Happy Birthday'' for the one-year-old roadster.

The enthusiasm at the cake-cutting ceremony was only one example of the Miata Mania evident throughout the weekend's activities. More than 80 Miatas formed a common ''Miata Corral'' at the Raceway, many sporting personalized license plates revealing their owners' devotion: LV CRVS, MIATAGO, LILAPUT, and MIATA O.

Owner Pete Paterson of Los Angeles brought his blue Miata customized with a yellow racing stripe -- and a red tongue hanging out of the oval front air intake.

In addition to the activities at Monterey, several other celebrations are taking place across the country to celebrate the first anniversary of the MX-5 Miata. The events, which continue throughout the summer, are sponsored by the Miata Club of America as well as various dealers and enthusiast groups.

Will Miata Mania continue? The people responsible for the Miata's existence were pleasantly surprised with the public's initial -- and continuing -- reaction. Sales remain high, with figures rapidly approaching the 50,000 mark since last year's introduction.

And as the Miata enters its second year on the market, Mazda plans few product changes. Silver Stone, a new metallic exterior color, now joins the red, white and blue trio originally offered, and new colors continue to be investigated. An automatic transmission option is now available, and for 1991, an optional four-wheel anti-lock braking system can be specified.

Hardtops, originally available only in red, can now be purchased in blue and white.

SAN FRANCISCO (SEPT. 5) BUSINESS WIRE - Tesseract Corp. announced its continued support for IBM's SAA(a) strategy with its Human Resource Management Systems for IBM DB2(a) and OS/2 EE environments.

In addition to its product line of HRMS application software, Tesseract currently markets the industry's first HR cooperative processing workstation for human resource management, HRMS Intuition, and the first HR Expert System set of application capabilities, the HRMS Executive Decision Series.

Technical details of Tesseract support for SAA strategy Support for: SAA Delivery Manager

Tesseract plans to take full advantage of IBM's SAA Delivery Manager (a). This will allow Tesseract customers to deliver their applications directly from their IBM host to their workstation processors through the electronic delivery services provided by SAA Delivery Manager.

This means that Tesseract users will be able to electronically select their applications from their workstation, and will then be able to extend

this service for use in installing, maintaining and upgrading their software when new Tesseract versions for their cooperative platforms become available. APPC/MVS

Tesseract takes full advantage of APPC/MVS within the DB2 and OS/2 EE environments to allow for peer-to-peer cooperative processing between the workstation, LAN server and host processor applications.

Headquartered in San Francisco, Tesseract Corp. is a leading supplier of human resource management systems for IBM DB2 and OS/2 cooperative environments. Customers include over 30 percent of the top Fortune companies.

In addition to its DB2 version, Tesseract currently markets the industry's first cooperative processing workstation application for human resource management, HRMS Intuition, and the first HR Expert System set of application capabilities, the HRMS Executive Decision Series. Tesseract is a wholly owned subsidiary of The Prudential Insurance Co. of America and an IBM Business Partner for SAA.

SAN DIEGO (SEPT. 5) BUSINESS WIRE - US Sprint and American Healthcare Systems (AmHS), one of the nation's largest healthcare alliances, have signed a major three-year agreement valued at more than $36 million.

The contract calls for US Sprint to design and implement a Virtual Private Network (VPN) linking all of AmHS' nearly 1,100 facilities across the U.S. as well as providing public payphone, patient calling and employee benefit-related services.

Deborah Kloman, Project Manager of Telecommunications for AmHS, said, ''Our contract with US Sprint will benefit our shareholder's facilities by providing the most modern and efficient long-distance network available at very competitive prices.''

American Healthcare Systems represents facilities in 45 states and Washington D.C., with combined revenues of over $18 billion. AmHS operates one of the nation's largest healthcare group purchasing programs and is involved in a healthcare venture capital fund, liability insurance, a national research and educational institute, a capital finance corporation

and a wide range of healthcare businesses.

John Polumbo, vice president of the Pacific area, said, ''When an organization with the reputation and geographic diversity of American Healthcare Systems selects our services, we take that as a confirmation of the excellence and innovation US Sprint has worked to build into our people, our network and our products. We are extremely pleased to welcome AmHS to our growing list of major customers.''

DETROIT (SEPT. 5) BUSINESS WIRE - US Sprint Wednesday announced a two-year $2.2 million agreement with Fireman's Fund Mortgage Corp. of Farmington Hills, Mich., the nation's second-largest mortgage banker.

Terms of the agreement call for US Sprint to provide Network WATS, US Sprint's multiple-location WATS product, on a nationwide basis.

''US Sprint had the functionality we needed and provided us with the cost-effective service we desired,'' said Donald Boisvenue, associate vice president of Technical Services with Fireman's Fund Mortgage Corp.

''US Sprint is very pleased to add a mortgage industry leader like Fireman's Fund to our customer list,'' said Richard C. Smith, president of National Markets for US Sprint. ''Their decision to choose US Sprint is a further indication of the quality of our fiber-optic network and our mutual commitment to providing the service that best fits their customer's needs.''

Fireman's Fund Mortgage Corp., with more than 50 branches nationwide, has a servicing portfolio of $32 billion and more than 500,000 customers.

#90248b0061 09/05/1990 ~Business Wire
KANSAS CITY, MO (SEPT. 5) BUSINESS WIRE - US Sprint Wednesday announced a two-year $78 million contract to provide a complete package of telecommunications services to National Carriers' Buyers Network (NCBN) of San Jose, Calif., which represents a group of small-to-medium size regional carriers throughout the United States.

The US Sprint services will be used by the NCBN firms to supplement their own regional networks and provide expanded service offerings to their customers.

''This contract gives our member firms a full range of services, an extensive business development support program and significant volume discounts,'' said Larry Davis, president of NCBN and Biztel, a small facilities-based inter-exchange carrier in San Jose, Calif.

NCBN firms typically serve specific regional areas with their own switches circuits and service offerings. Three years ago, Davis and NCBN vice president Jim Smith, president of Execulines of Sacramento, Calif., anticipated the need for small carriers, faced with intense competitive pressures, to become organized.

''US Sprint customized this package of services expressly to meet the needs of NCBN members,'' said Gary Nelson, vice president of the carrier services division of US Sprint's intermediaries marketing group. ''It should help them to be more competitive in the marketplace.'' US Sprint

services included in the contract are outbound transport, inbound (800), international transport, operator services, digital private lines, conference calling and customized FONCARDs.

The US Sprint intermediaries marketing group was formed in 1989 to encourage and support third party selling through exclusive contractual agreements that authorize sales agents to act as independent contractors.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

#90248b0069 09/05/1990 ~Business Wire

KINGWOOD, TX (SEPT. 5) BUSINESS WIRE - Yesterday the board of directors of Enex Resources Corp. (NASDAQ:ENEX) declared a dividend distribution of one common stock purchase right (a ''right'') for each outstanding share of the company's common stock.

Each right will entitle shareholders to buy one share of common stock at an exercise price of $12. The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common stock.

The rights are designed to assure that all of Enex Resources' shareholders receive fair and equal treatment in the event of any proposed takeover of the company, to guard against partial tender offers, open market accumulations and other abusive tactics to gain control of the company without paying all shareholders a premium value and to enable all of the company's shareholders to realize the long-term value of their investment.

Gerald B. Eckley, president and chief executive officer of Enex Resources Corp. stated, ''The rights will not prevent a takeover, but should encourage anyone seeking to acquire the company to negotiate with the board prior to attempting a takeover.''

Eckley added that while the board is not aware of any takeover threat or effort to acquire control of the company, it believes that in the current environment the rights represent a sound and reasonable means of safeguarding its shareholders' interests.

If the company is acquired in a merger or other business combination transaction, each right will entitle its holder to purchase, at the

right's then current exercise price, a number of the acquiring company's common shares having a market value at the time of twice the right's exercise price.

In addition, if a person or group acquires 20 percent or more of the company's outstanding common stock, each right will entitle its holder (other than such person or members of such group) to purchase, at the right's then current exercise price, a number of shares of the company's common stock having a market value of twice the right's exercise price.

Further, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of the company's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for shares of the company's stock on a one-for-one basis.

The rights will be issued on Sept. 18, 1990 to shareholders of record on that date and will expire on Sept. 4, 2000. The rights distribution is not taxable to shareholders.

Enex Resources Corp. is in the business of marketing and managing oil and gas investments, and is an independent general partner managing 30 limited partnerships with interests in more than 10,000 oil and gas wells.

LOS ANGELES (SEPT. 5) BUSINESS WIRE - Security Pacific Corp. Wednesday agreed to sell $125 million of floating rate notes, priced at par.

The rate on the notes will reset quarterly at 25 basis points above 3-month LIBOR. Interest will be paid quarterly. The notes mature Sept. 15, 1993, and are noncallable over the life of the issue.

The notes are being issued under a senior debt shelf registration statement filed with the Securities and Exchange Commission in January 1989. The shelf registration statement is rated AA- by Standard & Poor's Corp. and A1 by Moody's Investor's Service Inc.

The notes will be underwritten by and sold through The First Boston Corp. and Lehman Brothers.

Proceeds from the offering will be used by Security Pacific Corp. for general corporate purposes.

Security Pacific Corp., the Los Angeles-based financial services company with assets of $94 billion, is the nation's 4th largest bank holding company.

SUNNYVALE, CALIF. (SEPT. 5) BUSINESS WIRE - Boole & Babbage Inc. Wednesday announced full support of IBM's (a) SystemView (b) systems management strategy for the planning coordination, and operating of heterogeneous, enterprise-wide information systems.

Boole & Babbage intends to make its MainView system performance management and automation products as well as its underlying integrating architecture comply with the guidelines set forth in the SystemView strategy.

''The SystemView strategy confirms what our customers have been telling us -- they want a consistent user interface, shared data, increased integration, and increasing levels of automation,'' said Jack van Kinsbergen, senior vice president and chief technical officer.

Founder of the host performance management industry, Boole & Babbage is a leading developer and worldwide distributor of technically innovative software products for monitoring, managing, and automating data center operations.

In addition to industry-leading performance management applications, Boole & Babbage has also developed enabling technology so that its applications operate with seamless integration, a common user interface, increased sharing of data, and advanced use of expert systems technology.

This technology is expressed through its MainView system. The architecture of the MainView system is a multilayered approach to the integration of system performance and automation management.

It currently consists of a common services framework for communications and data sharing. Van Kinsbergen further commented, ''The MainView products will participate in the SystemView strategy. Our approach enables us to map directly into and to complement SystemView guidelines.''

MainView therefore gives users both a product toolset for today's needs and an architecture for today and tomorrow. Its immediate application is in MVS, CICS, IMS, DB2 (b), and DASD environments, as well as in multivendor networks.

HOUSTON (SEPT. 5) BUSINESS WIRE - Kern River Gas Transmission Co. Wednesday announced it has awarded purchase orders for compressor units and valves to be used in its natural gas pipeline from Wyoming to California.

''These orders will give us the rest of the major equipment we need to begin construction and put the pipeline into operation,'' noted E.J. Holm, Kern River president. ''We ordered pipe several months ago.''

Solar Turbines Incorporated of San Diego, a division of Caterpillar Inc., has agreed to supply Kern River four 12,600-horsepower turbine compressor units, which will be delivered next summer.

Two of the compressors will be installed at facilities to be built in Muddy Creek, Wyo., one at Fillmore, Utah, and one at Goodsprings, Nev.

In addition, Kern River has placed an order for 66 (36-inch) Cameron weld-in ball valves with Cooper Oil Tool, a division of Cooper Industries of Houston. Delivery of the valves will begin later this year, to coincide with delivery of pipe and the start of construction, Holm said.

Dollar value of the two orders has not been disclosed.

The Kern River pipeline is slated to begin operation in late 1991, with an initial capacity of 700 million cubic feet per day of natural gas.

The Rocky Mountain and Canadian gas brought to California through the Kern River line will be used for enhanced oil recovery, distribution by utilities, production of electricity, cogeneration of electricity and steam, and other industrial applications.

Kern River is a joint venture of units of Tenneco Inc. and The Williams Cos.

Tenneco Inc. (NYSE:TGT) is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals, and minerals.

The Williams Cos. Inc. (NYSE:WMB) of Tulsa, Okla., operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines which separately transport natural gas and petroleum products.

FREMONT, CALIF. (SEPT. 5) BUSINESS WIRE - Interlink Computer Sciences Inc. Wednesday announced plans to extend its products to support access to IBM's Enterprise System/9000 (ES/9000) family of processors under the IBM Enterprise Systems Architecture/390 environment (ESA/390).

IBM announced the ES/9000 family and ESA/390 earlier Wednesday.

Interlink's products give customers transparent connectivity between IBM mainframes and DECnet, TCP/IP, and NFS networks. The company's customer base includes over half of the Fortune 100 companies and over 700 companies worldwide.

As an IBM Business Partner, Interlink has participated in advance reviews of IBM's newly announced products. IBM ES/9000 is IBM's new family of processors, offering the extensive growth and performance benefits of ESA/390.

As Interlink's customers migrate to IBM's new products, Interlink will continue to offer multivendor connectivity solutions, protecting their investment in Interlink products and other vendors' equipment.

IBM also introduced SystemView Wednesday, a new network management architecture which will provide a consolidated view on a single console of information regarding processors, storage, databases, and administrative functions.

Interlink already provides SNS/NETconnect, a product that consolidates management of SNA and DECnet networks through IBM's NetView. Interlink also indicated it will provide products to extend SystemView functionality to other vendors' platforms.

Interlink Computer Sciences creates customer solutions, based on industry standards, that integrate computer networks, applications, data and peripherals. With headquarters in Fremont, Interlink has branch offices and distributors located throughout the United States, Europe, Latin America, and Asia Pacific.

IBM, Enterprise System 9000, ES/9000, Enterprise Systems Architecture/390, ESA/390, SystemView and NetView are trademarks or registered trademarks of IBM Corp.

VANCOUVER, WA (SEPT. 5) BUSINESS WIRE - Pacific Telecom Inc. (NASDAQ:PTCM) announced Wednesday that the transfer of North-West Telecommunications Inc. from PacifiCorp (NYSE:PPW) to Pacific Telecom was completed on Aug. 31.

Pacific Telecom issued 973,709 shares of common stock valued at approximately $25 million to its immediate parent company, Inner PacifiCorp, in exchange for the shares of North-West. The issuance of shares to Inner PacifiCorp increased its ownership of Pacific Telecom less than one half of one percent. PacifiCorp now beneficially owns 87.1 percent of Pacific Telecom's outstanding common stock.

North-West, a local exchange company in Wisconsin with cellular and publishing subsidiaries, merged with a subsidiary of PacifiCorp on July 31 1990. In the merger, shareholders of North-West received 1.97 shares of PacifiCorp common stock and $4.41 in cash for each share of North-West common stock and Class B common stock held. Pacific Telecom provided $247 million for the purchase of the PacifiCorp shares used in the merger while PacifiCorp provided $25 million in cash through an equity contribution. Pacific Telecom's total purchase price at completion of its acquisition of North-West was $272 million.

LOS ANGELES (SEPT. 5) BUSINESS WIRE - MGM Grand Air has signed a letter of proposal and deposited initial payment with Boeing to purchase two of the Seattle-based manufacturer's 757-200 long-range aircraft.

The planned purchase of these new planes, configured to the airline's unique seating arrangement, represents an investment by the airline of more than $100 million.

''We have an ongoing commitment to provide our customers with Grand Class Service now and in the years ahead,'' said Charles L. Demoney, president and chief executive officer of MGM Grand Air.

''These quiet, efficient, high-technology aircraft are central to our plan to keep MGM Grand Air viable and competitive.''

The 757s, introduced in 1982, normally carries 150-230 passengers over medium and long ranges. They are the quietest aircraft in their class and are one of the most fuel-efficient jetliners in the industry. The 757 is the only aircraft of its size approved to serve smaller, noise-sensitive airports due to the aircraft's low noise levels and high-performance takeoff ability.

MGM Grand Air will work with Boeing to create design specifications to give the new aircraft the ambience of an executive jet. The planes will have a redesigned seating configuration along with high-tech avionics, flight-management systems and low-noise characteristics. The jets will also feature gourmet galley service and luxurious amenities for which MGM Grand Air is renowned.

The Boeing planes will eventually replace MGM Grand Air's recently introduced DC-8 Super 62 fleet, allowing those planes to join its Boeing 727 fleet in executive charter service.

MGM Grand Air spend $55 million to purchase and refurbish the DC-8s, investing an average of $162,000 per seat on the 79-seat aircraft to provide passengers with state-of-the-art comforts.

Since it began service three years ago this month, MGM Grand Air has enjoyed unprecedented success providing premium, scheduled airline service at competitive fares. MGM Grand Air provides twice daily, non-stop Grand Class First and Grand Class Coach accommodations on its Los Angeles International to New York Kennedy route in the reconfigured DC-8s.

MGM Grand Air is a transcontinental airline for the executive business travel market. MGM Grand Air, the Marina Hotel, the Desert Inn Hotel and Casino in Las Vegas, and the newly announced MGM Hotel and Theme Park are

subsidiaries of MGM Grand Inc.

FREMONT, CA (SEPT. 5) BUSINESS WIRE - George H. Bruns Jr. has been named chairman of the board of ASCOR Inc., manufacturer and marketer of automatic test equipment for military and commercial avionics and other applications.

Jeffrey Lum, ASCOR president, said Bruns joined the board shortly after the company was founded in late 1989. He replaces Lum as chairman allowing him to devote full time to the presidency.

Bruns was founder and chairman of Systron-Donner Corp., Security National Bank, and president of Envirotherm Illinois Inc.

He is a founder and chairman of Gigatronics Inc. He is a director of Analyte Corp., Peninsula Engineering Group, Sysgen Inc. and Testronics Inc., in addition to operating his own venture capital firm.

Separately ASCOR announced receipt of a contract in excess of $1.2 million from Harris Corp.'s Government Support Systems Division, Syossett, N.Y. ASCOR's equipment is to be used with Harris' Portable Augmentation Test System (PATS), currently being developed for the Canadian Armed Forces.

The initial application is for the Canadian Air Force CF-18 fighter program. Specifically ASCOR will provide the interface switch assembly and digital test electronics subsystem for the Harris system.

Deliveries will begin in early November.

ASCOR is located at 47790 Westinghouse Drive, Fremont, CA 94539. Telephone is 415/490-8919, fax is 415/490-9493.

ORANGE, CALIF. (SEPT. 5) BUSINESS WIRE - Former Orange County Superior Court Judge John L. Flynn Jr. has joined Judicial Arbitration & Mediation Services (J.A.M.S.), an alternative dispute resolution firm with offices throughout California and the Northwest.

He will begin hearing cases immediately.

Judge Flynn comes to J.A.M.S. after eighteen years on the Superior Court bench and two years as a judge with the Central Orange County Municipal Court.

He has extensive arbitration experience, having served as chairman of the Superior Court Arbitration Committee and as a member of the Municipal Court's Arbitration Committee and Mandatory Settlement Conference Department.

Judge Flynn began his law career in Los Angeles in 1958. He served as a Los Angeles deputy city attorney for two years and was a member of the firm of Moss, Lyon & Dunn before becoming a partner in the La Habra, Calif., firm of Lawton, Christiansen & Flynn in 1963. He was appointed to the municipal court bench in 1970 by then-Gov. Ronald Reagan.

Judge Flynn is a graduate of UCLA and received his J.D. from Southwestern University. He has been a member of the American Board of Trial Advocates since 1962.

J.A.M.S. is a private forum for the resolution of civil disputes, offering its services through a panel of over 120 retired judges and justices. J.A.M.S. has 13 offices throughout California, Oregon, and Washington.

HOUSTON (SEPT. 5) BUSINESS WIRE - Santa Fe Energy Resources Inc. announced that it has recently signed crude oil and natural gas exploration and development agreements with the governments of Argentina and Bolivia.

The contracts involve a total of 5.9 million acres.

Two agreements in Bolivia represent Santa Fe Energy's first operations in that country and will permit exploration and production in the Charco Region near the Paraguay Frontier. Seismic operations are anticipated to begin in March 1991.

The Argentina contract is the 4th Production Sharing Contract Santa Fe Energy has signed with the Argentina government since 1988. The contract authorizes preliminary seismic activity in the Province of Formosa to begin in mid-1991.

Santa Fe Energy Resources Inc. is a large independent oil and gas exploration and production company with headquarters in Houston and interests in major fields throughout the United States. Internationally, Santa Fe Energy has interests in several countries including Pakistan, Indonesia, Bolivia and Argentina.

Its stock is traded on the New York Stock Exchange under the sysmbol SFR.

LOS ANGELES (SEPT. 5) BUSINESS WIRE - Executive Software, the 33rd fastest growing privately held U.S. company (per Inc. Magazine's 1989 rankings) officially opened its new world headquarters at 701 N. Brand Blvd.

Glendale Mayor Larry Zarian and Executive Software Chairman and Chief Executive Officer Craig Jensen cut the ribbon at the new headquarters, located in the heart of the city's financial mile.

Assisting were David Kluge, Executive Software corporate affairs manager and Karen Jorgensen, Glendale Chamber of Commerce vice president.

Since doubling its size in 1989, necessitating its new quarters, Executive Software has continued to expand. ''We have been successful for three key reasons,'' credited Jensen, ''the marketing of products that companies need and want, the application of the Administrative Technology researched and developed by L. Ron Hubbard and dedicated staff and executives who produce results!''

''After five years as a consultant in the minicomputer industry, I used L. Ron Hubbard's administrative principles which also include vital information on marketing for me to find out what was truly needed and wanted in the field,'' said Jensen.

L. Ron Hubbard's administrative and managerial technologies are available at WISE (World Institute of Scientology Enterprises) which is a membership organization that promotes the use of Hubbard's administrative principles in the business world.

The chamber's Jorgensen added: ''Executive Software has done a superb job of managing its staff growth. To grow from three employees to 124 in three and a half years, without loss in marketshare or profitability is a phenomenal job of managing this key corporate resource.''

Executive Software produces system management software for users of

Digital Equipment Corp. computers. (Digital is the second largest computer company in the world, next to IBM). By developing and producing the highest quality products and delivering the best customer service in its industry, Executive Software has become the most preferred data center software dealer next to Digital (independent survey conducted by Sentry Market Research).

Founded by Jensen in 1981, Executive Software has steadily increased its marketshare. Its major products, DISKEEPER/Plus and I/O Express, have received major awards for excellence from computer industry trade publications.

With distributors currently in 46 countries, executive Software will soon be featured in Inc. Magazine's 1990 ''fastest growing ... '' list.

#90248b0204 09/05/1990 ~Business Wire

NEW YORK (SEPT 5) BUSINESS WIRE - In major news announcements in New York and San Francisco, Quantum Corp. (NASDAQ:QNTM) Wednesday introduced eight new hard disk drives designed for use in two of the computer industry's major growth markets -- laptop, notebook and portable computers, and low-end personal computer systems.

Quantum unveiled the Go-Drive Series of 2-1/2-inch drives, designed for use in battery-powered laptop and notebook computers and for emerging non-computer storage applications such as printers and fax machines. The Go-Drive 40 and 80 provide 42 and 84 megabytes of formatted capacity, respectively, with embedded SCSI or AT-bus controllers.

Quantum also announced the ProDrive Gem Series, a family of small-frame, low-power 3-1/2-inch products intended for portables and low-end desktop personal computers. With 84 and 168 megabytes of capacity, the Gem Series drives are the highest capacity products to date in the quarter-height profile. Like the Go-Drive products, these drives are available with embedded AT-bus or SCSI controllers.

''The Gem Series 3-1/2-inch drives offer the low power consumption and small package size critical to portable and low-end desktop PC applications, and our 2-1/2-inch Go-Drive products clearly establish new standards in performance and capacity for hard drives in the laptop and notebook markets,'' said Stephen M. Berkley, Quantum chairman and chief executive officer.

''We continue to offer new hard disk drive products that meet the

requirements of major computer systems manufacturers and set new standards in the industry as well,'' he added.

Berkley noted that the introduction of these new products brings to 22 the number of new small form factor drives introduced by Quantum in just one year. The announcement follows by less than three months Quantum's extension of the ProDrive family to include 330 and 425 megabyte drives for the desktop workstation market.

''With the eight new products we are announcing today, Quantum now offers the broadest range of small form factor hard disk drives in the industry including both 2-1/2-inch and 3-1/2-inch products, a variety of frame sizes, and capacities from 42 to 425 megabytes.

''Our family of high quality, high performance products addresses market requirements across the board from laptops and portables to low-end PCs, business PCs, and desktop workstations and file servers,'' he said.

Both of Quantum's new product series meet the power, size and storage capacity requirements of the laptop and portable markets while maintaining the superior performance standards and exceptional quality and reliability for which Quantum's ProDrive Series products are known, according to Mark D. Wilson, Quantum's vice president, portable storage products business.

''All of the Gem Series and Go-Drive products feature average seek times of 19 milliseconds plus Quantum's proprietary DisCache for even

faster data access. Based on proven technology from our highly successful ProDrive Series products, these new drives set a new reliability standard for drives to serve the laptop, portable and low-end PC markets.

''They offer MTBF specifications of 80,000 power-on-hours, the highest in the industry for this class of product. They also provide multiple power-saving modes and improved shock resistance, making them ideal for laptop and portable environments,'' Wilson said.

Evaluation units of both SCSI and AT-bus models of the Go-Drive 40 and the 84 and 168 megabyte ProDrive Gem products will be available in January 1991, with volume production planned for March 1991. Evaluation

units of the 84-megabyte Go-Drive 2-1/2-inch SCSI and AT-bus drives will be available in mid-1991 with mass production 60 days later.

LOS ANGELES (SEPT. 5) BUSINESS WIRE - G. Howden Fraser, managing partner of McKenna & Fitting, has announced that Garrett Cecchini and Gerald Niesar have joined the firm as partners effective Sept. 1, along with Gerald F. Ellersdorfer, who will serve as of counsel.

They will practice in the firm's San Francisco office, which has relocated to 595 Market Street, 16th floor, San Francisco, 94105, telephone 415/243-9100.

Cecchini and Niesar bring a wealth of expertise to the firm in the areas of complex bankruptcy, corporate reorganization, partnership joint venture transactions and corporate securities. Ellersdorfer, an acknowledged bankruptcy specialist, was the author of the comments to Article 9 of the California Uniform Commercial Code.

Robert P. Chamness, administrative partner of McKenna & Fitting's San Francisco office, is pleased about the additions because ''it will allow us to bring more depth of service to our network of clients in the Bay Area, Silicon Valley and Pacific Northwest region.'' The San Francisco office will now number 13 attorneys, with a support staff of 12.

The firm recently emerged from the restructuring of McKenna Conner & Cuneo into McKenna & Fitting and McKenna & Cuneo. McKenna & Fitting, based in Los Angeles and also in Washington, D.C., has a national practice in the areas of business, finance, financial institutions, banking, real estate, corporate securities, tax, bankruptcy, ERISA, employment law and all aspects of civil litigation.

#90248b0259 09/05/1990 ~Business Wire

SANTA ROSA, CA. (SEPT. 5) BUSINESS WIRE - Vacu-dry Co., one of California's largest apple processors, Wednesday announced net earnings of $915,000, or 55 cents per share, on total revenues of $21,412,000.

These results compare with net earnings of $526,000, or 31 cents per share on total revenues of $25,581,000 for the fiscal year ended June 30, 1989.

The company's year-to-date revenues and earnings were affected by the sale of assets related to its packaged apple juice and applesauce business to Knouse Foods of Peach Glen, Pa. The sale included the ''Apple Time'' and ''Apple Land'' brands, inventories, certain machinery and equipment and

other related equipment. The company retained the right to produce and sell bulk apple juice and apple juice concentrate.

The company recorded a net loss of $191,000, or 11 cents per share, on total revenues of $4,167,000 for the fourth quarter ended June 30. This compares with net earnings of $16,000, or 1 cent per share, on total revenues of $5,744,000 for the fourth quarter ended June 30, 1989.

The fourth quarter results reflect a refund from the County of Sonoma, Calif. in the amount of $309,297 (including interest of $27,250) as a refund of disputed property taxes which were paid and charged against earnings in the fourth quarter of fiscal year 1989.

As of June 30, the company had an unshipped contract/order backlog of $9,409,000 versus $7,071,000 on June 30, 1989.

IRVINE, CA (SEPT. 5) BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA) has appointed Carmelo J. Santoro to its board of directors.

Santoro replaces Phillip D. Matthews, who has served on the board since May 1987. Matthews has resigned to devote more time to his various business interests.

Santoro is currently the president and chief executive officer of Silicon Systems, a Tustin manufacturer of mixed-signal integrated circuits (MSICs) used in disk drive, communications and automotive products. He has been with the company since 1982. Silicon Systems was acquired in May 1989 by Tokyo-based TDK Corp., the world's largest manufacturer of audiotapes, videotapes and ferrite products.

With more than 25 years of experience in high-technology manufacturing companies, the 48-year-old Santoro also serves as outside chairman or director on several boards in the electronics industry. In May 1990, he was named chairman of the board at Ashton-Tate Corp., a leading software company based in Torrance.

Santoro's other board positions include those at Paradigm Technology, a San Jose supplier of SRAM memory chips and Dallas Semiconductor, a Texas-based semiconductor manufacturer.

Prior to Silicon Systems, Santoro served as vice president of the solid-state division of RCA, held several senior-management positions at American Microsystems Inc., a custom integrated-circuits company and was group-operations manager at Motorola Inc.

Santoro earned a doctorate in solid-state physics from Rensselaer Polytechnic Institute in Troy, N.Y. and a bachelor of science degree in physics from Manhattan College, Riverdale, N.Y.

His extensive international experience includes active participation in RIMTech (Research Institute for the Management of Technology) and SoCal Ten, both regional networking groups which advance Pacific Rim trade relations. In addition, he serves as American co-chairman of Pacific Technology Roundtable, a forum to cultivate understanding among Japanese, Taiwanese and U.S. high-tech companies.

Santoro will complete the remaining term and stand for re-election at the Oct. 30 stockholder meeting.

AST Research is a leading manufacturer of high-performance personal computers, enhancement and data-communication products.

AST Research corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif. 92713-9658; phone 714/727-4141; fax 714/727-9355.

SAN FRANCISCO (SEPT. 5) BUSINESS WIRE - W. Philip Woodward, president and chief executive officer of San Francisco-based Chalone Inc. (NASDAQ:CHLN), Wednesday announced the appointment of William L. Hamilton as executive vice president and chief financial officer.

Hamilton joined the company in 1985 as the CFO and was named vice president of finance and administration in 1986.

''The promotion to executive vice president is intended to reflect Mr. Hamilton's increased role in the general management of Chalone,'' said Woodward.

Prior to joining Chalone Hamilton was vice president of finance for the Norrell Corp., an Atlanta-based company with annual sales of approximately $300 million. He is a graduate of the University of the Pacific in

Stockton, Calif. A native of the Bay Area, he resides in Mill Valley with his wife and three children, and serves on the board of directors of the Marin Community Foundation.

Chalone Inc. produces, markets and sells premium white and red varietal table wines throughout the United States, Europe and the Far East. The company owns and operates Chalone Vineyard in Monterey County, Acacia Winery in the Carneros District of Napa County, Carmenet Vineyard in Sonoma County, and in conjunction with its joint-venture partner, Paragon Vineyard Co., Edna Valley Vineyard in San Luis Obispo County.

Announced in May was a 50 percent interest in Canoe Ridge Vineyard in Washington State. In 1989 Chalone entered into a cross-investment with Domaines Barons de Rothschild, owners of the Bordeaux estates of Chateau Duhart-Milon, Chateau Rieussec, Chateau L'Evangile and general manager of Chateau Lafite-Rothschild.

     #90248b0615 09/05/1990 ~Business Wire
ALAMEDA, CA (SEPT. 5) BUSINESS WIRE - Ingres Corp., makers of the INGRES Intelligent relational database management system (RDBMS), Wednesday announced shipment of INGRES/Windows 4GL, its fourth-generation language (4GL) graphical programming tool, for the Sun SPARCStation.

The product also will be available for Digital Equipment Corp.'s VAXStation later this month.

INGRES/Windows 4GL dramatically accelerates the creation of software applications on workstations by combining graphical user interface (GUI) editors with an object-oriented 4GL. The visual editors allow developers to build and modify database applications quickly, while the 4GL reduces coding to a fraction of that required by third-generation language (3GL) tools.

''INGRES/Windows 4GL is a major breakthrough for graphic application developers working on advanced workstations,'' said Chris Kenber, executive vice president of sales and marketing.

''Before the introduction of INGRES/Windows 4GL, graphic applications built on workstations could not take full advantage of the hardware's powerful capabilities -- this ground breaking new product starts the real commercialization of the workstation.''

INGRES/Windows 4GL is an open and portable development tool. Applications

created with the product adapt to the ''look and feel'' of the native window system without reprogramming. Support is planned for popular window formats, including Open Look, DEC Windows, OSF/Motif, OS/2, Microsoft Windows, Presentation Manager and Macintosh.

Pricing for INGRES/Windows 4GL for a configuration of two to eight workstation nodes is approximately $1,000 per node.

Ingres Corp. is a world leader in information integration products for mission-critical applications. The company's primary product is the INGRES relational database management system.

Installed on more than 10,000 manufacturing and enterprise-wide commercial systems worldwide, and available on 40 types of computers including PCs and UNIX workstations, the INGRES RDBMS enables organizations to quickly access data spanning a variety of computer systems connected in a network.

CARACAS, VENEZUELA (SEPT. 5) BUSINESS WIRE - Ralph Ungermann, president of Ungermann-Bass, a leading worldwide supplier of computer networking systems to the oil industry, arrived in Venezuela Wednesday to meet with industry and financial leaders.

Ungermann-Bass has installed the most advanced data communications network in South America at the Caracas headquarters of Venezuela's national petrochemical company, Pequiven.

Ungermann-Bass has installed large, international networks for many of the major oil companies. The oil industry overall invested almost $4 billion last year in computer and networking systems in an effort to enhance revenues from the exploration, recovery, shipment and refining of oil.

Most companies in the petroleum producing and refining sector view their computerized information services operations as vital strategic tools with which to compete in the global marketplace.

The Ungermann-Bass fiber-optic network system is the first installation in South America and one of the first in the world that connects a major corporation's information systems over Fiber Distributed Data Interface (FDDI).

The network was jointly designed by Ungermann-Bass and Pequiven's Information Technology Division, and installed by Ingedigit,

Ungermann-Bass' Venezuelan partner. Fiber-optic cable consists of thin strands of glass wire through which intense light is transmitted to carry information on a high-speed network.

This advanced network installation is part of Pequiven's strategy to compete in the global petrochemical industry and develop investment opportunities. The network will help to satisfy Pequiven's increasing needs for high performance and reliability of computing resources. The FDDI network serves all 24 floors of Pequiven's headquarters building via a high-speed fiber-optic link.

Ungermann-Bass' Access/One structured wiring system connects Pequiven's 1,000 workstations, Hitachi and IBM computers and Sun Microsystems graphical engineering workstation computers, using a combination of Ethernet, token ring and Transport Control Internet/Internet Protocol (TCP/IP).

Founded in 1979, Ungermann-Bass Inc. is a worldwide designer and manufacturer of enterprise-wide data networks which allow dissimilar computers to communicate throughout a business organization. Ungermann-Bass is an independent subsidiary of Tandem Computers.

EMERYVILLE, CA (SEPT. 5) BUSINESS WIRE - ViewStar Corp., a leader in network-based Document Image Processing software, Wednesday announced a major new release of the ViewStar System.

ViewStar Release 2.3, to be shipped in early September, includes many new features as well as a variety of enhancements. New features range from optimized wide area networking capabilities and Windows 3.0 support for retrieval and display of images to predefined application layouts allowing easy modeling of complex scanning and Data Entry workflows. Additionally, ViewStar has completed several "under-the-hood" changes which improve overall system performance and capacity, while providing new tools for systems administration and maintenance.

New features and enhancements are included in all parts of the system. ViewStar's VS DataScan toolkit for building multi-user scanning and data entry workflow applications has also been completely revised and enhanced in Release 2.3.

The toolkit now comes with an extensive set of pre-defined application

layouts which allows users to get started more quickly and can now model much more complex scanning/data entry workflows with multiple input and output queues.

VS DataScan also has inherent 3270 windowing with bidirectional data exchange capacity so that organizations can build image-assisted data-entry applications that tie directly to host computer systems. In addition, VS DataScan workflows can be modeled to include and interface to ViewStar's ICR (Intelligent Character Recognition) Server, to partially or entirely automate the data-entry function.

Release 2.3 also includes major enhancements to ViewStar's VS Admin toolkit to optimize distributed system operations over wide area networks. The software's underlying object-oriented filing system has been extended to support the notion of locality and definition of network ''sites,'' so that document requests can be analyzed to determine if the files should be moved prior to providing user access.

With headquarters in Emeryville, ViewStar was founded and incorporated in February 1986 to develop network-based document image processing software for standard computing environments. Its products are sold directly into banking, financial services, insurance, oil and gas, engineering/manufacturing, pahrmaceuticals and utilities markets both domestically and internationally.

NEW YORK (SEPT. 5) BUSINESS WIRE - New Line Cinema Corp. (ASE:NLN) has appointed Michael Lynne as president and chief operating officer, it was announced Wednesday by Robert Shaye, chairman of the board and chief executive officer.

Commenting of Lynne's appointment, Shaye said: ''In naming Michael to the office of president and chief operating officer, our board acknowledges the value of his talent and the potential we believe it promises for our company's growth and its further success.

''Beginning in 1984, as general counsel and board member of New Line, Michael has played an increasingly instrumental role in the company's development. As a full-time member of New Line, I look forward to his continued creative impetus to the company.''

Lynne added: ''Bob Shaye and I have worked together in close collaboration on New Line's behalf for the past five years. I believe that collaboration has contributed to New Line's position as the industry's leading independent motion picture producer and distributor.

Most recently, Lynne was actively involved in New Line's purchase of a significant equity interest in RHI Entertainment Inc., and securing the North American distribution rights to the sequel of ''Teenage Mutant Ninja Turtles.'' He has been a partner with Blumenthal & Lynne, a corporate law firm specializing in entertainment law, since 1971.

Prior to that, he worked with the entertainment law firm of Barovick & Konecky, Esqs., and before that was resident counsel at Embassy Pictures. Lynne is a member of the New York Bar and received his law degree from Columbia University in 1964.

Lynne will be based at New Line's corporate headquarters in New York. He lives in the city with his wife, Ninah, son, Jonathan, and daughter, Elizabeth.

New Line Cinema Corp. is a leading independent producer and distributor of theatrical motion pictures.

NEW YORK (SEPT. 5) BUSINESS WIRE - Sept. 5-- G-III Apparel Group Ltd. (GIII/NASDAQ) today announced preliminary results for the 1990 fiscal year ended July 31.

Final audited results are expected to be available within the next three weeks.

Sales for the year ended July 31, 1990 increased 64% to $162 million from $99 million in Fiscal 1989. While the Company is still reviewing its final operating results, it expects earnings per share within the range of $1.70 and $1.80, an increase which ranges between 30% and 40% above the $1.28 per share earned in Fiscal 1989. Average weighted shares outstanding rose approximately 20% in Fiscal 1990.

Morris Goldfarb, President and Chief Executive Officer noted, ''Although profitability was somewhat lower than originally anticipated, due to pressures in the retailing environment which impacted our margins, we are pleased with the preliminary results of our year end.''

Goldfarb continued, ''We are encouraged by the sales recorded thus far in the first quarter of fiscal 1991, and that our customers are increasing the amount of selling space devoted to leather outerwear.''

G-III Apparel Group designs, manufactures and markets an extensive range of leather apparel including coats, jackets, pants, skirts and other sportswear items. The products are sold under the names G-III, Siena and Cayenne, as well as private labels.

LONDON (SEPT. 5) BUSINESS WIRE - NatWest Investment Bank (NWIB), the investment banking subsidiary of National Westminster Bank PLC, and Dai-Ichi Mutual Life Insurance Co. (DML), Wednesday announced the formation of a separately capitalised joint venture company to promote the use of computer based investment models for Japanese equities and derivative products.

The new company, Dai-Ichi Life County NatWest Investment Management Limited (''DaiNat'') will be headquartered in London and will have a capital of 5 million (British pounds), contributed equally by both DML and NWIB. It will be jointly managed by County NatWest Investment Management (CNIM), the investment management subsidiary of NWIB, and DML.

The board of directors will comprise an equal number of representatives from both companies, and the chairman will be Masao Tsuji, the director chief general manager, investmemt headquarters, of DML. Sir Richard Butler, chairman of CNIM, will be director and Charles Macek, who is a director of County NatWest Investment Management Japan, will be managing director.

The joint venture will both develop and own the investment models and license them to DML and CNIM for the management of Japanese equities and derivatives. DML, which has considerable investments in the Japanese market, will utilise the models for the management of part of their Japanese equity assets and will have principal responsibility for and control over the marketing in Japan.

CNIM will have marketing responsibility elsewhere in the world and be able to utilise the models for the management of Japanese equitities for institutional investors alongside its existing active equity management capabilities. It is anticipated that substantial funds will be managed utilising these models.

Commenting on today's announcement, Howard MacDonald, chairman and chief executive of NWIB, said: ''This is a major step forward for the NWIB Group in Japan and the use of investment technology developed by the innovative team at County NatWest Investment Management.

DML is one of our most important clients and through this joint venture we combine DML's client base and established skills in managing Japanese equities with CNIM's globally focused quantitative investment management knowledge. This unique combination will add to each company's range of investment techniques for successfully managing Japanese equities.''

PINE BROOK, NJ (SEPT. 5) BUSINESS WIRE - PURE TECH International Inc. (NASDAQ Symbols: PURT, PURTU, PURTW) Wednesday announced that a licensee

of the Pure Tech Process, Taiwan Recycling Corporation (TRC), has commenced operations at its post- consumer PET recycling plant in Taiwan.

In early 1989, PURE TECH granted a license to the TRC to construct a plant in Taiwan utilizing the Pure Tech Process, which is used to recycle post-consumer plastic bottles. During 1989 and 1990, the plant was in design and construction phase with extensive technical assistance from PURE TECH.

Under the terms of the license agreement, PURE TECH will receive royalties from post-consumer plastics recycled by the plant in Taiwan until September 1997. The plant has an annual capacity of 16 million pounds.

TRC, the joint venture of Far Eastern Textile and Shin Kong Group, is dedicated to recycling and solving Taiwan's environmental problems related to plastic bottles.

Commenting on this development, David Katz, President of PURE TECH INTERNATIONAL, INC., stated, ''We are extremely pleased with the commencement of TRC's operations. Originally scheduled to begin late last spring, operations were postponed due to delays in obtaining electrical connections from the public power company.''

Mr. Katz added, ''Plastics recycling continues to be a significant issue worldwide. Taiwan's population consumes approximately 250 million PET bottles annually and the TRC agreement is testimony to Taiwan's commitment to a solution. The Taiwan Recycling Corporation, in conjunction with the Taiwan Regional Association of Carbonated Beverage Industries, began the collection of PET bottles in early 1989 with eight collection centers across the island and has sufficient supply to begin operations.''

PURE TECH INTERNATIONAL, INC. is engaged in recycling post- consumer plastic bottles, including polyethylene terephthalate, or ''PET'' bottles (used in the soft drink industry), and high density polyethylene, or ''HDPE'' bottles (containers and jugs used for milk, juice, detergents, and other items) through a joint venture agreement with NICON, Inc. In addition, the Company is involved in the development of new recycling technologies in its pilot plant.

PROVO, UTAH (SEPT. 5) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Wednesday announced two new after-sale programs for United States and Canadian customers, NetWare UpGrade and NetWare UpDate.

These programs replace the existing NetWare Assurance program while offering NetWare users a more affordable and efficient system to manage network growth and stay current with Novell product development.

NetWare UpGrade offers customers two product migration paths. The first is an operating system trade-in program that allows users to move up to a current version of their NetWare product with credit given for the earlier purchase. As an example, moving from Advanced NetWare v2.0a to Advanced NetWare v2.15 would cost US$1155, a savings of 65 percent from the US$3295 list price of Advanced NetWare v2.15. The second NetWare UpGrade program provides a similar discount structure for users moving up from one NetWare operating system family to another with greater functionality. As an example, moving from SFT NetWare v2.15 to NetWare 386 v3.1 would cost US$4745, saving almost 41 percent of the NetWare 386 v3.1 list price of US$7995.

The second new program, NetWare UpDate, is a renewable software maintenance contract that provides new product features, upgrades within a NetWare product family, bug fixes and software patches for the term of the contract. Pricing ranges from US$325 per year for ELS NetWare Level I v2.12 to US$2000 per year for NetWare 386 v3.1. Users upgrading through the NetWare UpGrade program also receive six free months of NetWare UpDate.

Novell plans to combine all relevant product updates and issue them quarterly throughout the year to NetWare UpDate subscribers.

Novell Inc., (NASDAQ: NOVL), develops NetWare systems software products that manage and control the sharing of data across a variety of network computing environments, including computer workgroups, departmental networks and business-wide information systems.

RIVERSIDE, CALIF. (SEPT. 5) BUSINESS WIRE - Former employees of ABBA Rubber Co. Inc., of Los Angeles, and their current employer, Seaquist Co.

of Riverside, have been enjoined pending trial by the Superior Court in Riverside from further solicitation of ABBA's more than 400 active customers and making use of the company's trade secret information regarding these customers.

The court held that ABBA's customer lists and related information have ''independent actual or potential economic value from not being generally known to the public or to other persons who can obtain value from its disclosure or use,'' within the meaning of the Uniform Trade Secrets Act.

The principal Seaquist defendants are J.T. Uribe, who was employed by ABBA as plant manager and later a vice president and general manager from February 1983 to Sept. 11, 1989, and his brother, J.A. Uribe, who was employed by ABBA first as a salesman and then as manager of customer services and sales from 1985 until February 1989. ABBA alleges that the two brothers now are doing business with a third defendant, Roy J. Seaquist, as Seaquist Co.

The plaintiff, ABBA, is a manufacturer of precision rubber rollers and molded products used in machines and manufacturing processes by a variety of companies throughout the nation including makers of copy machines, computers, printed circuit boards, corrugated products, personal products and by still other companies in the brewing and bottling, trucking, automotive, electronics, aircraft and news media industries.

ABBA is a 30-year-old private company that had 1989 sales of $1.6 million, according to Robert J. McDonald, president and chief executive officer. He said that the company's rubber is made in its own mills with time-proven formulas using top-quality raw rubber and chemicals that have earned its national reputation for high quality and excellent service.

Representing the plaintiff, Allan Gabriel, of Earvin, Cohen & Jessup, Beverly Hills, said that his clients industry is highly competitive and developing names of potential customers is sophisticated, difficult, ongoing and expensive. He said that the extensive information maintained in ABBA's secured and limited access customer files represents trade secrets that no competitor could duplicate without similar years of expensive and time-consuming work.

SAN JOSE, CALIF. (SEPT. 5) BUSINESS WIRE - Silicon Valley Group Inc. (NASDAQ/NMS:SVGI) Wednesday announced that it has acquired an additional 1.1 million shares of its majority-owned subsidiary, SVG Lithography Systems Inc. (''SVGL''), from The Perkin-Elmer Corp., in exchange for the issuance to Perkin-Elmer of 499,117 shares of SVG common stock.

SVG acquired 6,310,000 shares of common stock of SVGL on May 15, 1990 concurrently with SVGL's acquisition of the assets of Perkin-Elmer's Optical Lithography Operations. The transaction just completed with Perkin-Elmer increases SVG's share ownership in SVGL from approximately 67 percent to approximately 79 percent of the outstanding shares.

Silicon Valley Group Inc. is a leading supplier of automated wafer processing equipment for the worldwide semiconductor industry.

SVG's product divisions are the Track Systems Division, focused on photolithography processing equipment, and the Thermco Systems Division, offering oxidation, diffusion and low pressure chemical vapor deposition (LPCVD) processing systems.

SVG Lithography Systems Inc. delivers photolithography tools which utilize step-and-scan technology.

SCOTTS VALLEY, CALIF. (SEPT. 5) BUSINESS WIRE - Borland International Inc. (NASDAQ:BORL) announced Wednesday it shipped a new version of Paradox (version 3.5), its award-winning relational database management system, and Paradox SQL Link, a companion product that provides Paradox users easy access to corporate data stored on a wide variety of computer equipment.

''Database users and developers worldwide have adopted Paradox as the new standard for database software,'' said Philippe Kahn, Borland's chairman, president and chief executive officer. ''Now Paradox SQL Link provides immediate and easy access to corporate information, wherever it is located which is essential to the success of any organization.''

Paradox 3.5 works with Paradox SQL Link to allow users to access remote SQL data without learning complex SQL programming. SQL (Structured Query Language) is the industry-standard data language for relational databases residing on minicomputers, mainframes or PC database servers.

''Paradox with SQL Link connects to more data servers than any other

microcomputer database management system,'' said Rob Dickerson, vice president and general manager of Borland's Database Business Unit. ''Paradox allows novice and experienced users to access SQL data without programming, and offers developers the ability to integrate SQL and PAL to create front-end SQL applications.''

Individual and corporate Paradox 3.5 users can share data with other Borland programs, such as Quattro Pro, SideKick for Presentation Manager and C applications developed with the Paradox Engine. In addition, Paradox imports and exports Ashton-Tate dBASE files. Version 2.0 of Quattro Pro, scheduled for shipment later this year, will include enhanced links to Paradox.

Borland International Inc., Scotts Valley, is a leading developer of high-performance software products. Borland offers some of the world's most widely used business applications and software development tools, such as Paradox, Quattro Pro, SideKick, Turbo Pascal, Turbo C, Turbo C++ and Turbo Debugger & Tools.

NEW YORK--(BUSINESS WIRE)--Borden, Inc. (NYSE: BN) Wednesday announced that it has acquired the assets of Astro Industries, Inc., a Morganton, North Carolina-based producer of specialty resins. Terms of the cash transaction were not disclosed.

Astro's product line consists principally of thermosetting specialty resins for use in making decorative laminates, treating and coating textile and paper products, and surface coatings and other applications. Annual sales of approximately $9 million are centered in the Atlantic Coastal states. The company employs about 20 people and has its headquarters, manufacturing and laboratory at the Morganton site.

R.J. Ventres, chairman and chief executive officer of Borden, Inc., said, ''Astro broadens and strengthens our presence in specialty resins, and it offers considerable opportunity to capitalize on synergies with our existing business. For example, Borden's national network of manufacturing plants will help Astro to expand its geographic market reach and we'll each offer a wider range of Astro/Borden products to our customers.''

Astro will be operated as part of Borden's worldwide Packaging and Industrial Products Division. Mr. Ernest St. Louis, one of the founders

of Astro in 1968, will continue as president and general manager.

Borden, Inc. is a worldwide producer of foods, non-food consumer products and packaging and industrial products, with worldwide sales of $7.6 billion in 1989. The company ranks number one in the world in pasta, wallcoverings, forest products adhesives and vinyl foodwrap films; number one in U.S. dairy; number two in salty snacks in North America; and number one or two, nationally or regionally, in 26 U.S. niche grocery product categories.

KANSAS CITY, MO (SEPT. 5) BUSINESS WIRE - Applebee's International Inc. (NASD:APPB) Wednesday announced that it has opened the 142nd unit in its national restaurant system.

The restaurant is located in Kansas City, and is a company-operated unit. Further, three franchisee-operated restaurants are expected to open next week, bringing the system's total to 145.

The company expects to have 165 to 180 units open by year-end 1990. To facilitate its aggressive expansion plans, Applebee's also announced two additions to its franchise development staff.

Laurence M. Bader, director of franchise development, has both international and domestic experience in the franchise industry. He has held development positions with Kentucky Fried Chicken, Marriott Corp.'s Roy Rogers Restaurant Group, and he was director of franchise development for Avis Car Rentals' Lube Fast Oil Change Centers Division.

James A. Crumbaker, real estate manager, has an extensive background in franchise sales and real estate. He has served in a management capacity with Dunkin Donuts of America Inc., McDonald's, and Marriott Corp.

Applebee's International Inc. develops, franchises, and operates a rapidly expanding chain of full service restaurants under the name, ''Applebee's Neighborhood Grill & Bar.'' Known as ''America's Favorite Neighbor,'' the restaurants offer a casual dining concept which includes full bar service and a broad array of menu items for lunch, dinner and Sunday brunch.

IRVINE, CA (SEPT. 5) BUSINESS WIRE - CORTEX Pharmaceuticals Inc. (NASDAQ:CORXU/CORX/CORXW) Wednesday announced receipt of a Phase I Small Business Innovation Research (SBIR) grant in support of its neural-growth-factor research program.

These revenues, initially for approximately $45,000, were extended by the U.S. Public Health Service to support investigation by CORTEX of the growth-factor properties of a proprietary class of compounds that the company is investigating.

Depending on the outcome of the initial studies, CORTEX intends to apply in late 1990 for a Phase II SBIR grant for up to $500,000 to support an extended program in the area.

Neural growth factors are naturally occurring substances responsible for growth and maintenance of cells in the brain. They have also been shown

in laboratory studies to enhance survival and regeneration of brain cells under conditions that are normally lethal.

According to Dr. Raymond T. Bartus, interim president and chief scientific officer at CORTEX, neural growth factors ''have the potential to dramatically alter the way in which medical science deals with brain degeneration.'' He described the grant as ''an important indication of external support for our program in this increasingly exciting area of neuropharmaceutical research.''

CORTEX, with laboratories in Irvine, is focused on discovery and development of therapeutics for age-related neurodegenerative disorders.

LITTLE ROCK, ARK. (SEPT. 5) BUSINESS WIRE - Environmental Systems Co. (NYSE:ESC) reported Wednesday financial results for the quarter ended July 31, 1990.

Net income for common shares from continuing operations, before an extraordinary charge, was $2,909,000, or 18 cents per share, on revenues of $38.7 million. The results compare with net income for common shares from continuing operations of $1,569,000, or 10 cents per share, on revenues of $24.2 million for the third quarter of fiscal 1989.

Net income for common shares from continuing operations before the extraordinary charge, for the nine months ended July 31, 1990 was $7,838,000, or 49 cents per share, on revenues of $107.9 million. During the first nine months of fiscal 1989, net income for common shares from continuing operations was $2,528,000, or 17 cents per share, on revenues of $62.0 million.

An extraordinary charge of $1,801,000, or 11 cents per share, was incurred in the quarter ended July 31, 1990, giving effect to the previously announced tentative settlement of a class action suit against the company and certain officers and directors. The net income for the current quarter, after the extraordinary charge, was $1,108,000,

or 7 cents per share, and the net income for the first three quarters of fiscal 1990, after the extraordinary charge, was $6,037,000, or 38 cents per share.

President and Chief Executive Officer, Jack W. Forrest, said, ''The operating results are in line with our expectations and continue the

recent trend of growth in revenues and earnings.''

Forrest also announced that effective Sept. 15, 1990, A. Reid Allison, vice president and chief financial officer of the company, would begin a reduced-time working relationship with the company in anticipation of his resignation for personal reasons, to be effective Oct. 31, 1990. Forrest noted that the company was reviewing several possible candidates for Allison's position.

Environmental Systems Co. provides integrated hazardous waste management services to private industry, public utilities and governmental entities. These services include chemical analysis, collection, transportation, processing and incineration of hazardous waste.

#90248b0653 09/05/1990 ~Business Wire

PALO ALTO, CA (SEPT. 5) BUSINESS WIRE - Aion Corp. announced new product directions which demonstrates its strong commitment and continued support for IBM's AD/Cycle.

AD/Cycle is the application development framework for IBM's Systems Application Architecture (SAA).

Aion Corp. considers the SAA AD/Cycle as a part of its commitment to deliver solutions central to today's business needs. Aion is committed to the inclusion of expert system products within this framework.

In support of IBM's stragey, Aion announced that Aion Development System (ADS) /b knowledge bases will be stored in and retrieved from the Repository Manager/MVS through ADS's object-oriented architecture. This will include the complete Aion product line.

The Aion Development System is structured to incorporate data definitions that are stored in the repository. This is an extension of ADS' current capability of sourcing external data definitions from popular products, such as DB2 and PL/1.

The Aion Development System has been extended to support a complete graphical interface that is compliant with the IBM SAA specification for the user interface, Common User Access (CUA). The graphical interface created with IBM Easel V1.1 for OS/2 enhances the friendliness and ease of use of applications generated with ADS.

Aion has also announced a CUA compliant interface to the ADS development

environment running under Presentation Manager. This will be available in the first quarter 1991.

Aion's Cooperative Processing Option (CPO) running under OS/2 via the IBM Communication Manager, will be available first quarter 1991. CPO is Aion's PC to mainframe package which brings large gains in the productive use of computing resources by leveraging the investment companies have made in existing microcomputers with data stored in corporate databases.

Aion Corp. develops and markets the Aion Development System, an integrated development environment for building, delivering and maintaining expert system applications. ADS includes a powerful set of inferencing techniques, object-oriented processing and data processing tools for significant productivity gains in IBM PC and mainframe environments.

SOUTH SAN FRANCISCO, CA (SEPT. 5) BUSINESS WIRE - Sega of America Inc. will launch Wednesday a daring national advertising campaign that directly attacks the market leader's weaknesses.

This is the latest stone to be cast by Sega's ''David'' against ''Goliath '' Nintendo of America. As the number two contender in home video game entertainment, Sega is going head-to-head to win the 1990 holiday battle for loyalty, sales, and to prove, once and for all, that ''Genesis Does What Nintendon't.''

'''Genesis Does' top name celebrities; 'Genesis Does' superior game quality with better color, sound, graphics and resolution and 'Genesis Does' games that appeal to adults as well as kids,'' said Michael Katz, president of the consumer products division of Sega of America.

The new TV ads break unusually early this year for a typical holiday-driven campaign. They're scheduled to air in New York after Labor Day, in 10 more major markets beginning Sept. 17, and nationwide via syndication through December. The video game wars will intensify as Nintendo launches its new campaign the same week as Sega.

Created by Bozell Inc., Los Angeles, the spots demonstrate the many advantages Sega's 16-bit Genesis video game system holds over Nintendo's 8-bit.

Sega brings out its full exclusive arsenal of celebrities to do it. The four new ads include cameo appearances by football hero Joe Montana, ''Heavyweight Champion'' James ''Buster'' Douglas and ''Coach of the Year'' Pat Riley -- all of whom have authored Genesis games.

Entertainment mega-star Michael Jackson is also spotlighted in several of the commercials. Footage from his films and videos is spliced back-to-back with matching scenes from his new Moonwalker game.

The targeted national $10 million fall campaign aims to bruise Nintendo's stranglehold over the $3 billion video game industry and fire up fall sales.

The company is also banking on the fact that Nintendo has played its hand with its primary audience, kids between the ages of 8 and 15 in 25 million U.S. households, and can't compete with Genesis which appeals strongly to the 18 to 25-plus adult market.

Michael Jackson also struts out in a 69-second promotional video for his Moonwalker game, premiering in movie theaters nationwide beginning Sept. 21.

PONCE, PUERTO RICO (SEPT. 5) BUSINESS WIRE - Ponce Federal Bank, F.S.B., (NASDAQ: PFBS) announced Wednesday that Miguel D. Lausell, Esq., was elected chairman of the bank's board of directors by unanimous vote of the board.

Lausell, who has served as vice chairman of the bank's board since his appointment to the board in May 1989, succeeds Ramiro L. Colon, Jr., who recently retired as the bank's chairman, president and chief executive officer.

The board also elected Federico Montilla, principal in the San Juan, P.R., based architectural firm of Montilla-Latimer, as vice chairman of the board, succeeding Lausell. Lucas P. Valdivieso, president of Hacienda Dolores, an agricultural concern headquartered in Penuelas, Puerto Rico, was elected secretary of the board of directors.

Valdivieso succeeds Jorge Vendrell, Jr., dentist, and a director of the bank since 1972, who will continue to serve as a director. Ramon Luis

Carro, an agronomist and president of Coamo Investments Corp., will continue to serve the board as its treasurer.

Lausell, 46, is a practicing attorney in San Juan, P.R., specializing in tax, corporate and banking law. He is a former president and chief executive officer of the Puerto Rico Telephone Co. and was a professor of law at the Interamerican University School of Law in Puerto Rico.

Having received a bachelors degree from Villanova University, Lausell attended the University of Puerto Rico Law School where he graduated with an LL.B - Magna Cum Laude and was distinguished as the Most Outstanding Student in the Field of Civil Law. Lausell later earned an LL.M degree at Harvard Law School.

Lausell and his wife Marisol (Archilla) live in San Juan with their three daughters.

Ponce Federal Bank, F.S.B., the third largest thrift institution in the Commonwealth of Puerto Rico, is a federally chartered, full-service financial institution headquartered in the southern coastal city of Ponce. As of June 30, 1990, the bank had both tangible and core capital ratios equal to 4.62 percent of adjusted total assets and a risk-based capital ratio equal to 8.10 percent of risk-weighted assets, all of which are in excess of the minimum OTS requirements of 1.5 percent and 3.0 percent of adjusted total assets and 6.4 percent of risk-weighted assets, respectively.

The bank maintains an Island-wide network of 26 branches as well as executive offices in both Ponce and Hato Rey, the financial center of metropolitan San Juan.

SANTA ANA, CA (SEPT. 5) BUSINESS WIRE - Microsemi Corp. Wednesday announced an expansion of its Plan of Disposition, which was adopted in August 1989.

In this final phase, Microsemi will dispose of its non-core businesses which are not synergistic with its discrete-semiconductor business. Historically, Microsemi has achieved steady profitable growth in its core business. Recent industry events present opportunities for Microsemi to

significantly expand its primary businesses.

This action has been taken to enable the company to concentrate its resources on its diode and transistor business. The revisions to the plan include an extension of the plan to include an extension of efforts to dispose of two remaining businesses previously targeted for disposition as well as expansion of the plan to include all but one of the non-core businesses.

As a result of this action, the company will record a charge to earnings in the current quarter in the range of $9 million to $11 million before reductions for the tax benefits associated with the dispositions. This reserve is estimated to cover losses and associated costs of these dispositions as well as a write-down of certain non-affiliate investments.

The final dispositions will include liquidation of certain business units and the sale of others at lower sale prices than originally thought recoverable. General business conditions over the past six months and the desire to accelerate the disposition of non-performing businesses have made this additional write-down a necessity.

Potential benefits of this planned restructure will be generation of between $6 million and $10 million of cash over the next 12 months and a return to the more predictable performance of the company's basic discrete-semiconductor business. The company anticipates that once having disposed of these non-core businesses it would return to its more profitable days.

Microsemi is a leading supplier of high-reliability discrete semiconductors, microelectronic hybrid and surface-mount assemblies and hi-rel screening and testing services for the electronics, computer, telecommunications, defense/aerospace and medical markets.

MECHANICSBURG, PA (SEPT. 5) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ:CONT) (''CMS'') announced Wednesday that it has acquired 80 percent of the common stock of Communi Care of America Inc., Pro-Rehab Inc. and an affiliated entity (collectively, ''Communi-Care/Pro-Rehab'') of Boone, N.C.

Communi-Care/Pro-Rehab provides physical, occupational and speech therapy services on a contract basis, principally to nursing homes, primarily in 17 southeastern states.

The purchase price for the stock of Communi-Care/Pro-Rehab is payable in installments of cash and CMS common stock over five years. For the six months ended June 30, Communi-Care/Pro-Rehab had net operating revenues of approximately $11.7 million.

Kenneth Hubbard, founder, CEO, and a principal stockholder of Communi-Care/Pro-Rehab prior to the purchase by CMS, will continue as president of each of the acquired companies.

Communi-Care/Pro-Rehab's remaining management will also continue to operate and strategically grow the new CMS subsidiaries.

Continental Medical Systems Inc. is the nation's leading independent provider of comprehensive medical rehabilitation with annualized revenues currently exceeding $300 million.

CMS operates 12 rehabilitation hospitals and two specialty rehabilitation facilities for a system total of 962 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas.

CMS has 10 community-based rehabilitation hospitals under construction in Arkansas, California, Colorado, Indiana and Texas. Braintree Hospital is also a part of the CMS system and operates 13 outpatient rehabilitation centers and manages two acute care rehabilitation units.

CMS supplies physical, occupational and speech therapy services in more than 26 states through its California Physical Therapy Inc.; VTA Management Services Inc.; Pro-Therapy of America; RehabWorks Inc.; and most recently Communi-Care/Pro-Rehab, which is located in North Carolina and serves the Mid-Atlantic and Southeastern regions.

WASHINGTON (SEPT. 5) BUSINESS WIRE - In its continuing efforts to lead the fight against software piracy, the Software Publishers Association (SPA) announced Wednesday the release of a software program, SPAudit, to complement the SPA Self Audit Kit.

The newly released product is an MS-DOS program that searches the hard disks of computers for over 650 of the most common programs used in business today. SPAudit is available free of charge to businesses, government offices and educational institutions.

SPAudit, which accompanies the Self Audit Kit, is designed to help an organization inventory commercial software programs that are on the organizations hard disks. After all PCs have been ''SPAudited,'' the program will print a listing that indicates how many copies of each application were found. Users may compare this report to purchase records to determine what software programs are authorized and which ones are unauthorized.

Since the release of the Software Self Audit Kit in Feb. 1990, the SPA has received over 5,000 requests from corporations interested in monitoring their internal software practices. The Self Audit Kit outlines the recommended steps for a self audit including suggested corporate policies, a memorandum to employees, and information about the copyright law.

''We are pleased to provide corporate America with a useful tool to help monitor their internal sofware practices, so that companies may become software legal'' said R. Duff Thompson, vice president and general counsel of WordPerfect Corp. and chairman of the SPA Copyright Protection Fund. ''Software piracy is a serious problem which directly affects publishers' research and development efforts to produce innovative, productive and efficient software products for the future.''

''During the beta-test period for SPAudit, the response was overwhelming '' said SPA Executive Director Ken Wasch. ''MIS managers have long-since recognized the difficulty of managing their software resources and staying within the law. We are now providing them with the tools they have requested.''

The Software Publishers Association, with offices in Washington and Paris La Defense, is the principal trade group of the PC software industry. Its over 670 members represent virtually all of the leading publishers in the business, consumer and education software markets.

NEW YORK (SEPT. 5) BUSINESS WIRE - The Horn & Hardart Company (AMEX: HOR) Wednesday announced that it has completed the sale of its Bojangles' Chicken 'N Biscuits restaurant chain to a company organized by Sienna Holdings and Interwest Partners.

The transaction was concluded on August 31.

On August 29, Horn & Hardart announced that it had entered into an

agreement to sell the Bojangles' chain to the group for $20 million principal amount of Horn & Hardart's 14 percent Senior Subordinated Debentures. In addition to the bond exchange, under the terms of the transaction as consummated, the purchaser assumed an additional $4 million in liabilities and capital leases, bringing the total consideration for the transaction to approximately $24 million.

With the sale of the Bojangles' chain, the Company's divestiture of H&H Restaurant Corp., organized in 1989 to operate its East Coast restaurant operations, is substantially complete. Horn & Hardart's remaining East Coast restaurant operation is comprised of its five Tony Roma's restaurant locations in New York City, the sale of which is under negotiation.

SCHENECTADY, NY (SEPT. 5) BUSINESS WIRE - GE Power Generation has signed a contract worth more than $30 million with Korea Heavy Industries Construction Co., LTD. (KHIC), to supply power plant equipment for the Poryong Power Station, located south of Seoul in the Republic of Korea.

The order announced Wednesday is for the supply of two coal-fired 550-megawatt steam turbine-generators for units 5 and 6 of Korea Electric Power Corp.'s (KEPCO) Poryong Power Station. GE signed another contract in April 1989 for the supply of two 550-megawatt steam turbines for Poryong 3 and 4. The contract also calls for GE to supply four boiler feed pump turbines and related equipment.

This order comes on the heels of another Korean contract GE announced last week worth more than $200 million. That contract is with KEPCO and calls for the supply of gas and steam turbine-generators for a power station to be built on the island of Ildo, west of Seoul.

The GE steam turbine-generators for the new contract are of a highly efficient design, allowing greater electrical output for a given amount of fuel than other steam turbine-generators of similar size and configuration.

Two 550-megawatt steam turbines could produce enough power for the city of Phoenix.

The power plant equipment will be jointly manufactured with KHIC. GE will supply the 550-megawatt steam turbines and generators from its manufacturing facilities in Schenectady, and the boiler feed pump turbines from its manufacturing facilities in Fitchburg, Mass.

The first steam turbine-generator unit from this latest order is scheduled to begin commercial operation in February, 1994, followed by the second unit in June of the same year.

GE is the world's leading manufacturer and supplier of power generation systems and services, including steam turbines, gas turbines, STAG (TM) combined-cycle systems, cogeneration power equipment and a variety of uprate, upgrade and power plant maintenance programs. Through a subsidiary component, GE Environmental Systems, GE provides flue gas desulfurization and other air purification systems.

VANCOUVER, BRITISH COLUMBIA (SEPT. 4) BUSINESS WIRE - Breakwater Resources Ltd. (NASDAQ: BWRLF; TSE, VSE: BWR) has acquired all of the shares of Bathurst Base Metals Inc. through the amalgamation of Bathurst with a wholly-owned subsidiary of Breakwater.

Shareholders of Bathurst are entitled to receive one share of Breakwater for every 3.75 shares of Bathurst. The principal asset of Bathurst is a 100 percent interest in the Caribou Mine, located near Bathurst, New Brunswick.

The transaction has resulted in the issuance of 4,455,460 new shares of Breakwater and Breakwater has reserved approximately 1.1 million additional shares for issue pursuant to convertible security obligations assumed from Bathurst.

Restructuring of the Caribou Mine's Cdn $30 million, non-recourse debt has been agreed to by Breakwater, Bathurst and two Australian banks. Breakwater has also agreed to fund the development of the Caribou Mine to completion.

The plan provides for deferral of principal and interest payments on the debt and allocates 80 percent of the mine's available cash flow to repayment of principal and interest.

The principal is to be repaid by April 30, 1996 and the interest repaid by April 30, 2000. The Caribou Mine had also issued silver certificates totalling Cdn $15 million. Interest payments on the silver certificates are presently being deferred.

Mining, mine development and milling are currently underway at the Caribou

Mine. Concentrate shipments commenced in May and production is expected to reach full capacity this year.

With the acquisition of the Caribou Mine, Breakwater Resources Ltd. has become a significant Canadian zinc producer. Breakwater owns 100 percent of the E1 Mochito zinc mine in Honduras and 49 percent of the Cannon gold mine in Washington.

The company is also earning a 70 percent interest in the Estrades zinc/copper/gold mine in Quebec by developing the property to production. Commercial production will commence this fall.

MINNEAPOLIS, MN (SEPT. 5) BUSINESS WIRE - Tricord Systems Inc. Wednesday announced the PowerFrame Model 40/33, based on Intel's 33MHz 486 processor.

This new PowerFrame Model secures Tricord's position as the super-server industry's price/performance leader.

The improved performance provided by the 33MHz 486 microprocessor will make the PowerFrame 40/33 the fastest super-server available. The 33MHz 486 processor is 30 percent faster than the 25MHz processor. The performance of the system bus alone will increase from 100 to 132MBytes per second.

The PowerFrame 40/33 is Tricord's next step in providing its customers with appropriate tools for today's computing needs. The PowerFrame features system scalability and seamless upgrade advantages, allowing users to increase power and capacity to meet growing computing demands.

PowerFrame uses who are not currently running client/server applications can purchase a system today for current needs, then easily and efficiently add the necessary processing power and storage capacity when these applications come on-line.

The PowerFrame rivals the application power of a minicomputer at a fraction of the cost by incorporating the highest-performance system bus, multiple processors, disk arrays, and Intel's latest 486 and 860 technologies. The server family includes an Extended Industry Standard Architecture (EISA) open systems bus to accept industry standard hardware such as Token-Ring or Ethernet network adapters. The PowerFrame supports OS/2, NetWare, and SCO UNIX operating systems.

The PowerFrame 40/33 is the newest addition to Tricord's product line. Other Models include the 30/25, the 40/25, the 44/25, and the 48/25, all based on Intel's 25Mhz microprocessor.

The PowerFrame Basic Model 40/33 includes 256KBytes second level cache, 385MBytes disk drive, and 8MBytes of main memory. It will be available during the fourth quarter of 1990, with a suggested retail price of $30,490.00.

Tricord Systems Inc. is a privately held company headquartered in Minneapolis, MN. It was founded to design and manufacture a new generation of network servers, based on advanced industry standards, to meet the increasing performance and reliability requirements of client/server and local area network computing.

HORSHAM, PA. (SEPT. 5) BUSINESS WIRE - Decision Data Inc. has announced an agreement valued at over $5 million to provide workstations and remote cluster control units to the St. Louis, Mo., headquartered Enterprise Rent-A-Car.

The purchase is part of a program to automate operations at Enterprise by linking more than 700 rental offices throughout the United States to five IBM AS/400 minicomputers at the St. Louis Data Processing Center.

Decision Data 3596 and 3597 workstations will be used both at the rental counters for processing customer rentals and returns and to perform administrative functions at the rental and group administrative offices. Each office will be linked to the IBM host computers in St. Louis by Decision Data 5794 remote control units. Implementation at all offices is scheduled for completion by the end of 1990.

''We selected Decision Data peripherals not only because of their favorable pricing, but also the company's ability to provide the complete set of twinax attachable products we need for rental office automation,'' said Enterprise Rent-A-Car Senior Vice President Marcus T. Cohn.

''Other reasons were Decision Data's ability to provide support at our remote sites through its service division and the ability to deliver the proper types of equipment to each office per our implementation schedule.''

According to Cohn, automating the company's rental operations will improve customer service by enabling faster rentals and returns, improving billing computations and providing the ability to retain and reuse information for repeat customers. Other benefits, he says, will include the ability to process information necessary to numerous marketing functions and to provide rate and fleet data necessary for maximum yield management.

''By reducing the administrative burden on our front-line employees, we will allow them to focus more on customer service, which remains our most important priority,'' Cohn said.

With sales approaching $1 billion, Enterprise is the nation's fifth largest rental company. Decision Data Inc. is the largest independent supplier worldwide of IBM midrange systems, products and services.

#90248b0697 09/05/1990 ~Business Wire

FREMONT, CA (SEPT. 5) BUSINESS WIRE - DSP Technology Inc. (NASDAQ:DSPT DSPTU) announced Wednesday that net income for the second quarter ended July 31, 1990, was $140,000, or 7 cents per share, on net sales of $1,407,000, compared to net income of $120,000, or 6 cents per share, on net sales of $1,596,000 in the same quarter last year.

F. Gil Troutman, president, said, ''The 17 percent gain in second quarter net income reflects improved gross margins and lower operating expenses which more than offset reduced revenue.''

For the first six months of fiscal 1991, net income was $194,000, or 10 cents per share, on revenues of $2,648,000 versus net income of $226,000, or 11 cents per share, on revenues of $3,258,000 last year. Troutman said that the decline in net sales and net income in the first half of this year was primarily due to lower product shipments which more than offset higher service revenue.

Troutman added that during the quarter, DSPT received an order of approximately $400,000 for multiple combustion analysis systems and, separately, a $241,000 contract for the maintenance of safety test equipment from a major domestic automotive manufacturer.

He said, ''These contracts, coupled with other orders, including a

previously announced $1,200,000 order for automotive safety test equipment have helped increase DSPT's backlog to over $2,500,000 at the end of the second quarter compared to approximately $700,000 at the beginning of the fiscal year.''

DSP Technology Inc. designs, manufactures and markets data acquisition systems which enable its customers to capture data from occurrences lasting from millionths of a second to several days.

#90248b0703 09/05/1990 ~Business Wire

SYDNEY, AUSTRALIA (SEPT. 5) BUSINESS WIRE - The economic philosophy behind Australia's 1990/91 Federal Budget seems to be that with the slowing in economic activity there is no need to further tighten government spending.

The strategy is to let the slowdown take its course, keep real growth in outlays and revenues small, and sit tight, according to Westpac Banking Copr. (NYSE:WBK), Australia's largest financial services group.

The September issue of Westpac's monthly economic publication Market Insights indicates that with outlays expected to rise 1.1 percent in real terms (0.6 percent before adjustment for various one-off effects that mask the underlying trends), the budget is mildly expansionary. This expansionary effect is reinforced in total public sector spending, on a national accounts basis, grows at the official forecast rate of 2.8 percent, the first real increase in outlays since the pre-''Banana Republic'' budget of 1985/86.

With the June quarter national accounts confirming that the Australian economy is slowing rapidly, the question that remains is just how deep and sustained it will be.

The budget forecasts net export growth to cushion output against flat domestic spending Westpac expects domestic spending to fall by one percent but agrees that a soft landing is likely and forecasts real GDP growth of 1.2 percent for 1990/91.

While the situation in the Persian Gulf complicates the outlook for Australia's trade performance (as well as for domestic activity and inflation), on balance, as a net energy exporter, Australia is likely to be slightly ahead in the medium term if crude oil prices settle at around

USD25/barrel in current prices.

The September issue of Market Insights also includes a special two-page report on the Australian property market which documents the factors behind the downturn and outlines the prospects for key sectors of the market.

Westpac Banking Corp. is an international financial services group headquartered in Australia, with operations extending offshore to 29 countries.

#90248b0706 09/05/1990 ~Business Wire

LEBANON, TN (SEPT. 5) BUSINESS WIRE - Cracker Barrel Old Country Store Inc. (NASDAQ/NMS:CBRL) Wednesday announced results for its fiscal year ended Aug. 3, 1990.

Net sales for fiscal year 1990, were $225.5 million, compared with net sales of $169.5 million in fiscal 1989. Pre-tax income was $24.1 million compared with $16.9 million last year. Net income was $15.3 million, or $1.07 per share, compared with $10.9 million, or 85 cents per share, a year ago.

Net sales for the fourth quarter ended Aug. 3, 1990 were $72.0 million, compared with net sales of $50.9 million in the fourth quarter last year. Pre-tax income was $10.7 milion, compared with $7.5 million. Net income was $6.8 million, or 47 cents per share, compared with $5.0 million, or 36 cents per share, a year ago.

Results for the fiscal year and fourth quarter ended Aug. 3, 1990, include 53 and 14 weeks, respectively, compared with 52 and 13 weeks a year ago. All share and per share amounts reflect the three-for-two stock split effected as a 50 percent stock dividend in April 1990.

Commenting on the results, Dan W. Evins, chairman and president, said, ''Comparable 52-week same store restaurant sales for fiscal 1990 increased 8.0 percent, including 5.2 percent in real terms and same store gift shop sales increased 13.4 percent. The additional week of operations accounted for a 3.0 percent increase in sales and the balance of the sales increase was attributable to new stores.

''For the 13 comparable weeks of the fourth quarter of fiscal 1990, same store restaurant sales increased 7.3 percent, including 5.4 percent in real terms and same store gift shop sales increased 9.6 percent. The additional week in the fourth quarter of fiscal 1990 increased sales for the period by 11.0 percent. New stores accounted for the balance of the sales increase.

''Net income for fiscal 1990 was favorably affected by the increase in sales, further improvements in our store operations, generally milder weather in January and February and the additional week in the fourth quarter.

''Fifteen new stores were opened during fiscal 1990. At Aug. 3,1990, 88 stores were in operation. Our plan is to open 18 new stores in fiscal 1991, two of which have already opened,'' Evins concluded.

Headquartered in Lebanon, Cracker Barrel Old Country Store, Inc. operates 90 restaurants located in Tennessee, Georgia, Kentucky, Indiana, South Carolina, Florida, Alabama, North Carolina, Ohio, Virginia, West Virginia and Illinois.

STAMFORD, CT (SEPT. 5) BUSINESS WIRE - CUC International Inc. (NYSE:CU) Wednesday announced second quarter results for the period ending July 31.

Earnings per share for the quarter increased 240% to 17 cents from 5 cents for the same period a year ago, based on 23.2 million and 21.7 million weighted average shares and dilutive equivalent shares outstanding, respectively. Net income was $3.9 million, up from $1 million for the prior year's second quarter. Revenues increased 23% to $110.6 million from $90.1 million for the same period last year.

Earnings per share for the six months ended July 31, increased to 58% to 30 cents, compared to 19 cents for the same six month period a year ago, based on 23.2 and 21.1 million weighted average shares outstanding. Net income was $6.9 million, up from $4 million a year ago. Revenues increased 23% for the comparable six month period to $215.4 million from $174.6 million a year ago.

During the quarter, the company bought three local dining clubs for approximately $6.5 million. Walter A. Forbes, chairman and CEO of CUC International, commented that these purchases brought the company

approximately 200,000 additional members for its dining clubs and a new distribution channel for the company's products.

''These localized dining and lifestyle programs give us a strong base for our newest distribution channel of localized direct marketing. Further, the discount lifestyle business is one which is gaining both consumer and merchant acceptance. It's a natural extension of our existing business. We will be able to add national features to a program which previously was principally local and, in turn, bring local features to our existing national credit card and bank programs.''

Forbes continued, ''We continue to see strong growth trends in our business. During the quarter, we added approximately 600,000 net new memberships, bringing our total to 14.8 million compared to 12.9 million a year ago. Dining memberships are now at 600,000 compared to 50,000 a year ago. We also added a major new credit client, American Express, for whom we began marketing our new Home Resource product in July.''

CUC International is a leading membership services company, presently providing more than 14 million consumers with access to a variety of services including home shopping, travel, insurance, auto, dining, checking account enhancements, and extended warranties.

KNOXVILLE, TENN. (SEPT. 5) BUSINESS WIRE - Plasti-Line Inc. (NASDAQ:SIGN) announced Wednesday that Toyota Motor Sales, U.S.A. Inc. has issued it a letter of intent to purchase dealership identity signage and services from Plasti-Line in connection with Toyota's nationwide dealer reimaging program.

James R. Martin, president of Plasti-Line, reported that Plasti-Line is expected to be the sole supplier of signs for this project. Toyota has indicated that their overall budget for the sign portion of the program is $20 - $25 million. Target date for introduction of the new sign program is early October.

Toyota has approximately 1,200 dealerships independently owned and operated by their franchise owners and has targeted this reindentification to be completed by 1994. Plasti-Line's involvement in this project remains subject to the negotiation and execution of a definitive contract.

Martin stated, ''We are very proud to have been selected by Toyota, one of the premium automobile manufacturers in the world, and a company with a

reputation for outstanding quality products.

''Although this new business will probably not materially impact the company's sales or earnings this year, we continue to be cautiously optimistic that the remainder of this fiscal year will be an improvement in sales and earnings over the first six months, even though we are continuing to experience the previously announced slowdown in shipments to our regular customers.''

For the six months ended July 1, 1990, Plasti-Line reported sales, net income and earnings per share of $40,107,000, $358,000 and 10 cents per share, respectively.

Plasti-Line manufactures, installs and maintains internally illuminated indoor and outdoor signs for corporate identification programs.

SALT LAKE CITY (SEPT. 5) BUSINESS WIRE - Evans & Sutherland Computer

Corp. (NASDAQ:ESCC) Wednesday announced that they have been selected for negotiations to become the visual system supplier to CAE-Link for the next generation of NASA space flight training systems.

The image generators will be procured by CAE-Link Corp.'s Link Flight Simulation Division to meet requirements under it's Training Systems Contract with NASA.

The image generator subcontract will be awarded in phases over the next six years. The initial award is expected to be about $19 million and, if all options are exercised, could total approximately $60 million. First deliveries are scheduled for 1991.

The program calls for the installation of the image generation systems at NASA's Johnson Space Center in Houston in the Shuttle Mission Training Facility and the future Space Station Training Facility, where astronauts currently receive shuttle training and where they will rehearse future space station operations.

Under the anticipated contract, Evans & Sutherland will initially provide five image generators, with options for eight additional image generators, and associated database and support services. The selection is the first for the company's new ESIG-3000 image generator which was announced in June of this year.

''We feel that our selection by CAE-Link validates the new direction set by the ESIG-3000, and continues our history of involvement in space simulation,'' said Bob Schumacker, president of the Simulation Division. The company has provided visual systems to several other NASA facilities where they are used in shuttle engineering and advanced space and aeronautical research.

Evans & Sutherland designs, builds, sells and services interactive computing systems for vehicle training and for general engineering and scientific applications.

CLEVELAND, OH (SEPT. 5) BUSINESS WIRE - LDI Corporation (NASDAQ: LDIC) today announced record financial results for the second quarter and the six months ended July 31, 1990.

Net earnings for the second quarter increased 34 percent to $2,458,000 from $1,836,000 for the same period in 1989. For the six months, net

earnings totaled $4,522,000, an increase of 41 percent from the $3,209,000 reported for the comparable period in the prior year.

On a per share basis, second quarter earnings were 38 cents, an increase of 15 percent over the prior year's second quarter, on 15 percent more average shares outstanding. For the six months, earnings per share totaled 70 cents versus 60 cents earned in the comparable period in 1989, on 20 percent more average shares outstanding. The increase in average shares resulted from a common stock issue of 1.3 million shares, completed during the second quarter of 1989.

Revenues for the second quarter increased 13 percent to $98,756,000 compared with $87,170,000 for the same quarter last year. Revenues for the six months were $180,158,000, a 21 percent increase from the corresponding period last year when revenues totaled $148,580,000.

Commenting on the second quarter performance, LDI chairman and chief executive officer Robert S. Kendall, said, ''These results demonstrate margin improvement and continued success of our strategy to diversify our product and services to customers, and to maintain a strong, conservative financial foundation to support those services. ''Our product and technical support array in data processing, telecommunications, high tech equipment, and selected capital goods is now one of the broadest available anywhere,'' Kendall said. ''All major business segments have maintained good performance levels during the first six months of 1990.

''At the same time, our strong balance sheet gives us great flexibility for the future,'' Kendall added.

LDI Corporation, with headquarters in Cleveland, leases and sells a full range of new and used data processing, telecommunications and other high technology equipment, and provides maintenance, disaster recovery, technical support and related services. The Company's products include mainframe and mid-range central processing equipment and peripheral devices, as well as personal computers, telecommunications equipment, computerized medical diagnostic systems, and selected capital equipment. LDI is also an active dealer in the secondary market for used data processing, telecommunications and related equipment.

DALLAS (SEPT. 5) BUSINESS WIRE - Peerless Mfg. Co. (OTC) Dallas

Manufacturer of separators and filters for the petroleum and chemical processing industries and environmental equipment announces earnings of $1.93 per share for its fiscal year ended June 30, compared to earnings of 7 cents per share in the previous year.

These earnings are based on the increased number of shares existing July 20, when a three for two stock split was effected. Using the shares actually outstanding at June 30. Earnings per share were $2.90 and 10 cents for fiscal 1990 and fiscal 1989, respectively.

Both sales and earnings figures were record numbers for the company. During fiscal 1990, the company benefited from the utilization of a net operating loss carryforward, which resulted in an extraordinary credit of 41 cents per share.

Peerless' backlog of orders at July 1, 1990 was about $12,700,000 compared to a backlog of some $10,822,000 on July 1, 1989.

#90248b0730 09/05/1990 ~Business Wire
FORT WORTH (SEPT. 5) BUSINESS WIRE - Pier 1 Imports Inc. (NYSE:PIR) announced Wednesday that net income for the company's second quarter ended

Sept. 1, 1990 is expected to be 7 cents to 8 cents per share, down from last year's results for the second quarter ended August 26, 1989, when the company's net income available to common shareholders was $7,227,000 or 20 cents per share.

''Sales for the quarter were below our levels of expectations with August sales of existing stores estimated to be 7 percent to 8 percent under last year's results,'' said Clark A. Johnson, chairman and chief executive officer.

''The August slowdown coincided with problems in the Mideast as customers deferred home furnishing purchases until the situation stabilizes. In particular, California and the Northeast were areas of slower sales activity with furniture and related accessory items feeling the major impact of diminished store traffic in affected markets,'' Johnson stated.

Sales for the second quarter will be released on Sept. 12, 1990 and earnings for the quarter will be released Sept. 27, 1990.

The company also announced that it expanded the Pier 1 Imports stock repurchase program from 2 million shares to 4 million shares. Since Dec., 1989, when the program was intitially announced, the company has acquired approximately 700,000 shares above normal requirements.

Pier 1 Imports is a specialty retailer of decorative home furnishings and related items with 535 stores in North America.

MIAMI (SEPT. 5) BUSINESS WIRE - Neolens Inc. (NASDAQ:NEOL), a Miami based company, announced Wednesday that it will debut a new tintable, abrasion resistant ophthalmic polycarbonate lens at a major trade exposition in California.

Neolens' finished single vision polycarbonate lens, already recognized for its superior optics, will soon offer superior abrasion resistance and tintability when coated with the company's new proprietary coating ''Neocoat Gold.''

Polycarbonate lens coatings typically do not tint to sunglass shades, but ''Neocoat Gold'' tints from fashion shades to sunglass shades in minutes

using standard dyes and techniques. Combined with exceptional abrasion resistance on both front and back lens surfaces, ''Neocoat Gold'' will enable Neolens to provide the optical industry with a high quality 76mm finished single vision polycarbonate lens.

Neolens, a manufacturer of polycarbonate ophthalmic lenses, will introduce ''Neocoat Gold'' at the Vision Expo West in Anaheim, Calif. Sept. 7-9. It will mark the company's first participation in this major trade show.

WEST BEND, WIS. (SEPT. 5) BUSINESS WIRE - Gehl Co. and Allied Industrial Workers Local 579 Wednesday announced the ratification of a new three-year contract covering the company's 550 hourly West Bend plant employees.

Gehl Co. is a leading manufacturer of agricultural and light industrial and construction equipment.

The contract is structured to support implementation of the company's new programs to become competitive worldwide. These world class manufacturing programs include multiple skill development of employees, cellular manufacturing, and the creation of focused factories that produce similar types of equipment. The agreement also includes provisions for improvements in wages and benefits, and the phase-out of a two-tiered wage system by Jan. 1, 1992.

''The agreement is a win-win situation for all of us, a real partnership '' said Bernie Nielsen, Gehl president and chief executive officer. ''It marks a new beginning for us as we put programs into place that will improve the quality of work life here at Gehl Co., allow us to better serve our customers and to compete with the best capital goods equipment manufacturers in the world.''

Gehl Co. (NASDAQ:GEHL) produces a broad line of niche capital goods equipment used worldwide in the agricultural and light industrial and construction industries. Founded in 1859, the company is headquartered in West Bend, with manufacturing facilities in West Bend; Yankton and Madison, S.D.; and Myerstown, Pa.

FARMINGTON, CONN. (SEPT. 5) BUSINESS WIRE - Otis GmbH (Otis Germany) has signed an agreement in Berlin to acquire a majority interest in an elevator manufacturer in East Germany.

The company, Berliner Aufzugs- und Fahrtreppenbau GmbH (BAF), with 1,000 employees, is a subsidiary of TAKRAF Schwermaschinenbau AG, a government-owned conglomerate.

BAF, which supplies and services electric passenger and freight elevators in East Germany, operates two manufacturing facilities in East Berlin and several branch offices in East Germany. The operations will manufacture, install and maintain elevator equipment using Otis designs, manufacturing technology, and installation and maintenance methods.

''With Germany moving rapidly toward full unification, this acquisition positions Otis to capitalize on emerging growth opportunities in the region,'' said Otis Executive Vice President and Chief Operating Officer J.P. van Rooy.

Otis, the largest elevator manufacturer in Western Europe, has been expanding its presence in Eastern Europe. In recent weeks the company announced separate agreements to establish manufacturing joint ventures in the Soviet Union and Hungary.

Otis is the world's largest elevator company. Revenues in 1989 totaled $3.3 billion, of which 70 percent came from outside of the United States. Otis employs 50,000 people at operations on every continent, including more than 20,000 in Europe, and offers its products for sale in 163 countries.

Otis is a wholly owned subsidiary of United Technologies Corp. United Technologies provides a broad range of products and support services to the aerospace, building systems and automotive industries.

The Hartford, Conn.-based corporation's best known products, in addition to Otis elevators, include Pratt & Whitney aircraft engines, Carrier heating and air conditioning systems, Sikorsky helicopters, Hamilton Standard aerospace systems, Norden defense systems and United Technologies Automotive components and systems.

ROCHESTER, N.Y. (SEPT. 5) BUSINESS WIRE - Rochester Gas and Electric Corp. has announced that the company is seeking proposals from interested parties to meet its future electricity requirements.

RG&E is requesting 70,000 kilowatts of supply or demand -side capacity, to be available no later than May 1, 1994.

The company is participating in a state-wide program called ''all-source bidding.'' The program, instituted by the New York State Public Service Commission, states that RG&E will accept bids from parties who can successfully show they can either provide generation that meets the requirements or a program that will reduce the amount of electricity (demand) that the company forecasts for 1994 through 2008.

Potential bidders may include large existing RG&E customers, independent power producers, co-generators, architect/engineering firms, contractors, developers and other utilities.

Proposals will be accepted for demand-side projects offering up to 20,000 kilowatts of capacity savings and supply-side projects offering up to 50,000 kilowatts of capacity. Demand-side projects must exceed 100 kilowatts and be located within RG&E's service territory.

The main objective of ''all-source bidding'' is to give utilities alternatives to their traditional methods of meeting electric demands. In the past, utilities, including RG&E, purchased turbine generators to have on hand for occasional summertime peaks or an emergency shutdown of a major plant. In recent years, the cost of purchasing and operating power plants has increased, leading to an interest in exploring other ways to meet demand.

''We have been studying alternate sources since the mid 1980's,'' said Paul G. Ruganis, RG&E's manager of corporate planning. ''There are many innovative ways out there and it is our desire to explore them,'' Ruganis said.

Along with price, reliability will be a key factor RG&E will be looking for in determining a new contractor. If RG&E is relying on these contractors to supply electricity, or reduce their usage, the company must be certain that the source is dependable for the present and the future.

RG&E is planning to solicit bidders starting the first week of September.

VIENNA, VA (SEPT. 5) BUSINESS WIRE - LEGENT Corp. (NASDAQ: LGNT) Wednesday announced that its Multi-image Manager product will support IBM's Enterprise Systems Architecture/390.

IBM has provided LEGENT with information that will allow the company to ensure that Multi-image Manager exploits the architecture's new connectivity capabilities to allow sites to share resources across mainframe images.

Enterprise Systems Architecture/390, as defined by IBM, includes sysplex, a combination of hardware and software facilities that an installation uses to couple MV's systems together.

In a sysplex environment or any other configuration, Multi-image Manager provides that ability to safely share resources across images to provide the transparent access required for single-image view of the enterprise. Sharing resources improves service and cost-efficiency. Multi-image Manager protects DASD integrity, provides global tape allocation control, and consolidates consoles.

''IBM's sysplex initiative will provide IS organizations with the ability to dramatically increase computing power and improve the sharing of computing facilities and communications among users,'' said Joe M. Henson, LEGENT's chief executive officer. ''Using LEGENT's Multi-image Manager in a sysplex environment will enable our clients to take advantage of the new architecture immediately.''

To fully support sysplex, LEGENT will:

-Enhance Multi-image Manager to support IBM's Cross-System Coupling Facility (XCF), which will be available in a new release of MVS (MVS/ESA SP4.1), scheduled for 1990 delivery. Multi-image Manager currently supports communication via channel-to-channel (CTC) paths and DASD.

-Expand L-Comm, LEGENT's Intersystem Communication Facility, to support XCF in addition to VTAM.

These enhancements will allow data centers to create a single point for controlling multiple sysplexes (groups of coupled processors). Using Multi-image Manager and L-Comm, a site can consolidate system information from various sysplexes on to a single console. This capability enhances coordination and increases control, efficiency, and service.

Multi-image Manager is designed for sites with two or more physical CPUs running MVS or VM, or sites with CPUs logically partitioned under VM, PR/SM, or MDF. The annual lease price for Multi-image Manager starts at $10,900 and is based on CPU class.

LEGENT Corp. is a leading international supplier of systems software and services for the management and operations of IS enterprises. The comany's solutions are designed for IS organizations supporting heterogeneous networks managed by IBM mainframes. With headquarters located in Vienna, LEGENT employs nearly 1,000 individuals, serving 3,500 customers worldwide.

ATLANTA (SEPT. 5) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software) announced today that its Millenium (M) and Expert (E) Series products are available immediately for the IBM Enterprise System/9000 family of processors.

The M and E Series products are families of financial, human resource, materials management, manufacturing and higher education software and related tools that provide a competitive advantage to more than 10,000 customers worldwide.

IBM ES/9000 is IBM's new family of processors for the 1990s, offering the extensive growth and performance benefits of Enterprise Systems Architecture/390 (ESA/390).

''The ES/9000 is a step toward the kind of enterprise connectivity and communication that IBM's Systems Application Architecture promises for our customers,'' said Jim Henderson, D&B Software executive vice president for marketing and technology.

In conjunction with related IBM announcements, D&B Software announced it is fully supporting the AD/Cycle architecture and plans to make use of the Repository Manager in its future architecture. D&B Software also intends to support the SAA Delivery Manager strategy announced by IBM.

D&B Software, a division of The Dun & Bradstreet Corp., is the world's largest provider of financial, human resource, materials management, manufacturing and higher education software solutions, tools and services. D&B Software was formed in 1990 by the merger of two software industry giants, Management Science America Inc. and McCormack & Dodge Corp. The company serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500.

FARNBOROUGH AIR SHOW, UNITED KINGDOM (SEPT. 5) BUSINESS WIRE - Bell Helicopter Textron's intermediate twin-engined Model 230 will be built at the company's commercial helicopter facility near Montreal, Quebec, Canada Bell President L.M. (Jack) Horner confirmed Wednesday.

The Model 230, originally announced last fall, is a significantly updated version of the Bell Model 222. It will be the fifth production line to be built at Bell's Mirabel plant, joining the 206B Jet Ranger, 206L-3 LongRanger, 212 and 412SP models.

Horner said all Model 230 engineering is on schedule for completion in October. Two prototype aircraft will be at Mirabel October 1st. First flight is scheduled for summer 1991 with certification planned for the first quarter of 1992.

First deliveries will be made in August 1992, with Mitsui & Co., Ltd. of Tokyo, Japan serving as the launch customer with 20 aircraft on order, Horner stated. ''With its exceptional design, I am convinced the Model 230 will play a significant role in the twin-engine helicopter market for many years,'' Horner said.

The Model 230 will be available in both wheeled and skid gear versions. In an executive configuration, the Model 230 will seat two pilots and up to six passengers. The utility version can accommodate either nine persons or cargo. It is equipped with twin Allison 250-C30 G2 turbine engines, among the most reliable and proven engines in the aviation industry. These powerplants are from the 250 series which have over 50 million flight hours cumulatively.

Bell's Canadian plant, which first opened in December 1985, now accounts for approximately one-third of the world's production of commercial helicopters. In just over four years of operations, the Mirabel facility has manufactured and delivered 375 helicopters.

Bell Helicopter Textron is a subsidiary of Textron Inc., a multi-industry company with operations in three business sectors, Aerospace Technology, Commercial Products and Financial Services.

NEW YORK (SEPT. 5) BUSINESS WIRE - The board of directors of Blue Circle Industries PLC announces the unaudited results of the Group for the six months ended June 30, 1990.

The main figures are:

	Six Month Ended June 30,		Year Ended December 31,
	1990	1989	1989
	(in pounds)		(in pounds)
Profit before tax	93.0	100.3m	231.8m
Earnings per share			
- basic	11.3p	12.5p	29.5p
- fully diluted	10.6p	11.5p	27.0p
Dividends	3.75p	3.5p	11.0p

The main contributions towards the Group operating profit of 94.4 million pounds in the half year were as follows: -- U.K. Cement's profits were reduced from 53.5 million pounds to 37.2 million pounds in a market estimated to be down by over 10 percent. -- Home Products division's profits, in markets affected by high interest rates, increased from 16.4 million pounds to 22.1 million pounds, including Myson for the first time. -- Property profits were reduced from 7.5 million pounds to 5.7 million pounds, also in difficult trading conditions. -- United States profits of 4.6 million pounds were at the same level, in weak markets, as last year. -- Profits from other overseas countries amounted to 22.2 million pounds, the same level as last year which included Mexico.

The Group's gearing as of June 30, 1990 was 34.1 percent and operating cash flow remains strong.

Bluc Circle Industries PLC (BCI) is an international company principally engaged in the manufacture and sale of building materials and home products and in land and environmental activities.

BCI is the leading cement producer in the U.K. and one of the largest in the world; the company is a major force in the U.S building materials

market and a substantial manufacturer of building materials in Chile, Asia and Africa.

NEW YORK (SEPT. 5) BUSINESS WIRE - American International Petroleum Corp. (NASDAQ:AIPN) announced Wednesday that it will commence production of its Toqui-Toqui field in Colombia, South America, on Friday, Sept. 7, 1990.

On Sept. 3, 1990, the Colombian Ministry of Mines and Energy signed its authorization for the initiation of production of crude oil from the field.

The company also announced that a sales contract has been executed with the Colombian national oil company, Ecopetrol, which provides for the purchase of all crude produced from the Toqui-Toqui field. The purchase price will be set monthly based on a basket of world market crudes.

This formula currently would yield a price of approximately $27 per bbl. The company may elect to receive up to 75 percent of its revenue in dollars with the remainder to be paid in Colombian pesos. Transportation to Ecopetrol's refinery has been arranged through a pipeline owned by Texaco which can immediately accept up to 1,500 barrels per day from the field.

The Toqui-Toqui oil field currently consists of 4 wells which have been drilled and successfully completed. Seismic analysis of the field indicates that up to an additional 25 wells may be drilled in the field.

Applications have already been submitted for the drilling of eight additional offset wells which are expected to be drilled within the next 12 months. The company owns a 45 percent working interest in the field and its wells with a 90 percent interest in one well until 200 percent payout.

The Puli contract area currently comprises about 94,000 acres of land in the Middle Magdalena River basin approximately 50 air miles west of Bogota. The Toqui-Toqui field covers only a portion of the contract area. Seismic work has been undertaken in another prospect of the contract area known as the Puli anticline, about 15 km. northeast of the Toqui-Toqui field.

The company and its partners are currently drilling an exploration well at that location.

American International Petroleum Corp. is engaged in refining, oil and natural gas production, transportation, exploration, and marketing activities in Louisiana, Texas and Kentucky as well as Colombia.

AUSTIN, TX (SEPT. 5) BUSINESS WIRE - In a 3-0 vote Wednesday the Public Utility Commission of Texas assigned Gulf States Utilities Co.'s request for a temporary $56.5 million rate increase to the PUCT hearings division.

The commissioners instructed the staff to establish an expedited hearing schedule, adhering as closely as possible to the schedule proposed by the PUCT general counsel. That schedule called for a decision in November.

GSU filed a motion with the PUCT in late July asking for the temporary rate increase to cover increases in operating costs without considering the portion of River Bend costs not already in rates. A company official said Gulf States decided to proceed with the request for a temporary rate increase because of the long delay in the rate case filed in March 1989. The pending rate case remains in suspension, while the Texas Supreme Court considers whether the River Bend prudence portion of that case may be considered by the PUCT.

The court is expected to issue its first set of decisions since returning from summer recess Thursday (Sept. 6), but it is not known whether the GSU issue will be included.

State law gives the PUCT the discretion to grant temporary rates when a case is in suspension.

If the $56.5 million temporary rate request is granted, the typical GSU residential customer will pay $87.18 for 1,000 kilowatt- hours of electricity. Rates would be about 10 percent higher than the $79.12 presently paid for 1,000 kilowatt-hours.

WHITE PLAINS, NY (SEPT. 5) BUSINESS WIRE - IBM Wednesday announced new System Application Architecture(a) (SAA)(a) versions of its ImagePlus(a) family of products.

SAA is IBM's set of guidelines and protocols for developing applications that run on IBM's major operating system. The SAA applications expand IBM's current ImagePlus offerings with new image features such as support for color and gray-scale images and high-speed capture of large volumes of documents. Enhanced software programs support more efficient workflow management schedules in both IBM MVS/ESA(a) and AS/400(a) environments. Users now have more options to integrate image processing quickly and easily into their existing data bases. The company also announced that the IBM System/390(a) will provide high-end users of ImagePlus with improved system management, greater levels of response and faster imaging networks. Collectively, these announcements help strengthen

IBM's leadership in the imaging industry. ImagePlus is IBM's system solution designed to provide users image processing capabilities to help streamline paper-intensive operations. Today, more than 100 ImagePlus systems are installed and improving productivity and customer service, in banks and insurance companies, government agencies, hospitals, manufacturers, retailers and transportation companies.

''The SAA versions of ImagePlus allow us to take full advantage of both architecture and system design in order to provide customers greater imaging function,'' said Mark F. Morin, vice president - Image Solutions at IBM. ''ImagePlus will continue to anticipate and address the image application needs of our customers.''

NEW HYDE PARK, NY (SEPT. 5) BUSINESS WIRE - Bamberger Polymers Inc. (ASE:BPI), an international plastics merchant and producer of custom resin compounds, Wednesday announced a number of executive appointments in connection with the restructuring of its Domestic Operations.

Lawrence M. Ubertini, senior executive vice president of the company, has been appointed president of Bamberger's Domestic Operations and will immediately assume these additional responsibilities.

The company also announced the following appointments: Frank J. Padula, executive vice president, will now assume the additional responsibilities of senior executive vice president,domestic operations; Dennis Don, corporate vice president Midwest Region, will take on the additional responsibilities of National Sales management; Christine A. Levy has been named vice president, Credit collection. Levy has held positions of

increasing responsibility throughout her 13 years with the company.

In addition, Steven M. Goldberg has joined the company as divisional vice president, Northeast Region. He has 20 years of experience in the plastics industry; Robert W. Wright has joined as the product manager in charge of both polypropylene and polystyrene businesses. He has been in the plastics industry for approximately 20 years.

Fred Garcia, president and chief exeuctive officer, commented that these new appointments and assignment of additional responsibilities will bring a more intense focus on the importance of the company's domestic business and enable Bamberger to aggressively expand its business in this area.

Bamberger Polymers is an international plastics merchant involved in compounding, distribution and sales of thermoplastic resins, the raw materials for a broad range of plastic products.

#90248b0827 09/05/1990 ~Business Wire

WHITE PLAINS, NY (SEPT. 5) BUSINESS WIRE - IBM Wednesday announced that Systematica(a) has become an AD/Cycle(a) business partner, with an agreement to bring its Virtual Software Factory(a) (VSF(a)) analyst tool to IBM's Operating System/2(a) Extended Edition (OS/2(a) EE) and Presentation Manager(a).

Systematica also will work with IBM to create a CASE tool, which will conform to AD/Cycle, that supports a unique IBM internal application development requirement for business and data modeling. The agreement further calls for Systematica to bring its VSF technology to IBM's AIX(a) and RISC SYSTEM/6000(a) platforms, and to enable its HOOD-SF(a) analyst tool on AIX. HOOD is the European industry standard methodology for aerospace and defense projects.

As part of IBM's Systems Application Architecture(a), AD/Cycle products and services help increase the quality and productivity of programmer applications. They come from IBM and AD/Cycle business partners.

Systematica's Virtual Software Factory allows CASE tool builders to create ''analyst workbenches,'' software products that define and automate the business-modeling and business-requirements phases of application development. With these analyst workbenches, programmers can create

pictorial and graphical representations of customers' application development requirements.

''We are delighted to have Systematica join IBM and our other AD/cycle business partners in meeting customer requirements for specific application development support,'' said Earl F. Wheeler, IBM senior vice president and general manager, Programming Systems.

''Systematica is proud to be a key part of IBM's application development strategies for both Systems Application Architecture and AIX platforms,'' said Andrew Wells, founder and chief executive of Systematica. ''VSF was selected by IBM for its ability to provide solutions to IBM customer requirements in both environments: AD/Cycle and AIX CASE.''

OSWEGO, NY (SEPT. 5) BUSINESS WIRE - The Nine Mile Point Two Nuclear Station begins its first refueling outage Wednesday following an operational run of 100 consecutive days.

Partial replacement of the plant's 764 fuel assemblies is one of the major activities to be conducted during the 92-day outage.

Plant refueling will take place over 40 days beginning with an eight-day period to remove existing fuel from the reactor vessel.

''The 23 days in which the reactor will be empty of fuel will be used to complete maintenance work on reactor systems and surveillance tests,'' said Outage Manager Donald A. Lee.

Approximately 196 uranium fuel bundles will be replaced in the plant's reactor, Lee said. The reloading of fuel, he said, is expected to take nine days.

About 500 workers will perform work that will include 38 modifications to plant systems; 1,200 surveillance tests; and 1,600 work requests. Lee said the outage schedule projects that about 350,000 hours of work will be completed on systems in the plant's reactor and turbine buildings.

Since January 1990, the plant has achieved an availability factor of 82 percent, providing power to the state energy grid 29 out of 36 weeks.

The 1,080-megawatt unit began commercial operation on April 5, 1988. The plant's second refueling outage is scheduled to begin in March 1992.

Unit Two is owned by Niagara Mohawk Power Corp. (41 percent) (NYSE: NMK) New York State Electric and Gas (18 percent), Long Island Lighting Co. (18 percent), Rochester Gas and Electric Corp. (14 percent) and Central Hudson Gas and Electric Corp. (9 percent).

CLEVELAND (SEPT. 5) BUSINESS WIRE - Forest City Enterprises Inc. (AMEX:FCEA and FCEB) President Albert B. Ratner Wednesday announced that gross revenues for the six months ended July 31, 1990, were $181,680,000 compared with $153,922,000 for the corresponding period in 1989, an increase of 18 percent.

Cash flow from continuing operations increased 11 percent to $21,130,000, or $2.35 per share, compared with $19,058,000, or $2.40 per share for the corresponding period in 1989. The reduction in cash flow per share has been affected by the increase in shares due to the conversion of debentures.

Earnings from continuing operations were $2,043,000 or 23 cents per share, compared with a loss of $389,000, or (5 cents) per share, for the first six months of the prior year. A loss on the sale of rental properties of $173,000 was recorded, or (2 cents) per share, compared with a gain on the sale of rental properties as of July 31, 1989, of $1,566,000, or 20 cents.

CHERRY HILL, N.J. (SEPT. 5) BUSINESS WIRE - George T. Muller has been appointed chief financial officer, succeeding Marvin S. Riesenbach, who has announced plans for his retirement, effective Oct. 31.

Muller will retain his current title and responsibilities as group vice president- finance and accounting in addition to serving as interim president of the company's financial subsidiary, Subaru Financial Services.

He is also a memeber of the company's executive committee and board member of Subaru's investment subsidiary, Subaru Investment Holding Co.

Muller, 41, joined the company in 1979, rising through the finance and accounting ranks to become group vice president- finance and accounting for Subaru of America in 1986, responsible for the company's finance, treasury, accounting, tax and internal audit areas.

As interim president of Subaru Financial Services, he oversees the subsidiary's function of providing financing to retail customers and Subaru dealers, as well as extended service contracts and credit life insurance for buyers of Subaru automobiles.

Riesenbach, 60, said he had been contemplating early retirement to pursue other business interests, and that the finalization of the recently completed merger with Fuji Heavy Industries Ltd. presented an appropriate time to announce his plans.

Riesenbach, who lives in Cherry Hill, N.J., joined Subaru of America in

1972 and rose to become executive vice president and chief financial officer in 1986.

In that capacity, he was responsible for all of the company's financial, accounting, budgeting, planning, legal, insurance and investor relations areas as well as the Subaru of America Foundation, which supports community service, charity and cultural activities. Riesenbach, in addition, oversaw Subaru Financial Services.

Prior to Muller's tenure at Subaru, he was vice president- finance administration and chief financial officer for an automotive parts distributor located in Cherry Hill, N.J. He began his career as a certified public accountant with the public accounting firm of Arthur Andersen & Co. in Philadelphia. He and his wife have two daughters and live in Voorhees, N.J.

Subaru of America Inc. markets Subaru vehicles and replacement parts throughout the United States and the Caribbean through a regional network serving over 700 dealers and is a wholly owned subsidiary of Fuji Heavy Industries Ltd. of Japan.

LONDON (SEPT. 5) BUSINESS WIRE - British Gas (NYSE:BRG) today announced revised charges for transporting gas through its pipeline network for competing organizations selling gas to industrial and commercial consumers during the year starting October 1, 1990. Charges payable in the 1990/91 year are lower than those for the previous year.

In today's publication of the Gas Transportation Services offered by British Gas, detailed tables of charges give the latest costs for transporting gas from the four terminals normally used for supplying gas to typical locations in Great Britain. The tables, which give charges for different types of loads at a range of load factors, allow potential competing gas supply organizations to assess the likely cost of supply and to compare directly the effect of the revised charges.

British Gas, headquartered in London, is the largest integrated gas company in the Western world and is primarily involved in the purchase, transmission, and sale of natural gas to domestic, industrial and commercial customers in Great Britain. Important support activities to its marketing efforts include appliance trading and customer service to domestic gas customers.

British Gas is also active in the exploration for and production of hydrocarbons both offshore and onshore. Expertise developed in the gas business is offered for sale overseas through the British Gas International Consultancy Service. American Depositary Receipts are traded on the New York Stock Exchange. One ADR is equivalent to ten ordinary shares.

SEC - AMENDMENT NUMBER: 1

ANNOUNCEMENT:

On July 23, 1990, MIC and Leucadia National Corp. (TICKER: LUK) received the rulings requested from the Internal Revenue Service. On Aug. 30, 1990, the merger was consummated and MIC was merged with and into Leucadia National Corp. with Leucadia National Corp. as the surviving corporation. In the merger, the 1,305 outstanding MIC shares were exchanged for an aggregate of 4,564,726 common shares, plus an aggregate of $100.36 in lieu of fractional shares which were distributed to MIC shareholders, as follows: 2,560,132 common shares to Leucadia National Corp.; 693,959 common shares, plus $1 to John W. Jordan II; 224,587 common shares, plus $10.90 to CMCO; 200,480 common shares, plus $10.98 to Ian M. Cumming; 113,605 common shares, plus $24.21 to Joseph S. Steinberg; 86,874 common shares, plus 46.40 to a trust for the benefit of Mr. Steinberg's minor children (as to which he disclaims beneficial ownership); and an aggregate of 685,089 common shares, plus $46.76 to certain officers of CMCO. The shares distributed to Leucadia National Corp. will be held as treasury shares, thereby reducing the number of outstanding common shares by 2,560,132. Also, as of Aug. 30, 1990, MIC no longer beneficially owned any common stock and as a result of the merger, MIC ceased to be the owner of more than 5 percent of the outstanding common shares.

#90248d0150 09/05/1990 ~French/German News Agency

WEST BERLIN (SEPT. 5) - The West German airline Lufthansa paid Pan American World Airways 150 million dollars to acquire Pan Am's routes linking West Berlin and six West German cities, it was confirmed here Wednesday.

Pan Am spokesman Harold Kosel confirmed the figure which had been mentioned in reports on the transaction disclosed on September 3. A letter of intent between the two airlines had been signed in New York last week.

Kosel noted that the agreement has still to be approved at the government level and by the supervisory boards of the two airlines.

Under the Pan Am-Lufthansa deal, starting with the winter schedule on October 28 the West German airline will operate nine Pan Am planes on routes between West Berlin and the cities of Hamburg, Nuremberg, Frankfurt Stuttgart,
Duesseldorf and Munich for nine months.

After that period, Lufthansa will fly its solely its own airplanes on the

routes.

Under post-war arrangements, Lufthansa had been excluded from flying to West Berlin. Pan Am, British Airways and Air France held the routes between the city and West German cities.

Pan Am will continue to fly to West Berlin on international routes, Kosel said.

#90248d0270 09/05/1990 ~French/German News Agency

MOSHI, Tanzania (SEPT. 5) - Pope John Paul II appealed Wednesday to a world caught up in the Gulf crisis and changes in eastern Europe not to turn its back on Africa, the poorest continent.

The pope, addressing a crowd at the airport here before leaving for Bujumbura, the capital of Burundi, urged "the more developed nations of the earth to inaugurate a new era of solidarity with Africa, based on justice and respect."

"Let the world not forget the urgent needs of the peoples of Africa" who are "deprived of the positive support of science and technology," he said.

The pope, now on his seventh trip to Africa, sees Africa's 79 million Roman Catholics as a bulwark against loss of faith in the West and the rise of militant Islam.

The catholic flock in Africa has grown by 24 million since the pope's first visit a decade ago.

Before leaving, the pope celebrated a mass at Moshi stadium, with the snow-capped peak of Africa's highest mountain, Kilimanjaro, in the background.

Some 40,000 people, including a sprinkling of Moslems, came to hear his message. The crowd cheered, clapped and ululated as the pontiff ascended the platform. A choir accompanied by a military-style brass band welcomed him.

The pope reiterated his call for religious harmony.

"May the people of Tanzania always remain united to one another as true brothers and sisters, regardless of ethnic origin or differences of culture and religion," he said.

Tanzania's population of 24 millions is fairly evenly divided between Moslems and Christians, with 15 per cent animists.

The pope's call for tolerance, however, came a day after he urged Africans to abandon witchcraft and traditional animist religious practices which he said could lead to "servitude".

#90248d0300 09/05/1990 ~French/German News Agency

MOGADISHU (SEPT. 5) - Somalia's new Prime Minister Mohamed Hawadle Madar, whose appointment was hailed as a gesture to northern-based rebels, on Tuesday presented a cabinet with few innovations.

The only real surprise was the return of President Mohamed Siad Barre's half brother Abdurahman Jama Barre who becomes deputy premier and takes over the finance portfolio.

Mr. Jama Barre was foreign minister up to January 9 when the president sacked the government headed at the time by Mohamad Ali Samantar for "incompetence". Mr. Barre was dropped in Mr. Samantar's next government set up on February 15 and which was dissolved on Monday.

In the new government, Hussein Abdurahman Matan keeps the defence portfolio but former interior minister Abdulcadir Haji Mohamed is being replaced by Abdikassim Salad Hassan, who also makes a comeback.

The choice of Mr. Madar was widely hailed as an opening to rebels of the Somali National Movement (SNM) which has been fighting the Barre regime in northern Somalia since May 1988. Mr. Madar belongs to the Issaq clan which provides the bulk of SNM guerrillas.

The government change comes ahead of a referendum planned for October 31 on whether to introduce multi-party politics in Somalia where President Siad Barre has been in power for more than 20 years.

The president has embarked on a programme of political reforms with the

declared aim of holding free legislative elections on February 1 1991.

#90248d0380 09/05/1990 ~French/German News Agency

LONDON (SEPT. 5) - British tobacco and insurance conglomerate BAT Industries said Wednesday its taxable profit fell 11 percent in the first half of this year to 592 million pounds (1.1 billion dollars) from 668 million (1.2 billion dollars).

Sales were up 12 percent over the same period last year at 9.4 billion pounds (17.7 billion dollars) from 8.48 billion (16 billion dollars).

The profit was below market forecasts of half-year profit of between 605 and 665 million pounds.

The fall in profit came essentially in the insurance sector, where operating profit was down 38 percent to 256 million pounds (483 million dollars) from 412 million (777 million dollars).

BAT's main insurance subsidiary, Eagle Star, fell victim to general depression in the sector and the cost of payouts for storm damage early in the year.

Interim dividend was set at 20.7 pence, up from 19.60 pence.

BAT shares were up two pence at 526 in early trading in London.

#90248d0390 09/05/1990 ~French/German News Agency

LAUSANNE, Switzerland (SEPT. 5) - China, a major ivory consumer, is to join countries honoring the ban on ivory trade from January, the secretariat of the Convention on International Trade in Endangered Species (CITES) said Wednesday.

The decision leaves only five southern African countries refusing to abide by the measure, which puts some 600,000 African elephants on a most-endangered list drawn up by CITES in October.

Hong Kong, another of the world's largest consumers of ivory, agreed to respect the ban in July.

The countries that refused - Zimbabwe, South Africa, Botswana, Malawi and Zambia - pledged to monitor elephant stocks and fight poaching.

Singapore meanwhile has decided to respect the endangered species designation for marine and New Guinea crocodiles, CITES said.

Until now Singapore has been a major centre for illegal trade in crocodile skins. It will now have to declare exports and mark the skins.

#90248d0450 09/05/1990 ~French/German News Agency

SYDNEY (SEPT. 5) - Despite sagging sales, the diversified Australian industrial group BTR Nylex Ltd. reported Wednesday a 15.7 percent jump in half-yearly net profit to 260.8 million Australian dollars (212 million U.S.).

Managing Director Alan Jackson said the operating profit for the country's third largest capitalised company rose 13.5 percent to 491 million dollars (398 million U.S.) in the six months to June "in difficult trading conditions."

But analysts described the net result, up from 225.3 million dollars (183 million U.S.) in the first half of 1989, as "pretty disappointing."

Sales worldwide dipped 4.1 percent to 2.35 billion dollars (1.9 billion U.S.) with sales in Asia falling about 12 percent to 402.8 million dollars (327.5 million U.S.).

But the group's Asian division reported a nine percent increase in profit to 81.6 million dollars (66 million U.S.).

Ken Fleming, analyst at James Capel Australia, said that the withdrawal of China from the market since the Beijing massacre last June was impeding Asian sales growth, while polymer operations in Taiwan were facing a demand slump.

"One of their major customers is not buying," he said. "(BTR Nylex) had a very rough second half in Taiwan. I would say that this is continuing."

Mr. Fleming said he had been expecting BTR Nylex to notch a much higher first half profit.

"The world petrochemical markets are in a spin and they are getting hit," he said.

He forecast that the company, which also has interests ranging from glass and plastics to textiles and engineering, would earn about 570 million dollars (463 million U.S.) for the full year compared with 521 million dollars (424 million U.S.) in 1989.

Mr. Jackson said in a statement that the directors were pleased with the company's performance in the first half.

"Current order levels within our building products, automotive and consumer markets are soft.

"On the other hand activity of our Asian operations, particularly Malaysia, Thailand and Taiwan are buoyant.

"While it is difficult to forecast the extent and duration of the current slowdown the directors are confident at this time that the results for 1990 should again be satisfactory," he said.

Sales in Australia were down less than one percent to 1.3 billion dollars (1.1 billion U.S.), and although U.S. sales fell six percent to 444.6 million dollars (361 million U.S.), profits from the U.S. market eased less than one percent to 63.4 million dollars (52 million U.S.).

BTR Nylex's finance charges swelled 50 percent to 83.9 million dollars (68 million U.S.).

Polymer sales fell 12 percent to 550.6 million dollars (448 million U.S.) while operating profit for the polymer division slipped four percent to 106 million dollars (86 million U.S.).

BTR Nylex comes after petroleum and steel producer BHP Co. Ltd. and diversified miner CRA Ltd. as the top Australian firms in terms of market capitalisation.

TOKYO (SEPT. 5P) - The 13.5 million member Japan Consumers' Cooperative Union has stopped importing lemons from the United States since discovering they contained anti-mold agricultural chemicals, union officials said Wedneday.

The union said it had notified 70 of its 665 branch organizations across Japan selling imported California lemons of the stoppage after discovering they contained two anti-mold chemicals -- orth-phenyl phenol (OPP) and thiaben bazole (TBZ).

The union imported the lemons on condition that the chemicals were not used, it said.

The union said it imported and sold 120,000 cases or 2,040 tonnes of lemons from Californian producers last year and planned to sell 140,000 cases or 2,380 tonnes this year.

Two representatives have been sent to the lemon supplier in California to

discuss the situation, it said.

Japan's total lemon imports from the United States came to about 100,000 tonnes last year.

SAN FERNANDO, PHILIPPINES (SEPT. 5) - Up to 15 percent of the rice harvest in central Luzon island, the Philippines' breadbasket, could be lost due to floods spawned by monsoon rains, an official said here Wednesday.

A total of 63,000 hectares (155,000 acres) of farmland in Pampanga, Bulacan and Tarlac, the country's main rice-growing provinces, remain under water following torrential rains on Saturday, regional agriculture department officer Renato Bulay told reporters.

"We could be losing two million cavans (50-kilogram or 110-pound sacks) of unmilled rice because of the floods," he said. He estimated the value of such losses at 1.2 billion pesos (48 million dollars).

The floods came after about 90 percent of the 427,000 hectares (1.07 million acres) of central Luzon rice farms had been planted to high-yield varieties, he added.

The Philippines has been importing rice for the past two years to boost domestic buffer stocks depleted by drought and other problems.

LONDON (SEPT. 5) - The five major Japanese banks have been put on a "rating watch" by the London-based credit rating agency IBCA, which could lead to their losing "AAA" rating -- the top of the international credit rating scale.

The big five banks, Dai-Ichi Kangyo Bank, Sumitomo Bank, Fuji Bank, Mitsubishi Bank and Sanwa Bank are joined on the list by Industrial Bank of Japan.

In a report issued to clients on Tuesday, IBCA said that the decision to put the banks on a "rating watch" was taken in the light of "uncertainty and instability" caused by the dramatic fall in the Tokyo stock market.

Another factor was "capital pressures" growing out of the banks' need to improve profitability in order to continue financing their worldwide expansion.

IBCA stressed that the potential downgradings related to problems brought about by high monetary growth in recent years compounded by fears stemming from current international tensions, rather than to concern over the performances of individual banks.

"The stock market's fall and the weakness of the yen have brought to an end the virtuous circle whereby Japanese banks could finance at insignificant costs virtually any level of growth," IBCA said.

The report predicted that the massive increase in equity base (300 percent in five years to 5,838 billion yen (40 billion dollars)) achieved by the big five banks could no longer be sustained.

The expansion, IBCA said, was due to Japanese stockholders being prepared to accept minimal dividends while large capital gains accrued.

But "with capital losses now more the norm, even the notoriously pliant Japanese investor may go on strike, leaving the banks dependent on internally generated profits to finance their growth."

If this occurred, IBCA said, the banks would either have to significantly raise the profitability of their banking operation or stop growing.

The falling yen and Tokyo stock market meanwhile are also likely to force the banks to reduce what has been "close to a frantic rate of expansion" overseas, fuelled in part by the yen's strong performance in recent years which has now come to an end.

IBCA also noted that the Japanese banks had been slower than their international competitors in setting up reserve funds against foreign "problem assets" -- particularly in the fields of lending associated with leveraged buyouts (estimated total Japanese bank exposure 10 billion dollars), and U.S. real estate (30 billion dollars).

If the big five lose their AAA rating with IBCA, only Mitsubishi Bank and Sumitomo Bank among them will be left with the top rating from one of the top three rating agencies, Moody's of the United States.

#90248d0610 09/05/1990 ~French/German News Agency

BRUSSELS (SEPT. 5) - European Economic Community (EEC) foreign ministers are to hold a special meeting in Brussels next Wednesday to adopt a common position on measures allowing East Germany's integration into the Community, an Italian spokesman said here Wednesday.

The special meeting should enable the adoption of such measures ahead of

German unification on October 3.

The European Parliament is to give a first reading to proposals on the issue on Tuesday, and should now be able to give a second reading on Thursday next week, a day after the foreign ministers meet.

The ministers are scheduled to meet again on September 17, when they could take a final decision.

The EEC's executive, the European Commission, had put forward proposals on August 21 for measures governing the integration of what is now East Germany into the EEC, and asked for delegated powers to start implementing them before their formal adoption.

But the European Parliament has preferred to go for a rapid formal consideration of the proposals.

East German integration into the EEC is expected to cost the Community 500 million European Currency Units (ECU's, 650 million dollars) a year between now and 1992, according to European Commission estimates.

-30- 1444

#90248d0690 09/05/1990 ~French/German News Agency

LONDON (SEPT. 5) - George Wimpey, one of Britain's leading construction concerns, said Wednesday its pre-tax profit plunged 72 per cent in the first half of this year to 12.6 million pounds (23.7 million dollars) from 45.2 million (85.2 million dollars).

Sales were up eight per cent over the same period last year at 908.2 million pounds (1.7 billion dollars) from 840.2 million (1.5 billion dollars).

Interim dividend was unchanged at four pence, while earnings per share dived from 10 pence to 2.5.

The result was well below market forecasts of profit of between 35 million and 42 million shares, and Wimpey shares were down 20 pence at 182 in mid-morning trading on the London stock exchange in a rising market.

The group stressed that the seasonal nature of the construction business meant that the second half of the year was generally better than the first and hoped that the same would be true of this year.

-30- 1113

#90248d0750 09/05/1990 ~French/German News Agency

AMSTERDAM (SEPT. 5) - Pirelli Tyre Holding, the Dutch holding of Italian

tyre group Pirelli, said Wednesday its net profit plunged 61 percent in the first half of this year to 40 million guilder (22.5 million dollars).

Operating profit fell 29 percent from the same period last year to 151 million guilder (85.3 million dollars) while sales were down 5.8 percent at 31.6 billion (17.8 billion dollars).

Sales were "slightly down" in volume terms, the company said in a statement, without giving overall figures.

In Europe, Pirelli's main market accounting for 59 percent of sales in 1989, car tyre sales rose two percent in volume terms but those for tyres for utility vechicles were "slightly down", the company said.

Sales fell five percent in volume terms in North America, and 21 percent in Latin America where the Brazilian government's strict measures to control hyper-inflation had seen sales fall five percent.

The fall in sales income was also due to an average fall of 11 percent in the value of the U.S. dollar against the guilder between the first half of last year and the first half of 1990, the company said.

The group axed 600 jobs in the first half of this year in its tyre division and intends to continue shedding jobs at the same rate until well into 1991, the statement said.

Pirelli is also reducing investment for 1990 and 1991 by 200 million guilder and cutting back on sports sponsorship, particularly in international rallying, it added.

The holding company was very cautious on prospects for the rest of this year, saying that the anticipated effects from its cost-cutting measures and an expected improvement on the replacement tyre market "could be reduced to nil by a rise in raw materials prices and a fall in demand due to the Gulf crisis."

-30- 1993

#90248d0770 09/05/1990 ~French/German News Agency

BRUSSELS (SEPT. 5) - U.S. Secretary of State James Baker will brief North Atlantic Treaty Organisation foreign ministers here Monday on the results of Sunday's U.S.-Soviet summit in Helsinki, NATO sources said.

The sources were unable to say how many ministers would be able to attend NATO's North Atlantic Council.

A U.S. spokesman meanwhile said there was still a "possibility" that President George Bush himself might brief the allies on Monday. But the

official said he could not immediately confirm this.

The summit will chiefly focus on the Gulf crisis.

NATO's 16 members have met regularly since the crisis exploded on August 2.

Their ministers held a special meeting in Brussels on August 10, and their ambassadors and economic experts have been meeting two and sometimes three times a week to discuss the United Nations embargo against Iraq and ways of providing logistical support for the U.S. troop build-up in Saudi Arabia.

#90248d0870 09/05/1990 ~French/German News Agency

LONDON (SEPT. 5) - British paper group Wiggins Teape Appleton, detached from the conglomerate BAT Industries in June, said Wednesday its profit fell nine percent in the first half of this year, but also announced it was buying a U.S. paper factory for 60 million dollars.

Wiggins Teape said its taxable profit totalled 85.9 million pounds (162 million dollars) in the first half of this year, in line with market forecasts but nine percent lower than the 94.5 million pounds (178.3 million dollars) it made in the first half of 1989 as part of BAT.

Sales were up four percent to 836 million pounds (1.57 billion dollars) from 802 million (1.51 billion dollars) but earnings per share fell to 10.9 pence from 11.9.

The group set its first interim dividend at 3.3 pence, as announced when it was introducedd on the stock exchange as a separate entity on June 1.

Wiggins Teape also announced that it was buying a carbonless paper factory at Vancouver in Washington state from U.S. group Boise Cascade. The plant has an annual capacity of 100,000 tonnes and employs 450 people.

Group chairman Stephen Walls said the first half results reflected "difficult trading conditions in the pulp and paper industry", and said further downward pressure on pulp prices and continuing stiff competition in the finished products market could be expected in the second half.

But Wiggins Teape's efforts at economy should "limit the negative impact of the market conditions on our overall results," he added.

Wiggins Teape shares were down two pence at 167 on the London stock exchange following the release of the results.

-30- 1822

#90248d0940 09/05/1990 ~French/German News Agency

PARIS (SEPT. 5) - Afghanistan's president Najibullah appealed Wednesday to major Western countries and Japan for urgent assistance to help his war-torn country rehabilitate its economy and resume its economic and social development.

Addressing the second United Nations conference on the Least Developed Countries (LDC's), he welcomed East-West detente and stressed his government's commitment to a peaceful solution to the devastating ten-year-old Afghan conflict.

He emphasized that the new constitution adopted in May commits the country to a pluralistic political system based on market-economy principles and private enterprise.

Mr. Najibullah, clearly seeking to present himself, both in his address to the conference and in subsequent remarks to the press, as a leader open to dialogue and national reconciliation, strongly emphasized that landlocked Afghanistan was already one of the poorest among the LDC's before the outbreak of the Afghan war in 1979.

Ten years ago, he said, its annual per capita Gross National Product (GNP) was no more than 187 dollars, and the protracted conflict, which had wrought destruction provisionally estimated at more than 10 billion dollars, had reduced output per inhabitant by a quarter.

He said agriculture, the backbone of the Afghan economy, had been especially hard hit, with output declining by nearly 30 per cent.

Mr. Najibullah said preliminary estimates set Afganistan's external development financing requirements over the next 10 years at more than six billion dollars.

He said present plans provided for a five-year period of economic rehabilitation, during which the emphasis would be on the return and resettlement of millions of refugees and reconstruction of infrastructure and productive facilities.

In a second five-year phase, the country would seek to expand its economic potential and boost exports, while placing the emphasis on import substitution and production of commodities meeting the population's basic needs.

Mr. Najibullah acknowledged that prospects for the first phase were "not very promising". Afghanistan would be able to finance its current expenditure from domestic sources only in the second half of the 1990's, he said.

Stressing the need for "urgent assistance", he called on the world community in general to seriously consider resuming aid to Afghanistan, and specifically addressed an appeal to past donors, including the United States, France, West Germany, Japan and Britain.

The Afghan president told reporters Afghanistan "warmly welcomes" all international efforts to achieve a peaceful settlement of the Afghan conflict,

adding that he was especially looking forward to the outcome in this respect of next Sunday's Soviet-American summit in Helsinki.

Presidents Mikhail Gorbachev of the Soviet Union and George Bush of the United States have scheduled talks there expected to centre on the Gulf conflict.

During a press conference after his speech, Mr. Najibullah again rejected U.S. demands that he step down from office during the transition process that will be followed by free elections in Afghanistan.

He said the withdrawal of "factions or persons" would not help a solution.

He also said Afghanistan was prepared to "cooperate multilaterally and bilaterally, including with the United States, for the elimination of illict trafficking in narcotics."

#90248d1040 09/05/1990 ~French/German News Agency

SYDNEY (SEPT. 5) - Key ministers in Australia's Labor government have swung their support behind a plan to use the proceeds from the sell-off of government assets to pay for infrastructure renovation, Labor Party sources said Wednesday.

In effect, the plan means swapping airlines used mostly by the affluent for socially desirable projects such as better railways, roads and homes used by everybody.

Proposed by the left-wing Health Minister Brian Howe, it is being seen by some as the means by which long-standing Labor opposition to privatisation could be overturned at a special party conference on September 24.

The cabinet will discuss and is expected to approve Thursday the assets sale plan, estimated to be worth almost four billion dollars (3.25 billion U.S.).

The government wants to sell 49 per cent of its wholly owned international airline Qantas, all or part of its domestic carrier Australian Airlines and

expose its telecommunications networks to private competition.

Although Labor officials concede rank-and-file opposition to privatisation is still strong, they say it would be political suicide for the conference to reject a plan proposed by the government and supported by ministers of all factions.

"The plan is one way of making the unpalatable seem more palatable," a senior left-winger said Wednesday.

The government's economic advisers favour using the proceeds of privatisation to pay off public sector loans, using only the interest savings for new infrastructure investment. However Mr. Howe has condemned the proposal to use only the interest as a gimmick and "tokenism which would not impress anybody".

He told a conference Monday that there were strong arguments for "massively increasing our investment in public infrastructure."

#90248d1110 09/05/1990 ~French/German News Agency

DUBAI, United Arab Emirates (SEPT. 5) - A Panamanian cargo ship carrying 750 Indian nationals left Iraqi-occupied Kuwait early Wednesday and was heading for Dubai, shipping sources said here.

The vessel, the Safeer, was due here Thursday night, when the passengers - who were working in Kuwait at the time of the Iraqi invasion August 2 - will be flown home aboard an Air India flight, they added.

It was the first departure of a ship from Kuwait since the invasion, when Iraqi forces took control of Kuwaiti ports and impounded foreign vessels and tankers.

Shipping sources said three Indian vessels, including the Akbar and the Tipu Sultan, were to set sail for Kuwait "in the next few days" to begin repatriating the more than 100,000 Indian nationals stranded there.

Prior to the invasion some 200,000 Indians had been working in Iraq and Kuwait, thousands of whom have fled Baghdad overland and are now camped along the Iraqi-Jordanian border.

#90248d1180 09/05/1990 ~French/German News Agency

FRANKFURT (SEPT. 5) - Dresdner Bank said here Wednesday it has increased its share in the Dresdner Bank Kreditbank of East Germany to a controlling 85 percent.

Dresdner Bank said the move, raising its share from the previous 49 percent minority holding, came via a 150 million mark (96 million dollar) increase to 500 million marks, in the Dresdner Bank Kreditbank's capitalisation.

Dresdner Bank Kreditbank, based in Dresden, has 72 branches throughout East Germany.

The West German parent concern said it hopes to acquire the remaining 15 per cent equity capital of the Dresden institute as soon as possible in order to be able to integrate it completely into the bank's corporate structure.

Dresdner Bank became the second major West German institute to acquire majority control of an East German bank. Deutsche Bank previously had obtained the Kreditbank, a successor to the previous East German state-owned Staatsbank, with its broad network of branches around the country.

#90248d1250 09/05/1990 ~French/German News Agency

WINDHOEK (SEPT. 5) - Namibia's Navachab gold mine has produced its first ton of gold from more than five million tons of ore, according to a company statement issued here Wednesday.

The value of production since the mine opened in December has now topped 30 million rand (11.7 million dollars), operators the Erongo Mining and Exploration Company said.

Erongo, which is 66 percent owned by the giant South African-based Anglo American Corporation, holds a 70 percent stake in the mine.

Metal Mining Corporation of Canada has a 20 percent stake and the remaining 10 percent is owned by Rand Mines Windhoek Exploration.

Navachab, near Karibib some 200 kilometres (120 miles) northwest of here, is an open cast operation expected to produce 1.9 tons of gold a year for

the next 13 years.

-30- 969
#90248d1260 09/05/1990 ~French/German News Agency
WINDHOEK (SEPT. 5) - The Namibian government is to cancel some loans earmarked for white farmers by the former South African colonial administration on the grounds that they are offensive and unconstitutional Agriculture Minister Gert Hanekom said Wednesday.

"The loans considered to be offensive and contrary to the requirements of the constitution are loans granted for the purchase of farmland in so-called father-son transactions, or family transactions, and loans for the consolidation of debts.

"These loans, if paid, would serve the personal interest of a small minority of white farmers only, and cannot be regarded in any way as supporting agricultural growth or development."

He said when the South West Africa People's Organisation-led government came to power at independence on March 21 just over four million rand (1.56 million dollars) worth of loans was waiting to be paid out to 18 families.

In those deals a father planned to sell his land to the son, who would buy it using government credit at four per cent interest.

The father would then bank the sale price, earning 18 per cent or more at commercial rates, providing the family with a pension.

"This was nothing more than cheap government money and we find this totally unfair," Mr. Hanekom said.

-30- 1468
#90248d1290 09/05/1990 ~French/German News Agency
SEOUL (SEPT. 5) - Several hundred South Korean students took part in a violent anti-government demonstration here Wednesday as North and South Korean prime ministers held a historic first-ever meeting.

The students criticised South Korean President Roh Tae-Woo saying he was using the North-South talks to enhance his own chances of staying in power.

Some 500 students from Seoul National University threw molotov cocktails at riot police who replied with tear gas grenades, witnesses said.

Before the clashes, the demonstrators held a rally denouncing Mr. Roh for suppressing the "national democratic movement" and arresting dissidents.

The protest took place shortly after North Korean Premier Yon Hyong-Muk in talks with his South Korean counterpart Kang Young-Hoon demanded that three prominent dissidents jailed here for visiting Pyongyang last year be freed.

Students also demonstrated Tuesday on the Korea University campus as the North Korean delegation was arriving in Seoul from Pyongyang.

#90248d1330 09/05/1990 ~French/German News Agency

LONDON (SEPT. 5) - Britain's leading cement maker Blue Circle Industries said Wedneday its profit fell 7.2 percent in the first half of this year to 93 million pounds (175 million dollars) from 100.3 million (189.2 million dollars).

Sales were down 5.4 percent from the same period last year at 656.4 million pounds (1.2 billion dollars) against 694.3 million (1.3 billion dollars), with domestic sales of cement down 14 per cent at 4.1 million tonnes.

Earnings per share fell from 11.5 pence to 10.6 but interim dividend was raised to 3.75 pence from 3.5.

The figures were in line with market forecasts of profit of between 86 million and 100 million pounds, and Blue Circle shares were up three pence at 203 in mid-morning trading in London in a rising market.

But Blue Circle warned that "trading conditions for the group's U.K. and U.S. businesses are likely to be further depressed in the second half."

-30- 1118

#90248d1440 09/05/1990 ~French/German News Agency

SYDNEY (SEPT. 5) - Elders IXL Ltd, the giant Australian brewing and agricultural company once controlled by John Elliott, could face a one billion dollar (810 million U.S.) annual loss, analysts warned Wednesday.

The likely loss for the year ended June 30 is blamed on the sale of the company's resources division and on the droughts, floods and tumbling wool prices that battered the farming sector in the last financial year.

Viktor Shvets, from Baring Security (Aust) Ltd., said it could intensify pressure on Elders' 56 percent owner, Harlin Holdings Pty. Ltd., which was controlled by Elders executives including chairman and former chief executive Elliott.

"The loss could be anywhere in the range from half a billion to a billion," said Tony Young of the James Capel Australia broking house, ahead of the

announcement of Elders' results for the year.

Abnormal losses from the agricultural and finance arms and the sale of the resources division could be as high as 1.6 billion dollars (1.3 billion U.S.), he said.

This would swamp a forecasted operating profit of about 478 million dollars (387 million U.S.), he said.

Last year Elders posted a record profit of 653.2 million dollars (529 million U.S.) after abnormal gains of 38.2 million dollars (30.9 million U.S.).

Mr. Shvets tipped Elders to lose about 500 million dollars (405 million U.S.) due to abnormal losses totalling one billion dollars (810 million U.S.).

Such a loss threatened the income stream of Harlin, which had estimated debts of about 2.25 billion U.S. dollars.

-30- 1778
#90248d1450 09/05/1990 ~French/German News Agency
BAGHDAD (SEPT. 5) - Indications mounted Wednesday that the Iraqi government wants to speed up the exodus of foreign women and children, prompting French officials to send an Air France Airbus to Amman to ferry home another planeload of refugees.

In Paris, the French Foreign Ministry said the jetliner was to pick up 44 people flown out of Baghdad, plus another 60 French citizens and other European nationals expected to arrive in the Jordanian capital from Baghdad during the day.

Authorities say 450 French citizens are still in Iraq.

In London, meanwhile, a British jumbo jet with 92 women and children who had been held back by Iraq arrived at London's Gatwick Airport on a flight from Amman.

The London Foreign Office said 306 more British women and children had arrived Tuesday night in Baghdad after a 14-hour drive from Kuwait.

Fifty-seven of the passengers flown to London Wednesday aboard the Virgin Atlantic Boeing 747 were British. The rest were U.S., Irish, French or Australian citizens.

The same plane took food and medicine to Jordan for refugees awaiting repatriation in Jordan and an estimated 40,000 more camped out on the

desert border with Iraq.

The Bonn foreign office said it had largely completed the evacuation of West German women and children from Iraq and Kuwait, leaving 150 West Germans, mostly men, in Kuwait and 400 in Iraq.

#90248d1610 09/05/1990 ~French/German News Agency

CAIRO (SEPT. 5) - The bodies of 50 Egyptians have been returned to their homeland from Iraq since the Gulf crisis began - and some have borne signs of a violent death, press reports said Wednesday.

The reports - carried in an Egpytian press increasingly hostile towards Iraq - said quarantine authorities at Cairo airport had discovered bullets and head blows in and on some corpses. Others bore signs of electro-shocks or burns. On Tuesday alone, 15 dead Egyptians had been flown out of Iraq via Amman.

Another 13 recently-arrived dead had apparently been killed in a road crash on their way to Aqaba when already in Jordan, their vehicle having been in collisison with a military vehicle. There was no official confirmation of the media report.

-30- 930

#90248d1690 09/05/1990 ~French/German News Agency

Frankfurt (SEPT. 5) - West German banks, with relatively small loan exposure in Iraq, have responded calmly to Baghdad's stop on its debt repayments in retaliation for the international trade boycott, bankers said here Wednesday.

One banker told the German Press Agency dpa that from the moment the U.N. trade embargo against Iraq was approved, it was clear Saddam Hussein would retaliate with whatever means at hand, including a stop in repayment of Iraq's debt.

There is no reliable data on Iraq's foreign debt load, since Baghdad refuses to keep the Bank for International Settlements or other foreign institutes informed of its financial situation.

West German banks estimate the Iraqi debt to be almost 80 billion dollars, with about 53.5 billion of that owed to the West and around 20 billion to Arab countries, chiefly Saudi Arabia and Kuwait.

But West German loan exposure to Iraq was estimated by bankers here to be around 3.5 billion marks, or a little over 2 billion dollars.

#90248d2110 09/05/1990 ~French/German News Agency
LONDON (SEPT. 5) - British Prime Minister Margaret Thatcher has pledged additional funds to Middle Eastern countries suffering most from the embargo against Iraq, U.S. Treasury Secretary Nicholas Brady said here Wednesday.

Speaking after talks with the prime minister, Mr. Brady said Mrs. Thatcher was "enormously supportive" of a U.S. plan to drum up international funds to make up for losses to countries like Turkey, Egypt and Jordan.

"We didn't talk specific amounts," but "there was a commitment to funds in that plan and she promised Britain would do its bit," Mr. Brady added.

Government sources here said Mrs. Thatcher viewed the U.S. plan as an "excellent" initiative.

The treasury secretary, who met with French officials a day earlier, did not give details of the U.S. scheme, but said it was "absolutely essential that we get money for the frontline states because it is at the essence of making sure that the sanctions work."

Mr. Brady described the aid plan as a "third spoke to the wheel," following "diplomatic support for the world effort against the aggression of (Iraqi president) Saddam Hussein" and "military backing for our effort" that "is fast coming into place."

#90248d2130 09/05/1990 ~French/German News Agency

WERNIGERODE, East Germany (SEPT. 5) - West German Chancellor Helmut Kohl kicked off an election tour of East Germany on Tuesday, promising voters an economic miracle similar to that in the affluent west if he and his party were kept in power in a unified Germany.

With East German legislative elections due to take place on October 14, and pan-German elections to follow on December 2, Mr. Kohl spoke in the two small neighboring towns of Wernigerode and Heiligenstadt in Saxony Anhalt and Thuringia to ask voters to back his Christian Democratic Union.

As soon as Mr. Kohl's helicopter appeared above Wernigerode, some 10,000 supporters gathered in front of the baroque town hall began to shout their support. The town's mayor proudly announceed "the man who has done the most for German unification: Helmut Kohl."

Almost 60 percent of Wernigerode's electorate - the town's population is 36,000 - voted for the East German branch of the CDU during the March 18 legislative elections.

"West Germany is the leading country in Europe, and the Deutsch mark is the reference currency for the entire continent," Mr. Kohl told the welcoming crowd.

"People here are no less courageous than people in Goslar, 50 kilometers away," he said, referring to a West German city just 30 miles away from this quaint town with its half-timbered houses and fairy-tale castle.

The crowd applauded enthusiastically. "East Germany's lack of development is due to 40 years of a centrally planned economy," Mr. Kohl said.

"There is no reason why we should not succeed in implementing the same economic miracle here which took place in West Germany: in three or four years, this country will be resplendent," he promised.

Washington (SEPT. 5) - Britain and France have cut off all military shipments to Jordan out of concern that they could be passed overland to Iraq, the Wall Street Journal said Wednesday.

The French decision, which had been kept secret, involved primarily Mirage fighter jets, whereas the British move was aimed on artillery shells.

The British decision had been announced publicly, the paper said, but was little noticed.

''Either you are serious about this crisis or you aren't,'' a French

official said. He said French troops would participate in a Gulf war if one were to break out.

France has up to now sent no troops to the region, although it has despatched ships. There were no U.S. cutbacks in military equipment to Jordan, largely because no offensively military weapons shipments were planned, U.S. officials said.

Both France and the United States have pledged to send aid to Jordan however to help cope with the flood of refugees from Iraq and Kuwait who are awaiting transport to their home countries.

KABUL (SEPT 5) - More than 30 Afghan resistance guerrillas have died in clashes with government troops or in internecine fighting around Kabul in the last two days, a government spokesman said here Wednesday.

He said at least 18 mujahedeen guerrillas were killed and 16 wounded Tuesday when Afghan soldiers launched an operation to force them from areas around the capital.

The spokesman said troops also managed to destroy about 80 missiles used by the rebels to bombard the city.

In separate skirmishes since Tuesday between the rival mujahedeen factions of the fundamentalist Hezb-e-Islami and the Jamiat Islami outside Kabul, 16 guerrillas died and 15 were wounded, the spokesman said.

The Soviet-backed government has launched two drives against guerrillas in the hills around the capital in an effort to destroy their missile sites, the spokesman added.

LONDON (SEPT 5) - Lord Caradon, one of Britain's most respected post-war diplomats and a leading figure in the movement towards de-colonization, died Wednesday at a nursing home in the southern British coastal city of Plymouth, his son announced.

Lord Caradon, formerly Sir Hugh Foot, was 82.

Lord Caradon joined the British Colonial Office during World War II and in 1943 became Colonial Secretary in Cyprus.

In the late 1940s and 1950s, his diplomatic skills played a pivotal role in

negotiations which created the conditions for Nigerian independence.

He was subsequently appointed governor of Jamaica and was instrumental in transferring greater authority over government affairs to Jamaicans.

From 1964 to 1970 Lord Caradon served as British representative at the United Nations and during that time won support for sanctions against Rhodesia -- now Zimbabwe -- following that country's Universal Declaration of Independence.

He had earlier served on the U.N. Trusteeship Council but resigned in protest over British policy toward Rhodesia.

Prior to his post at the United Nations, Lord Caradon served as governor of Cyprus where he brought together the island's Turkish and Greek community leaders and helped create an independent republic.

Lord Caradon grew up in the non-conformist radical tradition of his father, Isaac Foot, who was himself a leading Liberal Party MP. His brother, Michael Foot, was a former leader of the opposition Labour Party and his other brother, Dingle Foot was also a prominent Labour MP.

Lord Caradon also served on the U.N. committee studying apartheid and was a member of the Council for Volunteers Overseas.

He continued with some of his United Nations activities following his retirement, becoming a consultant on the U.N. development program from 1970.

#90248d2870 09/05/1990 ~French/German News Agency

WASHINGTON (SEPT. 5) - U.S. Congressmen Wednesday took a cautious approach to a White House's request that Egypt's seven-billion-dollar military debt be forgiven, fearing other countries might seek the same treatment.

"I'm not willing to double or triple our foreign aid budget without a lot more understanding of what the United States gets out of it," Patrick Leahy, chairman of the Senate's foreign aid panel, said in a television interview.

Mr. Leahy and other congressmen are concerned similar pleas from other countries might cause the federal deficit to swell precisely when Congress and the White House are struggling to reduce it.

On announcing President George Bush's decision to forgive Egypt's debt, White House spokesman Marlin Fitzwater Tuesday described it as "a symbol of

our appreciation" for Cairo's leading role in supporting operation "Desert Shield" in Saudi Arabia and the international trade embargo against Iraq.

Some legislators voiced support for Mr. Bush's request as long as it meant considerable savings to the United States.

"If we could avoid spending a substantial amount of money by having Egyptian soldiers in place of American soldiers, there could be a tradeoff there," said House Minority Whip Newt Gingrich in another interview.

While predicting wide support in Congress for the request, Senator John Glenn said. "I think we would have to look at the other nations that owe us a lot, also."

"There are going to be requests from others if we do this, undoubtedly," he added.

Mr. Leahy predicted that countries like Greece, Israel, Morocco, the Philippines, Pakistan and Turkey would also seek compensation for economic losses caused by the trade embargo against Iraq.

"It looks like some in the administration are saying let's have a blank check for foreign aid. I want to remind them that my subcommittee's still got the checkbook," cautioned Mr. Leahy.

He said the White House request would spell a loss of 750 million dollars in interest payments this year on Egypt's military debt.

#90248d2890 09/05/1990 ~French/German News Agency

PARIS (SEPT. 5) - The United States is seeking to mobilize support from its Western allies and Japan for emergency relief worth 2.5 billion dollars to "frontline" states affected by the Gulf crisis, well-placed officials said here Wednesday.

They said the U.S. administration believes Turkey, Jordan and Egypt will require external aid of this magnitude for 1990 to offset the impact on their economies of the embargo on Iraq and higher oil prices.

The European Commission in Brussels on Wednesday proposed that the European Economic Community (EEC) provide financial assistance to these three countries and announced new emergency aid totalling 15 million European Currency Units (ECU's, 39 million dollars) for refugees in Jordan.

It also proposed to take 30 million ECU's (39 million dollars) from the Community budget for refugees fleeing Iraq and Kuwait since the Iraqi invasion of August 2, particularly to help pay the cost of repatriating

Asians.

This amount requires the approval of EEC foreign ministers who will be meeting in Rome on Friday to discuss the Gulf crisis.

A Commission spokesman would not give details of proposed aid to Jordan, Turkey and Egypt, but said it would include loans to help balance of payments and involve the participation of non-EEC countries.

U.S. Treasury Secretary Nicholas Brady, who discussed the issue of emergency relief to "frontline" states with French cabinet ministers in Paris late Tuesday, said Wednesday in London that British Prime Minister Margaret Thatcher had promised Britain "would do its bit."

But he said after a brief meeting with Mrs. Thatcher that they "didn't talk specific amounts."

Mr. Brady, accompanied by Deputy Secretary of State Lawrence Eagleburger, was expected to discuss the U.S. plan with Japanese leaders in Tokyo within the next few days, Paris sources said.

BAGHDAD (SEPT. 5) - Iraqi President Saddam Hussein had an address read on television Wednesday to boost the morale of Iraqis and launch another appeal for Jihad, or holy war, against what he called the corrupt rulers of Saudi Arabia and Egypt.

Saddam's speech, read by an Iraqi spokesman, was simultaneously translated into English and carried by the American television network Cnn.

It gave no indication of any change in Iraqi policy toward the foreign hostages or in its policy regarding Kuwait, nor did it seem to indicate any imminent act of war on Iraq's part.

Interspersing his address with quotations from the Koran, the Iraqi leader made a strongly religious plea for Arabs to ''save the world and not just yourselves from unjust powers that exploit and corrupt us''.

He said the holy shrines of Islam must be liberated from the presence of non-believers, and that the people of Saudi Arabia should revolt against their ruler. ''We support them,'' Saddam said.

The Iraqi president claimed that 5 million volunteers had signed up to back his country's armed forces, which number one million, and said that if ''non-believers fight us, they must be more than this number.''

Pointing to the example of Vietnam, he said an air force could never win a land war and that non-believers would regret their involvement. They would be defeated in the event of a struggle.

He closed with the words: ''Palestine will be liberated''.

KAMPALA (SEPT 5) - A number of African heads of state or their deputies are expected in Kampala Saturday for a one-day mini summit of the Organisation of African Unity (Oau) ad hoc committee on southern Africa, the Ugandan Foreign Ministry said Wednesday.

Ugandan President Yoweri Museveni is current Oau chairman. The African National Congress (Anc) and the Pan-Africanist Congress (Pac) will also attend.

Anc vice-President Nelson Mandela is expected to brief the leaders on the progress of the negotiations with the South African government and about the violence in the black African townships which have claimed some 600 lives in recent weeks.

The Gambian leader, Sir Dawda Jawara, Chairman of the Economic Community of West African States (Ecowas), is expected to brief his colleagues about the Liberian conflict where an Ecowas peacekeeping force is battling to assert control over Monrovia.

Another subject likely to be discussed is the Gulf crisis and its implications on the performance of African economies, the Ugandan Foreign Ministry said.

AMMAN (SEPT. 5) - A planeload of 157 foreigners arrived here Wednesday aboard a French-chartered Iraqi Airways flight from Baghdad, bringing to more than 1,000 the number of foreigners evacuated from the Iraqi capital since Saturday.

Sixty-two French women and children, 23 Britons, 11 Americans and nine Greeks were reported among those on board.

Earlier Wednesday about 100 Westerners, mainly women and children, arrived in London from Amman aboard a Virgin Atlantic company Boeing 747.

They included 57 Britons, 29 Americans, four Australians and two Canadians.

The Foreign Office in London said Wednesday that 30 British women and children had been prevented from joining a British embassy-organised bus convoy of 306 Britons, which left Kuwait City for Baghdad Tuesday.

The seven buses and two private cars which made the 900 kilometre (562-mile) cross-desert trip arrived late Tuesday in Baghdad and passengers were waiting at Baghdad hotels while British diplomats tried to obtain exit visas for them.

The Foreign office said the British embassy in Kuwait was now considering organising a second convoy to evacuate those held back Tuesday.

An estimated 2,000 Britons are still in Kuwait.

#90248d3160 09/05/1990 ~French/German News Agency

LONDON (SEPT. 5) - Aluminium prices firmed strongly on the London Metal Exchange (LME) Wednesday, boosted by strong Far East buying.

Three months metal was quoted at 1,920 dollars per ton on the afternoon kerb, against 1,919 dollars on the ring and 1,884 on Tuesday.

The metal's climb was in sharp contrast to other metals, which edged lower in quiet trading volume.

Copper fell more sharply than most because of its quotation in pounds after the British currency firmed against the dollar during Wednesday.

Three months copper was quoted at 1,511 pounds per ton on the kerb against 1,505 on the ring and 1,540 on Tuesday.

GENEVA (SEPT. 5) - Libya reported its first AIDS case to the World Health Organisation (WHO) in August, as 10,000 new cases were reported for the month, WHO reported Wednesday.

The August figures bring to 283,010 the number of cases reported to WHO worldwide, while the number of persons estimated as suffering from the incurable disease that attacks the immune system is 700,000.

Another eight to 10 million are estimated to be infected by the HIV virus which leads to AIDS, according to WHO.

Among the 157 countries who are WHO members, only 21 have not reported any AIDS cases.

The Americas have reported 170,661 AIDS cases, compared to 167,014 as of the end of July and an increase of 13,182 for the year.

Of those cases, 140,822 have been reported in the United States (up 11,802 this year), 11,070 (up 415) in Brazil and 3,950 (up 128) in Canada.

In African countries, reported cases have risen 3,528 since the beginning of the year to a 70,724 total. While no new cases have been reported in Uganda this year, Uganda still has the most reported cases at 12,444.

The greatest reported increase in AIDS cases was in Zimbabwe with 1,502 new cases, bringing the total to 3,134 cases.

Reported AIDS cases in Europe have increased 4,689 since the beginning of the year to 38,503.

France remains the most seriously affected with 9,718 cases, but Spain experienced the greatest increase so far this year with 1,118 new cases for a 6,210 total.

Reportd new cases in Italy this year reached 1,015 by the end of August, bringing to 6,701 the number of Italians suffering from the incurable disease.

WASHINGTON (SEPT. 5) - The United States could ask the U.N. Security Council to vote on an air blockade of Iraq if the current international embargo against that country proves inadequate, Secretary of State James Baker said Wednesday.

"Some airflights get into Iraq," Mr. Baker told the Senate Foreign Relations Committee.

These violations are reported to the U.N. sanctions committee, but "if the committee is not effective ... we would be free to seek" authority to intercept the flights, he added.

The United States, however, was not considering taking that step in the immediate future, he said.

"So far we do not think the leakage has been substantial, but it is something we are watching," Mr. Baker said.

-30- 928

#90248d3310 09/05/1990 ~French/German News Agency

PARIS (SEPT 5) - French Minister of Industry Roger Fauroux presented a government plan here Wednesday to save about 30 million tons of oil in 10 years.

Addressing a government commission, he stressed the increased urgency to save energy because of the Gulf crisis, and urged that his proposals be adopted in the 1991 budget.

The plan includes tax breaks for those who buy electric-powered cars, who use renewable energy sources, who instal energy-saving heating devices and who invest in industrial energy-saving devices.

It would also make compulsory the installation of thermostats in offices and other buildings to indicate over-heating.

Oil consumption in France currently stands at 210 million tons a year.

Sources in the industry ministry say that the savings of 30 million tons in 10 years might seem modest, but many energy-saving measures had already become mandatory after previous oil shocks.

Mr. Fauroux would also not rule out more stringent measures later, such as restrictions on road traffic or interior heating, if the oil crisis got much worse. He confirmed that stricter speed limits and controls on auto emissions were also being studied.

The minister said France's petroleum bill would go up around 50 billion francs (about 9.5 billion dollars) in 1991, assuming an oil price of 30 dollars a barrel.

But he added that this would not amount to more than about 7.4 percent of the operating profits of commerce and industry, since many factories had already converted from oil to electricity.

Industries with most to lose from higher oil costs, he said, included the chemicals sector, paper packaging, cement and the glass industry, where one tonne of glass absorbs 100 kilograms (220 pounds) of petroleum.

Mr. Fauroux was sceptical about the development of such petrol substitutes as ethanol, which he said had not yet become cost-effective.

#90248d3370 09/05/1990 ~French/German News Agency

BRUSSELS (SEPT 5) - European Commissioner Filippo Maria Pandolfi on Wednesday played down a decision by Philips NV to withdraw from Europe's biggest research program in semiconductors.

The Dutch electronics, announcing a retrenchment, announced Tuesday it would pull out as leader of the S-RAM project of the Joint European Submicron Silicon Initiative (JESSI).

The European Economic Community joined the seven-year initiative last year in the aim of making the EEC a rival to the United States and Japan in advanced microprocessors, the heart of modern computers and consumer appliances.

Philips said it was closing down a 500-million-dollar pilot factory in Eindhoven to make one-megabit static random access memory (SRAMs) chips as world prices had slumped to to the point of making production unprofitable.

Mr. Pandolfi, in charge of research at the EEC's executive Commission, said that "while it is certainly not good news, it is far from meaning the collapse of the JESSI programme."

The S-RAM project, he noted, only accounts for six per cent of JESSI's total budget of five billion dollars, about one-quarter of which is being funded by the EEC. In any case, his statement said, Jessi remains an

"active participant" in other JESSI projects.

Mr. Pandolfi said the Commission is "more concerned with tackling the underlying reasons for the crisis of the European information technology industry, rather than individual cases which are consequences thereof."

The Commission would publish a paper shortly discussing how best to stimulate the industry in the great EEC single market of 1993, he said.

Philips also said it would cut back manufacturing of image sensors, liquid crystal displays for laptop computers and semiconductor lasers. All told, the measures will mean job losses of 4,000, out of a payroll of 35,000 in Philips' components division.

#90248d3430 09/05/1990 ~French/German News Agency

HAMBURG (SEPT. 5) - A member of the Hamburg city state parliament, Gerd Loeffler, was detained here Wednesday on suspicion of spying for the former Communist regime in East Germany.

Loeffler, 51, a physicist and member of parliament for the past 12 years, had been spokesman on energy for the opposition Christian Democrats (Cdu) in Hamburg.

He resigned Wednesday with immediate effect from the Cdu faction. A local newspaper quoted Loeffler as saying he did not want ''to say anything in this situation, my head is too full at the moment''.

The president of parliament, Helga Elstner, told the house that there was ''no one who was not shaken by the fact that our colleague faces such suspicion''. Loeffler's parliamentary immunity had been lifted so that he could clear his name.

Loeffler, who entered parliament in 1978, is alleged to have worked since 1974 for the now defunct East German Stasi secret police. His temporary detention was ordered by West German Prosecutor-General Alexander von Stahl.

Loeffler is to appear Thursday before a judge at the federal supreme court in Karlsruhe, who will decide whether to issue an arrest warrant.

The investigation of Loeffler was based on information passed to West German intelligence authorities by a former Stasi member.

Police said Loeffler was suspected of having betrayed information on the energy sector and details of internal developments within the Cdu which has been been the main party in the ruling Bonn coalition since 1982.

Police made a thorough search of Loeffler's Hamburg home Tuesday and Wednesday, taking documuents and computer discs.

LUXEMBOURG (SEPT 5) - A senior Tunisian official charged with seeking a peaceful solution to the Gulf crisis warned Wednesday that Iraq could launch a "suicide operation" if it sees no other option, a Luxembourg diplomat said.

Sadok Arabah, a special envoy of Tunisian President Zine el-Abidine Ben Ali, was quoted by the diplomat as President Saddam Hussein of Iraq declared his country had no choice but to undertake "a holy war to liberate Islam's holy sites."

Mr. Arabah, communications minister, made the warning in a meeting here with Luxembourg Foreign Minister Jacques Poos.

He described the situation in the Gulf as "very critical" and said Iraq "could be tempted by a suicide operation," the diplomat said, without elaborating.

Tunisian emissaries have already been to Brussels, Baghdad and Beijing. Tunisia condemned the Iraqi invasion of Kuwait, but refused to attend the Arab summit in Cairo which approved the dispatch of western and Arab troops to the Gulf, along with soldiers from other Moslem countries.

Mr. Arabah outlined Tunisia's five-point plan, the diplomat said.

This comprises: an Iraqi withdrawal from Kuwait; the release of hostages held in Iraq; guarantees by the countries with troops stationed in the Gulf that they will not attack Iraq once it has pulled out of Kuwait; and Iraqi guarantees to respect Kuwaiti sovereignty and the creation of a Kuwaiti government that would decide freely whether to join in union with Iraq.

When these four points have been agreed, the foreign troops deployed in the region would be replaced by an Arab multinational peacekeeping force, under the Tunisian plan.

President Hussein, in a speech read on Iraqi television Wednesday, called on the people of Egypt and Saudi Arabia to rebel against their leaders.

He added that Iraq has "no alternative but to undertake a holy war to liberate Islam's holy sites."

"We will not rest until the last (foreign) soldier leaves the region," he

said.

JAKARTA (SEPT 5) - The death toll from an explosion last week at a nickel smelter plant on the Indonesian island of Sulawesi has risen to six people from the initial two, PT International Nickel Indonesia said Wednesday.

The subsidiary of Canada's International Nickel Co. said in a statement that four other people were severely injured, three of them critically.

The explosion, which occurred Friday at one of the electric furnaces at the plant in Soroako, South Sulawesi, was believed to have been caused by a water leak.

The incident was being investigated by officials of company, the mines and energy ministry and by the police, the firm said.

-30- 835
#90248d3700 09/05/1990 ~French/German News Agency
LONDON (SEPT. 5) - Gold prices recovered here Wednesday from a five dollar drop the previous day, closing at 387 dollars per ton, up from 382.25 at the close of trading Tuesday.

The recovery was triggered by Iraqi President Saddam Hussein's call on Arabs in Saudi Arabia and Egypt to rise against their leaders and join a holy war agaist the Western presence in the Gulf.

Analysts said the market was taken surprise by the statement, after Tuesday's fall in bullion prices on expectations that war will not break out before the weekend.

"It was real mud-slinging stuff. We were expecting a holding statement from him (Saddam Hussein) and we got a blunderbus," said Andy Smith of UBS Phillips and Drew.

But the market is still not expecting any military action from U.S. President George Bush before his meeting in Helsinki with Soviet President Mikhail Gorbachev on Sunday.

After that the U.S. president is expected in Brussels for talks with other Western leaders.

"We could see a fresh upturn Friday to cover the possibility of an American strike Monday," Mr. Smith said.

#90248d3720 09/05/1990 ~French/German News Agency
JOHANNESBURG (SEPT 5) - The African National Congress (ANC) and its ally, the Congress of South African Trade Unions (COSATU), demanded a judicial inquiry Wednesday into the deaths of 11 people killed when soldiers opened fire on a crowd on Tuesday.

The South African Defence Force (SADF) has come under scathing criticism for the deaths in Sebokeng black township, 60 kilometres (36 miles) south of here.

ANC spokesman Saki Macozoma said Wednesday that ANC deputy president Nelson Mandela had called for the inquiry. COSATU spokesman Zwelinzima Vavi also called for a judicial inquiry at a press conference here late Wednesday.

The SADF said the soldiers came under attack by mobs throwing stones and petrol bombs but witnesses and journalists said residents were moving towards the troops with their hands up in a peace gesture when the soldiers opened fire.

The shootings brought to 36 the number of people who died in Sebokeng on Tuesday when Zulu vigilantes loyal to Chief Mangosuthu Buthelezi's Inkatha Freedom Party attacked township residents rallying under the ANC banner.

The ANC and COSATU were joined in their call for the appointment of a judicial commission of inquiry by a co-leader of the white liberal Democratic Party, Zach de Beer, who said the public will expect such an inquiry.

At the COSATU press conference, eye-witnesses said the soldiers opened fire without any warning after they were called in by police "to rescue" Inkatha vigilantes who were trapped in the hostel by ANC supporters.

Ernst Sotsu of the ANC-aligned Sebokeng Civic Association said "at no stage did our people provoke the SADF." "The SADF came out ready to shoot," he said.

Mr. Vavi claimed "a group of armed Inkatha vigilantes" led by the Transvaal chairman of Inkatha's Youth Brigade, Themba Khoza, and accompanied by "some whites who were clad in balaclavas," entered the hostel early on Tuesday morning and killed 19 people "on the spot."

Mr. Khoza was arrested on Tuesday in Sebokeng for possessing arms along with more than 100 Inkatha members.

Senior COSATU official Neil Coleman accused police of pulling back patrols around the hostel shortly before the vigilantes attacked the hostel --

described by residents as an ANC stronghold.

The SADF has launched an internal board of inquiry into the shootings while police were also investigating the incident.

#90248d3820 09/05/1990 ~French/German News Agency

KUALA LUMPUR (SEPT 5) - The Malaysian government will donate 100,000 U.S. dollars worth of food in response to Jordan's appeal for basic food items to feed a massive influx of refugees, a senior official said Wendesday.

"We hope this will help alleviate the food shortage there," Foreign Minister Abu Hassan Omar was quoted by Bernama news agency as saying.

He said that the cabinet made the decision at its Wednesday weekly meeting.

The government's decision was also to express Malaysia's gratitude to the Jordanian government for its cooperation in helping Malaysians evacuated from Iraq and Kuwait to return home, he said.

Jordan appealed to foreign nations and relief agencies for basic foodstuffs last week after it found itself unable to cope with the hundreds of thousands of refugees who flooded across its borders after Iraq invaded Kuwait on August 2.

LAGOS (SEPT 5) - Nigeria's Armed Forces Ruling Council (AFRC) decided Wednesday to retire all generals who are not members of the body, a source close to the presidency said.

The move affects eight army generals and an unspecified number of admirals and rear-admirals in the navy as well as several air force marshals.

The move will pave the way for the promotion of a large number of younger officers and cement the military team that will carry out the transition to civilian rule, which the president and chairman of the AFRC, General Ibrahim Babangida, has promised for late 1992.

Just how many promotions will follow remains unclear. Some posts may not be filled, in line with Gen. Babangida's announced intention to reduce the Nigerian army.

#90248d4110 09/05/1990 ~French/German News Agency

WASHINGTON (SEPT. 5) - Iraqi President Saddam Hussein's statement Wednesday calling on Egyptians and Saudis to overthrow their leaders was a "sign of desperation," White House spokesman Marlin Fitzwater said here.

Mr. Hussein's words were "another rhetorical diatribe designed to split Arab unity. We see it as a sign of desperation that Iraq is lashing out with hypocrisy and irrelevant statements," Mr. Fitzwater said.

"For Saddam to claim moral rectitude is totally beyond belief."

The Iraqi president's statement, read by his spokesman on Iraqi television, was broadcast live by Cable News Network in the United States.

Mr. Fitzwater refused to comment on the different issues Mr. Hussein raised in his statement.

He did say, however, that there was "no evidence" to support Mr. Hussein's claim that Iraqi children were dying because of the international trade embargo against his country.

Besides calling for Egyptian President Hosni Mubarak and Saudi King Fahd to be overthrown, the Iraqi president called for a "holy war" to protect Islam's holy sites in Saudi Arabia.

On other matters, Mr. Fitzwater said U.S. President George Bush spoke over the phone Wednesday with his ambassador in Kuwait City, Nathaniel Howell, who continued defying together with another 10 U.S. diplomats an Iraqi order to close down the mission and move to Baghdad.

Mr. Bush, the spokesman added, told the ambassador that Americans were proud in seeing that the embassy continued to help some 2,000 stranded countrymen who wanted to leave the country, despite the difficult conditions it was in -- water and power have been cut to the building.

Telephone links with the embassy were very patchy, he said.

Mr. Fitzwater said the U.S. embassy in Kuwait City had supplies for only "a short period of time," refusing to give any further details the Iraqi authorities might be interested in.

The U.S. diplomats would remain in the compound "as long as they can," said the White House spokesman.

#90248d4150 09/05/1990 ~French/German News Agency

MONTEVIDEO (SEPT 5) - Uruguay has decided to complain to the United Nations about the Security Council-mandated economic embargo against Iraq,

Foreign Minister Hector Gros Espiell said Wednesday.

The minister said article 50 of the U.N. Charter allowed member states to consult with the Security Council if they should suffer economic hardship as a result of any such embargo.

Mr. Gros Espiell said other countries -- specifically Jordan, Bulgaria, Yugoslavia and Turkey -- had made similar representations to the Security Council.

Saying Uruguay "has complied with and will comply with" the embargo, Mr. Gros Espiell pointed out that his country was on the verge of assigning a contract to provide Iraq with 22,000 tonnes of mutton and lamb at the time the Gulf crisis erupted.

The minister said the government's intention for the present was simply to raise the problem without suggesting any potential remedies.

However, observers said the move could be the first step toward the country seeking some relief under a plan being pushed by the United States for international contributions to a fund to help relieve thje costs of the crisis to some of the poorest nations.

#90248d4160 09/05/1990 ~French/German News Agency

LAGOS (SEPT 5) - Nigeria has increased its oil production in accordance with the recent OPEC decision, and can sustain the present output level for an indefinite period, the official News Agency of Nigeria (NAN) said Wednesday.

An official source in the Nigerian National Petroleum Corp. (NNPC) told the news agency that boosting output had not been difficult "since oil companies operating here had been placed on the alert as a result of the Gulf crisis."

Although the report did not quantify the volume of the increase over Nigeria's OPEC quota of 1.611 million barrels a day (mbd), the source said that the country has the capacity to produce 2.0 mbd.

The OPEC ministerial monitoring committee agreed in Vienna last week on an unspecified increase in OPEC production to make up for the shortfall in oil supply caused by the U.N. embargo on Iraqi and Kuwaiti oil.

Individual OPEC members were given the option to decide how to increase production based on output capacity and reserve base.

Nigeria has managed to produce 2.5 mbd in the past but had been forced to

"restrict our production in line with the market situation and our OPEC quota," the source told NAN.

Following the intensification of oil exploration in the last few years, oil companies have recently announced new finds in their opearational areas, the source added.

Preliminary estimates indicate that the findings amount to some 400 million barrels of oil and to more than half a trillion cubic feet of gas, NAN said.

PARIS (SEPT 5) - French Defense Minister Jean-Pierre Chevenement will visit Egypt on September 7-9, and Qatar and the United Arab Emirates (UAE) on September 22-24, official sources said here Wednesday.

In Egypt, Mr. Chevenement is to hold "an exchange of views in depth" on the Gulf crisis with President Hosni Mubarak, the sources said.

In the UEA, he will inspect French forces which are to be reinforced soon by a French command structure of less than 20 officers that will interface with the local authorities, according to informed sources.

The French presence in the UAE currently comprises about 300 men including a ground reconnaisance force, two Crotale surface-to-air missile units and a Mistral missile unit.

In addition, French combat helicopter pilots from the aircraft carrier Clemenceau have begun training with UAE helicopter pilots.

In Qatar, where France has provided significant military and other aid, the minister's discussions will follow the same lines.

On Tuesday, Mr. Chevenement said France wanted an "international resolution" to toughen the United Nations' trade embargo on Baghdad, but warned that any military intervention in Iraq could leave "at least 100,000 dead."

Speaking on French radio, he warned that it was foolhardy to believe such a conflict in Iraq would not spread beyond the Middle East, and added that he still had faith in "diplomacy" and a "dialogue" between the West and the Arabs.

WASHINGTON (SEPT. 5) - The U.S. Navy is currently monitoring a Bahamas-flag vessel, leased to Iraq, which is suspected of transporting equipment which could be used for nuclear weaponry, U.S. Government officials said Wednesday.

According to one official, who insisted on anonymity, the Gur Mariner is currently "floating around in the Mediterranean" after having apparently tried to reach the Jordanian port of Aqaba. It has been under U.S. surveillance since a stopover last week at Port Said, Egypt, they said.

"For the moment it can pretty well stay where it is, but if it tries to go through (the blockade) we'll interdict it," said one official.

#90248d4320 09/05/1990 ~French/German News Agency

ANKARA (SEPT. 5) - The Turkish parliament here Wednesday gave the government powers to use military force in the Gulf crisis.

The decision gives the government a free hand - stopping short of declaring war - in sending troops abroad or allowing foreign troops in Turkey to enhance the country's security.

The vote, with 246 in favour and 136 against, was taken in a reportedly stormy closed session.

The decision was seen as a personal victory for President Turgut Ozal who had insisted on flexibility after parliament voted him similar powers on August 12 but only in the event of an attack on Turkey.

Opposition leaders, fearing the powers could be used to allow the American forces to open a second front against Iraq from Turkey, accused Ozal of adventurism. They charged that he was putting the country's security in jeopardy for undefined rewards.

But after the vote, Premier Yildirim Akbulut said the government did not want war and would exercise its powers with restraint. He said a frigate could be sent to the Gulf as an early measure.

#90248d4420 09/05/1990 ~French/German News Agency

WASHINGTON (SEPT. 5) - U.S. Secretary of State James Baker was due to leave Wednesday for a tour of Saudi Arabia, the United Arab Emirates and Egypt before flying on to Helsinki for the U.S.-Soviet minisummit, the State Department said.

Spokeswoman Margaret Tutwiler said Mr. Baker would meet in Jeddah Thursday

with Saudi King Fahd and with Saudi Foreign Minister Prince Saud al Faisal.

Friday, Mr. Baker will meet with the exiled Emir of Kuwait, Sheikh Jabir al-Ahmad al-Jabir al-Sabah in Taef and then travel to Abu Dhabi for a meeting with the President of the United Arab Emirates, Sheikh Zayed bin Sultan al Nayer.

Saturday, Mr. Baker is due in Alexandria, Egypt, for a meeting with President Hosni Mubarak. He will then travel to Helsinki for the George Bush-Mikhail Gorbachev summit.

Following the Helsinki summit, Mr. Baker is due to travel to Moscow, where he will stay September 10-13, for the "Two-plus-four" meeting of the foreign ministers of the two Germanies plus the foreign ministers of the four major victorious allies of World War II -- Britain, France, the Soviet Union and the United States.

Miss Tutwiler said the secretary of state also planned to visit other European capitals but could not yet give details of his itinerary.

LAGOS (SEPT. 5) - A Nigerian committee on corruption and economic crimes has recommended that the government set up a "corrupt practices" court, the committee chairman, Supreme Court Justice Kayode Esho, said here Wednesday.

Presenting the committee's report to President Ibrahim Babangida, the judge called for an "independent committee against corruption" similar to one in Hong Kong, but with a Nigerian flavour and the right to try alleged offenders.

The judge's committee, made up of judges and lawyers, criminologists, police, journalists, military men, lawyers, clergymen and social crusaders, urged a public declaration of assets by high-ranking civil servants.

In his response, President Babangida blamed much of the corruption in Nigeria on a general lack of exemplary leadership and probity among public servants, and their desire to get rich quickly.

The anti-corruption committee was inaugurated in April last year to tackle what was officially described as the "endemic problems" of corruption and other economic crimes.

#90248d4460 09/05/1990 ~French/German News Agency

EAST BERLIN (SEPT 5) - Senior officials from the four World War Two allies and the two German states will meet again on Thursday in the current final round of the ''two plus four'' talks on German unity, informed sources said Wednesday.

They said further progress had been achieved Wednesday on a time limit for the withdrawal of Soviet forces from East Germany. The talks were then adjourned to give the Soviet delegation time to consult with the foreign ministry in Moscow.

It was not clear when the talks would be brought to an end, although the sources said all sides had stated their readiness to have a final document ready for signing by the six foreign ministers in Moscow September 12.

Originally it was hoped that the document would be ready for initialling on Wednesday. Its purpose is to settle the external aspects of German reunification, specifically the end of special responsibilities and privileges of the four powers.

The talks are being conducted by foreign ministry officials from Bonn, East Berlin, Washington, London, Paris and Moscow.

#90248d4480 09/05/1990 ~French/German News Agency

FARNBOROUGH, England (SEPT 5) - The private French group Matra Defense and the British group GEC-Marconi have made a joint proposal to the British defense ministry to supply Micasraam missiles, Noel Forgeard, president of Matra Defense-Espace, said here Wednesday.

The missile is based on Matra's air-to-air Mica missile, but was optimised for short-range missions in collaboration with GEC. Mr. Forgeard said the proposal demonstrated the two firms' commitment to joint strategic projects.

After the joint firm Matra-Marconi-Espace -- with Matra holding 51 per cent -- was created at the end of 1989, Matra's Defense-Espace branch expressed interest in more joint defense projects with GEC, Mr. Forgeard added.

But both Matra and GEC "wanted to move ahead step by step", he said.

He forecast that the Mica family of missiles would become the air-to-air missile of the 1990s, and expected the Micasraam, which would be ready in 1995, to draw a five billion-dollar export market in 15 years.

Both Mr. Forgeard and Dave Fletcher, head of GEC-Marconi, said they expected "a favorable decision from Britain in the coming months".

Mr. Fletcher said it was important to develop European missiles that did not depend on American licenses for export.

But he said Britain was not likely to buy the standard version of the Mica, because of a prior agreement with the United States on the medium-range AMRAAM air-to-air missiles.

Mr. Forgeard suggested another field of possible cooperation with GEC would be in the Apache air-to-ground missiles currently under development by Matra with the French firm Aerospatiale.

He said Matra had only two strategic partners in Europe, GEC and Deutsche Aerospace. He added that "no country can remain alone in the armaments field, and industrialists will have to associate to answer their joint needs".

Mr. Forgeard set Matra's overall sales at 10.65 billion francs (2.01 billion dollars) in 1990.

#90248d4600 09/05/1990 ~French/German News Agency

BAGHDAD (SEPT 5) - A delegation from the Italian parliament's foreign affairs committee arrived here late Wednesday to discuss the Gulf crisis with their Iraqi counterparts, the official INA news agency reported.

It said the group would spend several days in the Iraqi capital.

The Italian Foreign Ministry said earlier that a group of 27 Italian women and children who left Kuwait City on September 1 were to arrive in Amman late Wednesday with refugees from other countries.

Correspondents in the Jordanian capital said the Italians arrived on board an Iraqi Airways jet, along with 62 French women and children, 23 Britons and other foreign nationals.

An Italian foreign ministry spokesman said a total of 360 Italians were still in Iraq and Kuwait.

They, along with thousands of other foreigners, have been held hostage since Iraq's August 2 invasion of Kuwait.

ISLAMABAD (SEPT 5) - Pakistan Wednesday sent a ministerial delegation to Saudi Arabia to seek help in overcoming the impact of the Gulf crisis on the domestic economy, officials here said.

The crisis has "badly affected" the country, the minister for petroleum and natural resources, Majid Malik, said before leaving for the oil-rich kingdom.

Pakistan's interim government has not yet raised fuel prices despite a soaring oil market. Reliable sources said the government was hesitant to pass on the burden to consumers ahead of elections, due on October 24.

Mr. Malik, leading a four-member team of experts and officials, told reporters he was carrying a special letter from President Ghulam Ishaq Khan for King Fahd.

He was to hold talks with the Saudi oil and finance ministers and also meet with Kuwaiti ministers in the kingdom. Later the delegation will visit Abu Dhabi.

Pakistan is participating in the multinational force assembled in Saudi Arabia after the Iraqi invasion of Kuwait.

Disruption of oil supplies from Kuwait and loss of remittances by Pakistani workers in Kuwait and Iraq has hit the country hard, he said.

The minister said before the Gulf crisis, Pakistan received annual remittances worth 170 million dollars from Kuwait and 100 million dollars from Iraq.

He said Pakistan used to import 70 per cent of its oil requirements from Kuwait, and had extensive trade ties.

Mr. Malik said that acquisition of refined oil was the real problem as industrialised countries such as the United States and Japan had booked the refineries in Singapore and other countries.

He said the government was considering obtaining crude oil and then shipping it to foreign refineries.

The minister said talks were underway with Malaysia, Indonesia, Singapore and Brunei to meet shortages.

France had also been approached to help with oil refining, he added.

#90248d5320 09/05/1990 ~French/German News Agency

LONDON (SEPT 6) - Arab determination to stop Iraqi aggression remains strong, British Foreign Secretary Douglas Hurd said here Wednesday, returning from a tour of the Gulf region.

Speaking at London's Heathrow airport, Mr. Hurd expressed hope that the international sanctions against Iraq would lead to a solution to the crisis.

"I think what we have done is show the Arabs in the Gulf who are friends, who are staunch against the Iraqi aggression, that the West is going to stand with them on this and one way or the other Saddam Hussein will be forced to pull out of Kuwait," he said.

Mr. Hurd's tour included visits to Qatar, the United Arab Emirates, Oman, Yemen, Saudi Arabia and Jordan, to discuss the crisis sparked when President Saddam Hussein of Iraq sent his troops to invade Kuwait on August 2.

WASHINGTON, (SEPT 5) - A U.S. congressman Wednesday said Japan -- which has been slow in responding to the Gulf crisis -- should pay for U.S. troops stationed on their island nation.

U.S. Representative David Bonior, a Michigan democrat, said in addition to what he termed Japan's slow response, a one-billion-dollar assistance package it had promised appears likely to be delayed.

"Too often we have seen Japanese promises and no action," Mr. Bonior told reporters. "They should pay a greater share in the Persian Gulf and they should pay for our troops protecting Japan."

Mr. Bonior, the fourth ranking democrat in the U.S. House of Representatives, said he wrote an amendment for Japan to pay for U.S. troops stationed there to be offered in the fiscal 1991 defense bill. He said he drafted it before Iraq invaded Kuwait August 2.

U.S. forces in the Gulf are protecting the oil interests of U.S. allies, he said, including Japan.

"Everyone is bellying up and doing their part, and they (the Japanese) are hanging back. I think that's grossly unfair," Mr. Bonior said.

JOHANNESBURG, (SEPT 6) - Three right-wing fugitives wanted by Namibian authorities on charges of murdering a security guard last August in an attack on United Nations offices will be extradited to Namibia, police said here Wednesday.

Johannesburg police said in a statement issued here that warrants for the arrest of the three men were issued by a magistrate and were aimed at starting extradition proceedings as soon as possible.

Two of the men, Darryl Stopforth and Leonard Veenendal, are being held under security laws for their alleged responsibility for a wave of bomb attacks in and around Johannesburg in June and July, while a third rightwinger, Horst Klenz, is still on the run.

The men escaped from Namibian custody in central Namibia in December last year. A young Namibian policeman was fatally wounded when the rightwingers, assisted by unknown accomplices, escaped.

In Windhoek, Namibian police spokesman Deputy Commissioner Jumbo Smit welcomed the extradition steps saying: "I am optimistic that something is at last being done," the SAPA news agency reported.

At the time of Namibia's independence from South Africa on March 22, no formal extradition agreements existed between the two countries.

#90248d6010 09/05/1990 ~French/German News Agency

BANGKOK (SEPT. 6) - Heroin refineries appear to be mushrooming on the Thai-Malaysian border to avoid a crackdown on the illegal narcotics industry in northern Thailand, a senior Thai police official said Wednesday.

Border Police Colonel Prasert Chan-in said his forces had discovered the area's first known heroin refinery in a dense rubber plantation five kilometers north of the border on Tuesday and raided it after exchanging fire for about five minutes with several unidentified men.

After the gunmen fled, the police seized 400 grammes of refined top-grade heroin, 12 bottles of ether and 14 bottles of chloroform at the refinery in Sadao district of Songkhla province, some 960 kilometers (570 miles) south of here.

The illegal refining industry appeared to be migrating southward to evade a police crackdown in the notorious Golden Triangle region where Thailand borders on Burma and Laos, and where opium, the raw ingredient of heroin, is grown, Col. Prasert said.

He said he suspected that many heroin refineries had mushroomed along the border.

#90248d9830 09/05/1990 ~French/German News Agency

TAIPEI (SEPT. 5) - Taiwan's consumer price index was 5.63 percent up in August over a year earlier, bringing the inflation rate to 3.9 percent for the first eight months of this year, a top statistics official said Wednesday.

Yu Chien-min, head of the Directorate General of Budget, Accounting and Statistics, attributed the rise in August to jumps in prices of fresh vegetables following three typhoons which damaged crops.

The agency adjusted the projected inflation rate for this year to 4.2 per cent from 3.64 percent.

The island's inflation hit an eight-year high of 4.41 percent in 1989, compared with just 1.28 percent in 1988.

TOKYO (SEPT. 5) - Japan's ruling Liberal Democratic Party (LDP) will give Peru 120 trucks as economic development aid, a party official said Wednesday.

LDP secretary general Ichiro Ozawa conveyed the decision to Peruvian President Alberto Fujimori in a telephone call Tuesday, the official added.

The 120 trucks, valued at 300 million yen (2.1 million dollars), will be purchased in Latin America and will not be sent from Japan as originally planned.

The assistance comes after Mr. Fujimori, who has Japanese ancestry, visited Tokyo in July after his election as president.

-30- 745
#90248d9870 09/05/1990 ~French/German News Agency
MANILA (SEPT. 5) - The Philippines' annual inflation rate dropped to 11.1 percent nationwide and 15.4 percent in the capital in August, the National Statistics Office (NSO) said Wednesday.

The NSO said the effects of the July 16 earthquake on the main island Luzon contributed to higher inflation in some areas, but nationwide the average was cushioned by slower increases in prices of basic goods and services.

The nationwide inflation rate stood at 12.6 percent in July, while in Manila it stood at 16.5 percent, the NSO said.

-30- 704
#90248d9900 09/05/1990 ~French/German News Agency
Hanua, West Germany (SEPT. 5) - Three West German men went on trial here Wednesday for allegedly selling nuclear processing equipment and atom-bomb-grade tritium gas without permission to Pakistan.

The main defendant, Rudolf Maximilian Ortmayer, former managing director of the company Neue Technologien GmbH (Ntg), has been free since January on a bail of 600,000 marks (382,000 dollars).

Prosecutors plan to lead or cite testimony from nearly 50 witnesses to show that Ortmayer and two former business partners evaded West Germany's export control and arms control laws between 1981 and 1988 to help Pakistan's nuclear weapon research programme.

The co-defendants are a physicist, Peter Finke, who was arrested at the

beginning of this year in Luxembourg, and a chemist, Heinrich Weichselgaertner, who used to work for one of West Germany's prestigious Max Planck pure science institutes.

The case against two other accused was dropped in July after they agreed to fines of 50,000 marks (31,850 dollars) apiece.

Anti-nuclear demonstrators who turned up for the start of the trial Wednesday demanded that federal government ministers and the federal export-supervision agency should be the ones on trial.

#90248d9970 09/05/1990 ~French/German News Agency

TOKYO (SEPT. 5) - Japan's Sanwa Bank Ltd., the country's fourth largest, plans to acquire 75 percent of Canada's McCarthy Securities Co. Ltd. for an undisclosed sum, a bank official said Wednesday.

The Osaka-based bank said the purchase, to be made through Sanwa Bank Canada Ltd., was subject to approval and also involved the injection of additional capital in the form of an undisclosed amount of subordinated debt.

The acquisition aims to help expand sales of Canadian bonds to Japanese investors including insurance firms while boosting sales of securities underwritten by Sanwa to Canadian institutional investors, it said.

The new company, to be renamed Sanwa McCarthy Securities Co. Ltd., will also offer investment and commercial banking services in conjunction with Sanwa Bank Canada whose assets amount to 1.2 billion Canadian dollars (one billion U.S.).

McCarthy Securities, currently capitalised at four million dollars (3.4 million U.S.) has seats on the Toronto and Montreal stock exchanges in addition to an office in Geneva.

#90248e0007 09/05/1990 ~Latin America New Agency

Managua (SEPT. 5) EFE - The Nicaraguan government has announced a 34 per cent salary hike for state employees in an effort to protect their purchasing power amid skyrocketing inflation.

At a press conference Tuesday, Finance Minister Emilio Pereira said the wages of public workers would be paid in old cordobas, which have been continually devalued against the U.S. dollar.

But he added that a minimum salary of 50 gold cordobas, whose value is fixed to the U.S. dollar, would be guaranteed.

The two types of cordobas, along with the dollar, circulate in Nicaragua.

The government last raised state workers' salaries on August 3 by between 40 and 60 per cent. The average monthly income in the sector is between dlrs 350 and 500.

In May, a powerful state workers' union linked to the former ruling Sandinistas staged a crippling week-long strike to demand pay hikes from the conservative government of President Violeta Chamorro.

The stoppage, in which six people were killed in related violence, ended after the government agreed to some of the strikers' demands.

Opposition Sandinista party officials estimate inflation has reached 2,000 per cent over the past 12 months.

#90248e0009 09/05/1990 ~Latin America New Agency

Bilbao, Spain (SEPT. 5) EFE - The Basque separatist group ETA claimed responsibility for 11 recent terrorist attacks in Spain in a communique published Wednesday in the radical Basque daily Egin.

Among the actions claimed by ETA, was an August 17 car bomb attack on a civil guard barracks in the northern city of Burgos in which 47 people were injured.

The other attacks included four explosions on railroad lines which ETA

threatened to sabotage during a two-week period last month, a grenade attack on another civil guard barracks and a package bomb sent to an officer of the corps which was defused.

In its communique, ETA also acknowledged the membership of a youth who was killed August 21 while handling a bomb outside a supermarket in the northern Basque region.

The group has killed more than 600 people since it began fighting for the right to independence of northern Spain's Basque region in 1968.

#90248e0033 09/05/1990 ~Latin America New Agency

Amman (SEPT. 5) EFE - The Red Cross said Wednesday that a new refugee camp is being built at Azraq, 100 km east of Amman, which will be able to hold up to 30,000 refugees fleeing from Iraq and Kuwait.

A spokesman for the organization also said that Jordanian authorities were planning to build two other camps to hold 200,000 refugees, although the sites for these had not yet been decided.

Most of the occupants of the camps are expected to be Bangladeshis and Sri Lankans, whose repatriation may be held up because of transport problems.

Since Iraq invaded Kuwait August 2, more than 400,000 refugees have fled into Jordan.

-30- 802

#90248e0034 09/05/1990 ~Latin America New Agency

Buenos Aires (SEPT. 5) EFE - The Argentine government Wednesday announced the compulsory rescheduling of its internal debt, cancelled orders from

state industry and launched a further phase of public sector lay-offs.

The latest measures were revealed in a 122-point decree made public by Deputy Economy Minister Carlos Carballo.

As from October 1, all state sector offices will be required to cut their payroll by 15 per cent, resulting in the loss of some 80,000 jobs by the end of the year.

All state enterprises dependent on the Defense and Public Works Ministries many of which are already set to be privatized, will now be run by the Economy Ministry, effectively giving that ministry absolute control over public spending.

Furthermore, the decree establishes that the government's dlrs eight billion internal debt will be paid off through the compulsive issuing of 10-year bonds which will pay eight per cent interest yearly.

The state-run electricity, water, and gas industries will now be allowed to cut supplies to other state industries that do not pay their bills.

At the same time, state-owned cars used by senior civil servants will be auctioned off and public companies will be obliged to use private legal firms.

The decree forms part of the rigorous program of economic reforms announced the day after President Carlos Menem took office 14 months ago.

Last week, Economy Minister Antonio Erman Gonzalez announced on state television that public service costs were to rise.

Following the minister's broadcast, the opposition slammed the measures, declaring they would only bring misery and further recession.

The government has announced its intention to increase its budget surplus of around dlrs 100 million expected for August as a way of reducing inflation, and revitalizing industry.

London (SEPT. 5) EFE - Kuwait's deposed Al-Sabah royal family would not accept any peace plan for the Gulf crisis which meant it would have to leave power and live in exile, former Kuwaiti Prime Minister Prince Saad al-Sabah said Wednesday.

Speaking at a press conference in the British capital, Al-Sabah reiterated that the only way out of the crisis, sparked by Iraq's August 2 invasion of its tiny oil-rich neighbor, was for Iraq to unconditionally pull its troops out of Kuwait.

"We insist on the total implementation of the (United Nations) Security Council resolutions which establish the unconditional withdrawal of Iraqi troops from our country," he said.

Kuwaiti Emir Sheikh Jaber al-Ahmed al-Sabah and many members of his family fled to Saudi Arabia during the Iraqi invasion.

Prince Saad said that Kuwait would not forget the pro-Iraqi position taken by Jordan's King Hussein throughout the crisis.

"King Hussein must face up to the consequences of his policies and the grave mistakes he has made and continues making," he added.

He said that once the crisis was over, oil-rich Kuwait would not give such generous economic assistance to Jordan as it had done in the past.

The prince said that the exiled Kuwaiti government was prepared to partially fund the U.S.-led multinational force in Saudi Arabia and the Persian Gulf but refused to put a figure on how much it would give.

"If sacrifices are needed we are ready to be in the front line. The (Al-Sabah) family will be the first to sacrifice their lives for our country," he said.

SANTIAGO (SEPT 5) EFE - A rock explosion in a Chilean copper mine Wednesday killed one man and injured two others while they were working to reinforce underground tunnels, the National Chilean Copper Corporation (CODELCO) reported.

All three victims of the explosion at the El Teniente mine, 130 km southeast of Santiago, worked for a company contracted to strengthen the linings of the tunnels against such accidents.

Rock explosions in mines are small earthquakes that occur as a result of violent changes in rock pressure during drilling, and can only be avoided by reinforcing the tunnel walls, CODELCO said.

Two similar accidents have occurred in Chile already this year.

Five miners died in January after being trapped in a mine shaft following a rock explosion in January, while another mine blast in July caused extensive damage but harmed no workers.

The El Teniente mine produces an estimated 350,000 tons of copper each year.

BERLIN (SEPT. 5) XINHUA - THE DEMOCRATIC GERMAN GOVERNMENT AGREED TODAY TO INCREASE THE WAGES OF 1.7 MILLION WORKERS BELONGING TO 14 TRADE UNIONS, ACCORDING TO THE GOVERNMENT ADN NEWS AGENCY.

UNDER THE AGREEMENT, WHICH CAME AFTER 15 HOURS OF TALKS, THE WORKERS WILL GET A 200-DM (1 DM EQUALS TO 0.6 U.S. DOLLAR) RISE IN THEIR MONTHLY PAY AS OF SEPTEMBER, WITH ADDITIONAL 50 DMS FOR EACH OF THEIR CHILDREN AS A SUBSIDY FOR INFLATION FOLLOWING THE INTRODUCTION OF DM AT THE BEGINNING OF

JULY.

TRADE UNIONS, ESPECIALLY THE ONE OF THE PUBLIC SERVICES AND TRANSPORT AND COMMUNICATIONS, HAVE STAGED SEVERAL WARNING STRIKES SINCE AUGUST, DEMANDING A 350-DM MONTHLY PAY RISE AND A SUBSIDY OF 50 DMS FOR EACH CHILD.

#90248h0045 09/05/1990 ~Chinese News Agency

BEIJING (SEPT. 5) XINHUA - CHINA WILL REAP A BUMPER AUTUMN HARVEST THIS YEAR THANKS TO THE EFFORTS OF THE COUNTRY'S MAJOR AUTUMN CROPS PRODUCTION AREAS.

WHILE MANY FARMERS HAVE USED SCIENTIFIC METHODS TO TRANSFORM MIDDLE- AND LOW-YIELD CROPLAND, MOST OF THESE AREAS, INCLUDING JILIN, HEILONGJIANG AND HEBEI PROVINCES, HAVE ALSO ENLARGED GROWING AREAS FOR CORN AND RICE.

FOR INSTANCE, IN NORTHEASTERN CHINA'S JILIN PROVINCE, THE GROWING AREAS FOR CORN AND RICE THIS AUTUMN REACHED 2.2214 MILLION HECTARES AND 480,000 HECTARES RESPECTIVELY, UP 12 PERCENT AND 18.5 PERCENT OVER LAST YEAR.

FARMERS HAVE ALSO INCREASED GROWING AREAS FOR SOME HIGH-YIELD CROPS AND APPLIED MORE FERTILIZER TO FARMLAND IN ORDER TO ENSURE THIS YEAR'S BUMPER AUTUMN HARVEST.

NAIROBI (SEPT. 5) XINHUA - UNEMPLOYMENT IS THE BIGGEST CHALLENGE FACING KENYA AS IT HAS TO CREATE 14 MILLION JOBS BY THE YEAR 2000, KENYAN MINISTER FOR TECHNICAL TRAINING AND APPLIED TECHNOLOGY PROF. SAM ONGERI SAID YESTERDAY.

MR. ONGERI SAID THAT KENYA MUST ENTER INTO A NEW PHASE OF DEVELOPMENT TO ACCOMMODATE THE GROWING WORK FORCE IN THE COUNTRY, THE "DAILY NATION" NEWSPAPER REPORTED TODAY.

RECENT STUDIES, HE WENT ON, SHOW THAT THE SMALL-SCALE AND SELF-EMPLOYED SECTORS ARE GENERATING EMPLOYMENT FASTER THAN THE MODERN PUBLIC AND PRIVATE SECTORS.

THE MINISTER NOTED THAT IT COSTS AN AVERAGE OF 20,000 KENYAN SHILLINGS (ABOUT 950 U.S. DOLLARS) TO CREATE A JOB IN THE SMALL- SCALE AND SELF-EMPLOYED SECTORS WHILE 320,000 SHILLINGS ARE NEEDED TO CREATE A JOB IN THE MODERN PRIVATE AND PUBLIC SECTORS.

"THIS INDICATES THAT FOR EVERY ONE JOB CREATED IN THE MODERN SECTORS, 16 MORE JOBS CAN BE CREATED IN THE SMALL-SCALE AND SELF- EMPLOYED SECTORS,"

HE ADDED.

THE COUNTRY WILL HAVE TO ESTABLISH ABOUT 400,000 TO 500,000 SMALL BUSINESSES TO MEET THE GROWING DEMAND FOR JOBS BY THE YEAR 2000, THE MINISTER SAID.

BANGKOK (SEPT. 5) XINHUA - THAILAND'S EXPORT PROMOTION ACTIVITIES FOR FISCAL YEAR 1991 (FROM OCTOBER 1, 1990 TO SEPTEMBER 30, 1991) WILL FOCUS MAINLY ON JAPAN DUE TO ITS BRIGHT POTENTIAL UNDER A NEWLY REVISED STRATEGY.

A REPORT OF THE EXPORT PROMOTION DEPARTMENT OF THAILAND RELEASED TUESDAY QUOTED ITS DIRECTOR-GENERAL CHALOR FUENG-AROM AS SAYING THAT THE STRATEGY ON EXPORT PROMOTION WAS AGREED AT A RECENT MEETING BETWEEN THE GOVERNMENT AND PRIVATE SECTOR ASSOCIATIONS CONCERNED.

THE REVISION WAS NEEDED DUE TO UNCERTAINTIES SURROUNDING MIDDLE EASTERN MARKETS FOLLOWING IRAQ'S INVASION OF KUWAIT ON AUGUST 2, CHALOR SAID.

THE MEETING BELIEVED JAPAN HAS THE HIGHEST MARKET POTENTIAL AND, WITH ITS HIGH PURCHASING POWER, EXTRA ATTENTION SHOULD BE GIVEN TO IT, ACCORDING TO CHALOR.

THE DEPARTMENT WAS PLANNING A SERIES OF PROMOTIONAL ACTIVITIES IN JAPAN BEGINNING NEXT MONTH UNTIL MAY 1991, THE REPORT SAID.

THE GOVERNMENT WOULD OPEN ANOTHER COMMERCIAL CENTER NEXT MONTH IN JAPAN IN FUKUOKA TO BOOST BILATERAL TRADE AND INVESTMENT, IN ADDITION TO THE FIRST COMMERCIAL CENTER IN OSAKA AND AN OFFICE OF THE THAI COMMERCIAL COUNSELOR IN TOKYO.

JAPAN IS THAILAND'S SECOND LARGEST MARKET AFTER THE UNITED STATES, WITH THE PURCHASES IN 1989 TOTALLING 98,615 MILLION BAHT (ABOUT 3,944.6 MILLION U.S. DOLLARS) OR UP 38 PERCENT FROM THE PREVIOUS YEAR.

THIS REPRESENTED NEARLY 20 PERCENT OF THE OVERALL EXPORTS IN 1989 OF 510,000 MILLION BAHT (ABOUT 20,400 MILLION U.S. DOLLARS) OF THAILAND.

BEIJING (SEPT. 5) XINHUA - CHINA PLANS TO COOPERATE WITH FOREIGN AIRCRAFT MANUFACTURERS IN THE PRODUCTION OF 150-SEAT TRUNK AIRLINERS FOR DOMESTIC AIR ROUTES, THE MINISTRY OF AEROSPACE INDUSTRY ANNOUNCED HERE TODAY.

YU XIE, DIRECTOR OF THE MINISTRY'S FOREIGN COOPERATION BUREAU, SAID THAT

NEGOTIATIONS ARE UNDERWAY WITH THE BOEING COMMERCIAL AIRCRAFT COMPANY AND THE MCDONNELL DOUGLAS CORPORATION OF THE UNITED STATES AND THE AIRBUS INDUSTRIE CO. OF FRANCE.

CHINA IS ALSO EXPANDING INTERNATIONAL COOPERATION FOR THE MANUFACTURE OF FEEDER AIRPLANES, HELICOPTERS AND AVIATION ENGINES.

ACCORDING TO YU, CHINA IS CURRENTLY COOPERATING WITH THE MBB COMPANY OF FEDERAL GERMANY TO CO-MANUFACTURE MPC-75, A FEEDER PLANE.

HE SAID THAT CHINA AND SINGAPORE ARE JOINTLY DEVELOPING A TWO-TON HELICOPTER THAT IS EXPECTED TO BE READY IN TWO YEARS.

IN AN OVERVIEW OF SINO-FOREIGN COOPERATIVE VENTURES, YU SAID THAT AN EXISTING PROJECT BETWEEN THE MCDONNELL DOUGLAS CORPORATION AND THE SHANGHAI AVIATION INDUSTRIAL CORPORATION OF CHINA, IS PROCEEDING SMOOTHLY. FIFTEEN MD-82S HAVE BEEN TURNED OUT AND SOLD TO CAAC.

IN ACCORDANCE WITH A CONTRACT SIGNED BETWEEN THE TWO SIDES IN 1987, THE PROJECT WILL ASSEMBLE 25 MD-82S IN SHANGHAI BEFORE THE END OF 1991.

SINCE 1980, CHINA HAS SUCCESSFULLY MANUFACTURED 43 DOLPHIN HELICOPTERS WITH IMPORTED FRENCH TECHNOLOGY, YU SAID.

THE CHINESE AVIATION AND AERONAUTICAL INDUSTRY CURRENTLY HAS TRADE AND COOPERATIVE RELATIONS WITH COUNTERPARTS IN MORE THAN 50 COUNTRIES AND REGIONS.

YU SAID THAT CHINA WELCOMES FOREIGN COOPERATION IN THE FIELD OF AIRCRAFT BUILDING AND HOPES TO EXPAND THAT SCOPE IN THE YEARS TO COME.

#90248h0060 09/05/1990 ~Chinese News Agency

WASHINGTON (SEPT. 5) XINHUA - U.S. NASA SCIENTISTS ARE DEVELOPING A TELEROBOTIC SYSTEM TO AUTOMATE ASSEMBLY OF LARGE AND COMPLEX SPACE STRUCTURES, INCLUDING SATELLITES, POLAR PLATFORMS AND ANTENNAS.

THE NEW SYSTEM WILL FREE FUTURE ASTRONAUTS FROM LENGTHY AND REPETITIOUS ASSEMBLY WORK, ACCORDING TO THE AVIATION WEEK AND SPACE TECHNOLOGY MAGAZINE.

THE TELEROBOTIC SYSTEM PROTOTYPE DEVELOPED BY LANGLEY IS DESIGNED STRICTLY "TO EVALUATE IN-SPACE ASSEMBLY CONCEPTS" AND IS "NOT INTENDED FOR SPACE QUALIFICATION," SAID MARVIN D. RHODES, PRINCIPAL INVESTIGATOR.

THE HARDWARE CONSISTS OF A COMMERCIALLY AVAILABLE ROBOT ARM MOUNTED ON A PLANE-MOTION PLATFORM AND A SEPARATE, ROTATING MOTION BASE. THE ROBOT ARM

CAN MOVE IN TWO DIRECTIONS ON A HORIZONTAL PLANE WITH COMPUTERS TO CONTROL COMMAND AND MONITOR THE ACTION.

INITIAL OPERATIONS HAVE CENTERED ON ASSEMBLING A GENERIC TETRAHEDRAL TRUSS PATTERNED AFTER ACTUAL ORBITAL PLATFORM DESIGNS UNDER STUDY BY NASA.

ALL TRUSS MEMBERS ARE 2 METERS IN LENGTH AND 2.6 CM IN DIAMETER. A PALLET TRAY PLACED BEHIND THE ROBOT HOLDS UP TO 13 GRAPHITE-EPOXY STRUTS, WHICH HAVE PRE-ATTACHED ALUMINUM NODES TO LOCK THEM TOGETHER.

LANGLEY ENGINEERS HAVE DESIGNED AN END EFFECTOR TO ASSEMBLE THE TRUSS. ATTACHED BY A TOOLING PLATE TO THE WRIST AXIS OF ROBOT ARM, THE END EFFECTOR SELECTS ONE STRUT AT A TIME FROM THE PALLET TRAY, HOLDS IT WHILE THE ARM POSITIONS IT IN THE TRUSS STRUCTURE, COMPLETES THE NODE JOINT AND DRIVES A LOCKNUT TO SECURE THE STURT.

SOLENOID-CONTROLLED GRIPPERS ON THE UNIT GRASP EACH STRUT. THE END EFFECTOR IS DESIGNED TO PERMIT OPERATION EITHER WITH A NODE PRE-ATTACHED TO THE STRUT, OR TO INSERT A STRUT INTO PRE-ASSEMBLED NODES ON A STRUT.

A SYSTEM OF 12 MICROSWITCHES MONITORS THE DEVICE'S OPERATION, AND TWO SMALL VIDEO CAMERAS MOUNTED ON THE END EFFECTOR PERMIT THE SYSTEM OPERATOR TO VIEW THE OPERATION.

MANILA (SEPT. 5) XINHUA - THE PHILIPPINES HAS HIRED A BRITISH FIRM TO MAKE A SURVEY ON THE POTENTIAL OF THE SUBIC NAVAL BASE IN THE PHILIPPINES AS AN INTERNATIONAL SHIP REPAIR FACILITY, IT WAS LEARNED HERE TODAY.

INFORMED SOURCES SAID THAT SWAN HUNTER, A BRITISH FIRM THAT HELPED CONVERT THE BRITISH BASES IN SINGAPORE AND MALTA INTO A COMMERCIAL MERCHANT SHIPPING BASES, WAS HIRED FOR THE SEVEN-DAY SURVEY OF SUBIC NAVAL BASE,

THE LARGEST U.S. MILITARY BASE OVERSEAS.

IN A LETTER TO THE CHAIRMAN OF THE LEGISLATIVE-EXECUTIVE BASES COUNCIL (LEBC) OF THE PHILIPPINES, JOSE V. ABUEVA, LAST MONTH, SWAN HUNTER SALES AND MARKETING MANAGER T. J. BEARDER SAID THAT HE WAS SENDING A THREE-MAN EVALUATION TEAM TO "DETERMINE VIABLE ALTERNATIVES FOR THE MILITARY BASELANDS, PAYING PARTICULAR REGARD TO THE POSSIBLE DEVELOPMENT OF A SHIPREPAIR/SHIPBUILDING FACILITY AND CONSTRUCTION OF A CONTAINER TRANS-SHIPMENT PORT."

ACCORDING TO THE LETTER, THE TEAM WAS SUPPOSED TO BE IN SUBIC TODAY AND TO STAY UP TO FRIDAY. IT WILL SUBMIT ITS REPORT ON SEPTEMBER 12.

A LEBC MEMBER SAID THAT THEY HAD TO HIRE THE TEAM BECAUSE THEY DID NOT HAVE ENOUGH EXPERTISE ABOUT INTERNATIONAL MARKETING.

ACCORDING TO LEBC CHAIRMAN ABUEVA, THE FINAL BASE CONVERSION PLAN WILL BE SUBMITTED TO PRESIDENT AQUINO ON OCTOBER 4, MORE THAN TWO WEEKS LATE THAN ITS TARGET DEADLINE OF SEPTEMBER 16, DUE TO THE INACCURATE DATA USED IN AN EARLIER PLAN.

TOKYO (SEPT. 5) KYODO - THE DATA BASE BUSINESS IN JAPAN GREW BRISKLY IN 1989, WITH THE NUMBER OF DATA BASES AVAILABLE INCREASING 8.4 PERCENT YEAR-ON-YEAR TO 2,128, THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) REPORTED WEDNESDAY.

THE COMPANIES THAT PROVIDED DATA BASE SERVICES GREW 8.8 PERCENT IN 1989 TO 211, THE MITI SAID.

OUT OF THE 2,128 DATA BASES NOW AVAILABLE IN JAPAN, 662 OR 31.1 PERCENT WERE COMPILED IN JAPAN.

ABOUT 95 PERCENT OF THE OVERSEAS DATA BASES WERE THOSE MADE IN THE UNITED STATES, ACCORDING TO MITI OFFICIALS.

THE LARGEST CATEGORY, AT 41.4 PERCENT, WAS TO PROVIDE BUSINESS INFORMATION ON THE ECONOMY, CORPORATE MANAGEMENT, AND FINANCIAL AND COMMODITY MARKETS.

SCIENCE AND TECHNOLOGY WAS THE SECOND LARGEST, ACCOUNTING FOR 29.6 PERCENT OF THE TOTAL.

BUT THE GENERAL FIELD DATA BASES POSTED THE LARGEST GROWTH, INCREASING 26.3 PERCENT TO 529, MITI SAID.

#90248k0085 09/05/1990 ~Japanese News Agency

TOKYO (SEPT. 5) KYODO - SUMITOMO METAL MINING CO. SAID WEDNESDAY IT HAS DISCOVERED A GOLD VEIN WITH ESTIMATED DEPOSITS OF ABOUT 50 TONS AT HISHIKARI MINE IN ISA COUNTY, KAGOSHIMA PREFECTURE.

THE NEW VEIN, NAMED SANJIN DEPOSIT, HAS BEEN FOUND 300-500 METERS SOUTHEAST OF THE MAIN DEPOSIT IN HISHIKARI MINE, THE LARGEST GOLD MINE IN JAPAN.

THE VEIN, WHICH STRETCHES 750 METERS EAST AND WEST AND 300 METERS NORTH AND SOUTH AND HAS A DEPTH OF 140 METERS, HAS THE CAPACITY TO PRODUCE 70 GRAMS OF GOLD PER TON OF GOLD ORE, THE HIGHEST LEVEL IN THE WORLD, SUMITOMO OFFICIALS SAID.

SUMITOMO WILL INVEST A TOTAL OF 1 BILLION YEN IN THE VEIN TO BEGIN PRODUCTION IN THE FIRST HALF OF 1992.

THE COMPANY PLANS TO BOOST AN ANNUAL GOLD INGOT PRODUCTION AT HISHIKARI MINE TO ABOUT 7 TONS FROM THE CURRENT 5 TONS. IT WILL ALSO CONTINUE EXPLORATION AROUND THE VEIN.

THE DISCOVERY INCREASES THE GOLD DEPOSITS OF HISHIKARI MINE TO 250 TONS, AGAINST AN ORIGINALLY ESTIMATED 150 TONS, RANKING THE MINE FAR AHEAD OF OTHERS IN JAPAN, SUCH AS THE ALREADY CLOSED SADO MINE ON SADO ISLAND OFF NIGATA WITH DEPOSITS ESTIMATED AT 76 TONS.

MEANWHILE, THE TOKYO STOCK EXCHANGE HAS BEGUN AN INVESTIGATION INTO POSSIBLE INSIDER TRADING IN CONNECTION WITH THE NEWS.

THE EXCHANGE SUSPENDED TRADING IN SUMITOMO STOCK IN THE AFTERNOON, AFTER THE STOCK SURGED 60 YEN BEFORE THE ANNOUNCEMENT OF THE DISCOVERY OF THE VEIN. OTHER STOCKS OF THE NIKKEI 225 WERE GENERALLY WEAKER IN WEDNESDAY DEALINGS, WITH THE MARKET BAROMETER HITTING THE LOWEST LEVEL OF THE YEAR AT ONE STAGE.

TOKYO (SEPT. 5) KYODO - IN ADVANCE OF THE MARKET INTEGRATION OF THE EUROPEAN COMMUNITY (EC), MARUBENI CORP. WILL ESTABLISH A SUBSIDIARY IN DUSSELDORF, WEST GERMANY, IN OCTOBER TO DISTRIBUTE CHIP MANUFACTURING MACHINES.

THE NEW COMPANY, MARUBENI INTERNATIONAL ELECTRONICS EUROPE, IS DESIGNED TO DEAL WITH JAPANESE MANUFACTURERS WHICH ARE RUSHING IN LARGE NUMBERS TO SECURE BASES IN WEST EUROPE BEFORE THE EC INCREASES TARIFF DUTIES ON IMPORTED CHIP PRODUCTS BEGINNING IN 1992.

ANNUAL SALES ARE TARGETED AT 20 MILLION GERMAN MARKS IN THE FIRST YEAR. CAPITALIZED AT 1 MILLION MARKS, THE COMPANY PLANS TO OPEN OFFICES IN MUNICH IN WEST GERMANY IN GLASGOW, BRITAIN, AND GRENOBLE IN FRANCE, AND WILL ADVANCE INTO THE EAST EUROPEAN MARKET IF THE WESTERN TRADE WATCHDOG COCOM EASES ITS RULES ON EXPORTS TO EAST BLOC NATIONS.

TOKYO (SEPT. 5) KYODO - UBE INDUSTRIES LTD. SAID WEDNESDAY IT HAS INCORPORATED A WHOLLY OWNED FINANCING SUBSIDIARY IN NEW YORK TO ENGAGE IN FUND RAISING OPERATIONS FOR ASSOCIATED FIRMS OPERATING IN THE UNITED STATES.

THE COMPANY SAID THE NEW FIRM, UBE INTERNATIONAL (U.S.A.) INC. CAPITALIZED AT ABOUT 750 MILLION YEN, WILL BORROW ABOUT 8 BILLION YEN FROM BANKS TO SUPPORT AFFILIATES, INCLUDING A-MOLD CORP. OF OHIO WHICH MANUFACTURES AND SELLS ALUMINUM WHEELS FOR AUTOMOBILES.

THE COMPANY SAID IT PLANS TO ESTABLISH A SIMILAR SUBSIDIARY IN THE NETHERLANDS, KNOWN AS UBE INTERNATIONAL, (NETHERLANDS) B.V., LATER THIS MONTH TO PROVIDE FINANCIAL SUPPORT FOR ITS SUBSIDIARIES IN EUROPE AND ASIA.

THE NEW FIRMS WILL TAKE ADVANTAGE OF TAX INCENTIVES OFFERED THEM AND INTEGRATE FUND RAISING OPERATIONS OVERSEAS, THE COMPANY SAID.

TOKYO (SEPT. 5) KYODO - KDD (KOKUSAI DENSHIN DENWA) SAID WEDNESDAY IT WILL START AN INTERNATIONAL VIDEO CONFERENCE SERVICE WITH MERCURY COMMUNICATIONS LTD. OF BRITAIN FROM THURSDAY.

JAPAN'S INTERNATIONAL TELECOMMUNICATIONS GIANT SAID THE NEW SERVICE WOULD BRING THE CONVENIENCE OF AUDIO-VISUAL COMMUNICATIONS TO CUSTOMERS IN BOTH COUNTRIES.

KDD ALREADY HAS SUCH A SERVICE BETWEEN JAPAN AND BRITAIN IN COOPERATION WITH BRITISH TELECOM.

JAPANESE PARTICIPANTS WILL PAY 154,000 YEN PER HOUR PLUS A 40,000 YEN CONFERENCE ROOM CHARGE IF KDD'S OWN VIDEO CONFERENCE ROOM IS USED.

THE CHARGES ON THE BRITISH SIDE ARE SIMILAR, THE COMPANY SAID.

#90248k0112 09/05/1990 ~Japanese News Agency

TOKYO (SEPT. 5) KYODO - THE PHILIPPINES MAY LOSE UP TO 70 PERCENT OF ITS ARABLE LAND IF DEFORESTATION IS UNCHECKED, ACCORDING TO A PAPER PRESENTED TO AN INTERNATIONAL ENVIRONMENTAL CONFERENCE HERE WEDNESDAY.

A FILIPINO EXPERT SAID TROPICAL RAIN FORESTS IN HIS COUNTRY HAVE DECLINED FROM 54 PERCENT OF THE LAND IN THE PAST TO 25 PERCENT IN 1988.

AS A RESULT, THE PHILIPPINES MAY LOSE UP TO 70 PERCENT OF ITS TOP SOIL BECAUSE OF MASSIVE EROSION, ESTIMATED AT 1 BILLION CUBIC METERS A YEAR, HE SAID.

SOME 20 JAPANESE ENVIRONMENTAL EXPERTS AND 12 DELEGATES FROM ASEAN MEMBER NATIONS ARE ATTENDING THE TWO-DAY MEETING, WHICH OPENED WEDNESDAY, TO DISCUSS MEASURES TO HELP THE REGIONAL GROUP TO COPE WITH ENVIRONMENTAL ISSUES.

TWO DELEGATES FROM EACH OF THE SIX ASEAN MEMBER COUNTRIES -- THAILAND, MALAYSIA, INDONESIA, SINGAPORE, BRUNEI, AND THE PHILIPPINES -- ATTENDED THE MEETING.

A THAI EXPERT SAID 50 PERCENT OF THE MANGROVES IN THAT COUNTRY HAVE DISAPPEARED DURING THE PAST 28 YEARS BECAUSE THE TREES HAVE BEEN CUT TO BUILD FACTORIES AND SHRIMP FARMS.

THE TREES, WHICH GROW AROUND ESTUARIES IN TROPICAL AND SUBTROPICAL REGIONS HAVE LONG BEEN USED FOR WINDBREAK FORESTS, NATURAL DYES, AND BUILDING MATERIALS.

THE MEETING WILL DISCUSS TRANSFERS OF JAPAN'S TECHNOLOGY AND KNOW-HOW AIMED AT COMBATING ENVIRONMENTAL PROBLEMS SUCH AS DESTRUCTION OF TROPICAL FORESTS, AND WATER AND AIR POLLUTION.

THE ASEAN MEMBERS, FACED WITH TECHNICAL AND FINANCIAL CONSTRAINTS IN FIGHTING THE DEPLETION OF TROPICAL FORESTS AND WILDLIFE POPULATION, IN ADDITION TO WATER AND AIR POLLUTION, ARE SEEKING COOPERATION FROM JAPAN AND OTHER DEVELOPED COUNTRIES.

THE CONFERENCE IS INTENDED TO STUDY EFFECTIVE WAYS OF TRANSFERRING TECHNOLOGY AND KNOW-HOW TO HELP THE ASEAN GROUP COMBAT ENVIRONMENTAL DISRUPTION, CONFERENCE SOURCES SAID.

#90248m0002 09/05/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 5) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

JOHN ELLIOTT, a BANK OF AMERICA vice president in Los Angeles, says the North American market had no intention of pushing the dollar significantly higher yesterday, but was poised to send it lower if U.S. stock prices matched losses of other markets around the world. However, the Dow ended off less than a point. (WSJ, 9/5)

The dollar showed some strength yesterday, but analysts are highly skeptical about the greenback. "We're trying to decide whether it's a reversal of direction or what," says ROBERT RYAN of BANK OF NEW YORK CO. "We just don't know." ("Investor's Daily", 9/5)

"The fact that we are seeing some trading range for the dollar enhances the possibility of a rate cut" by the Fed, says LOUIS vB. CRANDALL, economist at R.J. WRIGHTSON & ASSOCIATES. "The Fed would prefer not to disrupt the foreign exchange market." (WSJ, 9/5)

"I think in essence there is something of a tug of war going on" within the Federal Reserve, says Fed watcher DAVID JONES, chief economist at AUBREY G. LANSTON. "The tough-minded and hawkish bank presidents still say we fight inflation at all costs even at the risk of recession. The board, including Chairman Greenspan, I think leans a little more in the direction of thinking the economy truly is weakening." Mr. Jones concludes that the Fed will ease, but not right away. (CNBC "Business View", 9/4)

"The [bond] market is two different worlds right now," says DONALD ALLISON managing director at CARROLL McENTEE & McGINLEY INC. "Short-term securities are trading off weakness in the domestic economy and the hope the Federal Reserve will ease. Long-term securities are being battered by the oil market and pessimism about a meaningful budget compromise." He says the dollar's recent weakness has also contributed to declines in the bond market because it has kept foreign investors' money home or in other markets. (WSJ, 9/5)

"I think people are really looking for a safe place to put their money and are really coming up with short-term securities," says WILLIAM BYERS, investment strategist at BEAR, STEARNS. "You can get better than eight percent going out no longer than two years. So what's the point. Why be a hero?" (CNBC "Business View", 9/4)

"We think the short end will remain firm and that bond yields will deteriorate further for the next couple of months," says ROGER 1 FROELICH

president of TECHNICAL DIMENSIONS, a bond research and advisory firm. "Bond yields have the potential to get back to 9 3/8 percent in that time frame." (NYT, 9/5)

THE ECONOMY:

"Mostly the American economy is moving sideways, neither expanding nor contracting," says EDWARD YARDENI, chief economist at PRUDENTIAL- BACHE SECURITIES. "What is keeping a lot of industries going are exports." (NYT, 9/5)

We're "clearly on the verge of recession," says BRIAN FABBRI, chief economist at MIDLAND MONTAGU. "Very specifically several sectors of

the economy are probably already described as being in a recession." (CNBC "Business View", 9/4)

"I think that without this oil crisis we would probably have just seen sluggish growth with more rotating recessions industry by industry, state by state. Now it looks more serious," says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. (FNN "Marketwrap", 9/4)

"Even before the Iraqi situation, the U.S. economy was facing an entrenched, underlying labor cost inflation of between 4% and 5%. That doesn't allow for any profits," says ALLEN SINAI, chief economist at BOSTON CO. He says this is one indication of "anemic doing in light of ... an anticipated recession is to cut back on jobs and hours worked." ("Investor's Daily", 9/5)

The Purchasing Managers' Index fell to 47% in August and is a sign of further weakening in the economy. "The manufacturing sector and the overall economy are very weak; there is no question about that," says ROBERT BRETZ, chairman of the survey committee for the NATIONAL ASSOCIATION OF PURCHASING MANAGERS. "But the index is consistent with real economic growth of 1.3 percent for 1990." (NYT, 9/5)

The purchasing managers' survey "only told us what we knew all along - the economy is dead in the water," says SAMUEL KAHAN, chief financial economist at FUJI SECURITIES INC. in Chicago. He adds that at this juncture, the Fed "should be more concerned with forestalling a recession" than with worrying about the potential inflationary effect of higher oil prices. "That is so because once we go into a recession, the political pressure to stimulate the economy will intensify, and that may induce even greater inflation fears." (NYT, 9/5)

IN WASHINGTON:

"I'm afraid Congress is going [to use Saddam Hussein] to try to leap off

the hook" on the Federal Budget, says ALAN STOGA of KISSINGER ASSOCIATES. "This is going to be the Saddam Hussein Memorial Budget Deficit before very much longer if not the Saddam Hussein Memorial Recession. Both of those are mistakes. It is not his recession and we should not use him as an excuse not to address our budget problems, but I'm afraid we'll be inclined to do so." Stoga believes that Congress and the President must approach the budget deficit with a two or three year deficit cutting package to offset problems created by the Mideast Crisis. He also believes that Gramm-Rudman will be "out the window" because Congress will be able to use the Mideast crisis to get rid of this "bad piece of legislation." (FNN "Marketwrap", 9/4)

SECRETARY OF STATE JAMES BAKER framed the Iraqi threat in economic terms yesterday in testimony before the House Foreign Affairs Committee, saying the threat was more than just the risk of 2 "increases in the price of a gallon of gas at your local service station." Baker claimed that the impact could reach much further. The crisis "is about a dictator who acting alone and unchallenged could strangle the global economic order, determining by fiat whether we all enter a recession, or even the darkness of a depression," said Baker. ("Investor's Daily", 9/5)

As budget negotiations resume, the Administration is still aiming for $50 billion in reductions, but Presidential spokesperson MARLIN FITZWATER says a lower target would be acceptable. "We're willing to talk about it and that's what we're going to the table to do," says Fitzwater. "We still believe that deficit reduction is important, that it's crucial to maintaining economic growth," maintains Fitzwater. ("Investor's Daily", 9/5)

-30- 6931

#90248m0004 09/05/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (SEPT. 5) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT says construction spending remained weak in July, rising 0.4% from June, and that non-farm productivity grew at a weak 1.5% annual rate in the second-quarter. The NATIONAL ASSOCIATION OF PURCHASING MANAGEMENT says its business index slipped to 47% in August, down from 47.4% in July. ... INTELSAT is suing MARTIN MARIETTA for $400 million, claiming the rocket builder miswired a rocket that launched a satellite into a useless orbit. ... FUJITSU unveiled a new generation of mainframes that could prove more powerful than a line IBM is expected to announce today.

WHAT'S AHEAD:

TIMOTHY RYAN, director of the OFFICE OF THRIFT SUPERVISION, willdiscuss the status of the INSTITUTE OF CERTIFIED PUBLIC ACCOUNTANTS at 9:15 a.m. EDT. ... SECRETARY OF ENERGY JOHN EASTON will be one of the witnesses before the HOUSE GOVERNMENT OPERATIONS COMMITTEE on the long-term impacts of the Gulf Crisis, starting at 10 a.m. EDT. ... DAN DORFMAN of "USA Today" reports that PRIMARK has filed for clearance to buy more than $15 million of CHAMPION INTERNATIONAL stock.

FROM THE BULLS:

"The low volume is very bullish to me," says CARLTON LUTTS, editor of the CABOT MARKET LETTER. "The market gives me the impression of being sold out." He says many investors are selling to protect themselves from any possible bad news from Iraq, but that such news has been absent. "The Dow could work higher from here perhaps to 3000 by year-end with some good news," predicts Lutts. ("Investor's Daily", 9/5)

"Sentiment is all lined up perfectly for a very solid move - there's a very high level of bearish sentiment," says ANDREW ADDISON of the "Addison Report." He says there are highly unusual but bullish "island reversal" chart formations in place in the Dow, S&P and many individual stocks. "I think we could be grinding our way up toward the 200 day moving average up at 2750 in the next couple of weeks," says Addison. (FNN "World Business Update", 9/5)

FROM THE BEARS:

"We are in a global bear market (far more serious than any seen since 1973)," writes STAN WEINSTEIN in the "Professional Tape Reader" dated August 24. STEVEN GOLDSTEIN of the "Tradecenter Market Letter" on August 27 agrees and says "The bear market is merely taking a breather." Goldstein says the prudent money will sell strength. (FNN "Marketwrap", 9/4)

STOCK MARKET:

"This is not a bear market," proclaims FRED GORDON of the "Plain Talk Investor" on August 29. "Don't believe everything you read in the funny papers." He adds that one should follow the lesson learned from the post-'87 crash. You should be "checking your shopping list" instead of "calling Chicken Little's 900 number" to find out if indeed "the sky thing was really true." (FNN "Marketwrap", 9/4)

Tuesday was the lowest volume trading day on the Big Board this year. "The fact that we had this kind of light volume with many people back from vacation was probably the most significant development" in the market

yesterday, says PETER CANELO, chief strategist at BEAR, STEARNS. "It reveals a real paralysis." He believes if the Mideast stalemate drags on for months and oil-price moves remain unpredictable, investors may remain paralyzed. "When investors know they don't know, investors tend not to act." (WSJ, 9/5)

"Everywhere we look, the technical indications are still negative," says CURTIS HESSLER of the "Professional Timing Service" who advises staying out of equities and in cash and cash equivalents. However, he says there are good reasons to expect a market low by mid- September to be followed by a trading rally. "The stage is being set for another move, possibly to new highs." (CNBC "World Business Update", 9/5)

"With the market this thin and with so little feature in it, most people are trying to figure out where this thing intends to bottom," says TIM HELLMAN at DREYFUS CORP. MICHAEL METZ of OPPENHEIMER & CO. says, "I think the lows of the week were probably seen early today [Tuesday]." ("The Washington Post", 9/5)

"It's really hard to come up with a strong case for equities at this point " says JOHN CONLON JR., a managing director at ROTHSCHILD INC. He says the low volume of trading activity is "indicative of an inordinate amount of indecision." (WSJ, 9/5)

Tokyo stocks continue to lose ground and a turnaround is unlikely, says KEN OBERMAN, manager of OPPENHEIMER's top performing "Global Fund." Oberman says rising Japanese interest rates have been competing with Japanese stocks, driving down high multiples. "The real question in Japan is what happens to real estate prices. As long as real estate prices stay up, the banks and insurance companies remain in reasonable condition." If real estate prices start to fall, Oberman says, "There is no real bottom in the Japanese market." Oberman believes 10,000 on the Nikkei would bring it into line with other markets on a price to cash flow basis. (CNN "Business Morning", 9/5)

STOCK TIPS:

JOHNSON & JOHNSON remains one of ANDREW ADDISON's favorite stocks for conservative investors. He likes the company's earnings growth and strong position overseas where the company should benefit from a lower dollar. The stock's relative strength is at an all time high, says Addison who sees upside potential into the 80 area. PROCTER & GAMBLE shares many of these same positive features, according to Addison. "I think its going to be one of the stocks to lead the Dow higher in the next couple of weeks," says Addison who also likes the fact that P&G management hold 12% of the company's shares. (FNN "World Business Update", 9/5)

DENNIS KELLY, vice president of JANNEY MONTGOMERY SCOTT, tells CNBC that

this is no time to be a hero in this market. He believes that we are in for a rolling recession, but he does see some good buys including WALGREEN HERSHEY, SCHERING-PLOUGH and MERCK. (CNBC "Business View", 9/4)

The market is full of excellent long term value, according to RAY HINES of the "Wall Street Generalist." DIAMOND SHAMROCK and VALERO ENERGY are two refining stocks he expects to benefit from the Mideast situation. Overall he expects stocks to recover from mid-September through November. "Pessimism has arrived at extremes that mark important bottom areas - the damage to stock prices should be pretty much over." (CNBC "World Business Update", 9/5)

"USA Today" says investors hoping that a continuing oil shock could give railroad stocks a lift had better switch their thinking. "Railroad stocks aren't pure energy plays [even if they have oil and gas reserves]," says analyst GEORGE MORRIS of PRESCOTT BALL & TURBEN. ("USA Today", 9/5)

LANDS' END INC. "is a very high-quality company," says PAUL SHAIN, a special situations analyst at ROBERT W. BAIRD & COMPANY in Milwaukee. "In the near term, it's going to be a difficult environment for them. But once they get moving again, I think they'll be all right. Lands' End merchandise has a place in many people's closets. I can't imagine that they won't get their customers back." (NYT, 9/5)

"CHRYSLER is staggering through the desert [and] the vultures are all hovering in the sky right now," says CHARLES BRADY of OPPENHEIMER & CO. "Either they're going to get out OK or they're going to get devoured by somebody." ("USA Today", 9/5)

#90248p1234 09/05/1990 ~PR Newswire

ANKENY, IOWA (SEPT. 5) PR NEWSWIRE - Earnings of Casey's General Stores Inc. (NASDAQ: CASY) in the 1991 fiscal first quarter ended July 31 were nearly even with the quarter a year ago, while sales for the three-month period advanced to a record high.

In announcing the financial results, Donald F. Lamberti, company chairman and chief executive officer, said rising wholesale and retail gasoline prices resulting from the Persian Gulf crisis had no impact on the company's first quarter, since prices didn't start up sharply until early August.

Earnings of $2,431,562, or 21 cents a share, in the first quarter ended July 31 were about even with the $2,389,950, or 21 cents a share earned a year ago. Sales advanced 5.8 percent to a record $141.5 million, compared to $133.7 million in last year's first quarter.

In other business, the Casey's board of directors approved a plan to repurchase up to one million shares of outstanding stock in the open market or through negotiated purchases. The Casey's stock will be repurchased from time to time, depending upon market conditions. There currently are just over 11.4 million shares of Casey's stock outstanding. Money for the stock repurchase will come from working capital.

At a meeting Sept. 4, the board declared a quarterly dividend of 2.5 cents per share of common stock, payable Nov. l5 to shareholders of record Nov. 1. This is the second consecutive quarterly dividend declared by the convenience-store chain.

The board also deleted a shareholder referendum provision from the existing Shareholder Rights Plan. The Rights Plan previously had permitted shareholders to redeem the rights if certain conditions had been met. Under the amended Rights Plan, only the Casey's board of directors is authorized to redeem the rights. Details of the amended Rights Plan are contained in a letter that will be mailed to all Casey's shareholders.

As of July 31, Casey's operated 771 stores in its eight-state market area, including 567 corporate-owned stores and 204 franchise units. This is an increase of 31 stores since the end of the first quarter a year ago, when Casey's operated 525 corporate stores and 215 franchise outlets.

Casey's annual shareholders meeting is scheduled for 10 a.m., Friday, Sept. 21, at the corporate headquarters, One Convenience Blvd., Ankeny,

Iowa. Shareholders are scheduled to vote on the election of seven directors.

#90248p1238 09/05/1990 ~PR Newswire

CHICAGO (SEPT. 5) PR NEWSWIRE - A dramatic new concept of industrial conveyors was introduced here today at the International Machine Tool Show in McCormick Place.

An all-new modular conveyor design that sharply reduces engineering and installation time and costs, allows rapid off-the shelf delivery, and facilitates reuse of standard components during line upgrades or other revisions, was exhibited by Simplimatic Engineering Company, of Lynchburg, Va. (Exhibit No. 3728). Simplimatic is part of CMB Packaging, the third largest packaging company in the world.

Called Simpli-Flex, the precision-engineered, highly flexible collection of conveyor components can be mixed and matched to handle diverse assignments.

The new system is available three different ways, according to Bernard J. Tipton, Simplimatic's vice president of engineering.

"In the first option, customers can order a complete system the same way they have in the past," he explained. "We will develop the line layout, do all the engineering, assembly and testing of the system in our factory, then install it. Normal turnaround for a customized system is four months or more.

"The second option is for the customer to give us a line layout and we will determine what conveyor components are needed to build the line. We will then ship the pieces to the customer, who will be responsible for the system assembly and installation. Typical delivery for this option is six to eight weeks.

"The third option is for a customer to order parts needed for a conveyor system directly from the catalog," Tipton said. "We anticipate that many engineering companies and some OEMs, such as robotics manufacturers, will take advantage of the cost savings available in this method. Because Simplimatic will stock partially assembled components, orders for modular conveyor components can be filled in three weeks or less.

"To help speed the engineering and quoting process, we have developed a special CAD (computer-aided-design) program," he reported. "All it needs are center lines and some basic information and it automatically draws the

conveyor system and identifies and prices all necessary components."

The Simpli-Flex conveyor will be built exclusively in the United States at Simplimatic's facility in Lynchburg, Va. An affiliate of the company, CMB Engineering Group, in the UK, will be licensed to manufacture the modular conveyors in Europe.

#90248p1239 09/05/1990 ~PR Newswire

DETROIT (SEPT. 5) PR NEWSWIRE - Recently, the first shipment of The Old Detroit Brewing Company's Old Detroit Amber Ale arrived on shelves in Chicago.

Christopher Dean, president of The Old Detroit Brewing Company, said, "We felt this was the next logical step in our progressive distribution of Old Detroit throughout the Great Lakes states. Our move into the Chicago market was expedited by the Best of Show and Gold Award, Ale awards we received at the All-American Beer Tasting held in Chicago back in April."

"We believe that while Chicago is a very difficult market to penetrate, it is at the same time sophisticated and will be receptive to a specialty beer like Old Detroit. Our initial sales are most encouraging and indicate that Chicago's consumers appreciate Old Detroit's regional nature and unique packaging almost as much as Michiganders do," said Chris Watts, vice president of The Old Detroit Brewing Company.

Old Detroit Amber Ale placed first in the eighth annual Chicago Beer Society's All-American Beer Tasting April 4. Old Detroit Amber Ale received the highest rating of all beers participating in the event, which included both ales and lagers from many of America's leading small breweries.

The blind tasting was judged by 350 participants who chose Old Detroit Amber Ale as the favorite based solely on flavor. Participants did not know what beers they were tasting until the winners were announced.

The Old Detroit Brewing Company brews Old Detroit Amber Ale at Michigan's oldest brewing facility, the Frankenmuth Brewery Inc., in Frankenmuth, Mich. Old Detroit Amber Ale has been available in Michigan since January 1990 and is currently available throughout Michigan and in the Chicago and Toledo, Ohio areas.

The Chicago Beer Society was founded in 1977 as a non-profit educational association dedicated to the appreciation of beer. The society has

sponsored an international beer tasting since 1977 and in 1983, added the All-American tasting to address the rekindled interest in traditional American beers.

Old Detroit Amber Ale is distributed by Julienne Importing Company in Chicago, 312-274-9463.

#90248p1240 09/05/1990 ~PR Newswire

COATESVILLE, PA (SEPT. 5) PR NEWSWIRE - W.R. Wilson, chairman and chief executive officer of Lukens Inc. (NYSE: LUC), today said the steel-based diversified industrial company "has a good opportunity for record results again in 1990."

Lukens Inc. last year reported its third consecutive year of record sales and earnings. Earnings in 1989 were $41.5 million, or $4.73 a share, on sales of $645 million.

Speaking to some 30 security analysts visiting the company's steel operations in Coatesville, Wilson said, "Current reports on business activity levels in our steel, corrosion protection and safety products operations make me optimistic that Lukens has a good opportunity for record results again in 1990."

Wilson said, "Fundamentals underlying Lukens performance have not deteriorated."

Lukens reported record sales and earnings for the first half of 1990. Sales were $349.5 million and earnings were $22.6 million, or $2.59 a share, compared to sales of $322.3 million and earnings of $16.1 million, or $1.88 a share, for the first half of 1989.

Wilson said that $1 billion in sales and $50 million in net earnings are two of the goals Lukens management has set for 199X, an unidentified year during the 1990s.

In the steel business, Wilson said the company intends to increase market share, pursue export opportunities for its specialty plate steels and continue to invest in plant, equipment and technology to drive production costs lower, raise productivity, improve quality and increase earnings. He said Lukens has plans that will enable the steel operations to produce more than 1 million tons of steel a year by 1995, using one electric furnace and the ladle refining system.

Wilson said new business acquisition is essential to the company's strategy for achieving the 1990s goals. He said, "We are interested in companies which serve industrial markets. The ideal candidate would be a company providing goods or services to the FORTUNE 1000 with the potential to generate $225 million in sales and operating margins of 11 percent of more."

#90248p1243 09/05/1990 ~PR Newswire

CANTON, OHIO (SEPT. 5) PR NEWSWIRE - The Timken Company (NYSE: TKR) announces the following: T.S. Dupaski, director-president of Timken do Brasil Limitada, announced today that Timken do Brasil will establish a new machining facility in Brazil. The facility will be located in Santa Barbara d'Oeste, which is a town of 140,000 people located 95 miles north of Sao Paulo. The project is part of the billion dollar capital investment program announced by the company last year and is expected to cost approximately $5 million.

Computer-controlled machining equipment manufactured in Brazil with the latest world-class technology will be used at the facility to turn forgings into bearing cups and cones.

The new facility will make Timken do Brasil more competitive in both local and international markets.

Stefanos Marcouizos, manager technology of Timken do Brasil, heads the project implementation team.

POUGHKEEPSIE, NY (SEPT. 5) PR NEWSWIRE - The IBM Enterprise System/9000 (ES/9000) family of 18 processors announced today for System/390 range from intermediate computers for office environments to the most powerful mainframe systems the company has ever offered.

The new general-purpose processors offer highly attractive price/performance and internal performance growth of more than 100-fold from the entry model to the high-performance top of the line. ES/9000 has the industry's broadest single-family range of performance and upgrade options.

ES/9000 processors share advanced architectures, a compatible family of

enriched operating systems and many common functions designed to facilitate customer growth, applications portability, enterprise-wide computing, and unparalleled system-management capabilities.

Comprehensive business system solutions and enterprise-wide computing are at the focus of ES/9000's new technologies and products associated with System/390. Customers will be able to increase programmer and end-user productivity significantly, handle more data in less time, improve current applications, and facilitate development of new, high-potential applications for competitive advantage. Some of the features available on all ES/9000 processors are:

-- Enterprise Systems Connection (ESCON) Architecture implementing fiber optic channels, which provide significantly higher data rates than traditional parallel channels and which permit input/output equipment to be located at distances up to nine kilometers (5.6 miles) from the processor; -- Logical partitioning between two or more operating systems at the same time, thereby giving users the ability to run production, development, maintenance and test applications simultaneously; -- IBM's Enterprise Systems Architecture/390 -- the most advanced in the industry -- encompassing VSE/ESA, VM/ESA and MVS/ESA operating systems. The enriched operating systems are capable of running existing programs and applications based on System/370 architecture; -- New enhanced performance options for scientific and technical computing; -- A family-wide 31-bit addressing structure, extended to entry and intermediate ES/9000 processors, that significantly increases the virtual storage available for an application and its data, and -- The ability to couple up to eight processors in a system complex (sysplex) and manage them as one, allowing more efficient horizontal growth options.

The ES/9000 processors are general purpose computers. With optional vector facilities, (available on 14 of the 18 models, including six air- cooled models,) ES/9000 processors can become powerful supercomputers for scientific and engineering applications.

CAMDEN, NJ (SEPT. 5) PR NEWSWIRE - Campbell Soup Co. (NYSE: CPB) today reported net earnings for the fiscal year ended July 29 of $4.4 million, or 3 cents per share, after fourth quarter charges for divestitures and restructuring of $301.6 million, or $2.33 per share.

That compares with fiscal 1989 net earnings of $13.1 million, or 10 cents per share, after restructuring charges of $260.8 million, or $2.02 per

share. Excluding these charges from both years, earnings per share rose 11 percent.

Net sales were $6.2 billion for the fiscal year, a 9 percent increase over 1989 net sales of $5.7 billion.

As a result of the charges for the divestiture and restructuring program, the company recorded a fourth quarter loss of $238.4 million, or $1.84 per share. That compares with a fourth quarter 1989 loss of $194.7 million, or $1.51 per share, also after restructuring charges.

Fourth quarter net sales rose 11 percent, to $1.44 billion from $1.30 billion a year ago.

Campbell U.S.A., the company's largest division, reported a 16 percent increase in fiscal year operating earnings, excluding restructuring charges. The division posted an 8 percent increase in sales for the year with solid volume increases in ready-to-serve soups, "Great Starts" frozen breakfasts, and "Prego" spaghetti sauces. "Mrs. Paul's" frozen seafood had a particularly strong year, regaining the number one market share position in frozen prepared seafood and achieving a significant improvement in profitability.

Pepperidge Farm operating earnings for the year rose 12 percent, excluding restructuring charges. Net sales rose 6 percent versus a year ago. The bakery, biscuit and food service business units had strong unit volume growth.

Campbell Enterprises had a 20 percent increase in operating earnings for the year, excluding restructuring charges. Net sales rose 5 percent from continuing businesses with a strong sales performance from Godiva premium chocolates.

Campbell International operating earnings, excluding restructuring charges were flat. Strong performances were recorded by the Canadian, European food and confectionery, and Argentine operations. United Kingdom frozen food and Italian biscuit operations performed poorly. Net sales, aided by acquisitions, increased for the year by 16 percent.

PITTSBURGH (SEPT. 5) PR NEWSWIRE - National Intergroup, Inc. (NII) (NYSE: NII) announced today that it is extending its tender offer for all outstanding cumulative convertible preference units representing limited

partnership interests of Permian Partners, L.P., at $3.85 per preference unit, subject to adjustment, and one non-transferable contingent value right ("CVR") per preference unit.

The offer and withdrawal rights, previously scheduled to expire at midnight (New York City time) on Sept. 4, 1990, will now expire at midnight (New York City time) on Sept. 11, 1990, subject to NII's right to extend the offer further.

As previously announced, NII plans to amend the terms of its tender offer with respect to the terms of the CVRs offered thereby. The CVRs are being offered pursuant to the terms of the previously announced settlement of certain litigation relating to the tender offer. NII said it plans to mail to unitholders a supplement to its offer to purchase setting forth the amended terms of the CVRs as soon as practicable after the Delaware Court rules on the settlement. As previously announced, NII said the Delaware Court had indicated at the hearing held on Aug. 27, 1990, that it intends to rule on the settlement promptly after receipt of additional information from the parties. The parties submitted such additional information to the Delaware Court on Sept. 4, 1990. Upon mailing the supplement, NII plans to further extend the tender offer for a minimum of 10 business days.

As of the close of business on Sept. 4, 1990, approximately 8,019,639 preference units (including 1,123,237 preference units pursuant to notices of guaranteed delivery) had been tendered and not withdrawn pursuant to the offer. The offer is conditioned upon, among other things, there being tendered and not withdrawn prior to the expiration of the offer at least 7,875,001 of the publicly held preference units, representing a majority of the publicly held preference units.

#90248p1250 09/05/1990 ~PR Newswire

FORT MILL, SC (SEPT. 5) PR NEWSWIRE - Springs Industries (NYSE: SMI) today announced plans for further restructuring of the company and a special early retirement program that will be offered to qualifying salaried employees. To provide for the cost of these actions, a special one-time charge will be made to earnings in the current quarter.

Walter Y. Elisha, chairman and chief executive officer, said the planned restructuring will take place over a 30 to 36 month period and will involve the conversion of several fabric manufacturing facilities to the production of home furnishings and a consolidation of some of the company's manufacturing operations. This process of conversion will involve further modernization in Springs' textile operations, and results

in a decrease in total weaving and finishing capacity. Over the period of implementation, the company expects to close portions of several manufacturing facilities.

Elisha said that a reserve will be created to cover the costs of both restructuring and the early retirement program through a special one-time pre-tax charge to third quarter earnings of $70 million, equivalent to $43.9 million after taxes, or $2.46 per share. The company expects this reserve to cover costs of any writeoffs of facilities where production is discontinued, as well as the additional expense created by the early retirement program. While purchases of new equipment will likely raise capital expenditures somewhat, Elisha said, the total program is not expected to require additional capital.

Elisha said, "These plans and the resulting charge to earnings reflect a continued acceleration of what has been a gradual process of moving more of our capacity to the home furnishings area as the market for finished fabrics continues to diminish. As the pace of this conversion picks up, we will have the opportunity to reduce manufacturing costs as equipment is replaced and production consolidated. At the completion of this program, we feel that our growing home furnishings and industrial fabrics businesses, as well as our refocused finished fabrics business, will be served by the most efficient and lowest-cost facilities available."

#90248p1251 09/05/1990 ~PR Newswire

JACKSON, MI (SEPT. 5) PR NEWSWIRE - Consumers Power Company is offering a service during the coming cold months that provides an essential commodity: peace of mind.

The utility's residential natural gas customers throughout Michigan's Lower Peninsula are currently receiving information on the Heating Security Plan, which offers protection against unexpected problems with their heating or hot water system. The program provides that if a furnace hot water boiler, or water heater fails to operate over the next year, Consumers Power repair experts will come to the customer's house. If the problem is with a part covered by the plan, it will be corrected at no charge, except the initial charge for signing up.

Customer participation in the program can vary, depending on the extent of protection the customer chooses. Rates for the program are as follows: $59 for the basic furnace/hot water boiler program; $10 to add a water heater; $25 for an additional furnace or auxiliary heater. A $5 discount is available for early sign up prior to Oct. 1, 1990.

An additional $5 discount is available to senior citizens, age 65 and older, who are members of Consumers Power's Prime Timers Senior Club. Seniors who are not members of the club and are 65 or older can check a box on the enrollment form. There is no charge to join the Prime Timers Senior Club.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is the nation's eighth-largest gas distribution utility serving 215 cities and villages including suburban Detroit, Bay City, Flint, Jackson, Kalamazoo, Lansing, Pontiac and Saginaw in 40 of the 68 Lower Peninsula counties.

#90248p1253 09/05/1990 ~PR Newswire

NEW YORK (SEPT. 5) PR NEWSWIRE - The Shidler/Holman Group today expanded on its future plans for Grossman's Inc. (OTC: GROS) pursuant to its consent solicitation to replace Grossman's current board of directors with its own nominees.

"We have a clear vision for the turnaround of Grossman's," said Allen Doane, The Shidler/Holman Group's designated CEO. Doane, who recently has been visiting with Grossman's institutional holders, is currently managing partner and chief operating officer of The Shidler Group, and was previously group vice president in charge of IU International's successful $600 million distribution businesses.

"Our first job is to restructure Grossman's balance sheet to raise additional sources of capital and reduce existing debt service costs," he said. "The company is facing $50 million of debt and capital lease obligations over the next 18 months." As stated in an earlier release, The Shidler/Holman Group has engaged an independent financial advisor to spearhead the effort to take full advantage of Grossman's real estate assets to raise these needed funds.

"At the same time," Doane continued, "we will re-direct the business strategy to avoid head-to-head competition with Home Depot and Hechinger's. We believe that the company's current operating strategy and highly publicized 'merchandise intensification program' are misguided and resulting in steadily declining operating margins. Instead, we favor a return to Grossman's historical strength of providing everyday low price building materials to the do-it-yourself customer in markets where it can retain competitive advantage."

Doane also asserted: "We're firmly committed to a higher stock price for

Grossman's stockholder, both in the short and long term. Our ownership of over 1.2 million shares provides evidence of our own incentive for realizing a higher stock price." Doane noted the stock is trading close to its all-time low of $3 3/8 per share in the face of management's stated position that Grossman's future could not be brighter.

Doane pointed out that independent support of The Shidler/Holman Group's position on Grossman's has been received from the Institutional Voting Research Service, a Massachusetts-based advisory firm providing independent research and analysis to institutional shareholders whose Aug. 27 report recommends shareholders take advantage of the opportunity for change and support The Shidler/Holman slate. Their proposed board contains individuals with experience in every area critical to Grossman's future success. The report continues saying "members of the group have incentives that align themselves directly with those of shareholders, and therefore are likely to make decisions to maximize share value in the future."

CONTACT: Ian Killips of The Shilder/Holman Group, 808-531-3000, or Jennifer Wall or Richard De May, 212-269-5550, both of D.F. King & Co., for The Shidler/Holman Group.

#90248p1256 09/05/1990 ~PR Newswire

LONDON (SEPT. 5) PR NEWSWIRE - The 1990s are a crucial time when all elements of the air travel industry must catch up with the surge in demand experienced during the 1980s, a Boeing executive told the Financial Times conference here.

Chris Longridge, vice president-sales for Boeing Commercial Airplane Group, said Boeing was making substantial investments to increase jetliner production to meet that demand. But airport and airways improvements must be started soon if air travel is to grow at presently expected rates.

"On the busiest U.S. and European routes," Longridge said, "airlines generally have chosen to maintain frequency levels and to increase aircraft size. This appears to be their only option to accommodate traffic growth within the constraints of a congested infrastructure. While this may provide some short-term relief to the system -- primarily in the air -- I do not think it is a long-term solution to congestion on the ground."

The sales executive cited Boeing estimates that through the 1990s, air travel will grow at 6 percent a year, dropping to 5.5 percent through the year 2005. "That means the growth this industry saw over the past 20 years will be equalled during the next 10 years," he said.

"Another way to think about it is that the increase expected during the next decade is equivalent to adding 20 new airlines the size of British Airways."

Longridge detailed Boeing plans to satisfy the market demand for aircraft - a market for almost 10,000 new airplanes from now through the year 2005 - created by traffic growth plus the need to replace older, noisier jetliners. Nearly 30 percent of this $626 billion worth of new aircraft is already on manufacturers' order books, he said.

"Boeing has increased production considerably over the past six years delivering 284 airplanes in 1989. Plans call for 381 deliveries this year and 419 during 1991. By mid-1991 we will be producing airplanes at a rate of 38 a month."

"Even with these increases, we recognize that the situation is far from ideal," Longridge said, "and we would like to increase our production capability to keep our backlog to within about three years." With a current backlog of more than 1,700 airplanes, available slots in the production line now are well into the late 1990s.

MIAMI (SEPT. 5) PR NEWSWIRE - IVAX Corporation (AMEX: IVX) announced today that its wholly owned subsidiary, Baker Cummins Pharmaceuticals, Inc., has been awarded a Small Business Innovative Research Grant ("SBIR Grant") of approximately $500,000 by the National Institute of Allergy and Infectious Diseases to continue the development of anti-viral compounds.

One of Baker Cummins Pharmaceuticals' anti-viral compounds, for the treatment of AIDS, is currently in the final stages of preclinical testing. Baker Cummins Pharmaceuticals presently expects to file an

investigational new drug application with the United States Food and Drug Administration later this year and begin human testing soon thereafter.

SS Pharmaceutical Co., Ltd. is collaborating with Baker Cummins Pharmaceuticals in the research and development of this anti-viral drug. SS Pharmaceutical, the third largest manufacturer and distributor of over-the-counter pharmaceutical products in Japan, has a number of ethical pharmaceutical products under development. SS Pharmaceutical owns 4.6 percent of the outstanding shares of IVAX.

IVAX Corporation is a holding company consisting of three operating divisions: IVAX Industries, Inc., a chemical specialties business; Diamedix Corporation, a medical diagnostics company; and the pharmaceuticals group which includes Baker Cummins Pharmaceuticals, Inc., a pharmaceuticals company; Baker Cummins Dermatologicals, Inc., a dermatological products company owned 50 percent by Baker Cummins Pharmaceuticals and 50 percent by Union Carbide Corporation; and Best Generics, Inc., a national distributor of generic pharmaceuticals.

#90248p1260 09/05/1990 ~PR Newswire
POUGHKEEPSIE, NY (SEPT. 5) PR NEWSWIRE - In its most comprehensive announcement of products, features and functions in more than a quarter century, IBM (NYSE: IBM) today introduced System/390(A) -- the industry's most advanced integration of system architecture, design, technology and function.

System/390 -- with its broad array of product options -- is designed to satisfy computing needs for the Nineties as defined by IBM's customers who want to manage their information system resources better and integrate them with strategic business processes for competitive advantage.

In addition to a new, enriched family of Enterprise Systems Architecture/390(A) operating systems, a new connection architecture and many functional enhancements, System/390 introduces the IBM Enterprise System/9000(A) family of 18 new processors -- including the most powerful the company has ever offered. The new processor family provides significant price-performance gains and flexible growth options spanning a 100-fold performance range increase from the smallest model to the most powerful.

The new ESA/390(A) architecture and new MVS/ESA(A), VM/ESA and VSE/ESA operating systems, along with new technologies, facilitate the function and computing power of System/390.

The range of ES/9000 growth options -- from the family's smallest rack-mounted office system, Model 120, to the very high performance Model 900 six-way multiprocessor -- helps to ensure smooth transitions for customers as their computing requirements change.

In typical configurations, prices for larger models of ES/9000 processors are as much as 23 percent lower than IBM Enterprise System/3090(A) (ES/390)(A) Model J processors of comparable computing power. Price-performance improvements in mid-range and low-end ES/9000 family processors range up to 50 percent when compared with IBM's earlier Enterprise System/4381(A) (ES/4381)(A) and Enterprise System/9370(A) (ES/9370)(A) processors.

Programs and applications based on the widely used System/370(A) architecture for IBM ES/3090, ES/4381 and ES/9370 will run effectively on ES/9000 and the ESA/390 operating systems with little or no modification, thus protecting customers' existing investments in software as they grow and move upward in the new, higher-function family.

For the first time, MVS/ESA, IBM's most powerful operating system -- previously available only to users of its larger systems -- also becomes available to intermediate system customers.

#90248p1262 09/05/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - In conjunction with today's far-reaching System/390(A) announcement, IBM announced new and enhanced networking products that make it easier for customers to integrate and manage networks of IBM and other manufacturers' computers and provide quicker, easier access to information on any computer.

Enhanced controllers and communications software give customers greater flexibility in linking workstations and computers used in local area networks with mainframe computers. IBM also introduced a range of products that enable customers to manage local and wide area networks simultaneously as well as networks of other manufacturers' computers.

"These products and solutions considerably increase the availability and efficiency of our customers' computer networks and put information at users' fingertips more quickly and easily than ever before," said Ellen M. Hancock, IBM vice president and general manager, Communication Systems line of business.

"Today's announcements further demonstrate IBM's commitment to open systems," said Kevin M. Moonan, U.S. marketing and services director of networking systems. "They offer customers a wide array of networking options and are based on industry standards. This will allow customers to maximize the use of their networks now and in the future."

Controller Enhancements Boost Performance, Increase Flexibility IBM has added the 3172 Interconnect Controller Model 2 to its family of controllers, and introduced two new models and enhanced existing models of the 3174 Establishment Controller and the 3745 Communication Controller, to offer customers more flexibility in configuring their networks. The controllers also provide many more options for connecting local area networks to wide area networks.

#90248p1264 09/05/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - IBM today announced the industry's first integrated cryptographic feature and a new cryptographic architecture to help safeguard customers' vital information assets.

The optional integrated cryptographic feature and its associated software enable customers to process large amounts of encrypted data up to four times faster than IBM's previous high-end processor encryption offering, resulting in a dramatic reduction in the cost of encryption. Cryptography, the enciphering and deciphering of messages or data using secret code, is a practical means of protecting information sent over communications networks that use land lines, satellites and microwave transmission.

Also introduced today was a product providing enhanced security capability for workstations and personal computers, plus new "anti- virus" measures. These new products assist customers in the secure exchange of data anywhere in the enterprise, even among their business partners, vendors and clients.

"Previously, customers used data to track the performance of their businesses. Today, they use that data to run their businesses," said William D. Vance, director of secure systems, Enterprise Systems. "Protecting data is crucial, and our new products give customers the end-to-end security measures they need to manage their enterprises."

The new high-speed Integrated Cryptographic Feature (ICRF) consists of a tamper-resistant Thermal Conduction Module (TCM) for water-cooled models of Enterprise System/9000(A) processors and a key-entry unit. Integrated

Cryptographic Service Facility/MVS (ICSF/MVS), a licensed program, is required for ICRF operation. Customers use the key-entry unit to enter master cryptographic keys into a secure key storage unit connected to the TCM by a tamper-resistant shielded cable.

Cryptography provides an added measure for protecting customers' most sensitive data from disclosure. Customers may use cryptographic services to protect not only the privacy of data, but also the integrity of their data. These services help to provide customers with the high degree of security they might need for processing proprietary information, such as engineering drawings, and high-value transactions, such as electronic funds transfer.

#90248p1265 09/05/1990 ~PR Newswire

POUGHKEEPSIE, NY (SEPT. 5) PR NEWSWIRE - IBM (NYSE: IBM) today announced Enterprise Systems Connection (ESCON)(A) Architecture,(A) using wide-band, high-speed fiber optic channels that allow customers to interconnect their computer systems over miles instead of a few hundred feet.

With IBM's new ESCON products, the customer's traditional data center, or "glass house," will change dramatically. Processors and their input/output (I/O) devices, such as disk, tape and display controllers, can be placed as far apart as nine kilometers, or 5.6 miles, allowing customers to build campus-wide computing systems.

The new ESA/390(A) interconnection architecture offers a new connection method and technology that improve system availability by allowing customers to add, delete or service I/O devices without disrupting end users.

Customers with cramped computer equipment rooms will have a new level of flexibility with ESCON. Essential computing devices now can be located miles away from the central processor, and they can operate in a "lights out" environment with little or no human intervention.

For those customers located where the high cost of real estate is a consideration, I/O devices can be situated in less expensive locales. An enterprise with a data center in such an area can now relocate I/O equipment to nearby sites where costs are lower.

The new fiber optic ESCON channels transfer data between host computers or between a host and a controller at up to 10 megabytes (million characters) a second, more than twice the speed of copper-cable parallel channels in

wide use today. ESCON allows customers to change the configuration of their systems while they continue operations, instead of being required to shut down their equipment as they do today.

The ESCON Manager (ESCM), a licensed program product running under MVS/ESA(A) or VM/ESA, provides host control to help customers manage connections that use ESCON Directors. With ESCM, operators can display system-wide configuration and status information from a single point of control, such as a NetView(A), ESCM or MVS master console.

For single and multiple processors in an ESCON environment, the ESCON Analyzer provides customers with easy diagnosis of link errors and coordination of service for a fiber optic complex from a single operator console.

CONTACT: Amos A. Kermisch of IBM, 914-435-1960 or after Sept. 5: 914-642-4668.

#90248p1266 09/05/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - IBM today announced a set of products that will allow workstation users to share resources transparently and flexibly throughout their computer networks. These announcements enhance IBM's client/server computing offerings and contribute to an environment in which workstation users throughout a network can easily share resources ranging from data and applications, to devices such as printers, to processing for large jobs that require intensive computing.

The new client/server computing products also extend announced directions for AIX(A), the IBM implementation of the UNIX(B) operating system, and Systems Application Architecture(A) (SAA)(A) -- which assist customers in meeting such client/server needs as software distribution and the transparent sharing of information through relational databases.

In client/server computing, a "client," usually an intelligent workstation can request services from a "server" -- the most suitable processor in the installation -- placing the rich resources of the entire network at the service of the workstation and its end user. Networked computers of all sizes -- from intelligent workstations to powerful mainframes -- can play a role in client/server computing.

"IBM's goal is to deliver the solutions our customers need to remain competitive in this decade of client/server computing," says Art Olbert, Enterprise Systems Director of Client/Server Computing. "We're in a unique position to deliver the total client/server solutions our customers want because IBM designs, develops and markets everything from PS/2(A) and

RISC Systems/6000(A), to the AS/400(A), to the Enterprise System/9000(A) family announced today, as well as products that support the many software protocols and standards required in a multivendor environment."

Listening to Customers' Client/Server Computing Requirements IBM increased its focus on client/server computing by creating the Client/Server Computing organization, which spans all product divisions, in May of 1989. This group intensified already active efforts with customers to understand how customers defined client/server computing. Views were sought from a broad range of domestic and international customers and user groups in such areas as banking, insurance, manufacturing and securities.

#90248p1267 09/05/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - To help customers expand their abilities to access and manage data across their enterprises, IBM (NYSE: IBM) today enhanced its distributed relational database capabilities.

The solutions constitute the next step in the delivery of Systems Application Architecture(A) (SAA)(A) distributed database management.

Announced today were new releases of DATABASE 2(A) (DB2)(A) and Structured Query Language/Data Systems (SQL/DS), designed to extend users' access to distributed relational data. Also announced was a new version of Query Management Facility (QMF)(A); a new software tool called Data Propagator(A) MVS/ESA(A); an SAA application that provides a new natural language query, SAA LanguageAccess, and a new release of Information Management System/Enterprise Systems Architecture Database Manager (IMS/ESA(A) (DB), with improvements in availability and systems management.

Using IBM's SAA Distributed Relational Database Architecture (DRDA) announced in June, customers can distribute data between DB2 systems under MVS, and SQL/DS relational databases under VM, regardless of where the data is stored. Users will need only to request the data and their system will retrieve it automatically, giving customers wider and more efficient use of data on VM and MVS operating systems.

DB2 and SQL/DS have implemented Remote-Unit-of-Work (RUOW) based on DRDA. In addition, DRDA will provide the basis for distributed RUOW support for the SAA OS/2(A) EE and OS/400(A) database managers when distributed support to multiple database systems is available in those SAA environments. With DRDA, users or application programs can easily access information in relational databases from any SAA or non-SAA system that fully implements DRDA in the enterprise.

Data Propagator MVS/ESA(A), a new software tool, is designed to facilitate the coexistence of IMS/ESA DB and DB2 databases. Data Propagator MVS/ESA ensures that data remains current and consistent on a DB2 database when it is changed on an IMS/ESA database, without user intervention. The system has the option to make all changes immediately or at user-controlled intervals. This makes it easy to complement existing IMS production applications with DB2 relational databases for decision-support query and reporting, and the data can be kept as current as desired.

#90248p1272 09/05/1990 ~PR Newswire

PHOENIX, AZ (SEPT. 5) PR NEWSWIRE - Dena Krentz-Greenawalt, composting operations systems foreman of Phoenix Newspapers Inc., publishers of the Arizona Republic, Phoenix Gazette, and Arizona Business Gazette, has announced the formation of the Information International Inc. (NASDAQ: IINT) (triple-I) Users' Group (TUG). Independent of triple-I, "Tug aims primarily to serve the users of triple-I equipment as a forum for the exchange of information and problem solving," according to TUG founder Krentz-Greenawalt.

Nearly 50 participants representing 21 triple-I installation sites attended TUG's first meeting and election of officers, held in June during the ANPA/TEC '90 show in Las Vegas. Officers include Krentz-Greenawalt, president; Jeff Dodd, senior account manager, International Computaprint Corp., as vice president; and Steve Schowengerdt, director of pagination at The Desert News, Salt Lake City, as secretary. Newspaper Agency Corp., publishers of The Salt Lake City Tribune and The Deseret News, will host the group's second annual meeting, slated for spring in Salt Lake City.

According to Krentz-Greenawalt, sophisticated publishing systems, like other advanced tools, present some users with practical challenges which no manufacturer can train for or completely foresee. In Fall, 1989, she conducted an inquiry survey from a triple-I customer list and received a near unanimous positive response which led to TUG's first meeting in June. Users exchanged information on issues, such as efficiency in production procedures, training methods, subtleties of software revisions, and methods of handling specialized ad situations. Other frequent questions involved optimum utilization of personnel and materials.

Triple-I recently sponsored and monitored two user seminars on specific issues. Now TUG provides the company regular feedback on changes in the user's environment.

TUG is open to any triple-I customer that is using triple-I equipment to

produce all or any portion of their printed product. Members currently include newspapers and five commercial sites. Not included are sites using only TECS/2 equipment, which has a separate specialized user group. Further information on joining TUG may be obtained from Dena Krentz-Greenawalt at Phoenix Newspapers, 602-271-8847.

Information International (NASDAQ: IINT) designs, manufactures, markets, and services computer-based systems that automate prepress production in newspaper, magazine, technical, financial and catalog publishing.

SAGINAW, MICH (SEPT. 5) PR NEWSWIRE - Polar Molecular Corporation's President and Chief Executive Officer Mark L. Nelson announced today that the company has entered into an option agreement with a major refiner to license its patented fuel additive technology, DurAlt(R) Fuel Conditioner. The name of the refiner was withheld at its request so as to preserve the confidentiality of the refiner's commercial strategy.

Under the terms of the licensing agreement, according to Nelson, the refiner would have the right to make and use PMC's patented fuel additive technology in its own refined products on a royalty basis.

According to the company, a number of major U.S. and foreign refiners are now testing its products.

THOMASVILLE, GA (SEPT. 5) PR NEWSWIRE - Davis Water & Waste Industries Inc. (NYSE: DWW) today reported results for the first quarter ended July 31.

The company reported net income of $165,524 or five cents per share on net sales of $51,192,544 compared to a net loss of $537,627 or 16 cents per share on net sales of $45,338,214 for the same period last year.

"Our water and sewage treatment business generated increased volume during this first quarter as compared to previous years. However, the continued slowdown in land development and residential construction, the current interest rate environment, and intensive competition for the available business are impacting margins this year," Doyle White, president, said.

"We continue to experience a slowdown in our water distribution equipment and supply business, which accounts for about 80 percent of total revenues. As part of our cost containment program, we recently closed several unprofitable branches and reduced operating costs where possible to help maximize profitability. We remain optimistic about the balance of fiscal 1991 and beyond, and continue to aggressively seek to expand operations internally and through acquisitions," White added.

Davis Water & Waste recently opened distribution centers in Houston, San Diego, and Bullhead City, Ariz.

The board of directors declared a regular quarterly cash dividend of 7.25 cents per share payable Oct. 1 to shareholders of record on Sept. 17. This represents the 10th consecutive year in which the company has paid a cash dividend.

Davis also has completed the previously announced acquisition of The Taulman Co., a privately held Atlanta-based firm engaged in the environmental pollution control business. Terms of the acquisition were not disclosed.

BOISE, ID (SEPT. 5) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) and Appleton Papers Inc. announced today that Appleton has agreed to purchase the Boise Cascade paper mill in Vancouver, Wash., for approximately $60 million. In addition, Appleton Papers has agreed to purchase finished goods inventories, which would bring the total transaction to approximately $72 million. Boise Cascade produces carbonless paper and other business communications papers at the Vancouver facility.

Both parties anticipate that the sale will be completed by year-end. Boise Cascade does not expect to realize a material gain or loss from the transaction.

"The sale of the Vancouver mill will be the first major step toward Boise Cascade's stated objective of reducing its pulp and paper presence in the Pacific Northwest," said John B. Fery, Boise Cascade chairman of the board and chief executive officer. "The sale also supports a second objective of focusing on white paper grades other than carbonless. These are two of five recently announced objectives that Boise Cascade is vigorously pursuing to increase shareholder value in the '90s."

With the purchase of the Vancouver facility, Appleton will add approximately 100,000 tons of papermaking capacity. The Vancouver mill's approximately 450 employees are expected to become Appleton Papers employees.

Appleton Papers Inc. is headquartered in Appleton, Wisc., and is the world's leading producer of carbonless paper, the leading U.S. producer of thermal paper, and a producer of colored enamels and other specialty coated papers. The company has manufacturing operations in Wisconsin, Michigan, Ohio, and Pennsylvania. Appleton Papers Inc. is a subsidiary of Wiggins Teape Appleton p.l.c., London, England.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

NEW YORK (SEPT. 5) PR NEWSWIRE - JPS Textile Group, Inc. has extended until 12:00 midnight, New York City time, on Thursday, Sept. 6, 1990, the expiration date, consent solicitation and withdrawal rights relating to each of the following: JPS's cash tender offer for all of its outstanding senior variable rate notes due 1996, senior subordinated discount notes due 1999 and 15-1/4 percent senior subordinated notes due 1999, at a purchase price of $750, $256.07 and $400, respectively, per $1,000 principal amount tendered; its cash tender offer for all of its outstanding shares of Series A exchangeable adjustable rate preferred stock, at a purchase price of $10 per share tendered; and its offer to exchange $1,000 principal amount of its new 6 percent (pay-in-kind) subordinated debentures due 1999 for each $1,000 principal amount of its outstanding 14-1/4 percent subordinated debentures due 2000. Each such offer, which originally commenced on July 20, 1990, was scheduled to expire, as extended, at 12:00 midnight, on Sept. 4, 1990, unless further

extended.

Such extension has been made with a view towards increasing, amending or otherwise modifying the consideration presently being offered pursuant to each offer.

In addition, the amendment to the company's existing bank credit facility which, among other things, eases certain financial and operating covenants became effective Thursday, Aug. 30, 1990.

As of Sept. 4, 1990, approximately $1,600,000 in outstanding principal amount of the senior variable rate notes had been tendered for purchase and not withdrawn, and no other JPS securities had been tendered pursuant to the offers.

SHELTON, CT (SEPT. 5) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) said today that Rudolph G. Morin, executive vice president and a member of the board of directors, will take on new strategic and operating responsibilities, and Michael Stashower, also a board member, will join the company as senior vice president and succeed Morin as chief financial officer. The announcement was made by Robert G. Gilbertson, president and chief executive officer.

In his new executive role, Morin will serve as chief development officer, and he will also become general manager of the T-Bar Division. T-Bar, which manufactures small communications switching systems and components, was headed by Gerrit Rohner, who recently passed away.

Stashower, who has been on the Data Switch board since 1985, has held a variety of posts in corporate financial management, including 18 years in key positions at Perkin-Elmer, where he advanced to senior vice president of finance. Most recently, he was executive vice president of Softstrip,

Inc., and his career has included management positions with AMF, Chrysler, and Ford. He holds a B.A. and an M.B.A. from Cornell University.

Morin, who has been a senior executive at Data Switch for six years, came to the company in 1984 from Thyssen-Bornemisza, an international industrial holding company, where he had been a senior financial and operating officer. A graduate of Lowell Institute of Technology, he also holds an M.B.A. from Harvard University.

Commenting on the new appointments, Gilbertson said: "With Rudy and Mike in these key posts, we strengthen our management team to accomplish our strategic goals. Rudy was instrumental in returning the company to a sound financial footing both in 1985 and after the acquisition of T-Bar in 1987. Mike's service on the board has stimulated and supported the strategics that have moved the company forward. We are pleased that both of them are here to help Data Switch make further progress."

Data Switch Corporation is a leading manufacturer of data processing and communications systems that are essential to the management and control of today's information processing networks.

LOS ANGELES (SEPT. 5) PR NEWSWIRE - CalMat Co. (NYSE: CZM) today announced that Onoda California Inc. (Onoda), an indirect wholly owned subsidiary of Onoda Cement Co. Ltd. of Japan, has informed CalMat that it is exercising its right, under a previously announced agreement dated July 19, 1988, to have CalMat acquire the 5,834,070 shares of CalMat common stock currently held by Onoda.

In accordance with the agreement, CalMat has the option to deliver the stock of its wholly owned subsidiary, California Portland Cement Co. (CPC) initially valued at $310 million, in exchange for the CalMat shares held by Onoda. In this exchange the CalMat shares are to be valued at the higher of $39.31 per share, or the current market value. Although CalMat has the alternative of purchasing the shares for cash, it intends to satisfy its obligation by exchanging the CPC shares for the CalMat shares held by Onoda. The acquisition value will be adjusted to provide CalMat the benefit of any CPC earnings from the date of the agreement, and to reflect changes in the capitalization of CPC. It is expected that CalMat will receive a payment, in the form of a combined dividend from CPC and assumption of debt by Onoda, which will equalize the agreed-upon values of the CalMat shares held by Onoda and the CPC shares. Closing of the transaction is expected to take place not later than the fourth quarter of 1990.

The assets of CPC include three cement manufacturing facilities located in California and Arizona, 13 Los Angeles-area ready-mixed concrete plants, three cement transfer terminals and a 50-percent interest in a cement import terminal located in Los Angeles.

WOBURN, MA (SEPT. 5) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) announced today that the company's HeartMate(R) ventricular- assist device (VAD) has been successfully implanted in a 35-year-old female patient at the Presbyterian Hospital/Columbia-Presbyterian Medical Center in New York. Columbia-Presbyterian is the first heart transplant center to use this device in the Greater New York area.

Eric Rose, M.D., led the surgical team at Columbia-Presbyterian that implanted the HeartMate device in the patient who was suffering from myocarditis. Now the 33rd patient in the United States to receive the HeartMate, she will be supported by the device until a donor heart becomes available.

"I am very pleased that Columbia-Presbyterian has completed their first HeartMate implant successfully," said Victor L. Poirier, president of

Thermo Cardiosystems. "It is very exciting for us to be working with one of the nation's leading heart transplant centers."

Surgeons at Columbia-Presbyterian performed 84 heart transplants last year. The HeartMate device has also been approved by the U.S. Food and Drug Administration for clinical use at seven other leading transplant centers around the country.

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the left ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

#90248p1298 09/05/1990 ~PR Newswire

LANSDALE, PA (SEPT. 5) PR NEWSWIRE - Central Sprinkler Corp. (NASDAQ-NMS: CNSP) reported today its sales and earnings for the third quarter ended July 31, 1990.

Sales for the quarter of $17,697,000 declined 2.7 percent from the $18,197,000 reported in the third quarter of fiscal 1989. Net income for the third quarter of fiscal 1990 was $1,566,000 compared to the $1,637,000 earned in the same quarter of fiscal 1989. The company earned $.30 per share in the third quarter of fiscal 1990 which was $.01 less than its earnings for the same quarter of fiscal 1989. The overall decline in sales and net income for the third quarter of fiscal 1990 primarily reflects the general decline in the level of new construction activity throughout most of the United States. The company's fire sprinkler products are used extensively in new construction projects as well as in the remodeling and retrofitting of older commercial and residential properties.

This decline in new construction activity adversely affected third quarter sales across all of the company's major product lines. Operating expenses for the third quarter of fiscal 1990 were virtually the same as the period a year ago due to various cost containment programs and lower variable sales expenses.

For the nine months ended July 31, 1990, sales were $52,849,000 and net income was $4,112,000 in comparison to sales of $51,067,000 and net income of $4,263,000 in the same period of fiscal 1989. Earnings per share of $.79 for the nine-month period of fiscal 1990 were $.03 less than the $.82 earned in the same period of fiscal 1989.

Central Sprinkler Corp. is a manufacturer and distributor of components used in automatic fire sprinkler systems.

CENTRAL SPRINKLER CORP.

MENASHA, WIS. (SEPT. 5) PR NEWSWIRE - Banta Corporation (NASDAQ: BNTA) today announced it has entered into a multimillion- dollar contract to produce postage stamp booklets for the U.S. Postal Service. Length of the contract is five years. Total contract volume will be based on quantities determined annually by the postal service.

Chairman Calvin W. Aurand, Jr. says the contract places Banta into the security printing business, part of a broader market that includes such things as gift certificates, game cards, food stamps and other print materials whose production requires special security precautions. "The various finishing processes involved with production of these booklets, such as trimming, perforating, folding and booklet binding, are a nice fit with our specialized manufacturing capabilities. Now that we're in the security printing market, we will examine other opportunities as they become available."

Two Banta Corporation subsidiaries will service the new account: KCS Industries Inc., Milwaukee, and The Press, Inc., Chanhassen, Minn.

Stamp booklet production will begin immediately, according to KCS Industries President Tim Battles. KCS Industries will assume overall responsibility for servicing the account. The company serves the point-of-purchase market with design and manufacturing services involving displays, retail merchandising programs and product identification materials.

"This contract provides a new avenue of growth for KCS," says Battles.

"It complements our printing and pressure-sensitive label production businesses."

He predicts an additional 25 to 30 employees will be added as a result of the contract. Employment currently stands at 250.

Banta Corporation is one of the nation's leading graphic arts companies, offering diverse printing and graphic/video services. It serves publishers of educational and general books, special-interest magazines, consumer and business catalogs, direct marketing materials and security documents. Its other businesses offer prepress services, multimedia and software packages, point-of-purchase materials, single- use products and video post-production and production services.

#90248p1300 09/05/1990 ~PR Newswire

NEW YORK (SEPT. 5) PR NEWSWIRE - The American Stock Exchange and Reuters Holdings PLC (NASDAQ: RTRSY) have signed a letter of intent to develop and operate an electronic marketplace for the trading of private placement securities meeting the requirements of Securities and Exchange Commission Rule 144A.

The new marketplace, called the System for Institutional Trading of Unregistered Securities (SITUS), would support trading of these securities by qualified institutional buyers as defined by the new rule.

Rule 144A provides an exemption from the registration requirements of the Securities Act of 1933 for resales of unregistered securities to qualified institutions.

AMEX and Reuters intend to launch SITUS during the first half of 1991. A detailed, definitive agreement is to be negotiated.

Plans for development of SITUS come at a time when there is strong interest in the private placement market among both U.S. institutions and overseas corporate issuers. Industry estimates give the U.S. private placement market an annual value of between $170 billion and $200 billion.

Under the letter of intent, SITUS would be a division or subsidiary of the American Stock Exchange. The Exchange would be responsible for regulatory reporting, qualifications, surveillance and Exchange-related administrative functions. The SITUS electronic trading system would be developed, operated, owned and maintained by Reuters.

The system would incorporate the most recent software technology from a

variety of Reuter subsidiaries, particularly the Instinet electronic trading system. Users would access SITUS via Reuter terminals.

Reuters Holdings PLC supplies the global business community and news media with a wide range of facilities including real-time financial data and transaction services, access to numeric and textual historical databases, news and news pictures. Reuters has a controlling interest in Visnews, the international television news agency, and Reuter Group companies design and install trading room systems. Reuters obtains information from around 160 exchanges and over-the-counter markets and from a network of some 1,310 journalists, photographers and cameramen. Reuters distributes information through approximately 200,000 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

SOUTHFIELD, MICH. (SEPT. 5) PR NEWSWIRE - Herb Fried, chairman and chief executive officer of W.B. Doner & Company, announced management changes for the $350 million advertising agency today.

Fried, himself, will shift his focus to the Detroit office, spending the majority of his time there, but continuing to oversee all agency offices. He will maintain residences in Maryland and Michigan.

Simultaneously, Jim Dale, formerly vice chairman and corporate creative director, takes on the role of president of the agency and chief operating officer. Dale will be based in Baltimore.

The agency's Executive Committee will be expanded to include four new members in addition to Fried and Dale. They are Barry Levine, who has moved up to senior vice president and chief financial officer; Steve LaGattuta, to vice chairman, International Business Development; Alan Kalter, moving to vice chairman, Account Management; and Don Riesett, also upped to vice chairman, Account Management. Levine, LaGattuta and Kalter are based in Detroit. Riesett is in Baltimore.

Fried, who had been spending more time in Detroit since the death last January of W.B. "Brod" Doner, the agency's founder, said, "We are particularly proud of being able to fuel the agency's growth from within our ranks. These are the same people who will guide the agency into the next century."

Doner is co-headquartered in Detroit and Baltimore, with offices in

Cleveland, Boston, Chicago, Tampa, Fla., Toronto, Montreal and London. The agency has had remarkable growth, gaining such prominent advertisers as BFGoodrich, Chiquita Brands International and Yoplait Frozen Yogurt in recent months. And Doner is a perennial creative leader, adding six national ADDY's, six ANDY's and two Cannes Lion awards just in the last year.

#90248p1308 09/05/1990 ~PR Newswire

ROCHESTER, NY (SEPT. 5) PR NEWSWIRE - An unprecedented Total Satisfaction Guarantee and two small copiers that will be sold through different marketing channels were announced here today by Xerox Corporation (NYSE: XRX).

The Xerox Total Satisfaction Guarantee, effective for products purchased, leased or rented from Xerox from today onward, is the first of its kind in the business products and systems industry. It covers all Xerox products for three years, or throughout the period of Xerox financing, whichever is longer.

Under its terms, customers who maintain their Xerox equipment under Xerox authorized service or warranty but are not fully satisfied are entitled to a replacement product that is identical or comparable to the original. Xerox pays all costs associated with the replacement.

Also announced today were the Xerox 5034 and 5011 R/E convenience copiers, bringing to nine the number of small copiers Xerox sells.

The 5034 copier is the first 50 Series small copier to be equipped with a duplexing automatic document handler that can invert originals to make copies automatically on both sides of a sheet of paper. The 5011 R/E copier features a speed of 12 copies per minute. It accepts originals up to 11 by 17 inches and can reduce or enlarge in ratios of 65, 75 and 130 percent or original size.

The new Total Satisfaction Guarantee is unique because of the empowerment given to the customer.

Discussing the new 5034 and 5011 R/E convenience copiers, Cahn noted that they make the selection of small Xerox copiers the broadest ever marketed by the company. He said this broad selection underscores the commitment of the company to the small-copier market.

The 5034 copier, which is equipped with a 10-bin sorter, has a presentation-set capability unique to the industry. In a single step, it

can make overhead acetate transparencies, interleave blank pages between the acetates, and make up to nine copy sets for use as handouts at meetings. It can also insert both front and back cover automatically on copied sets and insert dividers between pages of the copied documents.

The 5011 copier has automatic copy-quality adjustment for problem originals and a photo mode for copying photographs.

Both the 5034 and the 5011 use Xerox copy cartridges and dry-ink cartridges, which are guaranteed to perform to their specifications. They are customer replaceable.

#90248p1309 09/05/1990 ~PR Newswire

MINNEAPOLIS (SEPT. 5) PR NEWSWIRE - Varitronic Systems, Inc. (NASDAQ: VRSY) today reported that net earnings for its fiscal year ended July 31, 1990, were $1,753,000, or 40 cents per share, compared with $6,295,000, or $1.14 per share, for fiscal 1989. Net sales for fiscal 1990 were $39,447,000, compared with $52,586,000 in fiscal 1989.

Net earnings for the fourth quarter ended July 31, 1990, were $821,000, or 22 cents per share, compared with $734,000, or 13 cents per share, for the fourth quarter of 1989. Net sales were $9,478,000 in the fourth quarter of 1990, compared with $10,716,000 in the comparable period last year.

During 1990, the company repurchased 1,956,000 shares of its common stock at an average price of $5.76 per share, decreasing weighted average shares outstanding to 4,391,000 in fiscal 1990, compared with 5,520,000 in fiscal 1989. There were 3,629,000 shares of common stock outstanding at July 31, 1990.

A decline in machine unit sales, plus decreased average unit prices, accounted for the company's 25 percent sales decline in 1990. Sales of consumable supplies for use in the company's business graphics products remained at approximately the same level as in 1989.

Earnings for the year were impacted by several non-recurring expenses: (1) a $1,850,000 writedown of the Typestyler(TM) product line; (2) severance expenses of $368,000 related to an 18 percent reduction in the company's workforce; and (3) expenses of $267,000 incurred during merger discussions with Kroy, Inc., which were terminated in September 1989. On an after tax basis, these one-time charges amounted to approximately 37 cents per share for the year.

The company's gross margin in 1990 declined to 42 percent, compared with

48 percent in 1989. However, without the $1,850,000 writedown of the Typestyler product line, the company's 1990 gross margin would have been 47 percent. Fourth quarter 1990 gross margin was 46 percent, compared with 48 percent in the fourth quarter of 1989.

Net cash flow from operations was $10.1 million in 1990, compared with $1.6 million in 1989. All of this cash was used in repurchases of the company's stock, as described above.

"Even though we were disappointed in our sales and earnings performance in 1990, we believe we made the right decisions to reposition the company," Scott Drill, chairman and CEO said. "It was important that we quickly recognized that the Typestyler was not going to live up to its expected potential, so that we could refocus our marketing efforts on our new PosterPrinter(TM) product and on our successful line of lettering systems. Although it was difficult, it was very important that we reduced our workforce by 18 percent last November. As a result, annual operating expenses were reduced by $2 million.

"We are the market leader for office lettering systems and related consumable supplies, and we have programs in place which we believe will further enhance our leadership position. We are also actively looking for new products that will complement our existing product lines and enhance our opportunities for growth as a presentation products company.

"Having taken the steps we did in 1990, we believe that Varitronics is a very solid company. We have a strong balance sheet, a predictable base of revenues from our supply business, graphic products that continue to gain acceptance, and a strong distribution system that provides good opportunities to bring new presentation products to market."

Varitronics is a Minnesota-based developer, manufacturer and marketer of business graphic products that enhance the quality, professionalism and effectiveness of business communications.

#90248p1310 09/05/1990 ~PR Newswire

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - The advances embodied in the Enterprie System/9000(A) family announced today will bring new power and function to customers having supercomputing requirements, at prices attractive to all users.

"We're pleased that the new performance range of the ES/9000(A) systems, both at the high end for the very large applications and with the new air-cooled processors, will extend technical computing opportunities for scientists and researchers worldwide," said Jerry Latta, application solutions director of Technical Computing Systems at IBM.

The ES/9000 family expands customers' supercompting capability with outstanding high-end scalar (a single arithmetic operation per computer instruction) and vector (a single computer instruction capable of performing multiple arithmetic operations) performance, larger central and expanded storage, new Enterprise Systems Connection (ESCON(A)) Architecture(A) (channel architecture) based on optical fiber technology to accommodate enterprise-wide computing, greatly enhanced OEM-connectivity for the multi-vendor environments and a low-cost air-cooled entry system with vector capability.

The ten air-cooled and eight water-cooled processors of the ES/9000 family provide a unique compatible growth path to all users with numerically-intensive computing (NIC) applications through significantly enhanced scalar floating-point performance and improved vector and parallel processing. Parallel processing is the execution of a single user's job across multiple processors simultaneously. Parallelism can reduce the turnaround time for NIC applications on IBM multiprocessors.

With the rack-mounted processors, the ES/9000 Model 170 is expected to provide up to five-times the NIC performance as compared to the previous Enterprise System/9370(A) Model 90. The frame-mounted ES/9000 Model 320 with Vector Facility provides more than 16-times the scalar NIC performance of its predecessor Enterprise System/4381(A) Model 90 running the LINPACK benchmark. Such performance increases open up new possibilities for scientific and technical processing at the departmental level as well as in smaller enterprises.

At the high-end of the ES/9000 line, the water-cooled Model 900 is expected to provide from 2.0-to-2.8-times the NIC performance available on the Enterprise System/3090(A) Model 600J. Also available on the high- end are the IBM SuperComputing System Extensions (SCSEs), which are designed to meet both performance and functional requirements of the most demanding scientific and technical users. SCSEs are extensions to IBM products that allow the end user to achieve greater processing power.

Customers can continue to run the nearly 1,000 available scalar applications and more than 200 of the latest versions of the most widely-used vectorized technical computing applications on the ES/9000. These applications are available in such areas as structures, fluids, physics, chemistry, mathematics and earth resources.

The following languages will run on all models of the ES/9000 for scientific and technical applications: VS FORTRAN, C/370, APL2, VS Pascal and Assembler. In addition, productivity tools such as the IBM Optimization Subroutine Library (OSL) and the IBM Engineering Scientific Subroutine Library (ESSL) will run on the systems. ESSL is a collection of mathematical subroutines that provide a wide range of mathematical functions useful for many technical computing applications. OSL is a library of high performance programs used to find the best possible solution to specific problems. Typical uses of OSL include minimizing production costs in blending crude oils for gasolines, reducing transportation and warehousing costs in the scheduling of vehicle loading and routing, and maximizing profits in the management of a large financial portfolio.

(A) -- Enterprise System/9000, Enterprise Systems Connection Architecture, ESCON, Enterprise System/9370, Enterprise System/4381, Enterprise System/3090 are all trademarks of the IBM Corporation.

NEW YORK (SEPT. 5) PR NEWSWIRE - New York State savings banks paid $1.6 billion in interest to savers during the second quarter of the year, according to the Savings Banks Association of New York State (SBANYS) - The figure was unchanged from the previous quarter and remained relatively steady from one year ago.

"Federal deposit insurance makes savings bank accounts of up to $100,000, within legal limits, one of the new truly risk-free investments available today," said Association President and CEO Robert O. Lehrman. That security is just one of the reasons that New Yorkers have invested nearly $100 billion in 13 million savings bank accounts statewide."

SBANYS represents an industry of 82 savings banks with approximately $140 billion in assets, employing 35,000 people in 1,000 branches, offices and subsidiaries statewide. It is the largest organization representing savings banks in New York State.

#90248p1313 09/05/1990 ~PR Newswire

GREENWICH, CONN. (SEPT. 5) PR NEWSWIRE - United Parcel Service (UPS) has begun testing a new package encoding system that provides greater information density than traditional bar coding and which can be read by a scanner while moving rapidly on a conveyer belt.

Called the UPSCODE(SM) system, the UPS-designed code contains approximately 100 alphanumeric characters on a one-inch-square label. Its 888 information-carrying cells are arranged in a honeycomb pattern and contain all pertinent customer shipping information (consignee name and address, handling instructions, invoice and package tracking number). A bull's eye pattern in the center of the label allows a special scanner to locate the UPSCODE label information on UPS packages as they move along conveyer belts at speeds of up to 500-feet-per- minute.

When fully operational, the UPSCODE system will facilitate package sorting in hubs and operating centers from entry through intermediate sort to final loading for delivery. The system is presently being tested at UPS's Lawnside, N.J., facility.

"The UPSCODE system will enable UPS to be even more efficient in package handling and will increase facility automation," said Gene Hughes, UPS Strategic Planning manager. "It will also let us significantly enhance our electronic tracking and tracing capabilities."

The information density of the UPSCODE system label is superior in many ways to traditional bar coding. Its unique design allows for complete recovery of the information even if up to 30 percent of the UPSCODE system label is destroyed.

UPS, based in Greenwich, is a worldwide company serving all 50 states and more than 180 countries and territories. With a volume of 2.8 billion packages in 1989, and revenue of more than $12 billion, UPS is the largest package delivery company in the world.

AKRON, OHIO (SEPT. 5) PR NEWSWIRE - James M. Griffith has joined The BFGoodrich Company (NYSE: GR) as vice president of public affairs.

In this position, Griffith will be responsible for the company's corporate communications, federal government relations and state government relations functions.

Griffith previously was vice president of public relations for Pepsico, Inc. in Purchase, N.Y. Prior to joining Pepsico in 1981, he worked at Newport News Shipbuilding as director of public relations and at Ford Motor Company in various capacities on the public relations staff.

He received a bachelor of arts degree from the University of Detroit in 1964 and a master of administration degree from the University of Detroit in 1968.

BFGoodrich produces vinyl resins and compounds, specialty chemicals and provides aerospace components and services.

MEMPHIS, TENN. (SEPT. 5) PR NEWSWIRE - The Promus Companies (NYSE: PRI), l2th in size in the U.S. hotel industry, is second in new room additions, accounting for almost 13 percent of the estimated 70,000 new rooms predicted to come into the U.S. market this year. And Promus' share is expected to rise to almost 17 percent of the 50,000 new rooms forecast in the U.S. for l99l, which may well make the company first in new room additions.

Promus' three hotel brands--Embassy Suites serving the upscale all suite market, Homewood Suites the extended stay market, and Hampton Inn the moderately priced segment--will add about 8,800 newly constructed rooms this year and some 8,400 in l991. Additionally in l990 and l991, Hampton Inn expects to convert each year to its banner some l2-l5 hotels now affiliated with other brands, which will mean further growth in its rooms. Embassy Suites will add l3 and l2 new hotels in l990 and l99l respectively, Homewood Suites l4 new hotels each year and Hampton Inn 40-50 hotels (including conversions) each year.

Total room additions, both new and from conversions, represent an average l6 percent annual growth rate for the Promus brands over the two-year period, with the company expected to total some 68,000 rooms by year end l991. Industry capacity growth is forecast at only 2.4 percent in l990, declining to l.9 percent in l991.

The decline in the number of new hotel rooms annually nationwide--down sharply from 107,000 in l987--reflects a market overbuilt in some segments

but now in the process of correction. For the fifth straight year, growth in customer demand exceeds the growth in supply. In fact for the first six months of 1990 demand growth of about 5 percent exceeded capacity growth of less than 3 percent.

Geographically, most of the Promus hotels under construction are located in the East, Southeast, West and Upper Midwest. Embassy Suites has 100 hotels currently operating nationwide, Hampton Inn 231 hotels, and Homewood 14 hotels. Embassy was founded in 1983, Hampton in 1984 and Homewood in 1988.

Besides Embassy, Hampton and Homewood, The Promus Companies operates Harrah's, the only gaming company with casino hotels in all five major U.S. markets.

OWENSBORO, KY. (SEPT. 5) PR NEWSWIRE - Grace Specialty Chemicals Co., a unit of W. R. Grace & Co. (NYSE: GRA), today announced that it will install a thermal combustion system at its Organic Chemicals Division plant in Owensboro, Kentucky which is expected to reduce emissions of butadiene by more than 90 percent.

The latex polymer production facility's emissions are currently within federal and state regulations, but the company is going beyond compliance to better protect the environment. The new system will convert butadiene into harmless carbon dioxide and water. It is expected to be operational by the middle of next year.

Products manufactured at the Owensboro facility include coatings and adhesives as well as saturants for textiles and nonwovens. "Installing this new system will have a tremendously beneficial impact on the environment," according to Edward G. Najjar, president of Grace's Organic Chemicals Division. "We are also studying whether or not it is feasible for this system to reduce other plant emissions as well," he added, "thus attaining multiple reductions."

The company continually monitors new methods to reduce emissions. Recently a recycling system was installed here at the Polyfibron Division plant to reduce hexane. This new device was installed to capture hexane before it is released into the atmosphere and return it to the plant to be reused.

Grace is an international specialty chemicals company with interests in energy, manufacturing and service businesses with sales last year in excess of $6 billion.

CHICAGO (SEPT. 5) PR NEWSWIRE - Centel Corp. announced today that it has completed agreements to sell approximately $14.3 million of Centel Credit Co.'s lease receivables. These transactions complete the sale of Centel Credit Co.'s portfolio, which had total proceeds of approximately $55.1 million.

The company did not disclose who purchased the remaining portions of the portfolio. Centel Credit Co. had provided equipment financing to customers of Centel Communications Systems. Centel recently reached an agreement to sell its Communications Systems unit to an investor group.

Chicago-based Centel Corp., which had 1989 revenues of $1.19 billion, provides local exchange telephone service in nine states through more than

1.6 million access lines; operates cellular communications franchises that serve nearly 150,000 access lines in 44 markets in 15 states, and supplies electric power to more than 136,000 customers in two states.

POUGHKEEPSIE, N.Y. (SEPT. 5) PR NEWSWIRE - IBM (NYSE: IBM) today issued the following statement on NetView(A) Version 2 Releases 1 and 2:

Overview

NetView, IBM's flagship network and systems management product, provides a platform for automating both systems and network operations. Together with the NetView family of products and Open Network Management Architecture, NetView is the basis for a comprehensive end-to-end management approach enabling customers to manage Systems Network Architecture (SNA) and non-SNA resources and communication services and systems.

Benefits

-- Extended openness for integration with other IBM and non-IBM management applications through peer-to-peer communications and data sharing.

-- Enhanced operations support by means of new graphics and automation capabilities.

-- Enriched LAN support through synergy with newly announced LAN management products.

-- New pricing and packaging options offer flexibility for central, distributed and standalone system configurations.

NetView Version 2 Release 1

NetView Version 2 Release 1 features include new packaging and pricing, NetView Graphic Monitor Facility, NetView Bridge, NetView Installation Facility.

-- NetView Version 2 Release 1 for MVS and MVS/XA environments is scheduled to be available Dec. 31, 1990.

NetView Version 2 Release 2

NetView Version 2 Release 2 provides LU 6.2 transport capability, enhancements to the current NetView automation capabilities, and NetView Graphic Monitor Facility support is extended to the VM/ESA environment.

NetView Version 2 Release 2 runs in MVS/ESA, MVS/XA, VM/ESA, VM and VSE environments.

-- NetView Version 2 Release 2 for MVS/ESA and MVS/XA environments is scheduled to be available Sept. 30, 1991. NetView Version 2 Release 2 for the VSE environment is scheduled to be available Dec. 31, 1991. NetView Version 2 Release 2 for VM/ESA and VM environments is scheduled to be available on March 31, 1992.

#90248p1334 09/05/1990 ~PR Newswire

DENVER, COLO. (SEPT. 5) PR NEWSWIRE - Vicorp Restaurants, Inc. (NASDAQ: VRES) today reported record earnings for its third quarter ended Aug. 5, 1990. Net income increased 62 percent to $4,260,000, or 41 cents per share, from $2,636,000, or 25 cents per share, one year earlier. Revenues rose to $93,427,000, a 10.4 percent gain over the $84,601,000 reported in 1989. It was Vicorp's 14th consecutive quarter of year-to-year operating profit improvement and its second consecutive quarter of record operating results.

"Restaurant sales growth and continued margin improvement were again the significant factors in the improvement in our results," said Charles R. Frederickson, chairman of the board. "Restaurant sales grew by 10.8 percent, the result of a 6.7 percent increase in comparable restaurant sales and additional revenue from restaurants opened during the past year. The success of new menu items introduced in 1990 continued to bolster per-person expenditures in our restaurants. Two additional restaurants were opened during the quarter, further adding to the revenue gains from locations opened since last year.

"Restaurant operating income continued to grow in the third period, increasing 22 percent over the comparable quarter last year. Contributing factors were the continued margin improvement in our California operations the overall growth in sales, and the fact that we were also able to maintain restaurant operating margins in our expansion markets despite the attendant inefficiencies normally associated with new restaurant openings."

For the 40-week period ended Aug. 5, 1990, net income also reached record levels, increasing 78 percent to $11,955,000, or $1.13 per share, from $6,722,000, or 61 cents per share, in 1989. Revenues rose 10.6 percent to $302,977,000 from $273,846,000 in the prior year's forty-week period.

Vicorp operates and franchises approximately 400 mid-scale family type restaurants under the names Bakers Square and Village Inn, principally in

the Rocky Mountain region, upper midwest, Florida, Arizona and California.

SAN DIEGO, CA (SEPT. 5) PR NEWSWIRE - General Dynamics Commercial Launch Services Inc. today signed an agreement with General Electric Technical Services Company Inc., a wholly owned affiliate of General Electric's Astro-Space Division, to launch the BS-3H satellite next April from Cape Canaveral, Fla.

The agreement was formalized at the Farnborough, England air show with Alan M. Lovelace, CLS president, and L. Ron Greenwood, vice president and general manager of General Electric Astro-Space Division, as signatories.

An Atlas I launch vehicle, produced by General Dynamics Space Systems Division, San Diego, Calif., will launch the 2,940-pound direct broadcast satellite from launch complex 36 at Cape Canaveral air force station. The spacecraft will beam television signals to small satellite receivers in Japan.

GE Astro-Space Division, located in East Windsor, N.J., will build the BS-3H satellite. Getsco was selected by the Nippon Hoso Kyokai Japan Broadcasting Corp. to provide the satellite and launch service.

The latest award to General Dynamics Commercial Launch Services brings orders for Commercial Atlas Launch Services to 24. Additionally, the company's space systems division is under contract to build and launch 10 Atlas II rockets for the U.S. Air Force.

An Atlas I successfully launched the U.S. Air Force/NASA Combined Radiation and Release Effects Satellite (CRRES) from Cape Canaveral on July 25, marking the company's first commercial launch.

Commercial Launch Services, a wholly owned subsidiary of General Dynamics

(NYSE: GD), offers a complete launch service package, including spacecraft integration, launch operations and placement of spacecraft into orbit. The Atlas family of launch vehicles is able to satisfy a major portion of the commercial launch market through the 1990s.

DALLAS (SEPT. 5) PR NEWSWIRE - Retirement Living Communities, L.P. (RLC) announced today that it has waived one of the conditions of its offer to purchase up to 60 percent of the beneficial unit certificates (BUCs) evidencing ownership in Retirement Living Tax-Exempt Mortgage Fund Limited Partnership.

RLC is waiving the minimum condition requirement which called for a majority of BUCs to be validly tendered before the expiration date of the offer.

The offer to purchase, for cash, at $8 net per BUC will expire at midnight Eastern time, on Wednesday, Sept. 12.

RLC encourages each BUC holder to tender at least 30 percent of their BUC's prior to Sept. 12, 1990.

If you have already tendered your BUCs, no further action is required. If you have not tendered your BUCs and wish to do so, you must comply with the procedures for tendering set forth in the offer to purchase and related documents by midnight on Wednesday, Sept. 12, 1990. Registered owners of BUCs may tender directly to Service Data Corporation, the depositary for the tender offer. Beneficial owners must contact their nominee (brokerage firm) for assistance in tendering.

CONTACT: Brian Maddox of Georgeson & Company, 212-246-2981, for Retirement Living Communities.

NEW YORK (SEPT. 5) PR NEWSWIRE - Effective Sept. 4, Prudential-Bache Strategic Income Fund, Inc. (formerly the Prudential Strategic Income Fund Inc.) commenced a continuous public offering of its shares as an open-end investment company. The fund previously operated as a closed-end investment company and its shares were traded on the New York and Pacific stock exchanges.

Shareholders who held shares of the fund prior to its conversion to an

open-end fund will continue to hold the same number of shares. Shareholders can purchase and redeem shares of the fund at the then-current net asset value plus a front-end sales charge and a minimal distribution fee. A redemption fee payable to the fund not to exceed 2 percent will be imposed on all redemptions during September and October.

As an open-end investment company, the fund will continue to pay monthly dividends of net investment income, the amount of which will vary depending on changing market conditions. The fund currently expects to pay monthly dividends of $.065 per share, which represents a reduction from the fund's prior $.08 per share level.

Prudential-Bache Strategic Income Fund, Inc. is an open-end management investment company which allocates its assets among different sectors of the world's bond markets, primarily U.S. government bonds, foreign government bonds and high-yielding, lower-economy U.S. corporate bonds.

TAMPA, FL (SEPT. 5) PR NEWSWIRE - GTE Telecom's Network Management and Control (NM&C) organization has been selected to provide network-management software, computer hardware and consulting services for the State of California's CALNET project. CALNET is California's integrated voice and data-telecommunications network that will replace the state's 28- year-old analog telephone network.

GTE Telecom will install its portion of the project in three phases over 30 months. It will provide CALNET with two sophisticated computer systems, Network Management and Control Center (NMCC) applications software, 22 enhancements, and 14 months of consulting services throughout CALNET's implementation.

The network's status will be displayed on 15 alarm-monitoring work stations employing NMCC high-quality graphics.

GTEL, an unregulated subsidiary of GTE Telephone Operations/West Area in California, is the prime contractor and team leader on the $67- million, 10-year contract with the State of California's Department of General Services. Northern Telecom, Rockwell and IBM are also working on the CALNET project. GTEL will coordinate and manage overall implementation, including installation of switching equipment, fiber technology, transmission media and alarm-monitoring equipment.

When completed, the system will consist of three major network-switching

centers in Sacramento, San Francisco and Los Angeles. The Sacramento center will operate NMCC software applications on a Tandem computer.

GTE Telecom's NM&C operation provides automated, centralized network-management and control products for local and state government, commercial accounts and carrier markets.

GTE Telecom is a subsidiary of GTE Information Services (GTEIS), based in Tampa.

GTE Information Services offers industry-specific software and services, publishing and marketing capabilities through its businesses.

GTEIS is a wholly owned subsidiary of GTE Corp (NYSE: GTE). GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses --telecommunications, lighting and precision materials -- providing products and services worldwide.

PHILADELPHIA (SEPT. 5) PR NEWSWIRE - Effective today, Midway Airlines (NYSE: MDW) begins non-stop service to New Orleans International Airport from the carrier's hub at Philadelphia International Airport.

Chicago-based Midway Airlines has been serving New Orleans from Chicago's Midway Airport since 1985.

Using McDonnell Douglas DC9-30 aircraft, Midway operates one daily round-trip flight. From Philadelphia, the flight departs at 9 a.m. and arrives in New Orleans at 10:59 a.m. From New Orleans, the flight has a scheduled departure at 11:25 a.m., with an arrival in Philadelphia at 3:10 p.m.

New Orleans becomes Midway's twentieth non-stop destination from Philadelphia since the inauguration of the hub on Nov. 15, 1989. With the addition of the New Orleans flight, the number of daily departures increases to 61.

John P. Tague, senior vice president of marketing and planning for Midway Airlines, said that the introduction of service to New Orleans is in keeping with the airline's philosophy to provide service to the popular destinations along the Eastern seaboard.

Midway's schedule to New Orleans has been designed to provide convenient connections through Philadelphia for passengers who originate or who are destined to any of the eight northeastern cities that Midway now serves. In general, passengers on southbound flights departing at approximately 7 a.m. from Boston; Albany, Buffalo and Rochester, N.Y.; Providence, R.I.; Hartford/Springfield, Conn.; and Montreal and Toronto in Canada can conveniently connect in Philadelphia with the 9 a.m. flight to New Orleans. Passengers can depart New Orleans on Midway's 11:25 a.m. flight and connect at approximately 4 p.m. to northbound flights in Philadelphia.

Introductory fares will be in effect for travel starting today through Oct. 15. They include a $99 one-way, non-refundable coach fare; a $139 one-way, unrestricted coach fare; and a $149 one-way, unrestricted first class fare.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

TORONTO (SEPT. 5) PR NEWSWIRE - Varity Corporation (NYSE: VAT) said today that a subsidiary has acquired, at par, approximately U.S. $15 million of

Kelsey-Hayes 13.25 percent subordinated notes due 1992 in the past few days. The notes, guaranteed by Varity, were issued in 1989 to help finance Varity's acquisition of Kelsey-Hayes, of Romulus, Mich., a major supplier of automotive components.

Varity announced at its annual meeting of shareholders July 30, that it intended to start reducing the long-term debt of Kelsey-Hayes before the end of the current fiscal year. Neil D. Arnold, senior vice president and chief financial officer, said Varity wants to reduce corporate debt by $150 million in fiscal 1990 as a key element of its program to increase value for shareholders.

MARTINSBURG, WV (SEPT. 5) PR NEWSWIRE - Mary G. Poorman, president, and K. Wayne Simmons, executive officer, of First National Bank of Cameron, along with Lacy I. Rice Jr., chairman of the board of Mountaineer Bankshares of W.Va. Inc. (NASDAQ-NMS: MTNR) jointly announced today that the First National Bank of Cameron had executed a definitive agreement providing that the bank will become a subsidiary of Mountaineer Bankshares of W.Va. Inc., as part of a cash transaction.

Brent D. Robinson, president of Mountaineer, commented, "We are pleased to have First National Bank of Cameron join Mountaineer. It is a bank with strong earnings and will enhance our presence in the Marshall County market."

The First National Bank of Cameron has been in existence since 1901 and has total assets in excess of $17 million and equity capital of over $1.5 million as of June 30, 1990.

Mountaineer is a bank holding company which includes subsidiaries Old National Bank, The Empire National Bank of Clarksburg, City National Bank of Fairmont, The Bank of Wadestown and Mercantile Banking & Trust Co. As of June 30, 1990, Mountaineer had equity capital in excess of $48 million and total assets in excess of $528 million. Consummation of the agreements is subject to regulatory approval. The parties plan to consummate the transaction during the first quarter of 1991.

#90248p1366 09/05/1990 ~PR Newswire

LONDON (SEPT. 5) PR NEWSWIRE - Hillsdown Holdings plc, a leading U.K. food processing company with additional furniture and real estate operations, today announced its results for the six months ended June 30, 1990. The full text of the statement of the chairman, including the consolidated profit and loss account, follows.

Highlights include: -- 13.3 percent increase in turnover
-- 22.2 percent increase in pre-tax profits
-- 2.6 percent increase in earnings per share
-- Operating margins increased to 5.6 percent
-- Food operations now account for 80 percent of total sales, 77 percent of operating profits

I am pleased to report further substantial growth in pre-tax profits by 22 percent to a record 82.6 million pounds sterling. Operating profit increased from 86.4 million pounds to 105.5 million pounds on turnover up by 13 percent to 1,879 million pounds. Earnings per share increased by 2.6 percent to 11.92p, reflecting the increased number of shares in issue following the acquisition in July 1989 of Premier Brands. Operating margins again showed an increase from 5.2 percent to 5.6 percent.

These results have been achieved against the background of an increasingly difficult market, particularly for our non-food businesses, and demonstrate once again the benefits of the balance of our operations geographically, operationally and in terms of customers and products.

Your directors have declared an interim dividend of 2p per share which represents an increase of 11 percent on the comparable figure last year and reflects our continued confidence in the group's future.

Overall sales in our food activities increased by 19 percent to 1,544 million pounds and represent over 80 percent of the group's total sales. While a comparison with the prior period is affected by the inclusion of Premier Brands' figures, strong organic growth was achieved in our overall food activities. Operating profits increased by 84 percent to 81.2 million pounds and represent 77 percent of our total operating profits.

Our major acquisition activity this year has been the merger of Maple Leaf Mills with Canada Packers in July which, with the expenditure of C$120 million on acquiring shares in Canada Packers, results in Hillsdown's ownership of 56 percent of the enlarged Canada Packers Group, the largest publicly quoted food company in Canada.

FRESNO, CALIF. (SEPT. 5) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) announced that August 1990 sales increased 25.5 percent to $20.2 million from $16.1 million during the prior year August sales levels. Same store sales for the August period increased 11.3 percent. For the 30 week 1990 period to date, total sales increased 24.9 percent to $134.3 million from $107.5 million for the year earlier 30 week period. Same store sales on a year-to-date basis increased 11.9 percent over the prior year.

"Gottschalks sales results continued the strength shown in prior months," stated Joe Levy, chairman and chief executive officer. "Our strong double digit same store increase is attributable to improved merchandise selection, strong demographic growth in our market area and the continued expansion of sales in our relatively immature stores.

"We had an exceptional back-to-school period with sales of junior apparel being especially strong. Our home divisions also performed ahead of plan. We're optimistic about the third quarter given our early sales results," added Levy.

Sales results are summarized as follows:

	Sept. 1 1990	Aug. 26 1989	Total Percent Increase	Same Store Sales Increase
Sales, four weeks ended	$ 20,192	$ 16,086	25.5	11.3
Sales, thirty weeks ended	$134,251	$107,464	24.9	11.9

Gottschalks is a regional department store chain, currently operating 21 department stores and 32 specialty apparel stores and a clearance center in the Central Valley and Central Coast areas of California. Gottschalks offers moderate to upper moderately priced brand-name fashion merchandise, and is in its 86th year of continuous family management.

#90248p1370 09/05/1990 ~PR Newswire

PARIS (SEPT. 5) PR NEWSWIRE - Rhone-Poulenc said today that its consolidated sales rose 7.8 percent in first-half 1990 to FF 39.998 billion. On a comparable basis, sales have declined by 5.6 percent. Net earnings per share amounted to FF 34.73 at June 30, 1990 compared to FF

40.85 at June 30, 1989, while operating income stood at FF 3.749 billion versus FF 4.685 billion a year earlier. Net income after tax and minority interests but before payment to preferred shares retreated 12.9 percent to FF 2.175 billion.

This movement in sales and operating income, announced after the first quarter results 1990, is essentially due to:

-- The full impact of the Brazilian economic austerity program in the second quarter, and exchange rate fluctuations.

The latter, particularly the drop in the dollar and the yen against European currencies, depressed interim sales by 4.9 percent.

Exchange rates will continue to affect income performance in the coming months, but the Brazilian subsidiary is expected to return to breakeven before the end of the year.

The Agrochemicals, Fibers and Pharmaceuticals divisions maintain the growth momentum built up in the first quarter. The chemicals and animal nutrition businesses, on the other hand, suffered from their exposure to cyclical demand and/or currency fluctuations.

Rhone-Poulenc also said that its recent acquisitions (such as RTZ, GAF, Connaught, Rorer...) were being integrated as planned, and that the businesses were developing in line with expectations.

The acquisition of U.S.-based Rorer was finalized in early May. Provisions set aside by Rorer through April 30, 1990 were included as planned in the acquisition costs and therefore had no direct impact on consolidated earnings.

The divestment program unveiled at the beginning of the year is progressing as planned, and capital gains on the disposal of assets have already offset the higher interest expense stemming from recent acquisitions.

All together, the first six months of the year saw lower profits for all of the major world chemicals companies. Rhone-Poulenc was able to limit its own earnings decline despite the situation in Brazil and the cost of integrating recent acquisitions. In the second half, however, a weaker dollar, higher oil prices and slower economic growth could have a greater impact on operating income.

LINDEN, NJ (SEPT. 5) PR NEWSWIRE - General Magnaplate Corporation (NASDAQ: GMCC) President and COO Candida Aversenti today announced financial results for fiscal 1990 showing gross revenues reaching the record level of $10.3 million, a 6.2 percent increase over fiscal 1989. Reflecting charges for acquisitions, and for other costs in connection with operational changes at existing facilities, earnings per share were 35 cents, down 11 cents from the previous year.

In announcing the results, Aversenti restated General Magnaplate's intention to use the corporation's financial strength and flexibility to invest in the corporation's future. "General Magnaplate's objective," she said, "is to remain the market leader in advanced surface engineering and surface enhancement." She stated that continued expansion and diversification will position the corporation for both short-term and long-term growth and "allow us to make our coating technologies available throughout the world by licensing and/or joint ventures."

"As we look back on fiscal 1990," Aversenti said, "we see many concrete examples of our continued growth. In March and May, for instance, we achieved our first-ever $1 million monthly sales. And for 1990 we were listed in the August issue of Financial World's 'Top 500 Growth Companies.' At a time when many corporations have sacrificed long-term progress for the sake of short-term earnings and sales performance, we have been able to invest in the future and maintain current financial strength. We followed the early 1989 acquisition of Magnaplate Service Corporation up with the acquisition of General Magnaplate Wisconsin and General Magnaplate Canada in January 1990. Both these expansions have already allowed us to take advantage of regional growth opportunities."

As a result of these actions, General Magnaplate continues to be a good investment, with a book value per share up 13.5 percent and dividend payments up 23 percent over 1989. The board of directors has voted to increase the current semi-annual dividend by 50 percent to $0.03 per share payable Oct. 5, 1990, to holders of record as of Sept. 14.

CALGARY, ALBERTA (SEPT. 5) PR NEWSWIRE - Craig R. Frew, president of Western Gas Marketing Ltd., announced that the company has signed an agreement outlining the general terms for gas supply to Southern California Edison Co.

''Western Gas is committed to become a fully diversified marketer of natural gas to all regions of North America,'' said Frew. ''This sale represents a major initiative in securing a new market opportunity as part of this commitment. California is a growing market and as North America's largest aggregator of natural gas, Western Gas is particularly well suited to meet their requirements for a secure, reliable long term supply of natural gas.''

Southern California Edison is one of the largest electric utilities in North America and services the majority of southern California.

According to Frew, ''terms assure producers that they will receive prices that are competitive with other sources of natural gas into California over the life of the contract. In addition, there are assurances of high load factors making this sale an extemely attractive one for our producers.''

The formal agreements, which will be completed before the end of this year will be for a minimum of 50 mmcfld over 15 years beginning in 1993.

MONTREAL (SEPT. 5) PR NEWSWIRE - The board of directors of Techbyte International Inc. announced today that the company will sponsor the 13th International Seminar on Schooling in Lisbon (Estoril), Portugal, on Oct. 17-20, 1990. Delegates to the Seminar are expected from Europe, North America, the Pacific Rim, the Middle East, and the Soviet Union.

The theme for the 13th Seminar is "The Changing Face of Europe: Implications for Education, New Information Technology, and the World Economy." The purpose of the seminar is to bring together a small number of educational leaders from nations around the world to discuss policies and issues of international significance in education. Last year's seminar was held in Athens, Greece, and other seminars have been held in London; Stockholm; Oxford, England; Melbourne, Australia; Munich; Paris, and Birmingham, England.

The seminar is being hosted by the American International School in Lisbon and the University of Texas at Austin, with the support of the Commission of the European Communities (CEC/DELTA Project) in Brussels.

The Mayor of Lisbon and the United States Ambassador to Portugal will greet delegates at an opening session of the seminar, and the President of Portugal, the honorable Mario Soares, will host a special welcoming reception at the extraordinary Belem Tower.

In addition to CEC/DELTA Project, participating organizations include the Portugal Ministry of Education and the Scottish Council for Education Technology.

Topics planned for the program include panel discussions and special presentations on "The Changing Face of the World Economy," "Impact on World Culture," "The Alignment of World Power in 2001," "The New Europe: East Meets West," and "How Education is Preparing Young People to Live in a High Tech Society and an Increasingly Interdependent World Economy."

Techbyte International Inc., a federally incorporated company, was established in 1984 and has its head office in Longueuil, Quebec. In November, 1989, Techbyte International (USA) Inc., a wholly owned subsidiary of Techbyte International of Quebec, was established in the United States, and is based in Arlington, Texas. Onyx Informatique Inc. of Montreal, a wholly owned subsidiary of Techbyte International, produces computer-based training materials for business and commercial customers.

VALLEY FORGE, PA. (SEPT. 5) PR NEWSWIRE - UGI Corp. (NYSE: UGI), a Pennsylvania gas and electric utility and national distributor of propane, reported today that it has increased the 1990 capital expenditures budget of its Gas Utility Division by 21 percent to a record $42.5 million.

James A. Sutton, UGI's chairman and chief executive officer, said the higher level of spending "is required to serve new business growth resulting from the continuing high level of construction activity and increased demand for natural gas across the gas utility's service territory."

The division operates in 14 central and eastern Pennsylvania counties, including the cities of Allentown, Bethlehem, Easton, Harrisburg, Hazleton Lancaster, Lebanon and Reading. "The gas utility's original capital budget of $35 million for 1990 forecast a reduction in residential and commercial construction activity from year ago levels," Sutton said. "The downturn has not materialized."

UGI said it also plans major outlays this year and in each of the next three to four years for propane acquisitions by its AmeriGas subsidiary. AmeriGas, with wholly owned and joint-venture operations in 37 states, is the nation's third largest propane marketer.

MONTREAL (SEPT. 5) PR NEWSWIRE - The Seagram Company Ltd. (NYSE: VO) today reported net income of $205 million, or $2.18 per share, for its second quarter ended July 31, 1990, compared with $199 million, or $2.07 per share, in the previous year.

Operating income was $152 million, an advance of 8.6 percent from $140 million in the second quarter of 1989. Second-quarter sales increased to $1.4 billion, an 8.7 percent gain from $1.3 billion in the 1989 period.

For the six months, Seagram net income was $392 million, or $4.15 per

share, vs. $395 million, or $4.07 per share, in the comparable 1989 period. First-half operating income of $309 million represented a gain of 16.6 percent from $265 million in the six-month period last year. Sales for the first half were $2.7 billion, up 7.1 percent from $2.5 billion last year. Even though net income declined marginally, earnings per share increased, reflecting a smaller number of shares outstanding.

Dividend income from E.I. du Pont de Nemours and Company for the quarter was $65 million, up 14 percent from $57 million a year ago. Unremitted earnings from Du Pont declined 5.7 percent to $99 million for the quarter from $105 million in the comparable 1989 period. For the first half, Du Pont dividend income was $131 million, up 13.9 percent from $115 million a year ago. Unremitted earnings from Du Pont were $178 million for the first half, a decline of 16.4 percent from $213 million last year. At July 31, 1990, Seagram held an approximate 24.3 percent interest in Du Pont.

The Seagram Company Ltd., with affiliates in 28 countries, is a leading producer and marketer of distilled spirits, wines, coolers, fruit juices and soft drinks. The company's brands include Chivas Regal and The Glenlivet Scotch Whiskies, Crown Royal and Seagram's V.O. Canadian Whiskies, Seagram's 7 Crown Blended Whiskey, Seagram's Extra Dry Gin, Martell Cognacs, Mumm and Perrier-Jouet Champagnes, Sandeman Ports and Sherries, Barton & Guestier (B&G) Wines, Sterling Vineyards Wines, Seagram's Coolers, Seagram's Mixers, Tropicana Pure Premium Orange Juice, Tropicana Twisters, Tropicana Sparklers, and Soho Natural Sodas.

Note: Percentage changes are based on daily selling rates.

Comments: The following may be attributed to Robert L. Rewey, vice president - Sales Operations, Ford North American Automotive Operations.

"A 104 percent sales increase for Explorer/Bronco II over August, 1989 should enable Ford, for the fourth consecutive month, to capture compact utility sales leadership and widen our year-to-date advantage. Ford's share of the truck market has rebounded, due not only to the success of our new Explorer, but to the continuing popularity of the entire Ford

truck line-up, particularly our best-selling F-Series and Ranger pickups."

"As availability of the all-new 1991 Ford Escort and Mercury Tracer models improves, growing numbers of consumers are recognizing their exceptional value and sales are gaining momentum. (In the third 10 days of August, their daily selling rate was 79 percent higher than in the first 10 days.) Accordingly, we are confident that Ford's car market share will improve over the balance of the year, following the upturn in our truck market share already in evidence."

"Geo-political uncertainties translate into even greater uncertainties about the outlook for the U.S. economy in the months ahead. Thus far, however, consumers seem to be taking a wait and see attitude and the automotive market has been much more stable than might have been expected under the circumstances. Although, as one would expect, dealers in communities where the local economy depends on nearby military installations report that their sales are off sharply, we are not seeing any dramatic shift in either retail volume or mix on a national basis as a result of the Persian Gulf situation."

MIAMI (SEPT. 5) PR NEWSWIRE - Prodigy, the interactive computer service test-marketed a year ago in major cities including South Florida, today will launch the first and only national system available for a low, flat fee. Now 60 million Americans will have access to more than 800 services and features of Prodigy for the price of a local phone call.

More than 450,000 Prodigy subscribers currently use the easy, videotext service to shop without leaving their homes, read up-to-the-minute news, and communicate with other subscribers via bulletin boards and electronic mail. The Prodigy Services Company is a joint venture of IBM-Sears formed in 1988.

Prodigy can be used to electronically link families across the country or unite people in a community as issues of major concern or interest arise. For instance, with the Iraqi crisis, a Seattle woman asked other Prodigy subscribers for a cookie recipe that would hold up well under the duress of being shipped overseas to her son. Not only did she receive a batch of cookie recipes but the idea has taken on a life of its own. Operation Cookie, as the project has come to be called, was started by an Orlando woman responding to the original request who offered to serve as the central point to airship cookies to the Middle East through an Air Force connection.

Also in South Florida, residents with Prodigy are able to get past busy phone lines to check on the well being of relatives in Gainesville, Fla. by using Prodigy's electronic bulletin board to send and receive messages.

We can arrange for members of your media staff to see and try the newly expanded service themselves, or arrange an interview with a local family or resident using Prodigy. To arrange an interview or for further information, please contact Marie Correa at 305-576-5700.

MIAMI (SEPT. 5) PR NEWSWIRE - In addition to its national announcement, Prodigy Services Company unveiled today an expanded lineup of local news, weather and sports for its South Florida members. Among the services and features are:

-- Three-day weather forecasts for the Miami/Fort Lauderdale area, updated throughout each day.
-- Southeast news, where summaries of the top stories are updated throughout the day.
-- The latest Florida lottery numbers.
-- Sports news on the Heat and Dolphins. Even running summaries of the games -- as they're being played.
-- More sports coverage of local college football and basketball scores.
-- A listing of South Florida cultural events.
-- A PRODIGY service guide to Miami, prepared by service members, talking about the hot spots to dine, dance, stay and see.
-- The Mobil Travel Guide's suggestions for the best in Miami restaurants, hotels and sightseeing.

MENLO PARK, CA. (SEPT. 5) PR NEWSWIRE - Arthur C. Bass, a veteran top executive in both the air line and air freight industries, has been named chairman and chief executive officer of Emery Worldwide, a CF company.

The announcement was made today by Raymond F. O'Brien, chairman and chief executive officer of Consolidated Freightways Inc. (NYSE: CNF), the parent organization of Emery Worldwide.

He also announced that Donald G. Berger would continue as president of the air freight and express delivery company.

"We are very pleased to have a person of Art's experience and stature in the transportation industry join the management of Emery Worldwide. We believe Emery to have great potential under this management team's direction," said O'Brien.

Bass, 58, most recently was president, chief executive officer and a board member of The Cooper Companies of New York. He is a founder of Federal Express and was the leader of a group that performed the original research on the viability of the Federal Express concept. He was president of the company from 1975 to 1981 and served as vice chairman from 1981 to June 1982.

In August 1982 Bass was named chairman and chief executive officer of Midway Airlines of Chicago, where he managed the acquisition and merger of Air Florida and was instrumental in the resurgence of Chicago's Midway Airport.

Bass is a graduate of Middlebury College in Vermont and did post graduate work at New York Law School. He also served four years as a pilot in the U.S. Marine Corps. He is married with three children.

Consolidated Freightways Inc. is a diversified transportation company with businesses in long-haul and regional trucking, air freight and rail and ocean intermodal services.

#90248p1418 09/05/1990 ~PR Newswire

MONTREAL (SEPT. 5) PR NEWSWIRE - Air Canada is introducing a special fare program between Oct. 1 and Dec. 17, 1990, which will offer flat-rate fares to customers aged 55 years or over, traveling on any of the airline's (and its connector carriers) North American routes.

The "Freedom Flyer" program is based on the number of stopovers made during one trip, with no limit on mileage. A flat rate of $575 permits up to four stopovers, five to eight stopovers costs $675, while the third fare allows up to 12 stopovers for $775.

A companion of any age can accompany the Freedom Flyer passenger at the same fare, providing that both parties travel together on all portions of a trip.

For example: a Freedom Flyer could travel Miami - Montreal - Toronto - Vancouver - Calgary - Miami for $575 on a trip that would normally cost about $1600 full fare. A six stopover Freedom Flyer would pay $675 for travel Boston - Toronto - Los Angeles - Calgary - Montreal - Halifax - St. John's Nfld - Boston on trip that could normally cost about $2100.

Reservations must be made at least two weeks in advance, with all travel segments of the itinerary booked prior to the ticket issuance. There is no minimum or maximum stay requirement provided all travel is completed by Dec. 17, 1990.

In addition to the Freedom Flyer fares, Air Canada will continue to offer discounted fares for seniors 60 years of age or over, on a year- round basis.

Additional information and bookings are available through travel agents or by calling Air Canada.

SAUSALITO, CA. (SEPT. 5) PR NEWSWIRE - Phoenix Network Inc. (NASDAQ:

PHXN) today announced that Marc L. Goyette, the company's current chief operating officer and executive vice president, has been promoted to president of the company. Goyette, 35, will assume the title from Thomas H. Bell, the company's founder, who will continue to serve as chief executive officer and chairman of the board.

Goyette joined the firm in October 1988 as executive vice president and chief financial officer. He later assumed the additional title of chief operating officer. Before he joined the company he was a senior account executive with Merrill Lynch, and before that was responsible for information resource management at the electronics division of General Dynamics.

Commenting on the decision of the board, Bell said, "This expansion of responsibilities for Mr. Goyette is the board's recognition of his importance in pursuing our objective of becoming a $100 million telecommunications company. His background in MIS, finance, and marketing have been a significant factor in the growth and development of the firm since 1988." Goyette added, "This company is poised for significant growth in fiscal 1991. In the last four months the company has submitted new orders representing over $2 million of monthly long distance usage to its carriers for conversion."

Phoenix Network is a long distance telecommunications network manager and trades on NASDAQ under the symbol PHXN.

DALLAS (SEPT. 5) PR NEWSWIRE - Peerless Mfg. Co. (NASDAQ-NMS: PMFG) a Dallas manufacturer of separators and filters for the petroleum and chemical processing industries and environmental equipment today announced earnings of $1.93 per share for its fiscal year ended June 30, 1990, compared to earnings of $0.07 per share in the previous year.

These earnings are based on the increased number of shares existing July 20, 1990, when a three for two stock split was effected. Using the shares actually outstanding at June 30, 1990. Earnings per share were $2.90 and $0.10 for fiscal 1990 and fiscal 1989, respectively.

Both sales and earnings figures were record numbers for the company. During fiscal 1990, the company benefited from the utilization of a net operating loss carryforward, which resulted in an extraordinary credit of $0.41 per share.

Peerless' backlog of orders at July 1, 1990 was about $12,700,000 compared

to a backlog of some $10,822,000 on July 1, 1989.

NEW YORK, (SEPT. 5) PR NEWSWIRE - Merrill Lynch & Co., Inc. today said that Dennis J. Hess, senior vice president, diversified financial services in the consumer markets sector, has announced that he will leave the corporation to pursue other career opportunities.

Hess has been responsible for management of the company's insurance, mortgage, lending, credit, domestic banking, trust service and real estate syndication businesses, most of which he was instrumental in developing and growing as new business for Merrill Lynch. He also participated in the creation of Merrill Lynch's landmark Cash Management Account(R) (CMA), and was the creator of the Equity Access(R) account.

Commenting on his decision, Hess said, "My more than 20 years at Merrill Lynch have been highly rewarding, and I've enjoyed the chance to contribute to the growth of a great company. However, I have decided that now is the appropriate time in my career to seek new challenges through the pursuit of other business opportunities."

Daniel P. Tully, president and chief operating officer, and John L. Steffens, president of consumer markets, said, "Dennis has made valuable contributions to many initiatives which have expanded the range of financial services we provide to our clients. We have benefited from his creativity and management skills, and while we're sorry to see him go, we understand his desire at this time to move on to new endeavors, We wish him well."

Hess joined Merrill Lynch's investment banking division in 1969, and was named vice president of diversification and development of Merrill Lynch & Co., Inc. in 1976. Prior to his current position, he was president and

chief operating officer of Merrill Lynch Realty, which was sold last year to Prudential Insurance Company.

CHICAGO (SEPT. 5) PR NEWSWIRE - The board of directors of Telephone and Data Systems, Inc. (AMEX: TDS) has declared a third quarter dividend of $.07 per share on outstanding common and Series A common shares. This dividend is an increase of 7.7 percent over the third quarter 1989 dividend. The dividend is payable Sept. 28, 1990, to shareholders of record on Sept. 14, 1990.

LeRoy T. Carlson, TDS chairman, stated, "Your company's continued success is reflected in this quarter's dividend. The excellent progress of our telephone, cellular, and paging operations during 1990 demonstrates the continuing accomplishment of our three primary business units."

TDS's wholly owned telephone subsidiary, TDS Telecommunications Corp. ("TDS Telecom"), is increasing its customer base through acquisitions as well as internal growth. Thus far in 1990, TDS has completed the acquisition of four telephone companies comprising 5,200 access lines. As of June 30, 1990, TDS Telecom operated 77 telephone companies serving approximately 273,000 access lines in 27 states. An additional 11,000 access lines from previously announced acquisitions will increase TDS Telecom's total access lines served to 284,000.

United States Cellular Corp. (AMEX: USM), TDS's 81.4 percent-owned cellular subsidiary, is rapidly expanding its customer base and the markets it serves. TDS and USM own or have the right to own approximately 11.6 million population equivalents in 76 Metropolitan Statistical Area and 66 Rural Service Area markets. Cellular systems managed by USM served over 54,500 cellular telephones at June 30, 1990, a 76 percent increase over the June 30, 1989 level.

American Paging, Inc. ("API"), TDS's wholly owned subsidiary, is the fourth largest non-Bell affiliated paging company in the United States. API operates 30 paging systems in 17 states and the District of Columbia. As of June 30, 1990, these systems served more than 180,000 pagers, up 23 percent over June 30, 1989.

TDS is a diversified Chicago-based communications service company with established local telephone operations and developing cellular telephone and radio paging operations. TDS builds value for its shareowners by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

NOTE: 10 selling days (S/D) in the Aug. 21-31 period this year and last; 27 selling days for the August period this year and last year.

(a) -- Year-to-year percent change is not adjusted for selling days.
Comment by J.B. Fitzpatrick, vice president for the Communications and Marketing Staff:

Despite lower vehicle sales for August, General Motors increased its share of the U.S. vehicle market compared to last year -- a trend which has occurred throughout the 1990 calendar year. Also, through the first eight months of the year, GM remains the only domestic manufacturer to outperform the industry and to increase its U.S. market share for cars, trucks and total vehicles.

In the 1991 model year, GM will be introducing as many new passenger car models as Ford, Toyota, Honda and Chrysler combined and we expect to continue to increase market share due to our aggressive product programs. While present business conditions have created some uncertainty in the marketplace, we are optimistic that the environment will continue to stabilize in the weeks ahead.

Furthermore, as we approach the new model year, we believe that GM will benefit from ongoing divisional gains in product quality, vehicle designs, and customer satisfaction -- three important reasons why GM has strengthened its competitive position.

#90248p1439 09/05/1990 ~PR Newswire

PHILADELPHIA, (SEPT. 5) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) today announced it will phase out its sale of appliances and close its 13 Electric Company stores throughout southeast Pennsylvania.

The retail appliance stores, six in the city of Philadelphia and seven in

the suburbs, will be closed beginning in September through late-October.

PE said that bill payment offices will be unaffected, including those locations where appliance stores will be closed.

PE said the stores represent just 2 percent of appliance sales in the Philadelphia region and their continued operation is not compatible with emerging strategies for the future of the company.

Joseph F. Paquette Jr., PE chairman and chief executive officer, said "the appliance stores do not fit in with our emerging strategic plan for the future, which is to concentrate on our core business of supplying reliable electric and gas to our customers."

Paquette said there should be no layoff of any of the 57 regular employees at The Electric Company stores. Some are eligible for the company's early retirement program, and the company will attempt to find new positions for those who elect to remain.

The stores also employ approximately 40 persons on an as-needed basis. Some of those workers may be reassigned in other positions with PE or the company will assist them in attaining new jobs elsewhere.

The store closings are not expected to have any financial effect on the company's earnings, Paquette said.

The Electric Company locations are:

In Philadelphia: 2301 Market St., Center City; 2009 S. Broad St., South Philadelphia; 1819 E. Allegheny Ave., Kensington; 55 W. Chelten Ave., Germantown; 535 Adams Ave., Rising Run; and 3501 N. Broad St., North Philadelphia.

In the suburbs: 828 Lancaster Ave., Bryn Mawr; Willow Grove Shopping Center; Plymouth Meeting Mall; 3211 Lincoln Hwy., Thorndale; Fourth & Merion streets, Bridgeport; 76 S. 69th St., Upper Darby; and 18 E. Fifth St., Chester.

PE said the suburban stores will be phased out first.

SOMERS, N.Y. (SEPT. 5) PR NEWSWIRE - Pepsi-Cola Company today announced it has signed a worldwide sponsorship and advertising agreement with one of the hottest pop entertainers on today's music scene: MC Hammer, whose 5

million plus-selling LP "Please Hammer Don't Hurt 'Em" has topped pop charts for 13 consecutive weeks -- making it the best-selling album of the year.

To announce the association between the current King of Pop and Pepsi-Cola a special montage commercial, featuring MC Hammer's high-stepping, fleet-footed dancing, will be broadcast during MTV's Music Video Awards on September 6 (9 p.m. EDT).

In addition, MC Hammer, a.k.a. Stanley Kirk Burrell, will appear in future Pepsi-Cola television and radio advertisements, to air nationally and in local markets. Pepsi expects to begin filming its first MC Hammer spot later this fall.

Beginning this fall, Pepsi-Cola will be official sponsor of the MC Hammer Tour, which travels throughout the U.S., Europe, Asia and Australia. The concert tour, which kicks off on September 18 in Omaha, Neb. will be promoted through on-air announcements on worldwide MTV network.

"Pepsi-Cola Company has an established tradition of signing multi-talented performers who are a step ahead of the times," said John Moorhead, vice president, marketing services. "We're pleased that MC Hammer will continue that legacy with us."

Hammer also appears as a role model-spokesperson in Pepsi-Cola's 1990-91 national School Assembly Program, a multi-media presentation annually reaching an estimated three million youths with an anti-drug/ stay-in-school message. "In addition to being an exciting performer, MC Hammer speaks a message worth promoting: that our society needs to focus its energies on nurturing and educating our children," Moorhead said.

The 27-year-old performer has taken the music world by storm. His recent single, "U Can't Touch This," entered the charts higher than any single since "We Are The World." Hammer's flamboyant live act -- relying on a 30-member troupe that includes a live band, 10 backup singers and 15 dancers -- has been hailed by critics as one of the most exciting and energetic stage shows of recent years.

FORT LAUNDERDALE, FL (SEPT. 5) PR NEWSWIRE - Gus Boulis, chairman of the board of QSR, Inc. (NASDAQ: QSRI), the United States franchisor of Miami Subs restaurants, announced today the appointment of C. Ronald Petty to the position of president and chief executive officer. In this capacity, Boulis and Petty will be overseeing the rapid expansion of the Miami Subs

concept.

Prior to joining the company, Petty was president and chief operating officer, of Burger King Corporation. In this position, he had responsibility for the operation of over 5,000 restaurants nationally. During his 12 years at Burger King, Petty also served in the capacities of president of international, vice-president of European operations, senior vice-president of development and vice-president of real estate. Before coming to Burger King, Petty was with McDonalds Corporation and Mobil Oil Corporation.

Petty was quoted, "I am excited about the growth prospects of the Miami Subs restaurant concept. It is positioned for the 90's with variety of menu including hot and cold subs, gyros, broiled chicken, hamburgers, salads, desserts and beer. It is a fun concept with great visible appeal from the street."

Miami Subs was founded by Boulis. Currently there are 46 restaurant units in operation in Florida.

Last week, the company announced the acquisition of the exclusive rights to develop, operate and franchise the Miami Subs restaurant concept throughout the United States.

PHILADELPHIA, (SEPT. 5) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) announced today that it is investing almost $3.3 million to upgrade sections of its St. Louis Line, which links Indianapolis and St. Louis.

The work, which began in July and is scheduled to be completed this fall, is part of Conrail's capital program for 1990. It includes the installation of 26,300 crossties and the surfacing (raising and smoothing) of 87 miles of supporting railbed.

The 237-mile St. Louis Line is Conrail's route for freight shipments to and from the St. Louis area, and for shipments interchanged with other railroads at St. Louis. Traffic handled by Conrail trains on the St. Louis Line includes: appliances, auto parts, new automobiles, processed foods, chemicals and petrochemicals, fresh fruits and vegetables, furniture, grain and grain products, iron and steel products and other manufactured goods. In addition, the line is used by Conrail's high-speed high-priority intermodal trains, which carry a wide variety of consumer products.

"Conrail's capital program enables us to provide safe, reliable and customer responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this help us maintain the sound track structure essential to Conrail's ability to compete in the transportation marketplace."

NEW YORK CITY (SEPT. 5) PR NEWSWIRE - Gary A. Singer, co-chairman of The Cooper Companies, Inc. (NYSE: COO) today announced that effective Sept. 17 1990, the company will release Arthur C. Bass, Cooper's president and chief executive officer, from a multi-year employment contract so he can return to the airline industry as chairman and chief executive officer at Emery Worldwide, the $1.3 billion air cargo division of Consolidated Freightways, Inc. (NYSE: CNF).

Bass, however, will continue as a director and as a consultant on acquisitions and operations to both The Cooper Companies and its optometric and ophthalmic business, CooperVision.

Singer also announced that Richard W. Turner, president of CooperVision, will be named interim president and chief operating officer of the parent corporation.

In a memorandum to employees issued jointly by Cooper's co-chairmen, Gary A. Singer and Bruce D. Sturman said,

"Art Bass has made substantial contributions to the turnaround at Cooper in helping us guide the restructuring and growth that we have experienced over the past two years. We will miss his expertise on a day-to-day basis, and we wish him well in this unsolicited and exceptional career opportunity.

Dick Turner, who has been instrumental in managing our divestitures and rebuilding our core ophthalmic and optometric business, will assume the additional responsibilities of serving as interim president and chief operating officer while we continue to pursue acquisitions in both the healthcare and other fields."

During the last five fiscal quarters, from May 1, 1989 to July 31, 1990, Bass' efforts have helped Cooper reduce its total debt from $466 million to under $75 million, increase its cash and short-term investments from under $128 million to over $175 million, and restore its operating division to profitability.

Last week, Cooper announced that for the nine months ended July 31, 1990 and including the last fiscal quarter of 1989, the company recorded four successive profitable quarters. In the current fiscal year, those nine month results include net income applicable to common stock of $2.3 million or $.09 per share on sales of $34.9 million.

BOSTON (SEPT. 5) PR NEWSWIRE - As part of its previously announced recapitalization plans, Bank of New England Corporation (NYSE: NEB) said today it has asked its bondholders to form a committee and select financial and legal advisors so that negotiations can begin regarding restructuring the company's $706 million in debt.

As has been publicly disclosed a number of times, BNEC management is working on proposals to improve the company's current capital position. BNEC said it expected that the final structure of the recapitalization plan would be worked out in cooperation with the bondholder committee. Goldman Sachs and Lazard Freres & Co. have been retained by the company as its advisors in connection with this potential transaction with bondholders.

"Contacting our bondholders is a procedural first step toward successful capital restructuring -- the final element of our strategic recovery plan " said BNEC Chairman and Chief Executive Officer Lawrence K. Fish. "We

have made significant progress in other areas of our recovery effort over the past six months, but it is critical to our long-term goals that we move to improve the capital position of the company."

Of the major elements of the strategic recovery plan, Fish said:

-- Liquidity had improved significantly in the wake of a successful deposit campaign; the company began lending overnight Fed funds on June 14;

-- Capital has been enhanced through a successful downsizing campaign which will virtually be completed with the conclusion of the sale of BNE-Old Colony in Rhode Island announced Tuesday;

-- The company's organizational structure has been simplified and management strengthened;

-- The company is ahead of schedule on its work force reduction program announced in April and has cut operating costs by over $15 million a month;

-- A senior credit policy officer has been named and steps have been taken to identify and handle the risks in the company's loan portfolio and to upgrade policies and procedures.

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $23 billion and banking offices in Connecticut, Maine, and Massachusetts. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

TORRANCE, CA (SEPT. 5) PR NEWSWIRE - Lexus finished its first sales year with a record month as August sales of the LS 400 and ES 250 reached a best-ever high, according to sales figures released today by the luxury division of Toyota Motor Sales U.S.A. Inc.

Lexus' August sales total of 6,111 was up 9.2 percent from July, the best previous month. Both models also set records, the LS 400 up 6.9 percent from July to 3,856 and the ES 250 up 13.3 percent to 2,255. Lexus sold 56,448 cars during its first year.

"It's been an excellent year," said Dave Illingworth, Lexus vice president and general manager. "Since launch, Lexus has earned both media and consumer recognition, including the J.D. Power and Associates award as the most trouble-free nameplate in America. To finish with a record performance in such a competitive market, is an example of the strong acceptance Lexus has earned."

For the past 12-month period the LS 400 outsold its prime competition, including the Mercedes Benz 300-series and S-class, BMW 5- and 7-series (combined), Jaguar and Audi. The ES 250 topped its key competitors, including the Mercedes Benz 190-series and BMW 3- series four-door lineup.

FOUNTAIN VALLEY, CA (SEPT. 5) PR NEWSWIRE - Hyundai Motor America today announced that it sold 12,879 automobiles in the month of August, 1990.

Following is the sales breakdown:

Car Line	August 90	August 89	CY 90	CY 89
Sonata	3,308	4,074	21,794	23,714
Excel	9,571	16,478	71,627	108,726

Total	12,879	20,552	93,421	132,440

Hyundai Motor America has sold over 973,356 vehicles since entering the U.S. market in 1986. Besides introducing the new midsize Sonata V-6 and an all new redesigned version in 1990 of the award winning Excel, the company plans to introduce the Scoupe, a sporty car, aimed at young buyers seeking stylish, economical transportation, in September.

BIRMINGHAM, AL. (SEPT. 5) PR NEWSWIRE - Three senior managers at Southern Progress Corp. were recently promoted, announced Don Logan, president and chief executive officer.

"Our company has grown considerably over the past few years, and because of that growth we have needed to reorganize our senior management so that they can fulfill their many responsibilities more effectively," Logan said.

Jim Nelson, executive vice president, has been promoted to senior executive vice president; Jim De Vira, vice president and group publisher, has been promoted to executive vice president and group publisher; and Tom Angelillo, vice president and general manager of Oxmoor House, the company's book division, has been promoted to executive vice president and chief executive officer of Oxmoor House.

Nelson, 51, joined the company's accounting department in 1965. He was named assistant treasurer in 1971 and became treasurer in 1974. He was promoted to vice president and treasurer in 1978 and was named executive vice president in 1987. A native of Arkansas, Nelson has a bachelor's degree in accounting and a master's degree in business from the University of Alabama at Birmingham.

De Vira, 56, has been with Southern Progress since 1964 and has been involved in advertising efforts for several company publications. After serving as an advertising representative for Progressive Farmer, he was named New York advertising manager for both Progressive Farmer and Southern Living in 1967. Subsequent promotions made him Eastern advertising manager for Southern Living in 1969, vice president in 1971, Southern Living advertising director in 1975, Southern Living publisher in 1983, and publisher of Southern Accents and Travel South in 1988. When Southern Progress assigned individual publishers to each of its Southern magazines in 1989, De Vira was named group publisher, and he oversees the overall advertising strategy for these publications. A New Jersey native, he is a graduate of Colby College in Maine.

Angelillo, 38, joined Southern Progress in 1976 as book fulfillment manager in the company's computer and fulfillment center, Media Services. In 1979, he transferred to Oxmoor House as direct mail manager, and he was promoted to manager of the book division in 1980. Three years later, he became vice president and general manager of Oxmoor House. Angelillo has a bachelor's degree from Washington and Lee University in Virginia. He is a native of New Jersey.

Based in Birmingham, Ala., Southern Progress is a subsidiary of Time Publishing Ventures Inc. It is the nation's largest regional publisher of magazines and books.

#90248p1460 09/05/1990 ~PR Newswire

HICKSVILLE, NY (SEPT. 5) PR NEWSWIRE - With its consolidation and restructuring period behind it. Metro Tel Corp. (NASDAQ: MTRO) saw marginal profits from operations in the year ended June 30, 1990. However, management, looking for a clean sweep of deterrents to anticipated continuing near and long term profits, chose to write off a large portion of unprofitable and discontinued product line inventories at the fiscal 1990 year end.

For fiscal 1990, the manufacturer of telephone system test equipment and peripheral telephone equipment today reported sales of $4,919,630 and a loss of $143,727 or $.08 per share. This compared with sales last year of $5,441,686 and net earnings of $97,483 or $.04 per share. Reflected in the earnings and loss per common share for each of those years are dividends of $25,200 on the redeemable preferred stock.

Venerando J. Indelicato, Metro Tel president, said the company was disappointed with revenues for fiscal 1990 but pleased with its positive

direction in recent months. He explained that the writeoff rid the company of a large portion of unprofitable products acquired with the acquisition several years ago of Buscom Systems. Further, in the writeoff the company also shed inventories of discontinued and obsoleted Metro Tel products.

Indelicato said that the revenue decline in fiscal 1990 was due primarily to inclusion of large overseas order shipments in the fiscal 1989 second quarter. The contract, completed in 1989, inflated that year's revenue status. Second, revenues early in fiscal 1990 were negatively impacted by the long, but now settled, telephone workers' strike.

"By and large, revenues from our day-to-day business held up. Sales gains in our transmission test equipment line offset the decline in revenues from certain of our other products. We look for continued improvement and growth in this current year and beyond," Indelicato said.

#90248p1463 09/05/1990 ~PR Newswire

CALGARY, ALBERTA (SEPT. 5) PR NEWSWIRE - General Leisure Corporation (''GLC'') today announced that its unaudited financial results for the fiscal year ended June 30, 1990, will reflect after- tax earnings of approximately $401,000 or $0.07 per share. GLC's revenues, including its share of revenues of non-consolidated corporations, reached $16.8 million. Both revenues and earnings for the year ended June 30, 1990, represent record highs for GLC.

GLC continues to grow at a rapid rate with current sales of over $2,500,000 per month. Based on these sales, GLC expects revenues in excess of $30,000,000 and pre-tax profits of $2,000,000 for the 1991 fiscal year.

These assumptions do not include revenues and earnings expected from GLC's high technology subsidiary corporation, Bertonee Inc.

Lawrence G. Ryckman, chairman of the board, stated that: ''We are very pleased with the growth and performance of GLC's subsidiary corporations, which have surpassed our previous expectations. Our electronics subsidiary corporation, Bertonee, with its proprietary neon and fluorescent consumer and commercial lighting products is expected to be the major contributor to GLC's revenues and profits in the future. Product sales from current orders are scheduled to begin in the last quarter of 1990.''

GLC also wishes to announce that its board of directors has resolved to make application for additional stock exchange listings in Canada and the United States.

GLC is a diversified Alberta based public corporation listed on The Alberta Stock Exchange (GLM.A) with interests in the electronics, electrical contracting, food, hardware and medical supplies industries.

FARMINGTON HILLS, MI (SEPT. 5) PR NEWSWIRE - First State Bank and Trust in Port Lavaca, Texas, announced that it has assumed the deposits and acquired certain assets of Bay City Bank in Bay City, Texas, as of Aug. 30 1990, in an FDIC-assisted transaction.

First State Bank and Trust is an affiliate of Michigan National Bank, Michigan National Corporation's principal subsidiary. The announcement was made by John Faubion Jr., president, First State Bank and Trust.

Bay City Bank, with approximately $75 million in deposits, will become a branch of First State Bank and Trust. Specific terms of the transaction were not disclosed. The acquisition was approved by the Federal Deposit Insurance Corp.

Commenting on the transaction, Faubion said, "We are extremely pleased to establish a presence in Bay City. The Bay City area is a strong economic market, well diversified and offers First State Bank and Trust an ideal opportunity to expand its business. First State Bank and Trust's strong capital position can easily support the addition of the Bay City office. This transaction should be helpful to First State Bank and Trust in increasing earnings, and we are encouraged with the opportunity to enter into a deposit base from a long-established bank in Matagorda County -- individual, business and public funds. We expect to be very active lenders in this market, and we are eager to bring our commitment to

providing quality service to Bay City and Matagorda County residents.

Michigan National Corp. (OTC: MNCO) is a diversified financial services corporation with total assets of $11.6 billion. It is a bank holding company and a savings and loan holding company.

Michigan National Corporation's principal subsidiary, Michigan National Bank, has 200 branches throughout Michigan and operates the state's largest automated teller machine network. Among its other affiliates are: Beverly Hills Federal Savings Bank which operates six branch offices in Southern California; First State Bank and Trust in Port Lavaca; Independence One Mortgage Corporation, which originates residential mortgages through 28 offices in 12 states; Independence One Investment Services Corporation which provides investment services through its two subsidiaries; Morrison Asset Management, Inc., Pattern Recognition Investment Management (PRIMA) Corporation; Independence One Brokerage Services, Inc., which offers brokerage services for stocks, bonds, mutual funds, unit investment trusts, government securities and other investments; and Independence One Financial Services, Inc., a commercial lender serving small businesses in the Northeast. Michigan National Corporation has its headquarters in Farmington Hills.

#90248p1475 09/05/1990 ~PR Newswire

KINGWOOD, TX (SEPT. 5) PR NEWSWIRE - Yesterday the board of directors of Enex Resources Corp. (NASDAQ: ENEX) declared a dividend distribution of one common stock purchase right (a "right") for each outstanding share of the company's common stock. Each right will entitle shareholders to buy one share of common stock at an exercise price of $12. The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common stock.

The rights are designed to assure that all of Enex Resources' shareholders receive fair and equal treatment in the event of any proposed takeover of the company, to guard against partial tender offers, open market accumulations and other abusive tactics to gain control of the company without paying all shareholders a premium value and to enable all of the company's shareholders to realize the long-term value of their investment.

Gerald B. Eckley, president and chief executive officer of Enex Resources Corp. stated, "The rights will not prevent a takeover, but should

encourage anyone seeking to acquire the company to negotiate with the board prior to attempting a takeover." Eckley added that while the board is not aware of any takeover threat or effort to acquire control of the company, it believes that in the current environment the rights represent a sound and reasonable means of safeguarding its shareholders' interests.

If the company is acquired in a merger or other business combination transaction, each right will entitle its holder to purchase, at the right's then current exercise price, a number of the acquiring company's common shares having a market value at the time of twice the right's exercise price.

In addition, if a person or group acquires 20 percent or more of the company's outstanding common stock, each right will entitle its holder (other than such person or members of such group) to purchase, at the right's then current exercise price, a number of shares of the company's common stock having a market value of twice the right's exercise price. Further, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of the company's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for shares of the company's stock on a one- for-one basis.

The rights will be issued on Sept. 18, 1990 to shareholders of record on that date and will expire on Sept. 4, 2000. The rights distribution is not taxable to shareholders.

Enex Resources Corp. is in the business of marketing and managing oil and gas investments, and is an independent general partner managing 30 limited partnerships with interests in more than 10,000 oil and gas wells.

#90248p1481 09/05/1990 ~PR Newswire

PALO ALTO, CA (SEPT. 5) PR NEWSWIRE - At a press conference today, Ashton-Tate (NASDAQ: TATE) announced PowerStep, the company's new spreadsheet software for NeXT machines. Designed specifically for the NeXT platform using NeXT's Interface Builder, PowerStep includes such features as 3-D graphics, voice annotations, spreadsheet publishing capabilities and an intuitive, easy-to-use graphical user interface.

PowerStep is in beta test now; availability and pricing were not announced.

At the press conference, Bill Lyons, Ashton-Tate's president and chief operating officer, said, "The combination of NeXT and PowerStep will offer customers the power and ease-of-use that maximizes their productivity.

PowerStep takes full advantage of the graphical and audio output capabilities offered by NeXT machines, so our customers can benefit from these leading edge capabilities."

Added Steve Jobs, president and chief operating officer of NeXT Computer Inc., "PowerStep answers the need of a good number of our current and potential customers for a well-executed spreadsheet for their NeXT computers. PowerStep on the NeXT platform is a 'best of breed' product, with the versatility users need from a spreadsheet and the accessibility that comes from fully using NeXTStep and NeXT's Interface Builder."

PowerStep Features and Benefits. Spreadsheet Features.

-- Virtually unlimited worksheet size.
A 16,384 X 16,384 cell matrix can include financial, math, string and user-defined functions. As a result, users are not limited to what has traditionally been a smaller cell matrix.

-- Consolidation of multiple spreadsheets.
A virtually unlimited number of spreadsheets can be combined with a point and click of the mouse. This simplifies what could otherwise be a timely and cumbersome task.

-- Spreadsheet linking.
Users can call up multiple resizable windows of text, graphics and numbers and set up live links among them. This is accomplished via a simple point and click of the mouse, again saving time and maximizing productivity.

-- Lotus 1-2-3 file import and export.
Easy data import and export from this popular DOS spreadsheet eliminates data re-entry and expands PowerStep's usefulness. This is particularly useful for computers that have both DOS and NeXT computers. Graphics Features.

-- 3-D charts with live rotation.
Users can directly control the rotation, elevation and perspective of 3D bar surface charts using the mouse. This way, users can quickly and easily create 3-D charts that appear exactly the way they want.

-- 13 chart types.
These include pie, bar, high-low-close, area, line, scatter and 3D surface charts. All chart types are automatically updated as spreadsheet data changes, eliminating data re-entry. Usability features. -- Ease of use. PowerStep uses NeXT's Interface Builder for an icon-based, intuitive interface. In addition, commonly-used commands are conveniently located on the icon bar at the side of the worksheet. The result is a short learning curve, and maximum productivity for both novice and advanced users.

-- Voice annotation. Using NeXT's built-in-CD quality sound, comments can be recorded directly on any spreadsheet.

-- Spreadsheet publishing features. With PowerStep, users can combine numbers, text, charts, graphics and voice annotations on the same page. In addition, they can set page breaks, insert titles and add introductory text. This saves using a separate desktop publishing package, and provides professional, presentation-quality output.

-- WILMA programming language. Users can take advantage of 161 macro commands and 11 macro statement types; these macros can be called from within spreadsheet formulas. This macro language gives developers the tools they need to extend PowerStep's functionality.

Product specifics. PowerStep will run on any NeXT computer; a hard drive is recommended. Once the software begins shipping, it will be available through the Ashton-Tate authorized reseller network. Unlimited, free support, along with local access to the Ashton-Tate Bulletin Board System, will be included with the product.

Pricing and ship date are not available at this time. Headquartered in Torrance, Calif., Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. HOUSTON, (SEPT. 5) PR NEWSWIRE - Kern River Gas Transmission Co. today announced it has awarded purchase orders for compressor units and valves to be used in its natural gas pipelinefrom Wyoming to California.

"These orders will give us the rest of the major equipment we need to begin construction and put the pipeline into operation," noted E.J. Holm, Kern River president. "We ordered pipe several months ago."

Solar Turbines Inc. of San Diego, Calif., a division of Caterpillar Inc., has agreed to supply Kern River four 12,600-horsepower turbine compressor units, which will be delivered next summer.

Two of the compressors will be installed at facilities to be built in Muddy Creek, Wyo., one at Fillmore, Utah, and one at Goodsprings, Nev.

In addition, Kern River has placed an order for 66 (36-inch) Cameron weld-in ball valves with Cooper Oil Tool, a division of Cooper Industries of Houston. Delivery of the valves will begin later this year, to coincide with delivery of pipe and the start of construction, Holm said.

Dollar value of the two orders has not been disclosed. The Kern River pipeline is slated to begin operation in late 1991, with an initial capacity of 700 million cubic feet per day of natural gas.

The Rocky Mountain and Canadian gas brought to California through the Kern River line will be used for enhanced oil recovery, distribution by utilities, production of electricity, cogeneration of electricity and steam, and other industrial applications.

Kern River is a joint venture of units of Tenneco Inc. and The Williams Companies.

Tenneco Inc. (NYSE: TGT) is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals, and minerals.

The Williams Companies Inc. (NYSE: WMB) of Tulsa,Okla., operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines, which separately transport natural gas and petroleum products.

ST. LOUIS (SEPT. 5) PR NEWSWIRE - Pt. Industri Pesawat Terband Nusantra (IPTN) of Indonesia and McDonnell Douglas (NYSE: MD) have been jointly investigating the integration of the Harpoon anti-ship missile on the CN 235 patrol aircraft, it was announced today at the Farnborough Air Show in England.

McDonnell Douglas Missile Systems Co. has produced more than 5,200 Harpoon missiles for the U.S. Navy and 20 international customers. IPTN produces the CN 235, a twin-engine turboprop maritime patrol aircraft.

"This venture is the first step in opening new market opportunities for the Harpoon weapon system," said Thomas M. Culligan, vice president-strategic business and technology development for McDonnell Douglas Missile Systems. "A key to the success of the Harpoon program has been its adaptability to many launch platforms. We look forward to working with IPTN to add yet another Harpoon launch platform that will provide new customers with Harpoon anti-ship capability."

IPTN and McDonnell Douglas Missile Systems began preliminary joint studies and marketing activities earlier this year. These activities have included modifying a CN 235 to carry and successfully fly a Harpoon test shape. These tests have demonstrated CN 235/Harpoon missile compatibility.

The Harpoon weapon system is currently certified on 10 types of aircraft, as well as a wide range of surface ships, submarines and mobile land-based launchers.

Harpoon is an all-weather, over-the-horizon missile with a range in excess of 67 nautical miles. When launched from aircraft, the Harpoon's turbojet engine starts automatically and the missile descends to a

low-level cruise altitude.

McDonnell Douglas Missile Systems produces the Harpoon at its manufacturing facility in St. Charles, Mo. McDonnell Douglas has been developing missiles for more than four decades for the U.S. Department of Defense and international customers and has built more than 100,000 guided missiles.

HOUSTON (SEPT. 5) PR NEWSWIRE - Republic Waste Industries Inc., announced today that is has completed its acquisition of MALS Properties, a California general partnership that owns and operates a landfill in Imperial, Calif. The landfill is located on a 160-acre site of which 120 acres are permitted for landfill. The partnership also owns El Centro Sanitation Service Co., which operates four residential and commercial collection companies in the Imperial Valley area.

In announcing the acquisition, James D. Lee, Republic Waste's president, said, "As we said when we intiated this acquistion, California is very important to our company's long-term growth strategy. We believe the collection and disposal capabilities we have added with the purchase of MALS and El Centro will complement our other activities in the region."

Republic Waste Industries Inc., is a Houston-based solid waste management company that specializes in providing long-term integrated solutions to municipal and industrial nonhazardous waste problems. The company's common stock is traded over-the-counter under the NASDAQ symbol RWIN.

CALGARY, ALBERTA, (SEPT. 5) PR NEWSWIRE - On behalf of the board of directors, the Louisiana Mining Corp. (Alberta: C.LMG) announces that it has acquired an exclusive option to purchase the Tyrone Extension copper project by the payment of $100,000 (US) to the project owner. This project was discussed at length in a previous news release by the company.

The company will execute the option to purchase the Tyrone Extension project during September 1990. The terms of the purchase of this project are (all in US dollars): $3,000,000 by Jan. 1, 1991; $1,500,000 during 1991; and, $1,500,000 during 1992. The company is conducting negotiations

with U.S. and Canadian brokerage houses and other major sources of mining project financing. It is expected that the funding package will be in place by the end of September 1990. This funding package will include the resources to both complete the purchase of the project as well as construct the production facility and initiate operations.

In addition, Louisiana Mining is working with another mining company to prepare for, construct and operate the production facility. This other company, also publicly traded, owns several copper projects, one of which is in production, with a second beginning production this month. The management personnel of this company are among the most respected in the copper mining industry. It is anticipated that they will build a copper production facility for Louisiana Mining at a very favorable and guaranteed price. Also, they will manage the Tyrone Extension production plant and will provide training for Louisiana Mining operating personnel.

During the recent period after the initial announcement of the change of control of the company from L. Cade Havard to Frank C. Mashburn. Company management have been working to accomplish the Alberta Stock Exchange and Alberta Securities Commission requirements to effect this change of control. These activities and the necessity to change accounting firms to ensure better service caused the company to cease trading for a brief period. All change of control activities are progresssing in a satisfactory manner and will be completed in conjunction with an extraordinary general meeting within the next 90 days.

Certain of the proposed transactions described herein are subject to regulatory approval by the Alberta Stock Exchange and will require shareholder approval.

''The Alberta Stock Exchange has neither approved nor disapproved the information contained herein.''

MINNEAPOLIS (SEPT. 5) PR NEWSWIRE - The First Bank System (FBS) Foundation today announced grants totalling $233,630 in the areas of housing, education and families in need. To date, the Foundation has made grants totalling $1,456,500 for 1990.

"Grants that contribute to affordable, quality housing for people with low- and moderate-incomes have been a high priority for First Bank for the last three years," said Charles F. Riesenberg, vice president of the FBS Community Development Corporation. "Our bankers work with customers to

buy homes and finance home improvements all the time. It's equally important to pay attention to the needs of those who have never dreamed or only dreamed of a real home."

"In addition to the difficulty in finding safe, affordable housing, these families must cope with the challenge of raising their children," said Barbara Roy, executive director of the FBS Foundation. "The adult- child relationship at home, at day care and at school is important in child development. The Families in Need grants are aimed at helping parents provide a secure, healthy environment for their children."

The First Bank System Foundation complements the ongoing financial services provided by the First Banks. Foundation funds are granted to a variety of nonprofit organizations serving Minnesota, Colorado, North Dakota, South Dakota, Wisconsin, Montana and Washington state. The Foundation maintains its commitment to arts and cultural organizations, education, community development and other human services.

NEWTOWN SQUARE, PA. (SEPT. 5) PR NEWSWIRE - ARCO Chemical Co. (NYSE: RCM) announced today that the Federal Trade Commission (FTC) and ARCO Chemical Co. have entered into a provisional consent agreement regarding the proposed acquisition of the propylene glycol and urethane polyether polyols businesses of Union Carbide Chemicals and Plastics Co. Inc. (NYSE: UK).

By its terms, the arrangement permits ARCO Chemical to consummate the September 1989 agreement with Union Carbide and acquire its worldwide business in urethane polyether polyols, including operating facilities, technology and customer lists.

H.A. Sorgenti, president and chief executive officer of ARCO Chemical, said: "I am pleased that the commission has agreed to the settlement. This acquisition represents an important opportunity for our company and is consistent with our announced strategy to move further into derivatives and increase our portfolio of value-added products. Union Carbide's polyols business brings with it a solid market position and customer base. We expect the technology, Technical Center and personnel which we are acquiring to add significantly to our future business prospects."

ARCO Chemical and the FTC also entered into a "hold separate" agreement which requires the company to operate the Union Carbide businesses as a separate venture from the company's other businesses pending the settlement order becoming final and completion of the divestiture

obligations.

Also under the agreement, ARCO Chemical and Union Carbide will each pay $1 million as settlement of Hart-Scott-Rodino filing issues. This payment does not, however, represent an admission of wrongdoing by either company.

ARCO Chemical and Union Carbide anticipate closing the transaction within the next seven days.

The terms of the settlement will be published in the Federal Register for public comment for a period of 60 days. The FTC has legal authority to withdraw from the consent agreement at the end of this period.

ARCO Chemical Co. is a leading worldwide manufacturer and marketer of propylene oxide and derivatives and other inter-mediate chemicals used in a broad range of consumer products as diverse as foam cushioning, paints and coatings, packaging, and gasoline octane enhancers and emission reduction additives.

HOUSTON (SEPT. 5) PR NEWSWIRE - Zapata Corp. (NYSE: ZOS) announced today that it has signed a definitive agreement to sell its offshore drilling rig fleet and related assets for $298 million to Arethusa (Offshore) Limited, a newly-formed Bermuda company. Zapata will own 8.75 percent of the new company and will continue to manage the twelve rigs under a management contract.

"The rig sale agreement is a major milestone in Zapata'comprehensive restructuring," Zapata chairman and chief executive officer R.C. Lassiter said. "The cash from the rig sale is the catalyst for the bank agreement which was announced about two weeks ago. The company can now focus its attention on a tender offer for its outstanding subordinated debentures and on obtaining necessary stockholder approval."

Zapata also announced that as the last part of its comprehensive restructuring the company will soon commence a cash tender offer for its publicly held 10-1/4 percent subordinated debentures due 1997 and 10-7/8 percent subordinated debentures due 2001, offering $480, including accrued but unpaid interest, for each $1,000 debenture which is tendered. The consummation of the tender offer is subject to the closing of the rig sale and the bank debt restructuring and the receipt of stockholder approval of the overall restructuring plan. The tender offer is expected to commence as soon as the proxy statement and tender offer documents are ready for

distribution, which is expected to be early in October.

The sales transaction is expected to close on Oct. 31, 1990. Under the terms of the asset sales agreement, Zapata will invest $17.5 million of the $298 million in gross sales proceeds in an 8.75 percent interest in Arethusa (Offshore) Limited. Of the remaining $280.5 million, $7.7 million will be used to pay commissions related to the rig sale and $53.6 million will be used to repay rig-specific debt. In addition, $160 million of the proceeds will be paid to the banks in accordance with the bank debt restructuring agreement and an estimated $14.2 million will be used to pay taxes, fees and expenses related to the restructuring plan and to provide collateral for outstanding letters of credit.

Zapata Corp. (NYSE; ZOS) is a Houston-based international company that operates a fleet of offshore drilling rigs, conducts commercial menhaden fishing operations that produce fish meal and edible oil, and produces oil and natural gas. Zapata is also the largest shareholder in Zapata Gulf Marine Corp., the world's leading operator of marine service vessels.

RICHMOND, VA. (SEPT. 5) PR NEWSWIRE - The 4th Circuit U.S. Court of Appeals today upheld the dismissal of an antitrust suit filed by Sewell Plastics, Inc., of Atlanta against Southeastern Container, Inc., The Coca-Cola Company (NYSE: KO) and the 34 Coca-Cola bottlers that own Southeastern.

"The decision in this case is an important precedent upholding the legality of soft drink bottler cooperatives," said Jonathan Jacobson, attorney for the 34 bottlers. "Small and large bottlers alike need cooperatives to stay competitive in the soft drink business and this case makes it clear that the formation of a bottler cooperative is not a violation of the antitrust laws."

In its ruling, the appeals court upheld U.S. District Judge James B. McMillan's dismissal of the lawsuit by Sewell, a wholly owned subsidiary of Constar International, Inc. (NYSE: CTR), of Chattanooga, Tenn., and sent the case back to him for trial on Southeastern's counter claims against Sewell.

"We feel very strongly about the counterclaims and intend to pursue them vigorously," said Richard W. Roswech, Southeastern's president.

He said the counterclaims allege that Sewell's suit was filed in bad faith and for improper purposes. Southeastern claims Sewell engaged in unfair trade practices in connection with the law suit and asks for treble damages totaling $18 million, plus costs and attorney's fees.

Sewell Plastics filed the suit in August 1986 in U.S. District Court at Charlotte, N.C. It alleged that the 34 bottlers, aided by The Coca-Cola Company, had violated antitrust laws by forming Southeastern, of Asheville N.C., in 1982 to manufacture plastic soft drink bottles for them.

BALTIMORE (SEPT. 5) PR NEWSWIRE - Shippers of canned goods and processed foods between California and Florida can now save up to 90 cents per case when they use CSX Transportation Inc. and Union Pacific Railroad's new coast-to-coast rail service.

The two railroads have teamed up to provide truckload services and delivery with better-than-truck prices through UP's Bi-Modal Service and TDSI (Total Distribution Services Inc.), a companion company of CSXT.

Canned goods will be shipped from locations in California in 50-foot boxcars to strategically located TDSI centers in Florida. At the centers, the railcars -- each holding about three truckloads -- are unloaded into trucks for delivery.

"This service allows UP to provide some flexibility for those who want to enjoy the economies of rail transportation," said Chuck Ritenour, CSXT's director-food products.

Shippers who are not rail-served can take advantage of the economies of rail transportation through UP's Custom Care consolidation center in Stockton, Calif. At the centrally located facility, canned goods are consolidated and loaded from trucks into boxcars.

"Shipping by rail is now a much more attractive option when we can combine it with TDSI, consolidation services and Bi-Modal Service," Ritenour added.

For one base price, CSXT and UP will unload rail cars and load trailers, provide slipsheet-to-pallet conversion, arrange trailer delivery appointments, provide pallet exchange services, allow month-of-receipt storage and furnish trailer drayage to destination or allow customer pickup.

Services can also be customized to include recurring storage, pelletized rail care floor-loaded product, trailer detention beyond two hours, delivery to multiple points and pallet supply.

CSX Transportation Inc. and its 37,500 employees provide rail transporation and distribution services along a 19,200 route-mile rail network in 20 states, the District of Columbia and Ontario, Canada.

HOUSTON (SEPT. 5) PR NEWSWIRE - Sponsors of the proposed Empire State Pipeline today announced that they have reached an agreement with National Fuel Gas Supply Corporation that will result in the construction of facilities to interconnect Empire and National Fuel. In addition, National Fuel has agreed to transport certain natural gas volumes on Empire.

National Fuel will amend its pending applications to eliminate pipeline facilities which would duplicate Empire in the Buffalo, N.Y. area and to take transportation service from the Empire line. National Fuel and Empire have also agreed to mutually support their applications pending before various regulatory agencies in both the U.S. and Canada.

Designed to move an average daily volume of 150 million cubic feet of natural gas, the Empire State Pipeline is an intrastate pipeline that will run between Grand Island and Syracuse, N.Y.

"We're pleased to have reached this accord with National Fuel because we believe it will expedite necessary approvals from the Federal Board," said James F. Cordes, executive vice president of The Coastal Corporation (NYSE: CGP), which along with Union Energy Inc. and Rochester Gas and Electric Corporation (NYSE: RGS), is sponsoring the 155-mile Empire State Pipeline.

Rochester Gas and Electric supplies electric and natural gas service wholly within the state of New York and is engaged in the production, transmission, distribution and sale of these services in a nine-county area centering around the city of Rochester.

Union Energy is a Toronto-based integrated natural gas firm with $2 billion in assets and operations in natural gas production, marketing, transportation, storage and distribution.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of more than $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

#90248p1523 09/05/1990 ~PR Newswire

ENGLEWOOD, CO. (SEPT. 5) PR NEWSWIRE - Jones Intercable Inc. (NASDAQ: JOIN) today announced results for its 1990 fiscal year, which ended May 31. For the year, the company reported a 38 percent increase in total revenues, from approximately $65.8 million reported in fiscal 1989 to approximately $91 million reported in fiscal 1990.

While revenues showed strong growth, the company reported a net loss for the year of $22.8 million or $1.83 per share, compared with a net loss in 1989 of $24.3 million or $1.96 per share. This loss is primarily the result of increased depreciation, amortization and interest expenses relating to the acquisition of cable television systems in late fiscal 1988 and fiscal 1989.

According to Jones Intercable Chairman and Chief Executive Officer Glenn R. Jones, "The losses were anticipated and are not indicative of the financial performance of the company. Our strategy is to build revenues, operating cash flow and shareholder value in the company through expansion of our asset base. Fiscal year 1990 saw a significant increase in revenues and our asset base."

Subscriber service revenues increased approximately 28 percent, from approximately $53.5 million in fiscal 1989 to approximately $68.4 million in fiscal 1990. The increase is the result of the acquisitions of cable television systems in Anne Arundel County, Maryland and Walnut Valley, Calif. in the latter part of fiscal 1988 and fiscal 1989 respectively.

Revenues from the management of systems owned by Jones Intercable-sponsored limited partnerships totalled approximately $13.9 million in fiscal 1990 compared to approximately $12.3 million for fiscal 1989, due principally to increases in the number of managed partnerships and increases in operating revenues of such partnerships. Jones Intercable generally receives a management fee equal to 5 percent of gross operating revenues from these partnerships.

The company also receives distributions from the sale of cable television systems owned by managed partnerships. Such distributions generally represent the company's 25 percent residual interest in the net assets of its managed partnerships subordinated to certain returns to limited

partners. During the year ended May 31, 1990, Jones Intercable recognized approximately $8.7 million of such distributions from the sale of the remaining cable television system owned by one of the company's managed partnerships. In fiscal 1989, the company recognized no such distributions.

Operating, general and administrative expenses increased approximately $9.2 million or 26 percent, from approximately $34.7 million in fiscal 1989 to approximately $43.9 million in fiscal 1990, due to the acquisitions in fiscal 1989 mentioned earlier and increased satellite and programming fees.

Depreciation and amortization expenses increased 13 percent from approximately $32.1 million in fiscal 1989 to approximately $36.3 million in fiscal 1990, due to the significant increase in the company's investment in cable television properties in 1988 and 1989.

Fourth Quarter Results For the fourth quarter of the company's 1990 fiscal year, Jones Intercable reported a 17 percent increase in subscriber service fees, from approximately $15.4 million reported in fiscal 1989 to approximately $18 million reported in fiscal 1990. Total revenues increased 16 percent for the quarter, from approximately $18.7 million in 1989 to approximately $21.7 million in 1990. The company reported a net loss of approximately $6.5 million or 52 cents per share for the three months ended May 31, 1990, compared to a net loss of approximately $7.5 million or 61 cents per share in the like period in 1989. The loss is largely due to the aforementioned increased depreciation, amortization and interest expenses relating to the acquisition of cable systems in late fiscal 1988 and fiscal 1989.

Jones Intercable is one of the largest cable television operators in the United States, serving over 1.4 million subscribers, and is the world's largest cable television management company managing systems for publicly held partnerships.

NEWARK, N.J. (SEPT. 5) PR NEWSWIRE - Continental Airlines today announced that New York business travelers will receive gift certificates worth up to $50 for each qualifying trip they take this fall. Similar programs will be introduced in Cleveland and Denver.

"Compliments of Continental" gift certificates will be redeemable at Macy's and Lord & Taylor for any merchandise, and at Ticketron for tickets

to any performance.

A $25 gift certificate will be awarded for travel on a round-trip fare of $280 to $599, and a $50 gift certificate will be awarded for travel on a round-trip fare of $600 or more.

"The gift certificate program is another form of reward for our loyal business travelers," a Continental spokesman said. "Unlike a typical frequent flyer reward, this program gives our customers the ability to choose from a broad range of merchandise or performances, and pays dividends from the very first trip."

Qualifying travel includes round trips that begin and end between Sunday and Friday of the same week, to any destination in the mainland U.S., Caribbean or Mexico. Travel must begin and end at Newark or LaGuardia, and occur between Sept. 9 and Dec. 14, 1990.

"Compliments of Continental" gift certificates will be issued by instant fulfillment centers at the airports, or via mail.

TORRANCE, CA (SEPT. 5) PR NEWSWIRE - Toyota Motor Sales (TMS) U.S.A. Inc. announced today that it established a best-ever car sales record during the month of August, totalling 90,739 units.

The company also reported a new one-month vehicle sales record for 1990 with combined car and truck sales totalling 113,006.

August domestic car sales, totalled 41,798 (16,269 Corollas and 25,529 Camrys), versus 29,936 (10,560 Corollas and 19,376 Camrys) for the same period last year.

Lexus, the luxury division of Toyota, also reported its best-ever month with sales totalling 6,111.

"A good month like this is amazing when you consider all the uncertainties threatening the market," said Robert B. McCurry, TMS executive vice president. "This month's sales total will give us a car-market share of approximately 12 percent, including Lexus, up from 9 percent a year ago. That would increase our year-to-date market share to approximately 9 percent, up 2.2 points from the same period last year."

NEW YORK (SEPT. 5) PR NEWSWIRE - Kyocera Corporation's (NYSE: KYO) wholly owned subsidiary, AVX Corporation, announced today that an agreement in principle has been reached to settle the New Bedford Harbor Superfund litigation with the United States and the Commonwealth of Massachusetts. AVX's liability stems from the operation conducted by its corporate predecessor, Aerovox Corporation prior to 1973. Kyocera and AVX are currently using all necessary procedures to assure pollution free manufacturing operations.

Under the terms of the settlement, AVX will pay $66 million toward the remediation of the Harbor, natural resources damage and reimbursement of the Governments' past costs. The amount of the payment could increase if the total cost of the remediation exceeds $130.5 million and for other statutory reasons.

On a consolidated basis, Kyocera will recorded an after-tax charge of $18 million in fiscal 1991. This charge is in addition to the previously recorded amounts for the settlement and anticipates a recovery of a portion of the settlement from AVX's various insurance carriers.

The settlement is subject to the negotiation of a definitive consent decree and further approvals by the AVX board of directors and the court. Kyocera and AVX believe that the resolution of this matter is in the best interest of the companies.

MIAMI (SEPT. 5) PR NEWSWIRE - AT&T today said it plans to expand Reach Out (R) Florida, an optional calling plan which offers customers savings on in-state AT&T calls. Pending approval by the Florida Public Service Commission on Oct. 2, AT&T will modify its current Reach Out Florida plan to begin offering savings at 10 p.m. instead of 11 p.m. The plan enables residence customers to buy an hour of in-state calling during AT&T's night/weekend price period for $7.75 per month. Customers may buy additional calling time at $7.35 an hour, prorated so that callers pay only for the minutes they use. Calls during AT&T's evening period are discounted 15 percent.

For callers who want additional savings, AT&T will introduce a Reach Out Florida 24-hour Plan for $8.25 per month. The plan offers all the features of the current Reach Out Florida plan, but includes a five percent discount during AT&T's daytime price period.

The company also will introduce a Reach Out Florida Half-Hour Plan that offers 30 minutes of in-state calling for $4.15. Customers may buy additional calling time at $3.75 per half-hour, or 12.5 cents a minute. The half-hour plan also offers a 10 percent evening discount and uses the same price periods as the other Reach Out Florida Plans.

AT&T will waive the $14 sign-up fee for new Reach Out Florida customers from Oct. 2 through Dec. 31. (There is no fee to switch from one Reach Out Florida Plan to another.)

BRAINTREE, MA. (SEPT. 5) PR NEWSWIRE - Responding to a press release issued earlier today by a dissident group seeking to replace Grossman's current board, Thomas R. Schwarz, the new president and CEO of Grossman's Inc. (NASDAQ: GROS), said "The Shidler/Holman Group's announced 'plans' for Grossman's continue to reflect their basic lack of understanding of our Company and its business. The simple fact is that the Shidler/Holman Group's refinancing idea makes no financial sense when you do a careful analysis taking into account all the costs, including prepayment penalties and other transaction costs. Grossman's has successfully cut its debt by 62 percent over the past three and a half years and we are confident that we know how to continue to build the company's financial strength. The Shidler/Holman Group's other proposal, to limit the variety of merchandise

available to customers in our stores, is a blueprint for disaster. Today's difficult retailing environment is no place for the Shidler/Holman real estate financiers."

The Shidler/Holman Group still isn't offering anything to Grossman's stockholders," Mr. Schwarz continued. "First they said that if they won control of the board they would implement a sale/leaseback deal that was full of potential conflicts of interest. Then they reversed course, said that they would not participate in any such deal and would hire a consultant instead.

They also promised to send stockholders new 'principles' they had adopted to deal with their conflict of interest problem. That was three weeks ago and we're still wondering where the Shidler/Holman Group's new principles are."

Grossman's, a major retailer of lumber and building materials, operates 156 stores in nine Northeastern states and in California.

PONTIAC, MICH. (SEPT. 5) PR NEWSWIRE - Perry Drug Stores, Inc. (NYSE: PDS) reported today that its third quarter ended July 31 was highlighted by continued improvement in pretax earnings -- the eighth consecutive quarter of improved comparable earnings.

Third-quarter pretax earnings were $924,000, a 9-percent increase over the $848,000 for the same-quarter 1989 period.

For financial statement purposes, third-quarter net earning results reflect a provision for income taxes of $200,000. Last year's third quarter did not include a provision for income taxes due to the utilization of tax carryforwards.

Net earnings for the quarter were $724,000, 7 cents per share. Had the 1989 third-quarter net earnings of $848,000, or 8 cents per share, included a provision for income taxes at the statutory rate, net earnings

on a proforma basis would have been $560,000, or 5 cents per share.

Pretax earnings for the first nine months increased 9 percent to $6.3 million from $5.8 million in the first nine months of 1989.

Net earnings for the nine months, which also unlike last year reflect a provision for income taxes, were $4.4 million, 43 cents per share. Had the 1989 net earnings of $5.8 million, 57 cents a share, reflected a provision for income taxes, net earnings on a proforma basis would have been $3.8 million, or 37 cents a share.

"The strategic measures we have implemented, ranging from divestitures to acquisitions along with our emphasis on Michigan, have positioned Perry for even stronger future growth and profitability," said Jack A. Robinson, Perry chairman and chief executive officer.

The earnings were achieved on sales in the third quarter of $159 million compared to $164 million for the comparable 1989 period. Sales for the first nine months were $497 million compared to $507 million for the same period last year.

Robinson said that sales declined because Perry sold or closed many unproductive units in order to maximize its assets. In the third quarter sales were also impacted by the sale, early in the quarter, of 14 A.L. Price deep discount stores, a decision which was made, Robinson said, as part of Perry's strategy to concentrate on operating traditional drugstores.

Michigan stores performed very well with comparable store sales increases of 6.5 percent in the third quarter and 4.5 percent for the first nine months.

#90248p1567 09/05/1990 ~PR Newswire

FARNBOROUGH, ENGLAND (SEPT. 5) PR NEWSWIRE - GATX Air, a division of GATX Capital Corp., today announced its firm order for a McDonnell Douglas MD-11 long-range tri-jet and two firm orders and two options for MD-90-30s a next generation short-to-medium-range twin jet. The aircraft will be financed equally by GATX and Paris-based Credit Lyonnais.

Delivery of the GATX MD-11 is scheduled for late 1992. Its MD-90-30s are scheduled for delivery in 1995 and 1996.

The San Francisco-based leasing company recently contracted an agreement with McDonnell Douglas (NYSE: MD) to buy the third MD-11 tri-jet produced. The arrangement has a flexible leaseback provision that will allow McDonnell Douglas to continue operation of the aircraft in its flight test program. This MD-11 is the first tri-jet with Pratt & Whitney 4460 engines installed.

GATX joins a growing list of 32 MD-11 and 54 twin-jet customers. While this marks GATX's first MD-11 and MD-90 purchase, GATX has other McDonnell Douglas aircraft in its leased fleet -- including eight DC-10s, six MD-80s and four DC-9-50s. In addition, GATX has entered into an agreement to remarket seven MD-80s owned by Air Trading 92, a financial group based in Italy.

The MD-90-30 is a significantly quieter, more fuel efficient and environmentally superior jetliner. It is 4.7 feet (1.5 m) longer than the standard MD-80 at 152.6 feet (46.5 m) and features the International Aero Engines' V2500 engine. With the added fuselage length and the increased thrust of 25,000 lbs. provided by this latest generation engine, the MD-90-30 will carry 158 passengers in a standard mixed-class seating configuration.

GATX's MD-11 is capable of carrying up to 293 passengers and baggage in a two-class seating arrangement. The MD-11 features a two-person digital flight deck and a unique interior designed to give the operator flexibility and convenience in making seasonal changes.

GATX Air currently owns, leases and provides financing and remarketing services for a fleet of more than 90 commercial jet aircraft. Since its inception in 1968, GATX Captial Corp. has arranged financing for equipment for its own account and for the account of others with an original cost in excess of $10 billion.

GATX Capital is a subsidiary of GATX Corp., Chicago, a $3 billion

asset-based services company which provides financial, maintenance, and management services related to rail, aircraft, bulk liquid storage terminals, warehousing and shipping.

HOUSTON (SEPT. 5) PR NEWSWIRE - Jon R. Whitney, 46, has been elected president and chief executive officer of Colorado Interstate Gas Company (CIG), Colorado Springs-based subsidiary of The Coastal Corporation (NYSE: CGP). He was formerly executive vice president of CIG.

The promotion to CIG president gives Whitney overall executive responsibility for operations of the natural gas pipeline company. He reports to Coastal Executive Vice President James F. Cordes, who held the positions of CIG president and CEO in addition to his corporate responsibilities.

Whitney joined CIG in 1968 as an accountant and was elected controller in 1974; vice president and controller in 1980; and senior vice president of administration in 1984. He was named executive vice president and elected to the CIG board of directors in 1988.

He also serves in the boards of the United Bank of Colorado Springs, Colorado Springs Chamber of Commerce, Pikes Peak United Way, the Colorado Leadership Forum, the Colorado Association of Commerce and Industry, and the Cheyenne Mountain Zoo. He is a native of Ft. Collins and a graduate of Colorado State University.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

DETROIT, (SEPT. 5) PR NEWSWIRE - Small businesses can lower their energy costs and increase productivity through a free lighting-analysis program being offered by Detroit Edison (NYSE: DTE).

The utility's "Lightright" program provides a comprehensive on-site lighting inspection for small offices, restaurants, retail and other eligible businesses in southeastern Michigan. A Detroit Edison contractor

will conduct the audits, using a computer-assisted program to measure lighting effectiveness. The contractor will recommend low-cost modifications to existing lighting systems and installation of energy-efficient equipment where necessary, as well as provide projections for operating costs and payback periods on new equipment.

"Under this program we can help small businesses save up to 30 percent in lighting costs by replacing existing fluorescent lamps and ballasts with energy-efficient devices," said Mark Switala, a Detroit Edison lighting specialist.

Switala generally recommends 32- to 34-watt fluorescent lamps for most commercial uses, together with new energy-efficient ballasts now available on the market.

"A high-quality lighting system creates a better environment for employees and patrons, resulting in improved productivity and sales," he said.

Independent commercial customers using an average of 4,000 kilowatthours of electricity per year are eligible for the audit. Detroit Edison will contact select customers through the mail and by telephone by December 1991. The utility hopes to complete 2,500 audits by that time. For further information about the free lighting audit program, business owners and managers may call 1-800-999-6956. The lighting analysis is one of 13 energy conservation programs for business and residential customers currently available from Detroit Edison and approved by the Michigan Public Service Commission.

SAN FRANCISCO (SEPT. 5) PR NEWSWIRE - TIS Mortgatge Investment Co. (NYSE: TIS), today declared a dividend of 32 cents per share for the quarter ending Sept. 30, 1990, payable on Oct. 12, 1990, to stockholders of record as of Sept. 28, 1990. This is the company's fourth consecutive quarterly dividend of 32 cents per share. In the first three quarters of 1989, the company declared and paid dividends of 30 cents per share.

As a real estate investment trust ("REIT"), TIS Mortgage Investment Company's dividends are based on taxable income calculated under the internal revenue code and not on book income which is computed in accordance with generally accepted accounting principles. Taxable income in each quarter of 1989 and for the first three quarters of 1990 exceeded the amount of dividends declared and paid.

TIS Mortgage Investment Co. is a San Francisco-based REIT which invests in various mortgage assets, including Residual Interests in Collaterized Mortgage Obligation (CMO) Bonds. The company commenced operations on Aug. 26, 1988.

CLEVELAND, (SEPT. 5) PR NEWSWIRE - Green and yellow BP signs are replacing blue and red Boron signs on service stations all over western Pennsylvania this week as BP Oil Company completes the conversion from Boron to BP that was announced in early 1989.

BP Oil Company of Cleveland (formerly Standard Oil) has owned or supplied the Boron stations in Pennsylvania since 1962. BP announced last year that all of its 7,500 service stations nationwide operating under the Gulf Sohio and Boron brand names would be rebranded to BP.

Last summer, Boron stations in Pennsylvania began to take on elements of BP's new Horizon station design, including the green, silver, and yellow BP color scheme. Over 230 Boron service stations in the state have been converted in preparation for this week's change to BP.

Ross Pillari, BP's vice president of retail marketing, commented on the brand change: "Our customers in Pennsylvania have trusted the Boron name for quality products and service for many years, and today that relationship continues under the BP name. The same dealers, jobbers, and employees who have served the people of Pennsylvania as Boron are here to serve them as BP. We think our customers will appreciate the changes we've made, but they'll also like what stayed the same."

ELKIN, N.C. (SEPT. 5) PR NEWSWIRE - Brendle's Incorporated (NASDAQ-NMS: BRDL) today reported results for the second quarter of fiscal 1991. For the three months ended August 4, 1990, sales increased 15.1 percent to $61,504,000 from $53,415,000 in the second quarter of fiscal 1990. The Company incurred a net loss of $1,455,000, or $.18 per share, compared with a net loss of $1,004,000, or $.12 per share, in the same period last year.

For the six months ended August 4, 1990, sales were $109,753,000, an increase of 15.9 percent from $94,737,000 reported for the first half of last year. The Company recorded a net loss of $3,572,000, or $.45 per

share, compared with a net loss of $2,898,000, or $.36 per share, in the comparable period a year ago.

According to Douglas D. Brendle, Chairman and Chief Executive Officer, comparable store sales increased by 1.4 percent during the second quarter of fiscal 1991 compared to a 3.0 percent decrease for the second quarter of fiscal 1990.

Commenting on the results, Brendle remarked, "We are very pleased with the results for the first six month of fiscal 1991, which were ahead of budget. The Company opened eight new stores in the first half of fiscal 1991 and is on schedule to open five additional stores, relocate two existing stores, and complete a recent addition to its distribution center located in Elkin, North Carolina. Furthermore, I am very proud of the accomplishments of the entire organization, and in particular, I would like to recognize the contribution that Dennis Johnson has made during his first full year as President and Chief Operating Officer."

Brendle's Incorporated operates 55 discount retail stores in North Carolina, South Carolina, Virginia, Tennessee, and Goergia which offer nationally advertised, brand-name merchandise at everyday low prices. The Company's shares trade on the NASDAQ National Market System under the symbol BRDL.

NEW YORK, (SEPT. 5) PR NEWSWIRE - Avery, Inc. (NASDAQ: AVRY) announced

today that a memorandum of understanding has been signed to settle the pending lawsuit which challenges various aspects of the proposal made on July 23, 1990, by Nelson Peltz and Peter W. May to acquire the 17 percent of the shares of the company's common stock not owned by them for $.35 per share in cash.

The settlement provides that Peltz and May will increase their offer to $.43 per share in cash and is subject to completion of pre-trial discovery proceedings, the negotiation and execution of a definitive settlement agreement, court approval and approval by a special committee of the Avery board of directors of a price at least equal to $.43 per share. The settlement is also subject to consummation of a merger between Avery and a company wholly owned by Peltz and May. Consummation of this merger itself is subject to certain regulatory approvals as well as approval by the stockholders of the company.

#90248p1604 09/05/1990 ~PR Newswire

TAMPA, FLA. (SEPT. 5) PR NEWSWIRE - Price Waterhouse today reaffirmed its intention to support IBM's AD/Cycle (A) strategy. In conjunction with IBM's latest announcement, Price Waterhouse has announced an environment for re-engineering existing systems into IBM's AD/Cycle for Systems Application Architecture (A). Called RE/Cycle (SM), this environment is a Price Waterhouse initiative focused on assisting clients and key package software vendors in migrating to CASE tools and AD/Cycle development environments.

AD/Cycle, first announced by IBM on Sept. 19, 1989, is both a stategy and an SAA (A) solution for application development and maintenance consisting of a set of products for the VM (A), MVS (A), OS/2 (A), and AS/400 (A) environments plus an architecture providing the framework around which the products and solutions could be integrated. "IBM has announced today an important next step in the functional evolution of its application development strategy," stated Steve Errico, Price Waterhouse partner responsible for CASE and Re-Engineering. "These functional enhancements will add new or extended capability to IBM's evolving AD/Cycle architecture. While AD/Cycle provides the means to develop new SAA compliant systems, IBM's strategy does not address existing systems. That is where Price Waterhouse comes in."

Built around ARRAE (SM), Price Waterhouse's proprietary product for process analysis, creating reusable software components, and code generating the replacement system, RE/Cycle is an architecture for moving existing systems to the AD/Cycle framework. Architected similarly to

AD/Cycle, RE/Cycle is a portfolio of proprietary and third party vendor products for re-engineering existing systems.

Price Waterhouse has provided consulting services for over 40 years and offers a complete range of management, financial and information technology consulting services.

(A) -- Indicates trademarks of International Business Machines Corporation. ARRAE and RE/Cycle are service marks of Price Waterhouse.

RESTON, VA (SEPT. 5) PR NEWSWIRE - As foreshadowed in agreements signed between BMW and Rolls-Royce in May this year, the former KHD Luftfahrttechnik GmbH has been purchased by BMW and Rolls-Royce with effect from July 1, 1990.

It has been renamed BMW Rolls-Royce GmbH and has a share capital of 30 million Deutsch marks.

The company is located at the former Oberurseler Motoren Werke and is now responsible for the workers and plant there, for the military aerospace products previously undertaken there and for the fulfillment of contracts entered into by its predecessors. Oberursel lies about nine miles to the north of Frankfurt, under the Taunus mountains; the town is celebrating its 12th centennial and the Oberurseler Motoren Werke is about to celebrate its first. Baron von Richthofen was supervising the development of radial aircraft at Oberursel during World War I.

The management board of the company will have four directors, two appointed by each shareholder. The first director to be appointed by BMW is Gunter Kappler, professor at Munich University, who has a long background in aviation gas turbines, much of it gained with MTU in Munich. David Evans and Phil Wilkins have been appointed directors by Rolls-Royce; David Evans, formerly business vice president at International Aero Engines in the United States, is responsible for marketing and product support, and Phil Wilkins, formerly Rolls-Royce general manager at Leavesden, is responsible for production and procurement. The fourth director, yet to be appointed by BMW, will be the chairman of the management board, responsible for finance, personnel and administration.

For BMW, the venture represents a return to its origins. Among the first products of the Bayerische Motoren Werke were aircraft engines produced from 1913 to power German airplanes. Later BMW produced Hornet engines

under license from Pratt & Whitney, followed in the 1940s by the famous 14 cylinder BMW 801 engine installed in the Focke Wulf 190. For Rolls-Royce, the venture represents a major commitment to Europe and another plank in its global strategy. Both companies have a common ambition, namely that BMW Rolls-Royce shall develop full competence to design, develop, manufacture, sell and support a family of civil aircraft engines, with thrusts in the range 8,000 pounds to 22,000 pounds, to power business jets regional jets and passenger aircraft up to about 130 seats. This will be the BR 700 family of engines.

While launching itself at this segment of the civil aviation engine market BMW Rolls-Royce will continue to exploit the small gas turbine skills developed at Oberursel. BMW Rolls-Royce will continue its existing aircraft engine partnerships -- most notable with Snecma and Turbomeca in France. Supported by BMW and Rolls-Royce, BMW Rolls-Royce will invest in people, plant and technology at Oberursel to bring its production practices up to the best international standards.

Rolls-Royce is a world leader in the design, development and manufacture of civil and military aviation, marine and industrial gas turbine engines.

DANBURY, CONN. (SEPT. 5) PR NEWSWIRE - Union Carbide Chemicals and Plastics Company Inc. (UCC&P) today said that it has entered into a settlement agreement with the Federal Trade Commission (FTC) that will allow UCC&P to proceed with the sale of its urethane polyols and propylene glycols businesses to ARCO Chemical Company (ARCO) (NYSE: RCM). The settlement, in the form of a consent order, will become final once it has been accepted by the FTC after a 60-day public review period. The settlement contemplates that UCC&P would retain all funds previously paid by ARCO under the purchase agreement between the parties relating to the businesses.

As part of the consent order, the businesses sold to ARCO will be held separate from ARCO's other operations until certain divestitures by ARCO, required by the order, have been accomplished.

Also under the agreement, UCC&P and ARCO Chemical will each pay $1 million to the federal government as settlement of Hart-Scott-Rodino filing issues. This payment does not, however, represent an admission of wrongdoing by either party. Additionally, there is no finding by any court that any aspect of the transaction violated any law.

Urethane polyols are used to make polyurethane foam found in furniture cushioning and other products. Propylene glycols are used to make personal care products and cosmetics, automotive antifreeze, pet foods, liquid detergents, unsaturated polyester resins, and various functional fluids.

NEW YORK, (SEPT. 5) PR NEWSWIRE - C. Ryan Jones has joined the Kellwood (NYSE: KWD) Home Fashions division as vice president of sales, according to Roy L. Fruehauf, division president. Jones will have total responsibility for Kellwood's open-line sales.

Most recently, Jones was president of Eastern Accents, a manufacturer of high-end decorative pillows. Prior to Eastern Accents, he was with Summergrade/Pillowtex and vice president of Ralph Lauren furnishings for J.P. Stevens.

Jones reports to Paul Belo, division vice president of marketing. "Ryan strengthens the sales and marketing team envisioned by Roy Fruehauf when he took over the presidency of Kellwood Home Fashions this past January," said Belo.

"The marketplace is ready for and needs a supplier with the capabilities of Kellwood. Our state-of-the-art manufacturing facilities allow Kellwood to service customers quickly with fashion-forward merchandise at very competitive price points," added Belo.

Jones will operate from Kellwood's new showrooms at 120 West 45th St. in New York City.

Kellwood, a Fortune 500 company, is an international manufacturer and marketer of apparel, home fashions, and camping soft goods.

RESTON, VA. (SEPT. 5,) PR NEWSWIRE - Rolls-Royce and the Soviet helicopter design bureau Kamov today signed a protocol agreement for the RTM322 engine to power a new civil transport helicopter.

Under the agreement, covering both development and certification, it is intended to supply five Rolls-Royce Turbomeca RTM322 engines in 1993 for development flying in the new Ka-62 R.

The first flight is planned for late 1993 with certification of the RTM322 in the Ka-62 R following in mid-1995.

The agreement was signed at the Farnborough International 90 by Rolls-Royce's Deputy Chairman Sir Ralph Robins, the Soviet Deputy Minister of Aviation Industry S. M. Bolshakov, and Kamov's chief designer S. V. Mikheyev.

RTM322 engines would be fitted to versions of the Ka-62 R for export outside the USSR. Aircraft for the USSR and Eastern bloc countries will be powered by the Glushenkov TVD 1500, which is to be used to obtain the basic helicopter certification.

The Ka-62 R is designed to carry 14 passengers up to 370 miles at 165 miles per hour. This new civil transport can be converted for VIP use or as a multi-purpose utility aircraft.

Rolls-Royce is a world leader in the design, development and manufacture of civil and military aviation, marine and industrial gas turbine engines.

PHILADELPHIA (SEPT. 5) PR NEWSWIRE - PHLCORP, Inc. (NYSE: PHX) stated today that the preliminary results of a new study of projected redemptions applicable to trading stamps issued by a subsidiary, which were consistent with the results of a prior study, indicated that the recorded liability for future trading stamp redemptions was in excess of required amounts by approximately $34,000,000.

The company has concluded that it is likely that the amount of stamps ultimately to be redeemed is less than had been previously expected. However, the company noted that the results of such studies are inconsistent with the results of prior studies and may have been influenced by non-recurring factors and that ultimate redemptions may be significantly greater than indicated by these studies.

Accordingly, the company is amortizing the apparent excess over a five year period commencing Jan. 1, 1990. As a result, after giving effect to related adjustments, results of operations for the interim periods ended Sept. 30, 1990, will reflect pre-tax income of approximately $4,500,000. The company will continue to monitor actual redemptions and estimates of ultimate redemptions to determine if the amount and rate of amortization should be changed.

Leucadia National Corporation (NYSE, PSE: LUK) is the holder of approximately 66 percent of PHLCORP, Inc.'s outstanding common shares.

CALGARY, ALBERTA (SEPT. 5) PR NEWSWIRE - Norcen Energy Resources Ltd. (Toronto: NCN) announces the following Board and Executive changes:

E.G. Battle, president and chief executive officer of Norcen Energy Resources Ltd., will be appointed chairman of the board of directors effective Jan. 1, 1991, following his retirement from active employment on Dec. 31, 1990.

Battle is a graduate of Texas A & M University in Geological and Petroleum Engineering. He joined Medallion Petroleum, a Norcen predecessor company in 1957 as an engineer. Battle was appointed president of Norcen Energy Resources Ltd. in 1975 and president and chief executive officer in 1980.

B.D. Cochrane will be appointed president and chief executive officer coincident with Battle's retirement. Cochrane is a graduate of the University of Saskatchewan in Petroleum Engineering and has been an employee of Norcen Energy Resources and predecessor companies for more than 16 years. Cochrane was appointed executive vice president and chief operating officer in 1989.

Paul M. Marshall will assume the position of deputy chairman of Norcen Energy Resources Ltd.'s board of directors. Marshall is a graduate of McGill University Law Faculty. He has been chairman of Norcen's board since 1988 and is currently president and chief executive officer of Westmin Resources Ltd., president and director of Brascade Resources Inc. and a director of numerous corporations.

Commenting on the planned changes, Marshall stated that while he was sorry to see Battle retire from active employment, he and the Board were pleased that the new appointments would allow for a continuation of the strong management for which Norcen has become known.

CYPRESS, CALIF. (SEPT. 5) PR NEWSWIRE - Year-to-date vehicle sales for Mitsubishi Motor Sales of America Inc. reached 139,390 units, up 47 percent from a year earlier, and the company anticipates reaching its goal of 200,000 units by year-end.

"Our dealers have done a phenomenal job of meeting aggressive sales objectives for the 1990 model year, to the point of exhausting our inventory of end-of-model year product," said Rick Lepley, vice president of sales. "We're anxiously awaiting the arrival of the '91s and expect increased volume and continued sales success nationwide once our inventories are replenished."

New highlights for the 1991 model year will include the aerodynamic 3000GT Galant VR-4 sports sedan, and the Mirage GS, a sporty new version of the Mirage four-door model line. The new Mirage GS will offer a 123hp, 1.6-liter DOHC 16-valve engine and, along with a selection of Mirage

four-door versions and the popular Eclipse, will be built at Diamond-Star Motors in Normal, Ill.

Domestically built products have added consistent sales strength for Mitsubishi Motors. Year-to-date sales through August reached a total of 34,699 units, up 95 percent from a year earlier. The subcompact Mirage will offer additional vehicle volume through year- end.

Mitsubishi's more than 450 dealers will attend the company's annual dealer meeting this week in Las Vegas and view the '91 product line and all-new advertising campaign. This year's dealer show is the largest in Mitsubishi history due to the addition of more than 200 new dealers since 1989. Lepley noted plans for another 150 dealers to join the Mitsubishi banner by 1992.

Mitsubishi Motor Sales of America Inc., Cypress, Calif., was established in 1981 by Mitsubishi Motors Corp., Tokyo, and markets a full line of subcompacts, compacts, sports coupes, vans, light trucks and sport/utility vehicles.

#90248p1671 09/05/1990 ~PR Newswire

WILKES-BARRE, PA (SEPT. 5) PR NEWSWIRE - Hugh F. Hanson, a veteran water quality engineer, has been named president of North East Water, the company which hopes to acquire the water operations of Pennsylvania Gas and Water (PG&W). North East Water is a subsidiary of United Water Resources (NYSE: UWR). Hanson is senior vice president of Hackensack and Spring Valley water companies, and is serving as a consultant/observer to represent United Water's interests until the PG&W acquisition is completed.

"Hugh Hanson's long history with Pennsylvania utilities makes him an excellent candidate to head the water utility," said United Water Chairman Robert A. Gerber. "Hanson has strong water utility management experience and extensive water quality knowledge."

Hanson, 47, joined United Water Resources in 1989. He also serves as chief operating officer of Spring Valley Water. Prior to joining United Water he was president of an environmental management firm and a utility services company. Earlier, Hanson served for eight years with the United States Environmental Protection Agency (EPA) in Washington D.C., where he was chief of the science and technology branch.

Hanson was with the Chester (Pennsylvania) Water Authority as special projects manager and assistant superintendent of production. He started

his career with the Philadelphia Water Department, where he served as chief of the Schuylkill division.

Hanson holds a bachelor's degree in civil engineering from the University of Michigan. He performed his graduate work at the University of Pennsylvania, where he earned a master's degree in water resources engineering. He is a licensed professional engineer in Pennsylvania, Connecticut and Delaware, and a licensed water treatment plant operator in Pennsylvania and Connecticut.

Hanson has been involved in various professional organizations throughout his career, including the Water Pollution Control Association, the American Water Works Association, the American Society of Civil Engineers, and the National Association of Water Companies. Hanson was twice awarded the EPA's Special Achievement Award and received the agency's Bronze Medal as well, for contributions to the national drinking water program. He is a diplomate of the American Academy of Environmental Engineers.

United Water Resources has about 16 million shares of common stock outstanding, which are traded on the New York Stock Exchange under the symbol "UWR." Hackensack and Spring Valley Water Companies serve a combined population of one million people in New Jersey and New York.

#90248p1672 09/05/1990 ~PR Newswire

HARRISBURG, PA (SEPT. 5) PR NEWSWIRE - North East Water and its parent company, United Water Resources (NYSE: UWR), filed testimony with the Pennsylvania Public Utility Commission (PUC) in support of their proposed acquisition of the water operations and related assets of Pennsylvania Enterprises, Inc. (PEI), the parent company of Pennsylvania Gas & Water Company (PG&W).

The testimony, consisting of four volumes, was filed at the PUC in Harrisburg on Friday, Aug. 31, and will form the basis for evidentiary hearings, set to begin Sept. 10. North East Water has also intervened in PG&W's pending rate increase application for Scranton-area customers, since United Water expects to assume the rate proceeding if it is not resolved before the asset acquisition is concluded.

Among the witnesses were two senior United Water executives, Hugh F. Hanson, the designated president of North East Water, and Donald L. Correll, United Water's vice president and chief financial officer. "We believe that United Water has the experience and the capability to solve the problems and firmly establish North East as a strong and healthy

company," Hanson states.

"United Water has more than 120 years of leadership in the water industry, with particular strengths in the very disciplines that are needed to solve the challenges in northeastern Pennsylvania."

Hanson testified that "North East is committed to the completion of the remainder of the filtration project on or before the Dec. 31, 1992, deadline as mandated by the state Department of Environmental Resources (DER)."

Hanson outlined the fast track construction management program United Water plans to introduce for the three remaining filtration plants slated for the Wilkes-Barre area. The fast track method will save time and money by having some aspects of design and construction take place simultaneously, and by closer coordination by contractors and engineers in the construction of the plants.

Rehabilitation of the distribution system is also a primary goal of North East Water, said Hanson. He noted that although United Water's Hackensack Water Company has a system with sections that are as old as PG&W's system, Hackensack has a relatively low incidence of main breaks and other distribution system problems that negatively affect water quality.

United Water anticipates that it will require about $248 million to finance the acquisition.

North East Water, which was incorporated in May as a subsidiary of United Water, is the entity which will acquire the water operations of the Pennsylvania utility. United Water has about 16 million shares of common stock outstanding

BOSTON (SEPT. 5) PR NEWSWIRE - Healthco International Inc. (NASDAQ: HLCO) announced today that its board of directors has postponed the company's annual meeting of stockholders until Tuesday, Sept. 25. The meeting was previously scheduled to be held tomorrow, Sept. 6. The company stated that the current record date for the meeting remains unchanged.

The company said the board viewed the postponement as necessary in light of both a communication it received this afternoon from the staff of the Securities and Exchange Commission as well as reports it had received from various parties, including certain of its stockholders, of apparent misinformation in the marketplace concerning the recently announced Hicks Muse transaction and the apparent confusion among stockholders which has been engendered as a result.

As previously announced, Healthco yesterday entered into a definitive agreement with an affiliate of Hicks, Muse & Co. and Ray C. Davis providing for merger at a price of $19.25 per share in cash. The merger is subject to financing and approval of Healthco's stockholders and is expected to close in late Fall.

The company said that its counsel had this afternoon received a letter from the SEC's staff expressing the view that "it appears that stockholders will not have sufficient time to consider and react to these developments unless the annual meeting is postponed." In its letter, the SEC noted that, among other things, stockholders should be provided with additional soliciting materials describing the terms of the acquisition agreement between Hicks Muse and the company.

The company stated that in light of these developments and to comply with the views expressed by the SEC, it would promptly prepare and disseminate additional proxy materials to its stockholders so that its stockholders would have the opportunity to make a fully informed decision prior to the annual meeting.

WHITE PLAINS, N.Y. (SEPT. 5) PR NEWSWIRE - Eastchester Financial Corporation (NASDAQ: ECFC) commented today on the status of the agreement and plan of merger with North Fork Bancorporation, Inc. (NYSE: NFB) dated April 18, 1990, under which a subsidiary of North Fork would pay Eastchester shareholders $20 in cash per share, for a total purchase price of approximately $79.5 million, upon the satisfaction of certain conditions.

In a public statement issued on Aug. 8, North Fork announced that, based on Eastchester's financial condition and results of operations for the period ended June 30, 1990, it would not be prepared to consummate the merger agreement at the $20 per share price. Eastchester stated that North Fork has further advised Eastchester that in light of current economic conditions it does not believe the situation will change and does not currently anticipate consummating the transaction under its existing terms. After initial discussions with North Fork and its advisors, no amendments acceptable to Eastchester have been proposed. Eastchester stated that it has agreed to North Fork's request to meet later this month for the purpose of determining whether there is a basis for the parties to agree to a transaction.

Malcolm J. Delaney, president and chief executive officer of Eastchester, stated that the board of directors of Eastchester will continue to review the situation and consider the various options available to it.

Eastchester Financial Corporation, with $531 million in assets, is the parent company of Eastchester Savings Bank, headquartered in White Plains

with branch locations in Westchester and Rockland counties. Eastchester Savings Bank continues to be well in excess of all regulatory capital requirements.

FARNBOROUGH, ENGLAND, (SEPT. 5) PR NEWSWIRE - Bell Helicopter Textron's intermediate twin-engined Model 230 will be built at the company's commercial helicopter facility near Montreal, Bell President L.M. (Jack) Horner confirmed today.

The Model 230, originally announced last fall, is a significantly updated version of the Bell Model 222. It will be the fifth production line to be built at Bell's Mirabel plant, joining the 206B Jet Ranger, 206L-3 LongRanger, 212 and 412SP models.

Horner said all Model 230 engineering is on schedule for completion in October. Two prototype aircraft will be at Mirabel Oct. 1. First flight is scheduled for summer 1991 with certification planned for the first quarter of 1992.

First deliveries will be made in August 1992, with Mitsui & Co., Ltd. of Tokyo serving as the launch customer with 20 aircraft on order, Horner stated. "With its exceptional design, I am convinced the Model 230 will play a significant role in the twin-engine helicopter market for many years," Horner said.

The Model 230 will be available in both wheeled and skid gear versions. In an executive configuration, the Model 230 will seat two pilots and up to six passengers. The utility version can accommodate either nine people or cargo. It is equipped with twin Allison 250-C30 G2 turbine engines, among the most reliable and proven engines in the aviation industry. These powerplants are from the 250 series which have more than 50 million flight hours cumulatively.

Bell's Canadian plant, which first opened in December 1985, now accounts for approximately one-third of the world's production of commercial helicopters. In just over four years of operations, the Mirabel facility has manufactured and delivered 375 helicopters.

Bell Helicopter Textron is a subsidiary of Textron Inc. (NYSE: TXT), a multi-industry company with operations in three business sectors: aerospace technology, commercial products and financial services.

(SEPT. 5) UPI - The State Department says an Iraqi plane chartered by the United States arrived in Jordan Tuesday with 30 Americans and 100 other nationals who had been trapped in Iraq and occupied Kuwait. Meanwhile, more than 300 British women and children reached Baghdad... 17 hours after they left Kuwait City on a grueling bus journey through the desert. The British Embassy in Iraq says it will try Wednesday to obtain exit visas for them so they can get home.

The upcoming summit in Helsinki, Finland, has forced President Bush to cancel a long-planned appearance at Ellis Island in New York. Bush announced last weekend that he will meet with Soviet President Gorbachev Sunday to discuss the Persian Gulf crisis and other issues. Ellis Island officials say the festivities will proceed as planned... with Vice President Quayle substituting for Bush in dedicating the new National Museum of Immigration.

Sources in Bangkok, Thailand, say the leader of the Khmer Rouge has agreed to attend the Cambodian peace talks scheduled to begin Thursday in Jakarta Indonesia. The sources say a senior Thai Foreign Ministry official met Khieu Samphan Tuesday to persuade him to change his plans to avoid the talks. The change of heart could save the talks from degenerating into an inconsequential, low-level meeting.

NASA engineers are keeping their fingers crossed. They are hoping Wednesday's fueling of the shuttle Columbia DOESN'T turn up any hydrogen fuel leaks... like the ones that grounded the shuttle fleet all summer. If all goes as planned, Columbia is scheduled to lift off early Thursday morning from Cape Canaveral, Florida, on a long-delayed astronomy mission.

.

NASA plans to follow Columbia's mission by launching the shuttle Discovery in early October on a high-priority flight to send the European-built Ulysses solar probe into an orbit around the poles of the sun. The Discovery was hauled to launch pad 39-B Tuesday night. But an apparent leak in one of the shuttle's two primary Freon cooling systems threatens to delay the mission.

#90248u0219 09/05/1990 ~United Press International

(SEPT. 5) UPI - A poll finds Oregon voters favoring by a 3-1 margin the closing of the Trojan nuclear plant until it meets safety requirements. Those requirements are contained in a referendum on the November ballot in Oregon. Among them- that the plant remain closed until a repository for nuclear waste is operating. Since the federal government DOESN'T expect to license a nuclear waste dump until the year 2010- at the earliest- the measure would shut Trojan down for at least two decades.

First lady Barbara Bush is getting a boost from television glamour Wednesday to promote her literacy program. Mrs. Bush will speak at a luncheon during a education conference, sponsored by C- B-S, at Washington's Georgetown University. Then she'll take part in an A-B-C radio network call-in show with anchorman Peter Jennings. The first lady will discuss her plans for reading children's stories in the upcoming radio series, ''Mrs. Bush's Story Time,'' that starts September 16th and runs for 10 Sundays.

(SEPT. 5) UPI - The matchup between Oakland Athletics and Boston Red Sox aces Dave Stewart and Roger Clemens Tuesday night wasn't a duel, it was a suicide. Clemens, who has lost six straight decisions to Stewart, gave the game away with a wild pickoff attempt, a wild pitch and six walks that helped the A's to a 6-2 victory over the Red Sox.

''I just pitched poorly, that's all that needs to be said,'' Clemens explained. ''I was wild. The reason we lost is I pitched so poorly. I ended up cutting my own throat.''

Stewart, 18-10, improved to 4-0 against the Red Sox this season. He allowed six hits, walked three and struck out two in eight innings, and posted his seventh straight win over Boston.

The victory lifted Stewart's mark to 12-5 lifetime over the Red Sox and 6-1 over Clemens. He is 2-0 at Fenway Park against Clemens this season, where the Red Sox ace is 10-0 against the rest of the league.

''I'm not beating Roger Clemens - I'm beating the Boston Red Sox,'' Stewart said after going eight innings for his 18th win, leaving him two shy of his fourth-straight 20-win season. ''I get personal satisfaction in winning, not beating Roger, but winning.

''It's not anything I'm especially proud of and it's not anything Roger Clemens should be ashamed of,'' Stewart said.

Clemens, 20-6, had a personal eight-game winning streak halted and he fell to 3-9 lifetime against Oakland. Clemens walked six, made wild throws to third and first and wild pitched a run home as he lasted 5 1-3 innings,

his shortest outing since June 18.

Clemens hadn't walked three batters in a game since July 20, but he walked three in the first inning and the A's scored twice on one hit. Rickey Henderson and Jose Canseco walked before Harold Baines doubled in a run. Carney Lansford walked to load the bases.

Jamie Quirk then ripped a line drive back to Clemens, who caught the ball and should have had Canseco doubled off third. But Clemens lobbed a toss over the head of third baseman Wade Boggs for an error that allowed a run to score.

Clemens, who threw 31 pitches in the first inning, appeared to be bothered by a blister as the second inning began. He stayed in the game and wasn't scored upon again until the fifth, when he again hurt himself with wildness.

With one out in the fifth, McGee walked and Clemens sent him to third with a wild pickoff attempt and let him come home with a wild pitch.

''A lot of strange things happen in baseball,'' Oakland Manager Tony La Russa said. ''I don't think we feel we have any kind of hold over Roger Clemens. He's pitched some good games against us. A lot of things are tough to explain and I won't spin my wheels trying to explain them.''

Elsewhere in the AL, Seattle knocked off Baltimore 7-2, Detroit passed Toronto 3-1, Chicago halved Kansas City 6-3, Minnesota routed Milwaukee 7-1, and Cleveland nipped Texas 7-5.

In the NL, it was: Atlanta 7, Cincinnati 4; Chicago 3, Montreal 1; Pittsburgh 11, Philadelphia 7; St Louis 1, New York 0; San Francisco 6, San Diego 4; and Houston 10, Los Angeles 8.

-- AROUND THE AL --

Mariners 7, Orioles 2

At Baltimore, Ken Griffey doubled in three runs and collected three hits to spark Seattle and hand the Orioles their fifth straight loss. Erik Hanson, 13-9, spaced four hits over seven innings. Pete Harnisch, 10-10, suffered the loss.

Tigers 3, Blue Jays 1

At Detroit, Alan Trammell's bases-loaded ground-rule double in the seventh lifted the Tigers. Reliever Paul Gibson, 4-4, got the victory with one inning of relief. Mike Henneman pitched the last two for his 20th save. Duane Ward fell to 2-8.

White Sox 6, Royals 3

At Chicago, Dan Pasqua drove in three runs with a double and a single and Bobby Thigpen earned his 48th save for the White Sox. Jack McDowell, 12-6, won his sixth straight decision, the most by a Chicago pitcher since Floyd Bannister strung together nine in a row in 1983. Andy McGaffigan, 3-2, was the loser.

Indians 7, Rangers 5

At Arlington, Texas, home runs by Cory Snyder and Carlos Baerga backed up a strong seven-inning performance from Sergio Valdez to lift Cleveland past Texas and end the Indians' eight-game losing streak. Valdez, 3-5, struck out a career high seven. The loss went to Kevin Brown, 12-10.

Twins 7, Brewers 1

At Milwaukee, reliever Tim Drummond allowed four hits over 5 2-3 innings and Minnesota pounded out 19-hits. Drummond, 3-4, allowed four singles after relieving David West in the third. West did not allow a hit, but left the game with a medial hamstring strain in his left leg. Tom Edens, 3-2, gave up two runs in 4 2-3 innings despite allowing 11 hits.

#90248u0301 09/05/1990 ~United Press International

(SEPT.5) UPI - The political resurgence in Florida of former Democratic Sen. Lawton Chiles now targets the campaign of Gov. Bob Martinez, who is trying to become the first Republican governor to be re-elected in that state in more than a century.

Chiles and Martinez captured their respective party gubernatorial nominations in Tuesday's primary voting and will meet in the Nov. 6 general election.

Martinez promises to focus on the future and predicts he will be re-elected easily. Chiles predicted Democratic unity and it was expected that he would continue his populist approach.

With 67 percent of the vote counted, Chiles, 60, led challenger Rep. Bill Nelson 71 percent to 29 percent. Nelson conceded and pledged his support to the Democratic candidate.

In his victory speech at campaign headquarters in Tallahassee, the popular Chiles urged Republicans to join him in repudiating big-money, negative campaign tactics.

''Yesterday I had a feeling that no matter how the race turned out today, we had won. We had shown that people mean more than money,'' Chiles said.

Now supporters are urging him to ''fight fire with fire,'' he said. ''But the real test is whether you trust the people.''

''We've taken the first step. This just shows that if you ask the people to respond, they will,'' Chiles said.

In the GOP primary, Martinez led state Sen. Marlene Woodson-Howard 66 percent to 11 percent. He declared victory.

''We are ready for the next two months. This is not a campaign about memories of yesterday. It's about today and tomorrow,'' Martinez said in an obvious shot at the Democratic nominee.

Four years ago, Martinez became the first Republican in Florida to be elected governor in 20 years, and now he is seeking to become the first GOP incumbent to be re-elected in the Sunshine State since Reconstruction.

Nelson, 47, was favored to win the Democratic nomination until Chiles unexpectedly jumped into the fray.

Chiles, 60, left the Senate in 1989 after a 30-year political career, including 18 years on Capitol Hill. He disclosed this year that he retired from the Senate because of clinical depression and is now being medicated with Prozac.

His campaign was heavily populist and crafted around his refusal to accept any campaign contribution of more than $100.

He predicted that Democrats will be able to close ranks and avoid the sort of internal party bickering which helped Martinez win the governorship four years ago.

''There's a spirit that's different (from 1986),'' Chiles said. ''I think everybody is going to come together. I think it will happen this time.''

The only other state to hold a primary Tuesday was Nevada, where the races were marred by a Monday plane crash that seriously injured two prominent Republican candidates.

State Sen. Sue Wagner, who won the GOP nomination for lieutenant governor, and Bob Seale, winner of a tough race for the state treasurer's office, celebrated their victories in hospital beds in Washoe Medical Center in Reno where they were recovering from multiple injuries.

Acting Gov. Bob Miller easily defeated five political unknowns for the

Democratic gubernatorial nomination and will face political newcomer Jim Gallaway who won an eight-person race for the GOP nomination.

Rep. James Bilbray, D-Nev., in the 1st Congressional District, and Rep. Barbara Vucanovich in 2nd District, rolled to easy victories over token opponents.

In Florida's Broward County, voters rejected an amendment that would have outlawed discrimination in jobs and housing based on sexual orientation. About 58 percent voted no, while only 42 percent voted yes.

Voters in Sarasota County rejected a referendum to impose a two- year moratorium on growth by a margin of nearly 3-1.

#90248u0304 09/05/1990 ~United Press International

TOKYO (SEPT. 5) UPI - Stock prices continued to plunge Wednesday in Tokyo as fears of higher oil prices and interest rates kept buyers out of the market.

The key Nikkei average of 225 selected issues dropped 829.30 points, or 3.3 percent, to close at 24,078.34 in thin trading. The Nikkei had lost 512.79 points the day before.

The Tokyo Stock Price Index of all major shares sagged 50.30 points, following a 35.54-point loss Tuesday. TOPIX closed at 1,860.08.

Volume continued to be light as an estimated 380 million shares were traded, compared with 331.33 million the day before.

Buyers continued to fear a further rise in interest rates resulting from higher oil prices, the effects of which have yet to filter through the Japanese economy, brokers said.

Following a bearish day on Wall Street, which saw its lightest volume of the year Tuesday, Tokyo stocks fell sharply in the morning session, with the Nikkei dropping 751 points.

Arbitrage selling toward the end of the morning accelerated the decline, brokers said.

In the afternoon session, institutional investors dumped large blocks of shares on the market, driving the Nikkei down by more than 1,200 points.

The cash market went down so fast that futures arbitrageurs reversed positions and began buying stocks in the cash market, brokers said.

In addition, some bargain-hunting took place, trimming the market's loss.

Since the beginning of the week, the Nikkei has lost more than 7 percent, approaching the year's low closing of 23,737.63 it set on Aug. 23.

''It's only natural to have a technical rebound at this point,'' said broker Keiji Ikeda of James Capel Pacific (Securities).

But the overall trend of the market will remain weak, Ikeda predicted.

A lot of people think Japanese stocks are still expensive relative to the current interest rate environment.

The market fell broadly, with blue-chip issues sold heavily.

-30- 2123

#90248u0310 09/05/1990 ~United Press International

LOS ANGELES (SEPT. 5) UPI - Actress Irene Dunne, who who achieved fame as a singer, dancer, actress and comedian in the 1930s, and served as a delegate to the United Nations, died Tuesday night. She was 88.

Dunne, who was nominated five times for the Oscar but never won, had been in failing health for the past year and ''her heart gave out'' at her home in the exclusive Holmby Hills section, said her business manager, John Larkin.

Born Dec. 20, 1901, in Louisville, Ky., the daughter of the supervising general of steamships for the United States, Miss Dunne made her stage debut at the age of 5.

Her parents needed opera glasses to see the moppet play Mustard Seed in ''A Midsummer Night's Dream,'' but she said later that until she saw the movie version, ''I thought Mustard Seed was the star of the show.''

She studied piano and voice at the Academy of Fine Arts in Indianapolis and the Chicago Music Academy before trying out for show after show on Broadway.

Her first break came in the musical ''Irene.'' A season with the St. Louis Municipal Opera followed, then ''The Prince Chap,'' ''Lollipop,'' ''Sweetheart Times'' and ''Yours Truly'' in New York.

The pretty redhead retired from the stage when she married a Park Avenue dentist, Dr. Francis Griffin, but at her husband's insistence she continued her voice lessons.

One day in an elevator, she encountered Flo Ziegfeld, who assumed the

regal-appearing young woman was on her way to see him. When she did not get off at his floor, he sent his secretary to fetch her.

The result was a starring role in the road show of ''Showboat,'' the leading role in the film, and the beginning of a screen career that included more than a score of motion pictures.

Her movies included ''Back Street,'' ''The White Cliffs of Dover,'' ''Life With Father,'' ''Magnificent Obsession'' and ''Roberta.''

She was nominated for Academy Awards for ''Theodora Goes Wild,'' ''Cimarron,'' ''I Remember Mama,'' ''The Awful Truth,'' and ''Love Affair.''

A devout Roman Catholic, Miss Dunne was an ardent worker for the Sister Kenny Foundation, the Archdiocesan Council of Catholic Women and the Committee for the Hebrew University Rebuilding Fund. She was honored by Notre Dame University as an outstanding Roman Catholic.

Often a delegate to Republican National Conventions, she was appointed by President Dwight D. Eisenhower to fill Eleanor Roosevelt's vacated post at the United Nations.

Her 38-year marriage to Griffin was considered one of Hollywood's happiest until his death in 1965, although early in her career they lived on opposite coasts as she made movies here and he continued his dental practice in New York.

After he joined her in Hollywood, they adopted a daughter, now Mrs. Richard Shinnick of Beverly Hills. The daughter, two grandchildren and a great-granddaughter survive.

Larkin said the funeral would be closed. In lieu of flowers, he said Dunne had asked for donations to St. John's Hospital in Santa Monica, which honored her with a statue in front of the building for having raised more than $20 million.

-30- 3312

#90248u0311 09/05/1990 ~United Press International

(SEPT. 5) UPI - Nearly 40,000 students in Michigan, Illinois and Pennsylvania received reprieves from the first day of school as at least 2,300 teachers walked off the job in disputes over salary and working conditions.

Strikes also hit colleges in Michigan, Connecticut and Pennsylvania as schools scrambled to carrying on classes using administrators and temporary instructors.

In Michigan, 1,961 teachers in six school districts with a combined enrollment of 33,550 students were on strike. The strikebound school districts included Saginaw, 900 teachers and nearly 16,000 students; Troy, 700 teachers and 11,000 students; Gwinn, 175 teachers and 2,900 students; Cheboygan, 114 teachers and 2,400 students; St. Ignace, 48 teachers and 900 students and Engadine, 24 teachers and 350 students.

In Illinois, about 110 teachers in the Chicago suburb of Darien went on strike with salary as the main sticking point. The district's 1,721 students attended three days of school last week before the strike was called. Teachers voted in late August to go on strike after their contract expired on Aug. 25.

In the Mount Zion district near Decatur, Ill., 117 teachers remained off the job Tuesday in a strike that began last week.

But officials said about 2,200 students in Harrisburg, Ill., and 1,000 in Illini Bluffs, Ill., will be back in school Wednesday with votes by teachers to end their strikes.

Harrisburg's 135 teachers will receive an across-the-board raise of $1,750 in the first year of the contract and $1,500 in the second year. About 60 teachers in the Illini Bluffs school district will receive 8 percent pay increases in both years of a two-year contract.

In Pennsylvania, York County's Dover School District was struck by 184 teachers, idling 3,172 pupils, and the staff at Ligonier Valley School said it planned to strike Wednesday, when 2,691 students were supposed to return to class despite the threatened walkout.

George Badner, spokesman for the state's largest teachers' union, the Pennsylvania State Education Association, said there is no way to know whether unsettled contracts in 78 other school districts will be resolved without strikes.

''You can't make any kind of prediction or summation this early as to how things are going to go,'' Badner said. ''With strikes, you're going to have to take each one as they come up. They're all local issues.''

Professors at Wayne State University in Detroit also hit the picket lines Tuesday, but university officials said the majority of classes would begin Tuesday for the school's 30,000 students despite the walkout.

In Philadelphia, Temple University professors walked picket lines in what they vowed could be a protracted strike unless their demands on wages and benefits are met.

Some 100 unionized professors, librarians and other professionals toted picket signs reading ''Temple Unfair to Education.''

The university did not officially cancel classes for its 34,000 students, but many students left their classes after finding that professors were not there.

In Connecticut, striking professors, secretaries and maintenance workers set up picket lines Tuesday at the University of Bridgeport. Officials vowed to begin classes despite the walkout over wages and benefits.

Classes for about 5,000 students were scheduled to begin Wednesday night and Thursday morning.

The university has a contingency plan that includes hiring replacements and bringing in administrators and other staff qualified to teach and to conduct classes, said attorney John Sabanosh, who represents UB in negotiations.

The unions represent 175 faculty members, 100 maintenance workers and 150 secretaries and clerical workers.

-30- 3951

#90248u0315 09/05/1990 ~United Press International

(SEPT. 5) UPI - Playing with patience and determination, the Pirates are on a mission to avoid repeating the mistakes of the past.

In 1988, the Pirates challenged the Mets in the NL East race until unraveling soon after Labor Day. After trading places with the Mets most of the summer, the Pirates regained a half-game lead Tuesday night with a methodical 11-7 victory over the Philadelphia Phillies.

Philadelphia held advantages of 5-0 and 7-3 during the game, but Pittsburgh came back each time, posting two four-run innings to tie and then break the game open.

Bobby Bonilla, whose three-run homer in the sixth capped the scoring, expressed his team's position.

''We had to win. We had no choice,'' Bonilla said. ''We knew we had to win and focus in on tomorrow's double-header.''

The Pirates face the Mets in a three-game series in Pittsburgh starting with Wednesday's double header.

With the Phillies holding a 5-0 lead off Pittsburgh starter Bob Walk in the second, it looked like the Mets would get a chance to increase their

half-game lead. But Jose Lind's RBI single in the second, and Bonilla's run-scoring groundout and Bobby Bonds' RBI single in the third pulled the Pirates to 5-3.

Philadelphia scored two more runs, this time off rookie Mike York, in the fourth, but Pittsburgh came back with four runs in the fifth to tie it 7-7.

Phillies Darrel Ackerfelds, 5-2, then gave up four sixth-inning runs - including Bonilla's homer, his 31st of the season.

Wally Backman scored the first run of the sixth when Andy Van Slyke hit into an unsuccessful fielder's choice. First baseman John Kruk fielded Van Slyke's ball and threw to shorstop Dickie Thon, who dropped it.

''We played good early, but we couldn't pitch in the middle innings, and we didn't turn a double play there and that cost us four runs,'' said Phillies Manager Nick Leyva.

Despite the pressure to retain first place with 28 games to play - eight of them with the Mets, Bonilla is making the most of the see-saw pennant race.

''This is September. I'm smiling. It's a good time of the year,'' Bonilla said. ''Nobody wants to go through what we did last year when you come to the park and there's no feeling, no fans, no nothing.

Bill Landrum, 5-3, two-hit the Phillies over the fifth and sixth as one of four Pirate pitchers in the game. Bob Patterson held Philadelphia to one hit over the last three innings, picking up his fourth save.

In other National League action, Atlanta dropped Cincinnati 7-4, Chicago beat Montreal 3-1, St. Louis blanked New York 1-0, San Francisco edged San Diego 6-4 and Houston downed Los Angeles 10-8.

In the American League it was: Detroit 3, Toronto 1; Seattle 7, Baltimore 2; Oakland 6, Boston 2; Chicago 6, Kansas City 3; Minnesota 7, Milwaukee 1; and Cleveland 7, Texas 5.

-- AROUND THE NL --

Braves 7, Reds 4

At Atlanta, Dave Justice belted two homers to back a combined seven-hitter by Tom Glavine and Kent Mercker and give the Braves their fifth straight victory. Glavine, 7-11, earned his first victory since July 17th. Danny Jackson, 5-3, took the loss.

Cubs 3, Expos 1

At Montreal, Ryne Sandberg belted a tie-breaking two-run homer in the ninth inning, lifting Chicago. Cubs' starter Mike Bielecki, 7-9, went eight innings, gave up eight hits, struck out six and walked four. Paul Assenmacher struck out the side in the ninth for his seventh save. Dennis Martinez, 10-10, went nine innings, allowed four hits and struck out three.

Cardinals 1, Mets 0

At St. Louis, Joe Magrane, Omar Olivares and Lee Smith combined on a five-hit shutout, snapping the Cardinals' four-game losing streak. Magrane 9-15, snapped a personal three-game losing streak, allowing three hits and two walks over five innings while striking out two. Sid Fernandez, 9-11, gave up three hits and two walks, pitching into the eighth.

Giants 6, Padres 4

At San Diego, Bill Bathe slammed a two-run pinch hit homer to snap a seventh inning tie and lift San Francisco. Mike LaCoss, 5-3, went six innings. Atlee Hammaker, 4-7, took the loss in relief of Andy Benes. Benes went the first six, giving up six hits and four runs, walking one and striking out four.

Astros 10, Dodgers 8

At Los Angeles, pinch hitter Eric Anthony belted a three-run homer and Glenn Davis drove in three runs to propel Houston. The defeat was Los Angeles' fourth in five games and kept them 6 1-2 games behind first-place Cincinnati in the NL West. Al Osuna earned the victory - his first big-league decision - while Dave Smith registered his 22nd save. Los Angeles starter Ramon Martinez allowed eight hits and six runs in 4 1-3 innings.

(SEPT. 5) UPI - Around the world... around the clock... U-P-I has the latest news. .

The United States made its strongest move yet in the naval blockade of Iraq, seizing an Iraqi freighter that refused orders to return to its port. The ship carrying a load of tea was seized yesterday in the Gulf of Oman. The Pentagon says it was ordered to the port of Muscat, where it's being held. .

President Bush is to leave Washington Friday night for Finland and his one-day summit with Soviet President Gorbachev in Helsinki on Sunday. The Persian Gulf crisis will be the focus. The White House says the goal is

''to show unity and support by the two super- powers'' to stop Iraqi aggression.

NASA says the shuttle Columbia's countdown is proceeding smoothly, with an 80 percent chance of good weather for tomorrow's pre-dawn launch. Fueling begins later today for the long-delayed, 10-day astronomy mission. It's hoped that NO fuel leaks will develop like the ones that grounded Columbia in May.

The lawyer for the main suspect in the Gainesville, Florida, killings says his client's rights may have been violated. Lawyer James Russo says Edward Humphrey was questioned for two hours without a lawyer present. Humphrey also is linked to a 1988 attack that officials say has ''similarities'' to the five Gainesville student slayings.

Yesterday was the first day of school across the nation, but NOT for more than 39-thousand students in districts where teachers are on strike. At least 23-hundred teachers are on the picket lines in walkouts in Michigan, Illinois and Pennsylvania. Salary and working conditions are the main issues.

#90248u0349 09/05/1990 ~United Press International

(SEPT. 5) UPI - Nevada's acting Governor Bob Miller swept to an easy victory in the state's Democratic primary yesterday. He'll face political newcomer Jim Gallaway in November. Gallaway won the G-O-P nomination over seven other men. Miller became acting governor two years ago when Dick Bryan was elected to the Senate.

The two Koreas exchanged proposals today aimed at improving relations. North Korea stressed political and military steps, while South Korea focused on cultural exchanges and cooperation. The proposals were exchanged at an UNprecedented meeting of North and South Korean prime ministers in Seoul.

A federal judge in Los Angeles stunned prosecutors yesterday when he dismissed a massive cash and cocaine payola case against a once- powerful record promoter. The judge says the prosecutors improperly withheld evidence from the defense. The prosecutors say they'll appeal the judge's ruling.

Scientists say they have discovered the first genetic cause of the most common type of arthritis. Researchers from Cleveland and Philadelphia say they found a single genetic flaw that appears responsible for at least one type of osteo-arthritis. The potentially crippling disorder afflicts nearly 16-Million Americans.

Actress Irene Dunne died last night at her home in Los Angeles. Her business manager says she was 88. During her career, Dunne made the transition from Ziegfeld stage star to comedy and drama roles in Hollywood that earned her five Academy Award nominations. She also served one term as a delegate to the United Nations.

#90248u0353 09/05/1990 ~United Press International

(SEPT. 5) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

LONDON - At least 90 former Iraqi captives land in England Wednesday after flying from Jordan aboard a Virgin Atlantic Airways jetliner. The former hostages were among 130 people, including 30 Americans, flown from Baghdad to Amman Tuesday aboard a U.S-chartered Iraqi plane.

A spokeswoman for the U.S. Embassy in London says U.S. consular officials went to Gatwick Airport about 30 miles southeast of London to meet the plane. The spokeswoman said about 30 Americans are expected among the refugees arriving in London but officials at the airport are still trying to compile a list.

U.S. warships, which seized an Iraqi cargo ship carrying tea in the Gulf of Oman Tuesday, closed in on two Iraqi oil tankers in the Gulf region Wednesday. The British Broadcasting Corp. reported the warships would intercept the tankers if they attempted to load oil.

MOSCOW - Iraqi Foreign Minister Tariq Aziz was on his way to the Soviet Union Wednesday to discuss the gulf crisis with Kremlin leaders, the official Tass news agency reported. Quoting a Soviet Foreign Ministry source, Tass said only that Aziz ''arrives in Moscow today for consultations with representatives of the Soviet leadership.'' The surprise visit comes before Soviet President Mikhail Gorbachev and President Bush meet Sunday in Finland to discuss the crisis that began with Iraq's invasion and occupation of Kuwait Aug. 2.

AMMAN, Jordan - King Hussein, returning home unexpectedly from an extensive foreign tour aimed at finding a negotiated solution to the gulf crisis, was scheduled to depart this week for Baghdad on another diplomatic mission, a government statement said. State-run Amman Radio denied reports that Hussein planned to travel to Moscow to meet President Mikhail Gorbachev prior to the Soviet leader's summit in Finland with President Bush.

WASHINGTON - The United States acknowledges that some goods continue to reach Iraq by overland route through Jordan. But White House spokesman

Marlin Fitzwater insists that is ''not a major problem in terms of the total effectiveness of the sanctions, which we believe are beginning to bite.''

WASHINGTON - Secretary of State James Baker, in the first official report to Congress on Bush administration policy in the Persian Gulf crisis, says Iraq's ''unprovoked aggression is a political test of how the post-Cold War world will work.''

Arab newspapers reported the gulf state of Qatar expelled Palestine Liberation Organization diplomats, further isolating the organization. PLO Chairman Yasser Arafat has backed Saddam, alienating gulf states that have funded him for years.

#90248u0473 09/05/1990 ~United Press International

MANILA, Philippines (SEPT. 5) UPI - The inflation rate fell to 11.1 percent in the Philippines in August for the lowest level since January, the National Statistics Office said Wednesday.

The drop in inflation was achieved despite reports of hoarding and increased prices of prime commodities after the July 16 earthquake that devastated wide areas of northern Philippines.

The average inflation rate during the first seven months of 1990 was 12.97 percent with the peak of 13.6 percent occurring in April. The rate was 12.6 percent in July.

Prices of major commodity groups - especially food, beverages and tobacco - showed lower growth rates, the government said.

#90248u0505 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - New York Post Publisher Peter Kalikow has threatened to close the 189-year-old newspaper by Sept. 15 unless its 10 unions agreed to major wage and job cuts.

The unions were scheduled to meet Wednesday and Thursday to discuss the demands.

Negotiators for Kalikow met with union officials Tuesday and told them the newspaper had lost $80 million dollars since Kalikow bought it from Rupert Murdoch in 1988.

Richard Nasti, vice president and general manager of the newspaper, said the Post will continue to lose $25 million a year unless concessions are

made.

Nasti said the Sept. 15 deadlne was firm.

''If it gets to that point, we have to give notice, we will cease operations, he said.

Savings measures he suggested included cutting staff, pay and benefits and concessions from Post suppliers.

Nasti promised the management would listen to union alternatives.

Negotiators on both sides agreed to work around the clock to beat the deadline and George McDonald, president of the Allied Printing Trades Council said the unions would do ''whatever's necessary'' to reach an agreement.

Kalikow, a multi-millionaire developer-owner, has been hit financially by a weakened real estate market as well as an industry-wide depression in newspaper advertising sales.

Nasti said the Post's financial books will be open to union leaders, adding that management will meet with individual unions to discuss ''cost-saving proposals.''

''There is no hidden agenda,'' Nasti said. ''They understand that there is a $25 million annual gap that must be filled to allow Peter Kalikow to continue publishing the paper.''

At the same time as the Post meeting, the 10 unions at the Daily News called for advertisers to cancel contracts with that tabloid, which has been negotiating unsuccessfully all year with representatives of more than 2,000 employees.

News management has charged that overmanning and featherbedding have kept the newspaper from being profitable.

#90248u0552 09/05/1990 ~United Press International

TOKYO (SEPT. 5) UPI - Soviet Foreign Minister Eduard Shevardnadze asked Japan Wednesday to take a broader view in trying to resolve a 45-year territorial dispute blocking the flow of needed Japanese financial and technical aid to the Soviet Union.

On their first day of talks, Shevardnadze and Japanese Foreign Minister Taro Nakayama touched only briefly on their common claim to four small, Soviet-held islands off the northern coast of Japan.

Nakayama mentioned Japan's concern over the continued presence of Soviet troops on the islands, which the Soviets have occupied since the end of World War II.

Shevardnadze responded the withdrawal of Soviet forces from the islands should be considered in the framework of Asian security as a whole, not just Japan-Soviet relations, said a senior Japanese Foreign Ministry official who briefed reporters but asked not to be identified by name.

Shevardnadze and Nakayama will continue their discussion of the island dispute in detail Thursday, the last day of talks, the official said.

Japan has been demanding the return of the islands since the end of the war. But the Soviets say Japan lost all rights to the territories when it gave up claims to the Kuril Islands in the 1951 San Francisco Peace Treaty it signed with the United States.

At the end of World War II, the Soviet Union seized the islands and expelled the 17,000 Japanese who lived there.

As a result of the dispute, the Japanese and Soviets have never signed a formal peace treaty ending hostilities.

The issue also has prevented Japan from joining in the general thaw in relations Moscow has enjoyed with other major democracies and is the reason behind Japan's refusal to contribute economic assistance to Soviet President Mikhail Gorbachev's government.

Shevardnadze set forth a plan of confidence-building steps to improve relations gradually. His plan included exchanges between the Japanese and Soviet defense ministries and a request that each country inform the other before engaging in any large military maneuvers, the official said.

Nakayama did not agree or disagree to Shevardnadze's points, but proposed a working-level panel to discuss ways of improving the strained relationship, the officials said.

Shevardnadze and Nakayama also discussed the Persian Gulf crisis at length and issued a joint statement calling for the immediate withdrawal of Iraq from Kuwait, which Baghdad invaded Aug. 2, and pledging support for economic sanctions against Iraq.

Shevardnadze said on his arrival Tuesday he hoped his trip will mark a turning point in Japanese-Soviet relations and pave the way for Gorbachev to make a successful trip to Japan in 1991.

Gorbachev has said there would be little reason for him to visit Japan

unless significant progress is made on the island dispute beforehand.

Japanese officials have downplayed the significance of Shevardnadze's trip saying they do not expect either side to alter their basic stance on the island issue.

The islands have little economic importance, apart from the fishing waters around them, but carry tremendous emotional significance for the Japanese.

Prime Minister Toshiki Kaifu told a political rally Monday the issue cannot be set aside for the sake of better relations with the Soviets. Kaifu warned fellow members of his Liberal Democratic Party against optimism for a quick settlement.

Japan has reportedly offered a 10-point plan to swap return of the islands for various points of cooperation, including help for victims of the 1986 Chernobyl nuclear disaster.

But the Soviet Union, while eager for Japanese aid, fears surrendering territory in the Far East could compound its troubles with breakaway republics, analysts said.

#90248u0597 09/05/1990 ~United Press International

(SEPT. 5) UPI - Iraq's foreign minister is on his way to Moscow to discuss the Persian Gulf crisis. The Soviet news agency Tass says Iraqi Foreign Minister Tariq Aziz ''arrives in Moscow today for consultations.'' NO other details were given. President Bush is to meet with Soviet President Gorbachev in Finland on Sunday to discuss the crisis. Iraq formerly was a close ally of Moscow's in the Middle East. .

In Jordan, state-run Amman Radio denies reports that King Hussein plans to travel to Moscow to meet Gorbachev prior to the Bush summit in Helsinki. Hussein returned home unexpectedly yesterday from a trip to North Africa and Europe, where he tried to find a negotiated solution to the Persian Gulf standoff. The government says Hussein leaves this week for Baghdad to inform Iraqi officials about his trip.

Cocaine and marijuana use among American teen-agers apparently is dropping. A new study by the Partnership for a Drug-Free America says cocaine use among teen-agers fell 44 percent in the past year, and marijuana use declined by 27 percent. The study found that there is a growing feeling among teen-agers and adults that illegal drug use ''is NO longer acceptable behavior.''

Florida Governor Bob Martinez says he's ''ready for the next two months.'' Martinez won the Republican gubernatorial primary yesterday and will face

former Democratic Senator Lawton Chiles in the November 6th election. Chiles easily won the Democratic nomination. In Nevada, acting Governor Bob Miller won the Democratic nomination and will face G-O-P candidate Jim Gallaway.

#90248u0620 09/05/1990 ~United Press International

(SEPT. 5) UPI - Salary and working conditions are the main issues in teacher strikes in Michigan, Illinois and Pennsylvania. Nearly 40-thousand students are affected. At least 23-hundred teachers are on the picket lines in those states. Strikes also hit colleges in Michigan, Connecticut and Pennsylvania. But classes start today in two Illinois towns where teachers voted to end their walkouts.

Fire crews from two oil companies are fighting a chemical fire in Deadhorse, Alaska, in a chemical storage facility owned by a Houston-based company. NO injuries have been reported but some workers were evacuated. Deadhorse is the industrial center of Prudhoe Bay. One witness says the fire has now ''simmered down.''

Government scientists say an experimental blood-heating treatment for AIDS appears useless despite early claims of success. Two doctors at Atlanta Hospital earlier said the procedure cleared the AIDS virus from a patient and also shrunk an AIDS-related cancer. But a report by the National Institutes of Health says there appears to be NO evidence to support use of the procedure for AIDS.

The New York Times says eight youths charged in the stabbing death of a tourist from Utah were from a gang in which prospective members had to mug someone to gain admission. The paper says the suspects, accused in the death of 22-year-old Brian Watkins of Provo, Utah, belonged to a Queens gang named F-T-S. Watkins was killed in a Manhattan subway station on Sunday. He and his parents were in New York City to attend the U-S Tennis Open.

#90248u0687 09/05/1990 ~United Press International

ATLANTIC CITY, N.J. (SEPT. 5) UPI - Miss Texas, Suzanne Lawrence, won the talent competition and Miss Colorado, Karrie Mitchell, won the swimsuit contest Tuesday in the first round of preliminary competition in the 1991 Miss America Pageant.

Lawrence won the talent competition by singing Patsy Cline's ''Sweet Dreams.''

The quest for the 64th Miss America began Tuesday with the first of three nights of preliminary competition, during which the 50 contestants split into three groups and rotated through the talent, swimsuit, evening gown and interview competitions.

While the winner of the swimsuit and talent contests are announced each night, the results of the evening gown-interview preliminaries are kept secret in an effort to maintain suspense over the identities of the 10 finalists.

Those names will be announced during Saturday night's nationally televised finals, which culminates in Miss America 1990 Debbye Turner's ceremonial crowning of her successor.

-30- 1151

(SEPT. 5) UPI - The New York Times reports the eight youths charged in the weekend stabbing death of a 22-year-old Utah tourist on a Manhattan subway platform were part of a gang. The paper says prospective members had to mug someone before being admitted into the gang.

Prosecutors in Riverhead, New York, say a burglar seeking money for a trip stabbed a woman as she slept and then sat on her body and counted her heartbeats until she died. The incident occurred last month.

The judge in the pending murder trial of Christian Brando was removed from the case yesterday after prosecutors filed an affidavit of prejudice against him. The judge reduced Brando's bail from 10-Million to two-Million dollars.

Some 40-thousand students in Michigan, Illinois and Pennsylvania are taking it easy these days instead of starting a new school year. At least 23-hundred teachers are off the job in disputes over salary and working conditions.

The Children's Defense Fund says state governments need to regulate child care operations to assure health and safety protections. Nearly three-Million American youngsters are in out-of-home child care settings while their parents work.

Researchers say they have discovered the first genetic cause of the most typical form of arthritis- a painful disorder affecting nearly 16- Million Americans. The discovery could pave the way for treatments to directly attack the disease.

Actress Irene Dunne is dead at the age of 88. Dunne's business manager says ''her heart gave out'' last night in her Los Angeles home. Dunne received five Oscar nominations and appeared in ''Showboat'' and ''Life With Father.''

-30- 1828
#90248u0725 09/05/1990 ~United Press International
SEOUL, SOUTH KOREA (SEPT. 5) UPI - North Korea Wednesday called for joint military cutbacks and the gradual withdrawal of American troops from South Korea as the two sides began historic talks aimed at improving relations and ending the 45-year-old division of the Korean peninsula.

The South Korean package included a draft basic agreement for improved relations, moves toward cultural exchanges and cooperation, measures to build up political and military trust and steps to implement arms cuts.

The North, stressing both political and military steps for improved relations between the two sides, called for joint membership in the United Nations, arms cuts envisioning an eventual forces level of 100,000 for each and the release of jailed dissidents in the South.

The two sides presented their ideas for improvement of relations when South Korean Prime Minister Kang Young-hoon and his Northern counterpart, Yon Hyong-muk, got together in the unprecedented meeting.

Kang said the two Koreas now must express a determination and agreement to end mistrust and confrontation and manage and advance rational relations under conditions of stability. Their aim should be peaceful unification of the land, which was divided in 1945, he said.

Kang and Yon put forth their own proposals without going into debate. The meeting proceeded in a cordial atmosphere although there were some unmistakable gaps in their stands.

''Most urgent of all, are the questions of sharing one seat in the United Nations, ceasing Team Spirit military exercises (involving South Korean and U.S. forces) and releasing those jailed (in the South) for visiting the North,'' Yon said.

''If the political and military confrontation is resolved, there can be wide-reaching cooperation and exchanges in economic, cultural and various social fields, based on true mutual trust.''

The two sides differed in details of the proposed arms and manpower cuts.

They were in agreement that slander against each other be stopped, a joint non-aggression declaration be made, a telephone hotline be installed between top military authorities of both sides, and arms and troop reductions be pushed.

Southern officials said the Team Spirit exercises are of defensive nature and release of jailed dissidents is an internal affair of the South.

''If they persist in their stand on these two issues, it will be difficult to produce agreement between the two sides,'' one official said.

Thursday's session at the Intercontinental Hotel in the South Korean capital was to be held in private.

The South Wednesday placed considerable emphasis on exchanges. Kang sought all possible forms of economic cooperation including joint ventures for manufacturing and joint development of resources.

Kang also sought agreement to help reunite dispersed family members, to

reconnect severed railroads and roads between the two sides and to get permanent liaison missions opened in each other's capitals.

Those talks are scheduled for Oct. 16-19 in North Korea.

Kang proposed Wednesday that both sides turn their offensive military structure into a defensive one, agree to keep equal numbers of troops and weapons, and reduce the size of their troops in accordance with their arms reductions.

Yon was more specific. He asked that forces cutbacks be carried out over three to four years in three phases, reducing the size to 300,000 for each in the first stage, to 200,000 in the second phase and to 100,000 finally.

He also proposed that 43,000 U.S. troops be withdrawn from South Korea in proportion to arms cuts by the two Koreas, all nuclear weapons be removed to turn the Korean peninsula into a nuclear-free zone, and no nuclear arms be produced or procured.

The North demanded specifically that the Team Spirit exercises be restricted, at least for the next two or three years if not for good.

The two Koreas agreed in principle that the current armistice setup in existence since the 1950-53 Korean War be replaced by a permanent peace arrangement.

Kang proposed that a meeting between South Korean President Roh Tae-woo and his North Korean counterpart, Kim Il-sung, be arranged for a full accord on all pending issues.

Yon repeated a North Korean proposal for a confederation of the two Koreas and also offered the establishment of a joint North-South military committee to settle military disputes.

#90248u0727 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The National Apartment Association called on apartment owners Wednesday to honor lease agreements with military personnel dispatched to Saudi Arabia and the Persian Gulf.

''President Bush has asked these fine men and women to make the ultimate sacrifice in service of their country,'' said Jerry Warshaw, president of the industry association.

''It behooves us, whose residents are serving in the Persian Gulf states, to show similar patriotic support for the sacrifices they are making on our behalf,'' Warshaw said.

-30- 726
#90248u0743 09/05/1990 ~United Press International
CAPE CANAVERAL, FL (SEPT. 5) UPI - Rocket engineers readied the shuttle Columbia for fueling Wednesday, setting the stage for a long-delayed predawn blastoff Thursday, NASA's first in four months.

Running more than three months behind schedule because of a hydrogen fuel leak, Columbia's seven-man crew is scheduled to thunder away on a 10-day astronomy mission at 1:20 a.m. Thursday.

The flight was delayed a week ago because of trouble with an on- board telescope but test director Mike Leinback said at a morning status briefing that everything was moving smoothly toward the rescheduled start of the Astro-1 mission.

''I've been through the (control center) firing room this morning,'' Leinback said. ''The mood is very upbeat. Everyone's very anxious for this mission. We're not tracking any problems at this time at all.''

A massive service tower was moved away from Columbia before sunrise. That cleared the way for the late afternoon start of the critical fuel loading operation.

Should any leaks show up like those that grounded Columbia in May and Atlantis in July, NASA's launchless summer would drag on into the fall and raise questions about shuttle maintenance and reliability.

Few shuttle crews have had as much trouble getting off the ground as Columbia's, but officials said the orbiter's third countdown in as many months was proceeding smoothly, with an 80 percent chance of good weather at launch time Thursday.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, plan to spend 10 days in space studying the most violent objects in the universe with a $150 million battery of high-tech telescopes.

NASA plans to follow Columbia's mission by launching the shuttle Discovery in early October on a high-priority $750 million flight to send the European-built Ulysses solar probe into an orbit around the poles of the sun.

Engineers hauled Discovery to launch pad 39B Tuesday night to ready the ship for liftoff amid concern about an apparent leak in one of the shuttle's two primary Freon cooling systems that threatens to delay the

critical mission.

NASA officials hope the problem can be fixed at the launch pad, but with only one day of spare time built into Discovery's launch processing schedule, the ship's Oct. 5 target data would appear in jeopardy. If Ulysses is not off the ground by Oct. 23, it will be grounded for 13 months to achieve the proper trajectory to the sun.

Columbia's mission is primarily devoted to the realm beyond the solar system. And unlike Ulysses and the Hubble Space Telescope, the instruments making up the Astro-1 observatory will remain in Columbia's payload bay throughout the flight, operated around the clock by the astronauts and scientists on Earth.

The flight represents the most ambitious attempt ever made to study high-energy X-rays and ultraviolet light from deep space, radiation that is blocked by Earth's atmosphere. The results of the Astro-1 mission may help scientists understand the forces that power such cosmic enigmas as quasars, supernovae and theorized but-as-yet-unseen black holes.

The mission originally was scheduled for launch March 6, 1986, but Columbia was grounded by the Challenger disaster.

Columbia was grounded again the night before its planned May 30 launch when sensors detected hydrogen gas spewing into the shuttle's engine room. Subsequent tests blamed the leak on damaged seals inside a massive 17-inch-wide ''disconnect'' fitting that allows the external fuel tank to be jettisoned in space.

The damage apparently was caused by scratches from tiny glass beads that somehow got into the fitting, possibly during its construction.

Columbia was equipped with a disconnect asssembly taken from the new shuttle Endeavour and, after the shuttle Atlantis was grounded by a similar leak in July, Columbia was cleared for another launch attempt.

#90248u0775 09/05/1990 ~United Press International

(SEPT. 5) UPI - A series of chemical explosions ripped through an oil field service facility near Prudhoe Bay, Alaska, causing a fire and creating a toxic cloud. Hundreds of workers were evacuated, but NO injuries were reported. Firefighters are battling the blaze, which officials say began last night in a shop operated by a firm that prepares oil drilling sites.

Thunderstorms that uprooted trees with winds of more than 70 miles-an-hour continued to pound south-central Louisiana early today. Hail, high winds and possibly waterspouts battered areas west of New Orleans. Elsewhere, clear skies and high temperatures covered much of the nation.

A federal judge in Los Angeles threw out a massive cash and cocaine payola case against a once-powerful record promoter yesterday. Judge James Ideman says government prosecutors improperly withheld key evidence from the defense. Prosecutors say they'll appeal the judge's ruling that they engaged in ''outrageous government conduct.''

Four people are dead in a family dispute in Nebraska. Authorities say a farmer apparently upset about marital problems and a family feud shot his wife, son and another woman, and then drove to a trailer home and killed himself. The other three bodies were found at the home owned by 74-year-old James Brezina and his 73-year-old wife.

Good news for Supreme Court nominee David Souter. The American Bar Association gave Souter its highest rating of ''well qualified.'' A-B-A spokesman Ralph Lancaster told Senate Judiciary Committeee Chairman Joseph Biden yesterday that Souter is ''well qualified for appointment to the Supreme Court of the United States.''

#90248u0799 09/05/1990 ~United Press International

HOUSTON (SEPT. 5) UPI - Kuwait's government-in-exile came to the financial rescue of six families of Persian Gulf hostages who are not receiving paychecks from their employer, Midland, Texas-based OGE Drilling Co.

Officials at the Kuwaiti Embassy in Washington issued a ''monetary gift'' Tuesday to the families with instructions that the amount not be made public.

Meanwhile, OGE executives said they have come up with about $20,000 as an advance on the hostages' salaries. The company last week said it had no money to issue checks on a scheduled Sept. 1 pay day.

Faisal Al-Kazemi, economic counselor at the Kuwaiti Embassy, refused to discuss whether the Kuwaiti payment would be repeated if OGE misses additional payrolls.

He said his government would not be able to help the 10 employees who escaped from Kuwait after the invasion and now find themselves laid off by OGE.

''We are sorry for them, but with the limited resources available to us, we are helping only the more difficult cases,'' said Al-Kazemi.

Donnita Cole, wife of OGE drilling superintendent John Henry Cole of Odessa, Texas, said, ''I am very, very grateful. It will make this month pass without worry,'' about how to pay the bills.

Patricia Hale of Spring, Texas, whose husband, Edward Hale, also is an OGE employee and hostage, called the Kuwaiti action ''a really nice gesture on their part. That pretty well covers the August paycheck,'' Hale said.

Of the 10 employees who fled the invasion, four have found jobs through OGE on U.S. projects, three have found other work, one is awaiting word on a position, one has filed for unemployment compensation and one is ''still waiting to see what happens over there,'' said OGE drilling coordinator Bill Schaub.

OGE executives said the $20,000 they issued to the six hostage employees' families was money that normally would be the profits or operating funds from their parent company, OGS Engineering Inc., a drilling consulting firm.

OGE specializes in providing drilling supervisors and superintendents to the state-run Kuwait Oil Co. OGE spokesmen have maintained they cannot pay the hostages' salaries until they receive money from Kuwait Oil.

Schaub said Tuesday that each of the six families would receive $3,200 ''as an advance against salaries and expenses we hope to recover from the Kuwait Oil Co.''

''We've been sending invoices to the Kuwait Oil Co., and it has been our intention that, whenever those funds come to us, we'd pay the salaries,'' Schaub said.

OGE was attempting to recover funds wired to its employees' Kuwaiti bank accounts in the days before the invasion, he added.

''When the invasion occurred, we contacted our bank and successfully stopped the wire transfer,'' Schaub said. ''The funds were stopped in a Kuwaiti bank in New York.''

But OGE could not obtain access to the money because the United States government froze all Kuwaiti assets in this country, he said, adding that Kuwait Oil owes his company $510,000.

Schaub also said his company would continue to pay the health insurance bills for the families through Feb. 1, 1991, the date OGE's contract with Kuwait Oil expires.

#90248u0820 09/05/1990 ~United Press International
(SEPT. 5) UPI - The Iraqi News Agency reports Foreign Minister Tariq Aziz arrived in Moscow today for meetings with Kremlin officials. Moscow and Baghdad have been close allies, but a Western diplomat in Cairo says the Iraqis are surprised the Soviets have sided with the United States in the Persian Gulf crisis. Aziz's visit to Moscow comes just days before President Bush meets with Soviet President Gorbachev in Helsinki, Finland, on Sunday.

Iraq says it will continue working to find an ''Arab solution'' to end the crisis. The Iraqi News Agency quotes an Iraqi government spokesman as saying the presence of Western troops in the region complicates the situation and ''would lead to an explosion in the region... threatening the interests of its countries and other world states.''

Several chemical explosions ripped through an oil service field in Deadhorse, Alaska, last night, igniting a fire and spewing a toxic cloud that forced hundreds of workers to flee this morning. There were NO reports of any injuries and oil production was NOT disrupted. Deadhorse is an oil industry service center for Prudhoe Bay and the other North Slope oil fields that produce one-fourth of the domestic oil supply.

Summer vacation continues for nearly 40-thousand students in Michigan, Illinois and Pennsylvania. Disputes over salary and working conditions have prompted at least 23-hundred teachers to go on strike. Some college professors in Connecticut, Michigan and Pennsylvania also are on strike, causing schools to conduct classes using administrators and temporary instructors.

(SEPT. 5) UPI - The shuttle Columbia is set to take off early tomorrow morning from Cape Canaveral on a 10-day astronomy mission. NASA officials say the countdown is proceeding smoothly and engineers will begin fueling the shuttle today. Columbia's seven-member crew will use a 150-Million-dollar set of telescopes to study ultra-violet rays and high-energy X-rays.

Former Democratic Senator Lawton Chiles will square off against Florida Governor Bob Martinez in November. Both politicians easily captured their respective party gubernatorial nominations in Florida's primaries yesterday. Martinez hopes to become the first Republican governor re-elected in Florida in more than 100 years and says his campaign will focus on the future. Chiles predicts Democratic unity will help him win.

A 13-year-old boy accused of setting fire to 12-year-old David Opont last March is scheduled to go on trial today in New York City in a case that

drew national attention. The boy allegedly dragged Opont into a Flatbush basement and tried to force him to smoke something Opont thought was drugs. The attacker then set fire to Opont's clothing, burning him over 55 percent of his body.

Actress Irene Dunne died last night at her Los Angeles home at the age of 88. Dunne's business manager says ''her heart gave out.'' Dunne made her stage debut at five years old and went on to achieve fame as a singer, dancer, actress and comedienne. She appeared in many films, including ''Showboat'' and ''The White Cliffs of Dover.'' Dunn also served as a delegate to the United Nations.

#90248u0871 09/05/1990 ~United Press International

BRUSSELS, BELGIUM (SEPT. 5) UPI - NATO foreign ministers meet next Monday for a briefing by Secretary of State James Baker on the Helsinki superpower summit, the alliance said Wednesday.

There is the possibility President Bush also will come to the NATO session following his summit Sunday with Soviet President Mikhail Gorbachev, a NATO source said.

The meeting of foreign ministers will continue the Western alliance's discussions on the Persian Gulf crisis, NATO said. The United States has used regular meetings at NATO headquarters to push its allies into a greater role in the region.

At a special meeting of NATO ambassadors last Monday, the United States requested ships and aircraft to help move troops and equipment into the gulf as part of its massive military deployment. Italy, Britain and Portugal said they would comply.

NATO ambassadors, meanwhile, met again Wednesday to discuss the gulf crisis. U.S. ambassador Robert Taft thanked the three countries which agreed to supply ships and expressed hope that other nations could soon make similar commitments.

Another special meeting of NATO ambassadors is slated for Friday, with briefings on the deployment of American troops in the gulf by a U.S. assistant secretary of state and a representative of the Joint Chiefs of Staff.

The gulf is widely believed to be ''out of area'' for NATO, though some read the NATO charter as allowing joint action anywhere against threats to NATO members' security.

British Prime Minister Margaret Thatcher last week said NATO must be able

to act against new threats that arise in the post-Cold War world.

#90248u0874 09/05/1990 ~United Press International

HOUSTON (SEPT. 5) UPI - Proler International Corp. said the option it has held since December to buy the idled U.S. Steel plant in Baytown, Texas has expired.

David Sonnier, vice president and chief financial officer at Proler, would not say Tuesday how much money the company got back out of the abandoned plan to develop a mini-mill producing flat-rolled steel at the plant.

The plant, about 25 miles east of Houston, has been closed since 1986. It employed 2,000 people at its peak.

Proler's last annual 10-K filing with the Securities and Exchange Commission said the company had invested about $4.2 million, including refundable deposits, in the project since the end of its fiscal year on Jan. 31, 1990.

The 10-K filing provides for disclosure of total sales, revenue and pretax operating income, as well as sales for separate lines of products. Form 10-K becomes public information when filed with the SEC.

Sonnier said Proler deposited additional funds for the proposed purchase after Jan. 31 into a USX escrow account so the total amount of funds paid down for the deal was higher than $4.2 million.

The letter of intent to purchase land and the melt shop facilities at the plant expired Aug. 31, said Sonnier.

The revived plant was to be run by a joint venture known as Buffalo Steel, a partnership of Birmingham Steel Corp., Proler and Danieli & C. Officine Meccaniche of Milan, Italy.

Under the joint venture, Birmingham Steel was to be the operating partner, Proler would have owned 35 percent interest and supplied raw materials and Danieli would have built new steel rolling equipment for the plant.

Steve Sobat, spokesman for USX in Fairfield, Ala., would not comment Tuesday on whether USX had any other potential buyers lined up for the Baytown plant.

Sonnier said that if USX Corp., parent of U.S. Steel, eventually finds another buyer for the plant, Proler likely would benefit by becoming a partner with the new buyer or by at least selling raw materials to the plant.

Proler is one of the largest suppliers of scrap metal in the Houston area.

#90248u0914 09/05/1990 ~United Press International

DENVER (SEPT. 5) UPI - Former Denver developers Ken Good and Bill Walters, key figures in the failure of Silverado Banking, Savings and Loan, have refused to appear before a congressional hearing to explain how they maintain an affluent lifestyle, it was reported Wednesday.

The Denver Post said Good and Walters, who told Congress earlier this year they had a ''negative net worth,'' defaulted on about $130 million in loans from Silverado, a thrift that failed in 1988. One of its former directors was Neil Bush, son of President Bush.

The developers earlier agreed to voluntarily testify Thursday before a House Banking Commmittee subcommittee to explain how they can maintain expensive lifestyles if they don't have any money.

Committee chairman Rep. Frank Annunzio, D-Ill., said he will seek a subpoena to force Good and Walters to appear before the committee later. A subpoena would require a vote of the majority of the Democrats on the panel, as well as approval of the full committee.

Walters refused to appear Thursday because he couldn't get a guarantee that the hearing would be closed to the public, according to subcommittee spokesman Tom Seppy.

A spokesman for Good said he had a scheduling conflict.

Both men told the House Banking Committee in June that they once were worth more than $100 million, but now had a ''negative net worth.''

The committee has since discovered that Good owns a $450,000 home near Tampa, Fla., a lot in the same subdivision worth $3,422, a 1984 Maserati, and an $800,000 promissory note from his former home construction company, Gulfstream Housing Corp., which is secured by a resort home in Vail, Colo.

Walters reportedly is living in a $1.9 million estate in Orange County, Calif., owned by a trust whose beneficiary is his wife, Jacqueline.

Walters' wife also owns a $250,000 trailer at Laguna Beach, Calif., and a $1 million condominium at the Vintage Club in Indian Wells, near Palm Springs, Calif.

#90248u0926 09/05/1990 ~United Press International
CHICAGO (SEPT. 5) UPI - Widespread buying supported the grain market early today.

Soybeans were higher and grain futures were mostly higher at midmorning on the Chicago Board of Trade.

Some of the demand for corn and soybeans was attributed to carryover from Tuesday's late rally. Additional support came from the weekly crop reports indicating crop development continues behind normal in much of the Grain Belt.

Forecasts for above-normal temperatures the rest of the week also kept a floor under corn and soybean values.

Soybean products were supported by overnight sales of soybean oil to Pakistan and soybean meal to the Philippines.

Wheat futures were higher on a slight pick-up in export business. Commercials were the main buyers on indications the market was oversold, but gains were limited by adequate supplies around the world.

Country movement was light except for moderate farmer selling of corn and beans in the western Corn Belt.

Interior and Gulf basis levels were steady.

The midmorning prices:

Corn Sep 2.42 3/4 up 2; Dec 2.35 1/4 up 1; Mar 2.44 up 3/4.

Soybeans Sep 6.11 up 3; Nov 6.25 1/2 up 1 1/4; Jan 6.39 up 1 1/2; Mar 6.52 1/2 up 2.

Wheat Sep 2.62 up 5 3/4; Dec 2.78 3/4 up 4 1/2; Mar 2.90 1/2 up 4 1/4.

Oats Sep 1.08 3/4 up 1; Dec 1.19 3/4 up 1/4; Mar 1.31 1/4 up 1/4.

#90248u0930 09/05/1990 ~United Press International
ELKHART, IN (SEPT. 5) UPI - State and local officials are trying to help a union that wants to preserve about 700 jobs at an American Home Products Corp. plant, in case the company starts making the plant's major products elsewhere, a newspaper reported Wednesday.

The plant makes such popular non-prescription medical products as Anacin, a headache pain remedy, and Preparation H, a hemorrhoid cream. The

situation was reported in The Indianapolis Star.

Connie S. Malloy, president of Oil, Chemical and Atomic Workers Union Local 7-515, said Tuesday the union expects the company to announce on Friday plans to shift some operations out of Elkhart. She said she expects the company toeventually close the plant.

The Indiana Department of Employment and Training Services is exploring whether other companies might have work that could be done at the plant, or if employees might be able to buy the factory, said Stephen S. Sellers, spokesman for IDETS. He said job-training program officials have agreed to spend up to $10,000 in Job Training Partnership Act funds on seeking the alternative work.

Elkhart Mayor James P. Perron said company executives told him in April of tentative plans to phase out the factory over a three-year period.

Various sources indicated they believe American Home Products wants to move production to Puerto Rico to gain certain income tax exemptions for promoting economic growth in Puerto Rico and other U.S. territories.

Company spokeswoman Carol Emerling said a company review of plans for the factory will be released soon this month.

Malloy said the union believes the company will announce plans Friday to move Anacin production out of Elkhart. She said she expects no closing plans for the factory to be announced until after Sept. 15, when a new labor contract takes effect that requires a one-year notice of a plant closing.

Anacin products amount to about half the factory's production, she said.

NEW YORK (SEPT. 5) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.00-83.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.005-137.00 c-lb.

Lead, common, U.S. primary producers 50.00-58.00 c-lb.; U.S. non- primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $250.00-$270.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50- 4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $110.00-$115.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $484.50-$490.00; dealer- approx., $486.00-$488.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $113.00-$118.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 275.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 82.00-88.00 c-lb.

#90248u0959 09/05/1990 ~United Press International
SYRACUSE, NY (SEPT. 5) UPI - A phrase has been added to a memorial wall dedicated to 35 Syracuse University students killed in the bombing of Pan Am Flight 103 specifying the jet was destroyed by a terrorist bomb.

The change was made because some parents at the April dedication were upset that the memorial originally did not make it clear whether the disaster was an act of nature or terrorism.

The words ''caused by a terrorist bomb'' were added to the inscription last week, said Darryl Geddes, a spokesman for Syracuse University.

The students were among 270 people killed Dec. 21, 1988, when a bomb investigators believe was planted by terroists exploded while the jet was in flight over Lockerbie, Scotland.

The explosion and crash killed all 259 people aboard the aircraft and 11 people on the ground.

The inscription on the wall now reads:

''This Place of Rememberance is dedicated to the memory of the 35 students enrolled in Syracuse University's Division of International Programs Abroad who died with 235 others as a result of a plane crash December 21, 1988, over Lockerbie, Scotland, caused by a terrorist ''ver L

The limestone wall, which sits on a plaza behind steps leading to the university's main campus, also includes a list of the students' names.

''We were confronted by a small group of parents who felt that the university had been most insensitive in their failure to specifically

identify the cause of the crash as a terrorist bombing, and thereby allowing the event to be viewed as an accident,'' said Ronald Cavanagh, vice president for undergraduate studies.

''They felt that the act was one of murder, a malicious act. They wanted it clearly identified, and that there should be a sense that folks of good conscience ought to pursue the perpetrators.''

The university intends to send photographs of the reworked inscription to parents of the victims, he said.

#90248u0985 09/05/1990 ~United Press International

DALLAS (SEPT. 5) UPI - Robert McTeer Jr., senior vice president at the Baltimore branch of the Federal Reserve Bank of Richmond, was named president of the Federal Reserve Bank of Dallas.

He is scheduled to resume his new duties Feb. 1.

McTeer, named to the position Tuesday, will replace Robert Boykin, who plans to retire after 37 years at the Dallas bank, including 10 years as head of one of the 12 regional reserve banks that make up the nation's central bank.

The Federal Reserve manages the country's money supply and provides regulatory supervision for depository institutions.

The Federal Reserve division in Dallas supervises Texas and portions of northern Louisiana and southern New Mexico. It employs about 1,100 people locally and another 500 people in three regional offices in Houston, San Antonio and El Paso.

Boykin started at the Dallas bank in 1953 with the institution's legal department and was promoted to assistant counsel in 1959. Following a variety of assignments, Boykin was named first vice president of the Dallas bank in 1976 and became president on Jan. 1, 1981.

McTeer, 47, has 22 years with the Federal Reserve, where he started as an economist with the Federal Reserve Bank of Richmond. He has handled assignments ranging from senior officer of the bank's Fiscal Agency and Securities Department, to special assistant to the president and first vice president. McTeer has been senior vice president in charge of the Baltimore branch since 1980.

McTeer's responsibilities include overseeing construction of Federal Reserve's new headquarters near downtown Dallas. The 764,000- square-foot headquarters, scheduled to be completed by early 1992, is slated to cost

between $100 million and $200 million.

#90248u0988 09/05/1990 ~United Press International

WISCASSET, ME (SEPT. 5) UPI - Police and animal shelter officials said Wednesday they are worried the disappearance of dozens of cats in Lincoln County might mean the animals are being stolen either for medical research or satanic rituals.

No one has found any evidence the cats are being sacrificed or sold to medical labs, officials said. But they said the sheer number of missing cats indicates something out of the ordinary is happening to the animals.

''There are sections of the county that are really being hit hard, and it's more than just an attack by another animal or being run over by a car '' Lincoln County Sheriff William Carter said.

Ann Harford, manager of the Lincoln County Animal Shelter, said more than 50 cats have been reported missing since mid-July, far more than usual.

Most of the cats have disappeared during daylight hours from porches, driveways, yards and other areas near their homes.

''Most of these cats have turned up missing during the daylight hours, while people are not at home,'' Harford said. ''It is not like the cats went out and became missing overnight.''

''Also, many of the cats are animals that the owners never expected to wander off,'' she said.

Both Harford and Carter said the cats might have been taken for use in satanic rituals, a possibility that Carter said he recently discussed with state animal welfare officials.

''We are looking at that, of course. We have discussed that,'' Carter said. ''This does happen. We know what they need cats for.''

#90248u0993 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - Rural America is likely to lose some congressional seats as a result of the 1990 census, but the change is unlikely to significantly undercut the political power of the farm bloc, analysts and lobbyists say.

The steady decline in the number of rural residents since the Great Depression, when one-fourth of Americans lived on the farm and there were

6.8 million farms, has led to recurrent predictions of the downfall of the farm bloc. Nonetheless, farm-state legislators continue to bring home the bacon.

Just in recent years, they persuaded Congress to pass two disaster- relief bills and, during floor debate this summer on the new farm policy bill, won on all but two relatively minor amendments.

A highly touted challenge that would have denied crop support payments to large farmers was defeated by a 100-vote margin in the House, where seats are apportioned on the basis of population.

There have been recent estimates that this year's census will lead to 19 House seats shifting among states. The Midwest, Deep South and Northern Plains, which include major farming and ranching regions, are considered most vulnerable to loss of seats. The West, Southwest and Southeast are likely to gain seats.

''There are definitely going to be (fewer) rural seats in Congress, no question about it,'' said Brad Eckart, director of political education for the American Farm Bureau, who disagreed with suggestions of a decline in farm clout.

Eckart noted that virtually all senators have farm constituents and that in the House, lawmakers recognize the breadth of the agricultural and food industries.

The Agriculture Department says agriculture accounts for about 17 percent of the gross national product.

One reason for the enduring strength of the farm bloc, lobbyist John Gordley said, is the jurisdiction of the House and Senate Agriculture Committees. In addition to the farm program, the panels oversee the futures markets, national forests, public feeding programs and school lunches.

Programs like food stamps help the panels win urban support for farm-related bills, a fact Rep. Major Owens, D-N.Y., noted during July's debate on farm subsidies. ''We have kept the faith,'' Owens said, but it was time for reform.

''It is the agriculture committees that are the bastions of agricultural influence in this town,'' Gordley said. ''The agriculture committees will be there even if'' there are fewer congressmen from farm districts.

Rather than demographic trends, Gordley said the more immediate political threat is budget pressure to curtail farm spending.

About one-fourth of the U.S. population lives in rural areas, with about 5 million people on the farm.

Calvin Beale, an Agriculture Department demographer, said he had expected the 1980s to show a slight growth in the rural population but the preliminary Census Bureau figures ''make me wonder if that will be the case or not.''

Beale said the 1980s might ''prove to be intermediate'' between the record of the 1960s, when rural areas showed a net loss of about 1.7 million people, and the 1970s, when a net immigration of about 4.5 million people sparked talk of a rural renaissance.

''Whatever we come up with is going to pale in comparison with the 1950s '' when rural figures dropped by 5.5 million people, Beale said.

-30- 3597

#90248u0996 09/05/1990 ~United Press International

(SEPT. 5) UPI - School bells are ringing throughout the country, but teachers in many states have more pressing problems. Teachers are out on picket lines in Michigan, Illinois and Pennsylvania. The walkouts involve at least 23-hundred teachers and affect nearly 40-thousand students. The disputes center on money and working conditions.

Police say a farmer upset about marital problems apparently shot his wife, his son and another woman before killing himself near Octavia, Nebraska. A prosecutor says police believe James Brezina shot the three and called police to report the shotgun killings... then drove to a lake-side trailer home where he apparently shot himself to death. Officials say Brezina's wife recently filed for legal separation and the couple had quarreled about land.

Hundreds of oil workers fled when an explosion and fire created a toxic cloud near Alaska's Prudhoe Bay. Chemical fire fighters battled a fire ignited by a series of chemical explosions last night in an oil service facility. Officials say the fire started in a shop run by Dowell Schlumberger, a firm involved in preparing oil drilling sites. NO one was injured. There was NO disruption of oil production at the North Slope oil fields.

Forecasters are keeping an eye on a new tropical depression that has formed out in the Atlantic off the west coast of Africa. It is the 10th of the year and comes at the height of the traditional hurricane season. So far the tropical depression presents a problem to NO one.

#90248u1000 09/05/1990 ~United Press International
DETROIT (SEPT. 5) UPI - The weekly trade paper Metalworking News has folded after 30 years of publishing, effective with the Sept. 3 edition, its editors said Wednesday.

Kenneth Moore, the paper's editor-in-chief, blamed a weak economy and lower advertising levels for the closing of the paper, which tracked equipment and material orders placed by steel-intensive companies like car makers.

''The economy this year turned soft again and the company made a business decision to cease publication,'' Moore said.

Metalworking News was sold to Hitchcock Publishing Co. of Carol Stream, Ill., a division of Capital Cities ABC Publishing in New York. There had been plans to combine it with another steel industry publication this October.

Metalworking News began in 1960 as a weekly published by Fairchild in New York. Through the 1970s and 1980s, it was part of American Metal Market, a daily publication. In early 1987 it was decided to spin off Metalworking News as an independent publication, bolstered by the turnaround in the economy and manufacturing sector.

Metalworking News had a circulation of about 77,000, but less than half of those were paid subscriptions, Moore said. Paid subscribers will receive American Metal Market for the balance of their subscriptions.

Metalworking News employed eight editors and reporters and 10 others in non-editorial jobs.

-30- 1549
#90248u1021 09/05/1990 ~United Press International
WASHINGTON (SEPT. 5) UPI - On the eve of the release of the nation's health goals for the year 2000, a look Wednesday at the 226 goals set in 1980 for 1990 show about half were met, 26 percent were not and there was inadequate data to assess the rest.

''I think we've done quite well,'' said Dr. J. Michael McGinnis, director of the Department of Health and Human Service's Office of Disease Prevention and Health Promotion.

''If you look at the ultimate impact on mortality and improved quality of life for people at various stages, we've done quite well. Obviously, there are some areas where there are problems.''

Health Secretary Louis Sullivan is scheduled to release Thursday his health

targets for the coming decade. Many of the goals for the year 2000 will be similar to those set in 1980 for 1990 because little or no progress has been made. In some cases, the agenda will include new objectives, such as reducing the incidence of acquired immune deficiency syndrome. Because little was known about the disease in 1980, AIDS as not included in the goals set for 1990.

Of the 226 goals set in 1980 for 1990, McGinnis said approximately 48 percent have been achieved or are likely to be met, 26 percent were unlikely to be met and insufficient data made it impossible to assess 26 percent. Final figures will be available in 1991.

McGinnis said some goals were included in 1980 despite the fact that there was no source of information on them.

''We hoped it would drive our efforts to collect data and indeed it did for some ... but we have not come as far as we had hoped,'' he said.

In general, progress was made in the 1980s to meet such goals as reducing infant mortality, reducing childhood and adolescent deaths, improving awareness of the hazards as high cholesterol and sodium intake and reducing the incidence of gonorrhea.

However, no progress was made to achieve such goals as reducing teenage pregnancy, virtually eliminating preventable childhood diseases such as measles and mumps, reducing the incidence of syphilis, reducing smoking among kids and lowering the number of couch-potatoes and overweight people.

Here are selected goals set for 1990 and their most recent status:

-There should be almost no unintended births to girls 14 and under. Status: Will not be met. 1984 figure was nearly 10,000 such births.

-National infant mortality rate should be reduced to no more than nine per 1,000 live births. Status: 1989 figure was 9.7 per 1,000, the lowest ever recorded rate in the United States but not meeting the goal.

-Incidence of fetal alcohol syndrone should be reduced by 25 percent. Status: Need to collect better data on problem, but McGinnis said, ''The reality is that we're not going to hit the goal.''

-Immunize at least 90 percent of all children against measles, mumps, rubella, polio, diphtheria, tetanus and pertussis. Status: Will not be met especially in low-income groups.

-Cut incidence of gonorrhea to 280 per 100,000 population. Status: Probably will be met.

-Cut incidence of syphilis to seven per 100,000 and of congenital syphilis to 1.5 per 100,000 children. Status: Problem worsening. 1985-1988 figures show 50 percent increase for syphilis and doubling for congenital syphilis.

-Reduce by 25 percent the number of adult smokers. Status: Nearly met.

-Number of women who smoke during pregnancy should be no more than half of all women smokers. Status: Will not be met.

-Reduce to 6 percent the number of children and youth who smoke. Status: Will not be met. In 1989, 19 percent of all high school seniors were daily smokers.

-Fatalities from alcohol-related motor vehicle accidents should be reduced to less than 9.5 per 100,000 population. Status: Has been met.

-Growth retardation of infants and children due to inadequate diet should be eliminated. Status: Has not been met. Problem exists for about 5 percent of overall population but as high as 16 percent among minorities.

-Significant overweight problem for adults should be decreased to 10 percent of men and and 17 percent of women. Status: Will not be met. 1976-1980 data (most recent) found 26.3 percent men and 29.6 percent women were overweight.

-Average serum cholesterol level in adults should be at or below 200 milligrams. Status: Will not be met but situation improving.

-Average daily sodium intake for adults should be reduced to at least 3-6 grams. Status: Will be met.

NEW YORK (SEPT. 5) UPI - Walter Yetnikoff stepped down Wednesday as chief executive officer of CBS Records, saying he will continue as a consultant to Sony Corp., owner of the multibillion-dollar recording company.

Yetnikoff's decision to ''go on sabbatical now,'' transmitted to Sony Chairman Norio Ohga Tuesday, did not take the music industry completely by surprise, since he already was regarded as a lame duck. But the actual reasons for the 57-year-old Yetnikoff's departure still were a mystery.

His departure came five weeks after the publication of ''The Hit Men'' by Random House, an expose of the multi-billion dollar record industry in which Yetnikoff has been a major player since 1971. The book charged that the industry is rife with deals, drugs, and payola.

Yetnikoff's decision was announced by CBS Records, which quoted him as saying he had decided to ''accelerate'' his previously announced intention to serve as head of the company for only two more years.

''Following a sabbatical leave of a few months or so, I will work together with Norio Ohga on long-term projects affecting the future growth of Sony '' Yetnikoff said in the CBS Records announcement.

In reply, Ohga issued a statement saying CBS Records was fortunate in having a strong and resourceful management team to take over from Yetnikoff. He named three executives - Tommy Mottola, head of CBS Records' domestic business; Robert Summer, president of CBS Records International;

and Neil Keating, president of Columbia House - to ''run the day-to-day operations'' of the company.

''The business has never been in better shape, both financially and operationally,'' Ohga said.

''This is therefore a good time for Mr. Yetnikloff to focus on his other priorities and for us to continue to build an organization and management structure appropriate to CBS Records' future growth potential.

''Mr. Yetnikoff's record speaks for itself. The company has grown and prospered under his leadership. We understand and respect his decision and are grateful that he will make himself available as a special advisor to me.''

Yetnikoff brought many stars to CBS records, including the Rolling Stones, Billy Joel, Bruce Springsteen, Cyndi Lauper, Michael Jackson and Barbra Striesand.

In recent years, Yetnikoff's relationships with several stars, including Springsteen and Jackson, appeared to have deteriorated, according to industry observers.

Sony's announcement that Yetnikoff had only two more years to go as chief executive officer also was seen as putting him in the position of a lame duck.

Whether or not disclosures in ''The Hit Men,'' a book by Vanity Fair contributing editor Fred Dannen, had anything to do with Yetnikoff's speeded-up departure also was a matter of industry speculation.

The book was the first to attack the people and politics involved in running the industry, including Yetnikoff, Clive Davis of Arista Records and David Geffen, who put together the label bearing his name.

Yetnikoff joined CBS Records as an attorney and became president of CBS Records International in 1971. In 1975, he was made president of CBS Records and was instrumental in its sale to Sony in 1988 for $2 billion - for which he reportedly received a $20 million bonus.

Yetnikoff's departure came a day after a federal judge in Los Angeles dismissed all charges against record promoter Joseph Isgro and two other defendants and declared a mistrial, ending the biggest music payola trial since the 1960s.

Isgro had been charged with making ''illicit and illegal'' payments, often in the form of cocaine, to music directors at radio stations in return for the broadcast of records he was promoting on behalf of such major record

companies as Columbia, Warner, RCA, MCA and Polygram.

Isgro's co-defendants were Raymond Anderson, a former vice president of promotion at Columbia Records, and Jeffrey Monka, a convicted drug offender.

#90248u1044 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - While most Americans are choosing healthier foods, the school lunch menus millions of children face each day ''are still the old, traditionally high-fat variety,'' a consumer group reported Wednesday

Public Voice for Food and Health Policy released a study that also found that, no matter where they get their lunch, students eat too much fat.

''Pizza, hamburgers and fried chicken dominate the main course options, and french fries, canned fruits packed in sugar syrup, and cakes and cookies most often complete the high-fat meal,'' the study said.

As it did last year, Public Voice said the federal government should require schools to limit the amount of fat in a school lunch to 30 percent of total calories. This year, it also called on Congress and states to impose the standard if the Agriculture Department won't.

''We can't have vague policies any more,'' said Ellen Haas, the group's leader.

Although school food directors also bear responsibility, Haas named the Agriculture Department as the chief culprit. In addition to failing to restrict fat content, she said the agency does not give schools enough help in planning low-fat meals and but does provide too many free foods, such as chicken nuggets, that are high in fat.

''The school lunch programs depend upon the free commodities (to help keep prices down) and the high proportion of high-fat foods acts to thwart efforts by directors to reduce fat,'' the report said.

Department spokesman Phil Shanholtzer said the government is sticking with its dietary guidelines that students should ''eat a variety of foods'' in moderation, rather than adopting a strict standard.

As for commodities, Shanholtzer said the government provides 20 percent of the food used for school lunches and noted, ''Schools have a pretty large choice as far as the additional foods that they buy.''

The school lunch program cost taxpayers $3.5 billion last year.

Public Voice said health authorities have agreed Americans should limit fat to 30 percent of their calories, but said recent surveys showing school-age children get 37 percent to 39 percent of their calories from fat.

High-fat diets can lead to heart disease and obesity and may be connected to cancer.

''Although Americans have changed their eating habits considerably over the last decade ... school lunch menus are still of the old, traditionally high-fat variety,'' Public Voice said.

One problem is that 24 million children who eat school lunches each day favor the foods, like cheeseburgers, that may be bad for them. However, Patricia Morris, research director for Public Voice, said schools could present low-fat meals children would like.

''I don't think you have to go to granola and bean sprouts,'' she said, noting baked chicken or fish can be substituted for high-fat fried foods, and spaghetti with meatballs is a lower-fat choice than lasagna. Taco fillings can be refried beans rather than ground beef and frozen yogurt could replace surpy fruit and cookies.

The American School Food Service Association said school lunches meet federal guidelines and ''parents can feel secure in relying upon the school lunch program for healthful meals.''

Marshall Matz, a spokesman for the association, said schools have acted to give students healthful choices by setting up salad bars and offering pasta and potatoes.

''What children choose is up to them,'' Matz said. ''I think there has been tremendous progress but Public Voice isn't aware of it.''

Public Voice's conclusions were based on a one-week survey in which Current Science magazine asked its schoolchildren readers what was on their school's lunch menu and what they actually ate. Schools provided 58 percent of the meals, 32 percent were prepared at home and 9 percent came from other sources.

The survey drew responses from 163 middle schools in 41 states. It concluded that menus were more likely to offer high-fat foods than lower-fat choices.

#90248u1045 09/05/1990 ~United Press International

EAST RUTHERFORD, NJ (SEPT. 5) UPI - Lawrence Taylor ended a 44-day holdout Wednesday, when he signed a three-year contract with the New York Giants that the all-Pro linebacker's agent said made him the highest-paid defensive player in the NFL.

Taylors contract, which runs through 1992, is worth an estimated $5 million over three years. Taylor signed about noon Wednesday, three hours after his agent Joe Courrege arrived at Giants Stadium to talk with club officials.

''I'm home,'' Taylor said upon walking into the Giants press room after signing.

''The important thing now is to get ready for the Eagles on Sunday. Regardless of if I am happy or not, they're gonna be here.''

Taylor, who was scheduled to earn $1.21 million in this last year of his old contract, had said since training camp oopened he would not report unless the Giants paid him $2 million per year.

''I put my pride aside,'' Uaulor said. ''Nobody gets exactly what they wanted. It's not like that. I look kind of stupid bitching over the money I am making because it's good money.''

Giants owner Wellington Mara said he never doubted Taylor would sign in time to play the season opener, ''but it's nice to have it over with,'' the owner said.

#90248u1059 09/05/1990 ~United Press International

(SEPT. 6) UPI - For the second consecutive week, NBC grabbed most of the top spots in the weekly Nielsen ratings race, but this time the network did it with reruns rather than previews of new shows, it was reported Tuesday.

''Cheers'' knocked off CBS's ''60 Minutes,'' which had been in the No. 1 spot for two weeks with its Iraq-related programming, and the newsmagazine fell to a tie for 15th place for the week ending Sept. 2.

A special two-hour broadcast of ''In the Heat of the Night'' Tuesday night catapulted the NBC show to second place, its best ranking ever, the network reported.

The highly touted Thursday night competition between NBC's ''The Cosby Show'' and Fox's ''The Simpsons,'' although both shows are in reruns, showed another disparity for the second week. ''Cosby'' landed in 11th place and ''The Simpsons'' tied for 53rd place with three other shows.

The second half of NBC's repeat of the two-part miniseries, ''I Know My First Name is Steven,'' made a respectable showing in ninth place, compared with the first half, which was broadcast during the previous ratings period and finished in a tie for 51st place.

NBC placed seven shows altogether in the top 10, while CBS had two and ABC's lone entry was ''Roseanne'' in eighth place.

CBS won the Sunday night movie race with ''Who Gets the Friends?'' tying for 53rd place with a CBS News special, ABC's ''The Young Riders'' and ''The Simpsons.'' NBC's theatrical movie ''Mad Max: Beyond Thunderdome'' was in a three-way tie for 63rd place and ABC's entry, ''Love Among Thieves,'' tied for 73rd place with a new Fox show ''Comic Strip Primetime.''

With the CBS shows ''Designing Women'' in a tie for third place and ''Murphy Brown'' tying for fourth place, it was just enough to edge the network into second place in the weekly ratings.

In ratings for the week ending Sept. 2, according to the A.C. Nielsen Co., NBC remained in the lead with a 10.6 rating and a 20 share. CBS was second with an 8.8 rating and a 17 share and ABC posted an 8.7 rating and a 17 share. Fox finished the week with a 5.3 rating and a 10 share.

For the third week in a row, NBC was the winner on Monday, Tuesday, Wednesday, Thursday and Saturday nights, its best showing since June 1, 1987, the network said. CBS won Sunday and ABC held Friday.

In the 50-week season-to-date competition, NBC maintained a 13.0 rating and a 23 share, followed by CBS with an 11.1 rating and a 19 share, and ABC with an 11.6 rating and a 20 share. Fox has a season-to- date record of a 6.3 rating and an 11 share.

ABC's ''World News Tonight'' with Peter Jennings was in the No. 1 spot for the 34th week in a row with a 10.0 rating and a 21 share. ''CBS Evening News'' with Dan Rather was second with a 9.3 rating and a 20 share, while ''NBC Nightly News'' with Tom Brokaw was third with an 8.7 rating and a 19 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top 10 programs for the week ending Sunday, Sept. 2, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. In the Heat of the Night (NBC)
3. (tie) Empty Nest (NBC)
4. Designing Women (CBS)
5. (tie) Bill Cosby Special (NBC)
6. Murphy Brown (CBS)
7. Golden Girls (NBC)
8. Roseanne (ABC)
9. NBC Monday Movie (NBC)
10. Different World (NBC)

#90248u1063 09/05/1990 ~United Press International

BUJUMBURA, Burundi (SEPT. 5) UPI - Pope John Paul II landed in the tiny state of Burundi Wednesday on the second leg of his 11-day African tour and called for an end to the former Belgian colony's history of tribal violence.

In the hot, humid air of the capital Bujumbura, deep in the heart of Africa, the 70-year-old pontiff called for the people to unite and end the long history of fighting between the majority Hutu tribe and the elitist Tutsi tribe.

He was given an enthusiastic welcome by about 4,000 people in the former Belgian colony.

Speaking in French, the pope said, ''I want to be for you a messenger of faith and peace... I am thinking of the trials that have marked your people, involved in conflicts which have torn apart your community and wounded too many families.''

The Tutsi, although comprising only 15 percent of the population, have traditionally dominated Burundi society and over the past 30 years perpetuated a series of massacres of the Hutu.

As many as 60,000 people may have died in the most recent of these, in 1988, which prompted Burundian President Maj. Pierre Buyoya to embark on a National Unity reform program.

''Now the road of reconciliation and concord has opened before you,'' John Paul said. ''You have started on the path: hurry your pace because these hills of yours must never again see violence and division.

''Consolidate your unity, not with resignation and reluctance, but rooting

it solidly by means of reconciliation and pardon.''

The pope's visit to Burundi has drawn both criticism and appeals for help from opposition groups in the country.

He was welcomed at the airport by Buyoya, the military ruler who in May promised his people a civilian government, a ''charter of national unity'' and a referendum on how their little country should be run.

The pope then drove seven miles in bright sunshine into the capital, which lies on the northern shore of Lake Tanganyika, past banners proclaiming him and Buyoya as ''pilgrims of unity.''

As he left Tanzania for Burundi on the fifth day of his tour, the pope appealed to the world not to ignore the poverty and despair of millions of Africans.

''In the name of our common humanity, I appeal to the more developed nations of the earth to inaugurate a new era of solidarity with Africa, based on justice and respect,'' the pope said.

Earlier Wednesday, large crowds heard Pope John Paul II celebrate mass at the foot of Mount Kilimanjaro, in the northern Tanzanian town of Moshi.

The snowy summit of the 19,340-foot free-standing mountain - Africa's highest - broke through the clouds as the pope entered Kilimanjaro Stadium in an open car.

The pope will spend two days in Burundi, where 3.12 million of the country's 656.3 million people are Catholics. He then plans to fly north to tiny, landlocked Rwanda for a further two days before taking off west across the continent to Ivory Coast.

#90248u1068 09/05/1990 ~United Press International

DIJON, FRANCE (SEPT. 5) UPI - A confrontation between U.S. and Iraqi troops - on the basketball court - has been scrubbed because of the Persian Gulf crisis, organizers said.

The U.S. and Iraqi military teams had been selected in a random drawing to face each other in the first round of the Joan of Arc world military basketball championships, which open Friday in Dijon.

But, in the wake of Baghdad's Aug. 2 invasion of Kuwait, Iraq's squad has withdrawn, as have teams from Saudi Arabia and Senegal. Despite initial fears the tournament might have to be canceled, organizers now say enough teams will be present to play.

Andre Jeannin, president of the organizing committee, said he believed a U.S.-Iraq contest could have been played without incident, despite the tension between the two nations.

''Among athletes, it would have been fine,'' he said. ''We did, of course, have security measures planned. But I think between a group of American athletes and Iraqi athletes, there would not have been any problem.''

#90248u1070 09/05/1990 ~United Press International

HOLLYWOOD (SEPT. 5) UPI - ''Ghost,'' thrice deposed from the No. 1 spot in the weekly box-office rankings, has materialized at the top again and vanquished all pretenders to the title of summer ticket-selling champion.

The Patrick Swayze-Demi Moore surprise blockbuster was bested the previous week by newly released ''Darkman.'' Earlier in its eight-week run it was denied the top spot by distant paranormal cousins ''Exorcist III'' and ''Flatliners.''

But ''Ghost'' is No. 1 again and has yet to fade below No. 2 in its two months of release, raking in $8-9 million per week. Its challengers have fired and fallen back.

''Ghost'' zapped $9.9 million from 1,766 venues to bring it's total for Paramount to a smashing $125 million.

With an attendance increase of 33 percent during a week that included the Labor Day holiday, ''Ghost'' moved ahead of ''Total Recall'' ($116.6 million) to grab honors as most popular movie of the summer. The season's other major hit, ''Pretty Woman'' ($169.1 million), was released in the spring.

No. 2 last week was ''Darkman,'' which fell off only 1 percent from its opening week on 1,833 screens, and reaped $7.9 million. In two weeks the horror film has garnered $19.1 million.

''Presumed Innocent,'' the courtroom thriller starring Harrison Ford, moved up a notch to No. 3 with a gross of $5.8 million. In six weeks the gripping drama about a prosecutor attorney accused of murder has collected $67.4 million.

''Flatliners,'' the sci-fi tale of young medicos monkeying around with dead bodies and the afterlife, flattened out in its fourth week with a tally of $5.2 million and a total of $40 million.

Comedian Steve Martin could sing the blues over his ''My Blue Heaven,''

which dipped to No. 5 with a gross of only $3.1 million last week. Its haul in three weeks of release is a paltry $17.9 million.

At No. 6, ''Men at Work'' wasn't working at all. The Charlie Sheen- Emilio Estevez brother act as garbage men went down the storm drain to the tune of $3 million in its second week. So far it has picked up $7.6 million.

The only newcomer to open widely was ''The Lemon Sisters,'' a female bonding film of a singing trio in Atlantic City starring Diane Keaton, Carol Kane and Kathryn Grody. It was No. 12 with $2.1 million.

Worth noting: Jack Nicholson's ''The Two Jakes'' grossed $339,297 for 30th place in the rankings. In four weeks it has tapped out at a mere $9.3 million.

Altogether it was a booming Labor Day week with a total box-office gross of $99.8 milion, up from 1989's $90.9 million in North America's 23,000 theaters.

Daily Variety reported the total gross so far this year is $3.431 billion, as against last year's $3.471 billion for the same period.

The top 10, last week's gross, total gross, weeks in release:

1. ''Ghost,'' $9.9 million, $125 million, 8 weeks.
2. ''Darkman,'' $7.9 million, $19.1 million, 2 weeks.
3. ''Presumed Innocent,'' $5.8 million, $67.4 million, 6 weeks.
4. ''Flatliners,'' $5.2 million, $40 million, 4 weeks.
5. ''My Blue Heaven,'' $3.1 million, $17.9 million, 3 weeks.
6. ''Men at Work,'' $3 million, $7.6 million, 2 weeks.
7. ''Taking Care of Business,'' $2.8 million, $13.1 million, 3 weeks.
8. ''The Exorcist III,'' $2.7 million, $20.8 million, 3 weeks.
9. ''Young Guns II,'' $2.39 million, $34.2 million, 5 weeks.
10. ''The Witches,'' $2.30 million, $5.7 million, 2 weeks.

-30- 3648

#90248u1074 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Steffi Graf came back from a slow start to win 12 of the last 14 games and defeat Jana Novotna 6-3, 6-1 Wednesday for a semifinal berth at the U.S. Open.

Graf, the two-time defending champion and No. 1 seed, next plays the winner of the quarterfinal between fourth seed Zina Garrison and No. 6 Arantxa Sanchez Vicario.

''I didn't have the best start, that's for sure, but I got in it pretty well,'' said Graf, in quest of the 10th Grand Slam title of her career.

''I feel very good. I feel I'm in excellent position but I can't underestimate any of the other players.''

Novotna, who has taken merely one set from Graf in nine career meetings, broke service to open the match, then held to go up 2-0.

The 12th seed had another break point in the third game, which Graf saved with a service winner, and the 21-year-old West German went on to take the next four games.

Novotna fought back to break in the seventh game when Graf, venturing forward, netted a backhand volley. Graf, though, broke right back and held service to end the set.

Novotna won only one game in the second set, holding at love in the third game.

Novotna, a 21-year-old from Czechoslovakia, blamed her poor performance on the fact she was playing for the first time on the Stadium Court.

''I started very well, Steffi was making easy errors and I won the first two games,'' she said. ''Then I realized the court was much slower than the outside courts. The ball doesn't jump so high, she started coming to my backhand and I had trouble passing her.

''I had no chance this year to play on the Center Court. It's not just the whole atmosphere, but the court is different. I found it difficult to play serve and volley because the court is slower.''

Graf credited an effective slice with neutralizing Novotna's game.

Although Novotna is out of the singles, she and Helena Sukova have reached the semifinals in a bid to complete a Grand Slam in women's doubles.

The men's semifinal bracket also was to be completed Wednesday. Third seed Ivan Lendl was paired against No. 12 Pete Sampras, and at night it was to be John McEnroe against David Wheaton.

PLYMOUTH, MA (SEPT. 5) UPI - Mayflower II, a replica of the ship that carried the Pilgrims to Plymouth Rock, set sail in open waters Wednesday for the first time in nearly 30 years.

With its crew dressed in Pilgrim costumes, Mayflower II ventured out in open waters from the state pier in Plymouth around 9 a.m.

As part of the Festival of Sails, the vessel, accompanied by a flotilla of 75 boats, sailed out in Cape Cod Bay before returning to Plymouth, said officials at Plimoth Plantation, the museum that owns Mayflower II.

''We have a ship which sailed across the Atlantic in 1957, and is in fine sailing condition today. It seemed the time had come to begin showing the world this beautiful symbol once again under sail - the way people imagine her to be,'' said David Case, president of Plimoth Plantation.

In the 1950s, a group known as Project Mayflower began work on a reproduction of the ship that brought the Pilgrims to the New World in 1620. The Mayflower II was built in England as a symbol of Anglo- American friendship.

In 1957, the vessel duplicated its namesake's voyage, crossing the Atlantic in 55 days. However, the crew of the replica chose a more southerly route than that of the orignial vessel - not inappropriate, as the Pilgrims had planned to settle in Virginia before stormy winds and navigational errors steered the first Mayflower toward Massachusetts.

More than 11 million people have visited the Mayflower II since it docked at Plymouth.

WARSAW, POLAND (SEPT. 5) UPI - Soviet authorities barred three American Iroquois Indians on a peace mission from entering the Soviet Union because the covers of their passports were the wrong color, the official Polish news agency PAP reported Wednesday.

The three were part of a group of some 50 Iroquois taking part in a ''sacred run for peace'' across Europe.

Following their arrival at the Polish-Lithuanian border crossing at Ogrodniki, the group, wearing Indian costumes and singing songs, performed for travelers, the PAP dispatch said.

Three members of the group then presented passports with golden covers to Soviet officials, who turned them back, saying American passports are blue.

The passports were covered with gold in accordance with an Iroquois tradition, PAP reported. The other members of the group carried standard U.S. passports.

Border officials consulted with Moscow before refusing the three Iroquois, including a 3-year-old boy, permission to cross the border, PAP said.

''The 3-year-old boy was the highlight of the run and it is a pity that he turned out to be so dangerous,'' PAP's dispatch said.

The Iroquois group began its cross-European journey in London on Aug. 6 and is headed for Moscow.

Lithuania declared its independence from Moscow in March, but its borders are still controlled by the Soviet Union.

WASHINGTON (SEPT. 5) UPI - The leasing company United Aviation Services has ordered two Airbus Industrie A310-300s jetliners and is committed to acquire three A300-600R aircraft, the European aircraft maker said Wednesday.

The A310-300s are scheduled for delivery in mid-1994, and the A300- 600Rs will be delivered in 1996. The purchase price was not disclosed. United Aviation has yet to select engines for the airliners.

NEW YORK (SEPT. 5) UPI - Eight young men said to be part of a gang whose members must commit a mugging to get admitted were arraigned Wednesday on murder charges in the slaying of a Utah tourist stabbed during a robbery in a subway station.

Each of the men pleaded innocent and all were remanded to jail without bail by state Supreme Court Justice Judith Levitt. They were scheduled to appear in court Friday to hear the results of a grand jury investigation.

The eight suspects, whose ages range from 17 to 20, were charged with murder, robbery and assault in the stabbing death of Brian Watkins, 22, a tennis buff from Provo, Utah.

Watkins, in New York with his family to attend the U.S. Open, was slain Sunday night while trying to defend his parents from a gang of muggers in a Manhattan subway station.

All eight suspects arrested in the Watkins slaying were said to be part of the Queens-based FTS gang, a graffiti crew whose members are required to mug someone in order to join, according to a report in The New York Times.

Police said they were unaware of the FTS gang, even though the group's name, or tag, can be seen scrawled all over the walls of subway stations and other buildings in the Flushing neighborhood of Queens.

''They have not come to the attention of the Police Department as a group that has committed an illegal act,'' said John Galea, a retired sergeant and former head of the gang intelligence unit.

Neighborhood residents and friends of the suspects told the Times that Yull Morales, 19, identified by police as the stabber, was the founder of the FTS gang and the one who imposed the mugging rule.

At its peak several years ago, FTS boasted a membership of about 250 youths who passionately pursued dancing and spray painting grafitti as hobbies, the Times said.

Detectives have said they believe the suspects stole $200 from Watkins' father to party at Roseland, a popular dance hall located near the subway stop where the young tourist was slain. Six of the eight suspects were arrested several hours after the killing outside that dance hall.

Galea, who has worked with New York street gangs for more than 20 years, said Queens has seen a sharp rise of street gangs in recent years. But, he said, cops are often unable to spot members because none wear recognizable ''colors,'' such as jackets or bandanas.

''In Queens, that's where we have the largest increase in gang activity,'' Galea said. ''But they go unnoticed by the police on foot patrol.''

Morales, an employee at a refrigerator and air conditioning repair service in Flushing, Queens, and one other defendant had no previous arrest records, but the other six defendants had previous arrests on charges ranging from forgery to assault.

The seven other youths arrested were identified as Anthony Anderson, Emilo Fernandez, 17, Louis Fernando Montiero, 20, and Jonnie Hincapie, 18 - all of Queens; Pascal Carpenter, 18, of Brentwood, N.Y., Ricardo Nova, 18, who had no known address, Ricardo Lopez, 18, whose address was given tentatively as Queens.

#90248u1100 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - In a new departure from its policy of isolating Cambodia's Communist regime, Secretary of State James Baker announced Wednesday the United States is opening talks with representatives of Hun Sen, the Vietnamese-backed head of the Cambodian government.

Baker revealed the meeting in an appearance before the Senate Foreign Relations Committee, where he said the progress toward a political settlement to the 11-year-old civil war in Cambodia is encouraging.

Baker said ''the jury is still out about whether all parties to the dispute'' will accept the framework agreement agreed to last month by all five permanent members of the United Nations Security Council.

But he said all parties, including Hun Sen - the Hanoi-installed leader of the Phnom Phnem government - have agreed to use the U.N. plan as a framework for their discussions about an eventual settlement.

Under the U.N. plan, the factions would set up a Supreme National Council that would embody Cambodian sovereignty and take the Cambodian seat in the United Nations, now held by the Pol Pot faction.

That would be an interim step nn,the way to national elections.

Baker said Hun Sen has some reservations about the U.N. plan but has agreed to use it as a framework for future discussions.

Baker changed U.S. policy in July by announcing that the United States would talk to the Vietnamese government about Cambodian issues. Two U.S.-Vietnamese meetings took place in August in New York.

He took that policy change one step further Wednesday with his statement that a representative of Hun Sen and a U.S. representative would meet in Vientiane, Laos to discuss a Cambodian settlement.

Hun Sen has been a major figure in the long Cambodian war, and the diplomatic efforts to end it, but he has always objected to any plan that would require his abdicating power, or even sharing it with other factions particularly with the Khmer Rouge guerrillas.

But since the Vietnamese forces withdrew from Cambodia, taking with them Hun Sen's main military support, Hun Sen's forces have steadily lost ground in the fight against the Khmer Rouge, who have been supported by China.

China was one of the Security Council members who agreed to the U.N. framework plan.

#90248u1103 09/05/1990 ~United Press International

LONDON (SEPT. 5) UPI - Stock prices closed slightly higher on the London International stock exchange Wednesday with a directionless Wall Street eroding early gains scored by British issues.

The blue-chip Financial Times 100-stock index closed up 4.2 points to 2,152.2, after retreating from a high for the day at 2,165.4.

The narrower top 30 industrial average closed up a mere 1.3 point at 1,672.2.

Volume was a modest 344.9 million shares, although stronger than Tuesday's 286.2 million shares.

A string of corporate results brought mixed news to the market, including some disappointing profit reports by a number of leading British companies.

Renewed speculation that Britain would soon fully enter the Exchange Rate Mechanism of the European Monetary System played a moderate role in the rebound, brokers said.

Analysts said worse-than-expected results from major industrial corporations were obvious signs of an impending British recession. They expected more bad news to come out as a new round of corporate results is to be released soon.

George Wimpey, Britain's second largest homebuilder, fell 50 cents to $3.27 on a lackluster interim profit report, with Barratt Developers shedding 20 cents to $2.60 in sympathy.

''The recession is the worst I have experienced in 39 years in the industry,'' said Wimpey Chairman Cliff Chetwood in an interview with the Evening Standard daily newspaper.

Williams Holdings, the industrial conglomerate, dropped 22 cents to $4.07, after reporting that its half-year profits dropped 15 percent.

British Aerospace gained 19 cents to $10.28 on rumors of new aircraft orders.

Reuters jumped 39 cents to $16.34 on news that the global information company has reached a business agreement with the American Stock Exchange.

Two oil companies gained ahead of their earnings reports to be released Thursday, which are expected to be strong. Enterprise was up 19 cents to $12.67 and Burmah gained 7 cents to $9.63.

Elsewhere, stock prices closed lower on the Frankfurt Stock Exchange on fears that higher taxes were needed to finance a heavier budget following the reunification of the two Germanies, scheduled for Oct. 3.

The German Stock Index, or Dax, lost 25.8 points to end at 1,564.27.

The Frankfurt market has been showing signs of weakness lately, on renewed concerns about the Middle East and worries about the German economy.

Volume remained very thin as institutional and foreign investors stayed away from the market while awaiting a solution to the Persian Gulf crisis.

#90248u1104 09/05/1990 ~United Press International

BY JONATHAN S. LANDAY - UPI

RWEISHED, JORDAN (SEPT. 5) UPI - In Shaalan One, there is nothing to do but wait - wait for hours for food and water, for the sear of the sun to die and the chill of the night to set in, for the pain of the scorpion sting to fade, for the embassy man who never comes.

And the most difficult wait of all: The wait to go home.

There were an estimated 60,000 refugees from Iraq and Kuwait waiting Wednesday in the city of tents and makeshift shelters of towels and sheets a flyblown oasis of hunger, thirst and despair in the fiery desert ''no man's land'' between Jordan and Iraq.

Home to scorpions, snakes and itinerant Bedouin, the 30-mile frontier strip hosts Shaalan One and a sister camp, into which Indians and Pakistanis, Sri Lankans, Bangladeshis, Thais and Filipinos have been hurled in a clash of cultures and tongues after fleeing from Iraq and Kuwait.

Food and water are in short supply. One can of infant formula was all that remained in the Red Cresent clinic, sanitation is almost non- existent and fights are frequent.

And every few minutes, another packed bus or luggage-crammed car is directed by Jordanian soldiers off the highway into Shaalan One because there is no more room in camps 200 miles to the west in Amman, where more than 40,000 more refugees also wait.

The crisis has erupted, aid officials said, because everyone failed to anticipate the extent of the exodus and the inability - some believe reluctance in several cases - of governments to finance the repatriation of their citizens.

International aid is now slowly coming, some in donations for a growing airlift, some in supplies to bolster the contributions made by Jordan and its people. But with officials forecasting up to one million more arrivals time is critical.

In Shalaan One, some refugees have been waiting for 10 days and they are angry.

''We were money-making machines for our governments yesterday,'' said Reza Hussein, 32, of Quetta, Pakistan, referring to the remittences the refugees once sent home. ''We are garbage today.''

Refugees reported several deaths from exposure. Doctors in the stifling Red Cresent medical tent denied any fatalities, but warned that unless help arrives quickly, deaths could occur.

The six doctors and five nurses treat some 3,000 people every day, about 200 suffering from scorpion stings, the rest mostly heat stroke, dehydration and diarrhea. Several snake bite and chicken pox cases are reported daily.

There are also fears of mental breakdowns, those concerns highlighted when some Sri Lankan women steered a young girl into the tent, her eyes glazed and distant, a finger picking her lower lip, her voice silent.

''She has gone mental here,'' said one of her companions. ''She wanders here and there. We can't control her.''

Trash lies in heaps or is whipped into the cloudless sky by swirling funnels of hot wind. Huge pits dug by bulldozers serve as toilets. No one uses the few portable latrines any more.

Water tankers discharge intermittently into metal storage tanks, before which lines of people have long waited, not knowing when the deliveries will come.

Competition is so fierce that fights often erupt, sometimes pitting one ethnic group against another.

''The Indians never stand in line,'' shouted Robert Adalia, 32, of Manila, as he protected two tanks bearing the inscriptions ''For Filippinos only.'' Said he: ''Everybody needs water. We are trying to avoid a fight.''

Refugees patient and fortunate enough eat once a day, but the number is limited. The meal is a single piece of flat Arabic bread and a cup of yogurt for which they must line for up to six hours in lines that stretch a quarter mile across sand covered with human excrement.

Those too hungry or impatient try sneaking up to the distribution points, only to be driven back in waves by soldiers flailing belts, rubber-coated wire and sticks.

''They treat us like sheep,'' complained Mohammad Sharif, 30, of Jelum, Pakistan. ''They hit us like animals.''

Refugees also wander along the road, looking for Jordanians selling bottled water for $3 each, soda for more than $2 each and packs of cigarettes for almost $10 each.

#90248u1118 09/05/1990 ~United Press International

MOSCOW (SEPT. 5) UPI - Iraqi Foreign Minister Tariq Aziz met with President Mikhail Gorbachev Wednesday to discuss the Gulf crisis, four days before a U.S.-Soviet summit expected to focus on the issue.

Soviet officials said the Iraqi side had requested Wednesday evening's surprise meeting, and visiting U.S. Senator Robert Dole quoted Gorbachev as saying, ''I'm prepared to hear him out.''

Dole, who led a delegation that met with Gorbachev earlier in the day, said he was optimistic about the Iraqi-Soviet contacts and the upcoming summit.

''They obviously wanted to have some contact before Sunday's (summit) meeting. He's not coming here just to get wet,'' Dole said of Aziz, who arrived in Moscow in a driving rainstorm. ''It's possible he has a message to give to Gorbachev to pass on to President Bush.''

The official Soviet news agency Tass said Gorbachev received Aziz Wednesday evening in the Kremlin, but details of the talks were not immediately available.

Soviet officials, saying they hope to use Moscow's ''special relationship'' with Baghdad to help negotiate a settlement to the crisis, have maintained contacts with Iraqi officials despite the Kremlin's condemnation of the Aug. 2 invasion of Kuwait and support for U.N. sanctions.

The Soviets have insisted in previous meetings with Iraqi officials that Baghdad immediately withdraw its troops from Kuwait as the first step to ending the crisis and avoiding all-out war.

Moscow cut off arms shipments to its one-time close ally in the Gulf after the invasion and is supporting international sanctions against Iraq, although it has refused to participate in a naval blockade or the international military presence in the region.

The surprise visit by Aziz came four days before Gorbachev and Bush were to meet in Helsinki to discuss the crisis that began with Iraq's invasion and occupation of Kuwait.

In addition to regular diplomatic contacts in Baghdad and Moscow,

Gorbachev and other Soviet officials met Iraqi special envoy Saadoun Hammadi last month as part of the intense Soviet diplomatic effort to find a peaceful solution to the Gulf crisis.

''Until now, however, no political or diplomatic contacts between Moscow and Baghdad have produced the desired result - the immediate withdrawal of all Iraqi troops from Kuwait and the restoration of that country's independence and sovereignty,'' Tass said in a report on Aziz's visit.

The Soviet Union expressed disappointment at the results of talks last week in Amman between Aziz and U.N. Secretary-General Javier Perez de Cuellar, and Soviet officials have said they are hopeful the Gorbachev-Bush summit will be a step forward toward a solution.

There were reports earlier in the week that King Hussein of Jordan would also visit Moscow this week to discuss the Gulf crisis, but diplomatic sources in Rome where Hussein was visiting said Tuesday the monarch had decided not to make the trip to the Soviet Union.

The Soviets have also proposed an international conference be held to resolve problems in the Middle East, a suggestion British foreign minister Douglas Hurd dismissed as having ''no chance of success.''

''There have been conferences galore on this question...and there is no magic in holding a conference which has no chance of success,'' Hurd said during a visit to Amman, Jordan Wednesday.

Dole, the Kansas Republican who is minority leader in the U.S. Senate, praised what he called unprecedented superpower cooperation in efforts to solve the Gulf crisis.

Speaking at an airport news conference before leaving Moscow, Dole said Sunday's summit in Helsinki was yet another ''turning point'' in relations between the two countries.

''The (leaders of) two superpowers are meeting for the first time in response to a conflict when we're both on the same said,'' Dole said.

He said the Senate delegation saw a monument in Leningrad that reminded the senators of the U.S.-Soviet cooperation in World War II and added, ''We think we have it again in the Persian Gulf.''

Dole said he believed Bush and Gorbachev agreed that any solution to the Gulf crisis would have to begin with an Iraqi pullout from Kuwait.

''My impression was that Gorbachev was in almost complete agreement on that point,'' Dole said.

#90248u1124 09/05/1990 ~United Press International
WASHINGTON (SEPT. 5) UPI - Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, offered a plan Wednesday to strengthen the nation's deposit insurance funds and limit taxpayer liability in bank and thrift failures.

''It is time for the Congress to start putting the hard issues on the table for debate,'' Gonzalez said in a speech to the House.

''We must now confront what no one wanted to admit four or five years ago: the deposit insurance system is in urgent need of repair. Not only did the savings and loan insurance fund fail, today the bank insurance fund is facing a fifth consecutive year of multibillion-dollar losses,'' he said.

Among the changes Gonzalez proposed is removal of ceilings on insurance premium assessments paid by banks and thrifts and giving regulators authority to change the assessments as conditions require.

He also proposed extending the assessments to foreign deposits, establishing a risk-based premium system to ensure that institutions that engage in greater risks pay higher premiums, and limiting the investments that can be made in the insured funds in order to further reduce the risk exposure.

Gonzalez also suggested that Congress consider limiting the number of accounts that can be insured and reducing the current $100,000 insurance coverage for individual accounts.

Gonzalez said regulatory agencies should be strengthened and he called for creation of a single consolidated regulatory agency that ''is truly independent and that can provide consistent supervision of all insured institutions.''

The plan calls for strengthening capital of insured institutions to ensure that owners risk their money, not just the taxpayers', Gonzalez said.

#90248u1126 09/05/1990 ~United Press International
WASHINGTON (SEPT. 5) UPI - Rural America is likely to lose some congressional seats as a result of the 1990 census, but the change is unlikely to significantly undercut the political power of the farm bloc, analysts and lobbyists say.

The steady decline in the number of rural residents since the Great Depression, when one-fourth of Americans lived on the farm and there were

6.8 million farms, has led to recurrent predictions of the downfall of the farm bloc. Nonetheless, farm-state legislators continue to bring home the bacon.

Just in recent years, they persuaded Congress to pass two disaster- relief bills and, during floor debate this summer on the new farm policy bill, won on all but two relatively minor amendments.

A highly touted challenge that would have denied crop support payments to large farmers was defeated by a 100-vote margin in the House, where seats are apportioned on the basis of population.

There have been recent estimates that this year's census will lead to 19 House seats shifting among states. The Midwest, Deep South and Northern Plains, which include major farming and ranching regions, are considered most vulnerable to loss of seats. The West, Southwest and Southeast are likely to gain seats.

''There are definitely going to be (fewer) rural seats in Congress, no question about it,'' said Brad Eckart, director of political education for the American Farm Bureau, who disagreed with suggestions of a decline in farm clout.

Eckart noted that virtually all senators have farm constituents and that in the House, lawmakers recognize the breadth of the agricultural and food industries.

The Agriculture Department says agriculture accounts for about 17 percent of the gross national product.

One reason for the enduring strength of the farm bloc, lobbyist John Gordley said, is the jurisdiction of the House and Senate Agriculture Committees. In addition to the farm program, the panels oversee the futures markets, national forests, public feeding programs and school lunches.

Programs like food stamps help the panels win urban support for farm-related bills, a fact Rep. Major Owens, D-N.Y., noted during July's debate on farm subsidies. ''We have kept the faith,'' Owens said, but it was time for reform.

''It is the agriculture committees that are the bastions of agricultural influence in this town,'' Gordley said. ''The agriculture committees will be there even if'' there are fewer congressmen from farm districts.

Rather than demographic trends, Gordley said the more immediate political threat is budget pressure to curtail farm spending.

About one-fourth of the U.S. population lives in rural areas, with about 5 million people on the farm.

Calvin Beale, an Agriculture Department demographer, said he had expected the 1980s to show a slight growth in the rural population but the preliminary Census Bureau figures ''make me wonder if that will be the case or not.''

Beale said the 1980s might ''prove to be intermediate'' between the record of the 1960s, when rural areas showed a net loss of about 1.7 million people, and the 1970s, when a net immigration of about 4.5 million people sparked talk of a rural renaissance.

''Whatever we come up with is going to pale in comparison with the 1950s '' when rural figures dropped by 5.5 million people, Beale said.

#90248u1131 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - A government employees' union charged Wednesday that federal workers liquidating the assets of failed U.S. banks and thrifts are the victims of illegal hiring practices.

The National Treasury Employees Union accused the Federal Deposit Insurance Corp., and its chairman, L. William Seidman, of ''insidious ... mismanagement that can destabilize this critical agency.''

In a suit filed Tuesday in U.S. District Court for the District of Columbia, the union said it alleged FDIC ''liquidation graded'' employees are classified illegally as temporary workers.

A spokesman for the FDIC said he had yet to see a copy of the lawsuit and declined comment on the allegations.

The union said 3,500 workers are being denied Merit Systems Protection Board appeal rights, the right to file a grievance through the arbitration process, and the right to promotions or transfers without examination.

The FDIC workers are also being denied the right to compete with other employees in the event of layoffs by the government, the union said.

''The success of the FDIC mission teeters on a tightrope held by FDIC management,'' union president Robert Tobias said. ''The competent, experienced FDIC workers who balance the finances can have the rope yanked from under their feet at any moment.

''Our lawsuit seeks to stabilize the future of the FDIC work force,'' Tobias said. ''Billions of taxpayers' dollars are being managed by these

FDIC employees, and they are being treated as disposable vate by management.

''The public trust deserves a stable FDIC workforce, hired on merit and protected against arbitrary firings based on favoritism or political corruption,'' he said.

The National Treasury Employees Union represents 140,000 federal workers nationwide, including the Internal Revenue Service, the U.S. Customs Service and other agencies.

#90248u1167 09/05/1990 ~United Press International

(SEPT. 5) UPI - Negotiators for the Philippine government told communist guerrillas proposing peace talks that President Aquino agrees in principle to a cease-fire in Manila and areas devastated by a July earthquake. Security officials and peace advocates held two hours of talks at a hospital outside Manila and additional meetings are scheduled next week.

Eight reputed gang members pleaded innocent in a New York City courtroom to manslaughter charges in the fatal stabbing of a tourist from Utah at a Manhattan subway stop. A judge ordered the youths held without bail. Police say 22-year-old Brian Watkins of Provo, Utah, was stabbed to death last Sunday as he tried to protect his parents from a gang of muggers.

New York Post publisher Peter Kalikow is threatening to close the 189-year-old newspaper unless unions agree to major wage and job cuts. Kalikow says the paper has lost 80-Million dollars since he bought it from Rupert Murdoch in 1988. He's set a September 15th deadline. The unions are scheduled to meet today and tomorrow to discuss the demands.

Private funeral services are planned in Los Angeles for actress Irene Dunne. She died at her home last night at the age of 88. Dunne was nominated five times for the Acadamy Award but never won. Dunne's movies include ''Back Street,'' ''The White Cliffs of Dover,'' ''Life With Father '' and ''Magnificent Obsession.''

#90248u1169 09/05/1990 ~United Press International

GAINESVILLE, FL (SEPT. 5) UPI - A forensic dentist used an ultraviolet scanner Wednesday to search for fingerprints and other clues invisible to the naked eye in apartments where five college students were slain.

Dr. Michael West of Hattiesburg, Miss., said he found several fingerprints in two of the three apartments where four young women and one young man were found stabbed to death early last week, but that ''the odds are these

are prints that are going to be of the residents.''

West has pioneered the use of ultraviolet photography to match fingerprints and to match dental models with bite marks left on human flesh.

Detectives were trying to determine if bite marks left on at least one of the female victims could lead to a suspect, a technique used to help convict serial killer Ted Bundy, Gainesville police said.

Investigators reportedly were also awaiting genetic test results to determine whether body fluids found at one of the crime scenes matched the genetic material in blood drawn from a prime suspect, Edward Lewis Humphrey.

Humphrey, 18, a freshman at the University of Florida, was charged Tuesday in an unrelated 1988 sex attack in Indian River County. He was already held on $1 million bail on charges involving an attack on his grandmother.

Gainesville police have identified him as one of four prime suspects in the college student killings. But at a briefing Wednesday, police said they had no new information that could lead to an arrest in the student killings.

Humphrey was scheduled to appear at a bond hearing Thursday morning in the Brevard County Detention Center in Sharpes. His lawyer, James Russo, said he would ask the state to justify the bond set for his client on the aggravated assault charge in the attack on Humphrey's grandmother.

Humphrey has been jailed since Aug. 30 on that charge. His bond was raised to $1 million when Gainesville police identified him as a suspect in the student murders.

On Tuesday, Russo called the bond ''exorbitant'' given the lack of charges in the Gainesville case and questioned why investigators had been unable to obtain a search warrant for Humphrey's Gainesville apartment.

Russo also said Humphrey's legal rights may have been violated by investigators who interrogated him in the Brevard County Jail without a lawyer present, even though Humphrey had requested one.

The victim in the 1988 incident identified Humphrey as her attacker after seeing his picture in news reports over the weekend, said Maureen Coogan, records clerk with the Indian River County Sheriff's Office.

Based on the victim's statement, Indian River authorities issued a warrant charging Humphrey with armed burglary and attempted sexual battery.

The sex attack occurred Sept. 6, 1988, when a man followed the woman into her home, tore her blouse and held a hunting knife to her throat. The woman pleaded with the man not to rape her, and the attacker agreed, but told her to take off her pants, Coogan said.

The victim escaped after struggling with her attacker.

Indian River detectives believe the same man was responsible for an attack 30 minutes earlier at the Vero Beach mall. No one has been charged in that incident, in which the attacker grabbed the woman's clothes, cut her finger with a knife, then fled when the woman began to scream.

Indian River investigators cited ''similarities'' between the 1988 attacks and the Gainesville investigation, but would not release specifics.

Besides Humphrey, the only one of the eight suspects in the Gainesville case to be publicly identified by police is Stephen Michael Bates, 30, a short-order cook from Lakeland. He has been held in the Polk County Jail in Bartow since Aug. 29, the day after the last two bodies were found in Gainesville.

Bates was being held in lieu of $100,500 bond on charges of burglary, aggravated assault and battery. Authorities said he broke into a Lakeland home, threw water on a woman and her daughter while they slept and pointed a butcher knife at them.

Polk County police said they did not think Bates was a viable suspect in the slayings, but Gainesville police Lt. Sadie Darnell said his fingerprints had been sent to a task force investigating the deaths of the students.

All five victims were college students who lived within 2 miles of each other and within 2 miles of the University of Florida campus.

They were Christina Powell, 17, of Jacksonville; Sonya Larson, 18, of Deerfield Beach; Christina Hoyt, 18, of Gainesville; Tracy Paules, 23, of Palm Springs North and Manuel Taboada, 23, of Carol City. All five were stabbed to death and at least three of the bodies had been mutilated. Two of the students also were bludgeoned.

Hoyt was a student at Santa Fe Community College in Gainesville and the other four were University of Florida students.

#90248u1174 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The first signs of congressional reservations about U.S. policy in the Persian Gulf crisis emerged Wednesday, as

Secretary of State James Baker outlined U.S. plans to isolate Iraq and prevent future aggression.

Most members of the Senate Foreign Relations Committee echoed the praise that came one day earlier at a House Foreign Affairs Committee meeting, where Baker and President Bush were lauded for their moderation and firmness in the crisis, as well as their willingness to use international rather than American pressure.

Baker outlined the American goals in both days of testimony: rolling back the Iraqi invasion of Kuwait; the restoration of Kuwait's ''legitimate government;'' the protection of the lives of American hostages, and a continuing American commitment to the protection of the Persian Gulf.

Some senators accepted the broad outlines but rejected some specific elements of those goals:

-Sen. Joseph Biden, D-Del., said the military operation raises an unsettled constitutional question that will persist as long as a dispute continues between the legislative and executive branches over the War Powers Resolution.

President Bush did not invoke the resolution in sending troops to the gulf because he said he believes hostilities were not imminent.

Biden told Baker, ''I'm with you. I just want to know where we are going.''

-Biden, Sen. Paul Sarbanes, D-Md., Sen. Claiborne Pell, D-R.I., and others raised questions about whether the United States whould be using its great weight to re-install the autocratic, unelected Emir of Kuwait and his family-run government.

Baker said it is U.S. policy to preserve the government that existed on the day of the Iraqi invasion, otherwise aggressors in the region would believe they can force political change by external aggression.

-Sen. Jesse Helms, R-N.C., suggested that the American forces would not be unless they knock out Iraqi chemical weapons factories, possibly using cruise missiles based aboard the battleship USS Wisconsin.

Baker refused to answer Helms specifically, but he twice repeated a statement that he made Tuesday as well: ''The president is ruling nothing out and is ruling nothing in, militarily.''

-Sen. Daniel Moynihan, D-N.Y., praised the administration for using the United Nations and reviving the organization by involving it in the isolation of Iraq. But he criticized the U.S. government for remaining behind in its dues.

Baker agreed with Moynihan that it was ''outrafecus'' that the United States was ''the biggest deadbeat'' in the United Nations, but he said Congress could remedy that situation by passing the administration's budget request, which contains nearly $500 million in funds to pay past U.N. dues and assessments.

Moynihan also criticized the administration for doing relatively little to help the plight of the tens of thousands refugees standed along the Iraqi-Jordanian border under horrendous conditions.

Baker said the United States has already pledged some $14 million for direct or indirect refugee relief, but he agreed that the government machinery is slow to start up.

TORONTO (SEPT. 5) UPI - The Canadian Auto Workers on Wednesday chose Ford Motor Co. of Canada Ltd. to set the pattern for talks on new collective agreements with the Canadian subsidiaries of the Big Three U.S. auto makers, whose current contracts expire Sept. 14.

CAW president Bob White said Ford Canada was chosen because it hadn't been targetted since 1976, and has made $340 million profit since 1987. He also said the union wants to force the company to act independently of its U.S. parent, Ford Motor Co., of Dearborn, Mich.

''I think it's time that Ford Canada cut its apron strings with Ford United States,'' White said in announcing the union's decision.

White said a strike is possible depending on Ford Canada's response.

Ford Canada's chief negotiator, Don McKenzie, said the company ''welcomes'' the opportunity to set the Canadian pattern and will work toward reaching ''a fair and realistic agreement''.

''It's not impossible to reach a settlement before the Sept. 14 midnight deadline,'' McKenzie said. But he paid there are many complex issues on the table and the two sides have very little time left.

White said the key issues include security against outsourcing - sending work to outside contractors rather than doing it in-house - and technological change, income security for the life of the agreement, better protection against plant closures and shorter work time.

Ford Canada employs 12,800 CAW members at assembly and manufacturing plants and a parts depot across the province of Ontario in Windsor,

Oakville, St. Thomas, Niagara Falls and Bramalea.

The Ford workers recently voted 97.52 percent to authorize strike action if needed.

''I don't know whether or not we can do this without a strike,'' White said. ''We think that if we have to have a strike, ultimately we will have enough pressure on the Ford operations that we can put together a good settlement.''

The CAW and Ford Canada were scheduled to return to the master bargaining table Wednesday afternoon.

McKenzie said he wasn't sure when Ford Canada would have a proposal ready for the CAW, saying the immediate objective was to ''prioritize'' the issues.

McKenzie said Ford Canada would continue to push its earlier stated position that maintaining quality, improving operating efficiency and reducing worker absenteeism were its key goals.

White said Ford Canada was selected because of the ''real possibility of a strike'' in the United States, where the United Auto Workers are targetting General Motors Corp. The UAW's collective agreements with the Big Three also expire Sept. 14.

Ford Canada has the ''opportunity'' to set a Canadian pattern before a settlement is reached in the U.S., White said.

White said Ford Canada has made $340 million since 1987, when the current contract was negotiated, and that the company's recent troubles wouldn't alter the union's demand for a percentage wage increase in each year of a new three-year deal.

McKenzie said he wouldn't dispute White's figures, but added that Ford Canada's profitability was down ''markedly'' in the last few quarters due to increased marketing costs. ''We have heard the term overcapacity again and again in this industry. It appears that it's arrived,'' he said.

Whether negotiations with General Motors of Canada Ltd. and Chrysler Canada Ltd. and the union locals will continue or recess until a pattern is established was uncertain, White said.

The CAW - which broke away from the U.S.-based UAW during the mid- 1980s - represents 36,500 GM Canada workers and 11,300 Chrysler Canada workers at various assembly and parts plants in Ontario and Quebec. Workers at both companies have offered their support to the Ford workers if a strike occurs, White said.

#90248u1204 09/05/1990 ~United Press International

BONN, WEST GERMANY (SEPT. 5) UPI - West German Chancellor Helmut Kohl will take four East Germans into his Cabinet for the interim period between German unification on Oct. 3 and all-German elections on Dec. 2, government officials said Wednesday.

The East German deputies will be appointed to ministerial posts without portfolio, officials in Bonn said.

It is widely believed that East German Prime Minister Lothar de Maiziere, his deputy Guenther Krause as well as East German Parliamentary President Sabine Bergmann-Pohl will get the appointments.

All three are members of the East German Christian Democratic Union, which will merge with Kohl's West German CDU a few days before unification.

The fourth likely candidate, Rainer Ortleb, is a member of the Free Democratic Party, the junior partner in the West German coalition government.

European Community foreign ministers, meanwhile, will meet in special session next week to discuss emergency measures for incorporating East Germany into the EC, officials said Wednesday.

The EC Executive Commission seeks emergency powers to grant special exemptions from some EC laws, particularly competition and environmental regulations, during a transitional period of several years following German unification.

The main East German political parties, with the exception of the communists, Wednesday announced the names of deputies they will send to an all-German parliament after unification.

After East Germany officially ceases to exist, a total of 144 East German deputies will join their 519 West German colleagues in the all- German parliament, which will hold its initial session in Berlin Oct. 4.

The 663 deputies will serve in the Bundestag - now still the West German parliament - until a new parliament is formed after Dec. 2 all- German elections.

For the first time since 1953, communists will be among the deputies in the all-German parliament, at least until Dec. 2.

The East German ministers will represent the interests of the five states

East Germany will form in joining the 11 existing West German states at unification, said Rudolf Seiters, a senior aid to Kohl.

Creation of the five states was outlined in a bilateral unification treaty onfinancial, legal and technical aspects of the Oct. 3 merger. The treaty signed last Friday by the East and West German governments was presented this week in both German parliaments, which are to ratify it later this month. The Bundestag, the West German parliament, is to vote on the document Sept. 14.

Elections for regional governments in the new states are scheduled for Oct. 14 before all-German parliamentary elections Dec. 2.

The four World War II victors are expected to give the final gsein light for German unification at a meeting of the four foreign ministers with their German counterparts in Moscow, Sept. 12.

The agreement will then be presented to the 35-member Conference on Security and Disarmament in Europe meeting in New York, Oct. 1-2.

Officials from the four powers - France, Britain, the Soviet Union and the United States - and the German governments are currently meeting in East Berlin to tie-up details of the agreement.

EC tariffs would be waived until 1992 for some trade between East Germany and its traditional Comecon trading partners. This proposal is likely to be the most controversial at next Wednesday's meeting of foreign ministers.

The Commission's proposal was laid out in a rare summer meeting, on Aug. 21, and is presented in a 350-page report that seeks to minimize the costs to both a united Germany and the 12-nation EC as a whole.

Initial estimates forecast a cost to the Community of $7.5 billion over the next three years, but the rapid collapse of East Germany's economy since German monetary union began on July 1 is expected to push the total far higher.

#90248u1206 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The Navy's Military Sealift Command is considering chartering a large Soviet cargo ship to help haul U.S. military equipment to Saudi Arabia for Operation Desert Shield, an official said Wednesday.

''At this point in time, no decision has been made to charter it or not to charter it,'' said Marge Holtz, spokeswoman for the command.

She said when the command issued a notice to the commercial shipping market a few weeks ago that it was interested in chartering cargo ships, an American broker in New York responded with an offer of one Soviet ''roll-on, roll-off'' vessel.

The large ships have the capacity to carry hundreds of vehicles such as tanks and armored personnel carriers that can easily, as the name implies, be rolled onto the ship from a dock and rolled off at the destination.

''We've talked to a tremendous number of people (about charters),'' she said. ''This particular broker offered one, and we haven't gone beyond that.

''There is no indication at this point that we are going to charter this (Soviet) ship, but there's nothing to preclude that,'' she said.

The Navy's Military Sealift Command, which has experienced mechanical difficulties with some of the ships activated from the Ready Reserve Force has chartered 30 vessels so far for Operation Desert Shield, Holtz said.

Of those 30, 22 were foreign and eight were American, primarily roll-on, roll-off off ships and breakbulk vessels that can carry large amounts of heavy military equipment, she said. The foreign charters came from numerous countries ranging from Britain and Norway to the Caribbean island of Antiqua.

Holtz said the large number of charters was not an indication that something is wrong with the Navy's sealift capacity.

''Part of the plan has always been to rely on the merchant marine,'' she said. ''This is normal.''

The command so far has called for the activation of 43 ships in the Ready Reserve Force, where ships are kept on standby status in case of war or other national emergency. It has received 33 of them so far, she said.

''Some of them do have difficulties, do have problems,'' Hotlz said. ''It has not slowed the (U.S. military) deployment (to Saudi Arabia), however.''

She also said she did not know the price being asked for the Soviet cargo ship or the name of the vessel. ''It's always referred to simply as the Soviet ro-ro.''

#90248u1235 09/05/1990 ~United Press International

LONDON (SEPT. 5) UPI - The Crown Prince of Kuwait said Wednesday the exiled leadership would make no territorial concessions nor would they

submit to a plebiscite to end Iraq's occupation of the Gulf monarchy.

He also criticized King Hussein of Jordan for ''serious mistakes'' in handling the crisis and said Jordan would have to suffer the economic consequences of the king's policy.

Speaking at a press conference at the end of his three-day visit to London Crown Prince Sheik Saad al-Abdullah al-Sabah dismissed suggestions that Kuwait give up control of two Gulf islands of Warbah and Bubiyan or allow a popular vote on the future of the monarchy to resolve the crisis.

''Neither I nor any other Kuwaiti official can make any concessions, not even a single inch of our territory, to be conceded. But we will continue to insist on liberating all our territory whatever sacrfices we may make '' the Crown Prince, who is also the Kuwaiti prime minister, said.

''The Kuwaiti people have already expressed their opinion,'' he said. ''They all are emphatic about what kind of government they would like to have. They have said their word.'' (sic)

In letters to members of the British Parliament, which has been recalled for an emergency session Thursday and Friday, Kuwaiti groups in Britain and Ireland appealed for Britain to maintain a united stand.

''He must be stopped now - whatever the cost,'' the groups, Free Kuwait Campaign, the National Union of Kuwaiti Students and British Friends of Kuwait, said in the letter.

''For no matter what price is paid now, it will be much higher in the future,'' the letter stated.

Last week, left wing Labor MP Tony Benn started a Stop the War campaign against British and American presence in the Gulf.

The Crown Prince said he will visit Italy and France next to thank them for their support and urge them to keep pressure on Iraq.

The Crown Prince praised western, especially British and U.S. support, and Arab backing. But he criticized Jordan's King Hussein for his mediation attempts and failure to side with Kuwait, one of Jordan's aid donors.

''I do not deny that we have extended and provide a lot of help and financial aid to King Hussein in the past and, of course, he remembers that very well,'' the Crown Prince said.

''But now and whatever economic damages Jordan might be exposed to, King Hussein has to bear the consequences of his own policies and the serious mistakes that he has made and continues to make. King Hussein should

remember the attitude, the backing of Kuwait, both at the official and the popular level,'' he said.

The Crown Prince said Kuwait will set up a humanitarian fund for those hurt by the implementation of United Nation's sanctions, but refused to confirm reports that Kuwait will pay dlrs 3 billion toward the western and Arab military deployment in the region.

He said he hoped sanctions would force Iraq to withdraw, but declined to comment on specific actions Kuwait would take if sanctions failed. Nothing short of the full implementation of the five U.N.'s resolutions, which call for Iraq's unconditional withdraw and the restoration of the al-Sabah government, would be acceptable, he said.

''We will fight and we'll struggle and we'll fight again with all our friends against Iraqi aggressors,'& de said.

The Crown Prince said he considered Saddam Hussein a threat, but did not call for his removal.

''Although I wholeheartedly believe that (Saddam) is an enemy to Iraq itself and an enemy to the whole region, even to the whole world, I leave that to the Iraqi people themselves to decide whether to keep him or kick him out.''

#90248u1270 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Sex and basics about reproduction confuse Americans, with most respondents flunking a Kinsey Institute quiz, it was reported Wednesday.

In a survey conducted for the institiute by the Roper Organization last October, 82 percent of 1,974 Americans questioned received a grade of D or below. Fifty-five percent could not answer correctly at least 10 of the 18 questions on topics ranging from pregnancy to extramarital affairs.

''We are a nation of sexual illiterates,'' said the report's lead author, June Reinisch, director of the renowned research center on sexuality at Indiana University.

''No wonder we have the highest teenage pregnancy rate in the Western industrialized world,'' she said at a news conference to release the survey and a book promoting sex literacy.

''No wonder the rate of sexually transmitted diseases continues to grow. And no wonder the AIDS crisis has not abated.''

Forty-nine percent of the respondents incorrectly believed that a woman cannot get pregnant while she is menstruating, Reinisch said.

The survey also found that Americans tend to believe the average person has sex at a younger age than research has found, she said. Three-quarters of the respondents did not know that the age the average American first has sexual intercourse apparently is between 16 and 17.

A similar percentage - and even more women than men - overestimated the percentage of married man who have had at least one extramarital affair.

Sixty percent of those surveyed said they believe that most women have a preference for men with large penises, contrary to studies showing otherwise.

The erring belief, howver, is consistent with fears men often express in desperate letters to the institute, Reinisch said.

Nearly 80 percent incorrectly answered a question asking what percentage of American women have had anal intercourse, which is estimated to be between 30 percent and 40 percent, she said.

Fifty percent in the survey knew that oil-based lubricants, such as petroleum jelly and baby oil, can make holes in condoms or diaphragms and only water-based lubricants should be used.

Reinisch characterized the survey as supplementing rather than updating the ground-breaking sex research of Dr. Alfred Kinsey in the late 1940s and said it showed many dangerous myths persist in spite of education efforts mounted to battle the AIDS epidemic.

Only 21 percent were aware than about one out of four American men have had a sexual experience with another male during their teens or adult years, the survey said.

The Midwest scored the best, with only 45 percent of respondents in the region failing, followed by the West with 53 percent and both the Northeast and the South with 60 percent flunking.

Women and men scored about equally well overall, but men more often could answer questions relating to sexual activity while women were better informed about personal health care and contraaception.

Less surprising were higher scores among those aged 30 to 44, respondents who described themselves as liberal or moderate politically and those with higher income and education levels, the researchers said.

(SEPT. 5) UPI - Iraqi envoy Tariq Aziz is in Moscow today... apparently trying strengthen ties with Iraq's one-time ally before the Bush-Gorbachev summit. Soviet Foreign Ministry spokesman Gennady Gerasimov says Aziz will meet with Gorbachev tonight to discuss Persian Gulf developments. The Soviet Union was a staunch ally of Iraq in the eight-year Iran-Iraq war, selling Baghdad much of its arsenal of weapons.

Secretary of State Baker is scheduled to brief NATO foreign ministers next Monday in Belgium on results of the Bush-Gorbachev summit this weekend in Finland. And a NATO source indicates there's a possibility that President Bush will attend the session, coming one day after he meets Soviet leader Gorbachev in Helsinki. The NATO ministers continued talks on the Persian Gulf crisis today, with U-S officials pressing allies for a greater role in the Middle East.

Officials in South Africa are investigating the involvement of army troops in the deaths of 11 black people outside a migrant worker hostel in a township near Johannesburg. A Defense Force spokesman says a board of inquiry was convened to investigate the slayings. At least 11 people were found dead yesterday after troops opened fire to disperse township residents angry about an alleged attack by Zulu hostel dwellers in which four people died. Police today reported calm in black townships rocked by factional violence.

U-S officials canceled off-post leave and non-essential travel for U-S military personnel amid reports of increased threats against Americans at six installations in the Philippines. U-S military television's Far East Network broadcast the announcement which covers 41-thousand troops, Defense Department workers and their dependents. The announcement comes just five days before the expected resumption of talks on the renewal of U-S basing rights in the Philippines.

#90248u1307 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - Sen. Jesse Helms, R-N.C., handed President Bush Wednesday a list of 131 foreign firms that in the past have sold Iraq equipment that could be used in its military buildup.

The list, drawn up from unclassified, published sources, includes 68 West German companies, 13 from Austria and 10 each from the United Kingdom and

the United States.

The list does not include the Soviet Union, largest single supplier of military equipment to Iraq, since that was a government-to-government series of transactions and did not involve any specific companies.

Helms, the ranking Republican on the Foreign Relations Committee, said that he handed over a copy of the list - titled ''Saddam's Foreign Legion'' - to Bush during a White House meeting Wednesday morning between the president and about 30 congressional leaders.

The 68 West German firms outnumbered by far other countries. The German firms included Siemens (lathes and computer control equipment), Daimler Benz (security vehicles), Messerschmidt-Boelkow-Blohm (fuel air explosive technology, combat helicopters), Carl Zeiss (equipment for a chemical weapons facility), Thyssen (weapon and ammunition facilities), AEG (weapon and ammunition facilities) and Nukem (nuclear technology).

The U.S. firms listed are: Alcolac International (chemical precursors, possibly for chemical weapons); Banco National Lavoro, Atlanta branch (finance for Iraqi exports); Sitico (an Iraqi-financed front company); Nu Kraft Marcantile Co. (precursor chemicals); Hewlett- Packard (electronic equipment); Scientific-Atlanta (telecommunications); Tektronix (computer graphic terminal); Wiltron Co. (Scalar analyzer system); United States Steel and Strip Corp. (precursor chemicals) and Lummus Crest (chemical precursors).

The Helms list did not include Bell Helicopter Textron, which was identified Tuesday by Secretary of State James Baker as selling Iraq ''a few helicopters.''

Under the current United Nations embargoes, all of the deliveries on previous contracts would have to be canceled.

#90248u1327 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The Navy released the Iraqi cargo ship it had seized in the Gulf of Oman a day earlier to prevent the vessel from delivering a load of tea to Iraq, Pentagon officials said Wednesday.

''The boarding party has returned to the (guided-missile destroyer USS) Goldsborough,'' said Lt. Cmdr. Edward Lundquist, a Pentagon spokesman. ''The Iraqi ship is in international waters. We are continuing to monitor it.''

It was believed the United States had received some assurances that the cargo ship, still in the Gulf of Oman, would not try to enter the Persian

Gulf or the Red Sea in an attempt to deliver its cargo of tea from Sri Lanka.

Lundquist said the U.S. Navy and Coast Guard members from the Goldsborough who boarded the cargo ship Tuesday never took the vessel to a port despite reports it was going to be taken to Oman's port of Muscat.

He said the new destination of the Iraqi ship, named Zanoobia, was unknown.

It was the first ship seized during the U.S. intercept operation in the Persian Gulf region that began Aug. 17 to enforce the U.N. embargo against Iraqi goods.

The Iraqi ship was 268 feet in length and capable of carrying 1,599 tons of goods. Williams said he did not know how much tea the vessel had on board.

The United States boarded an Iraqi vessel for the first time last Friday, in the Red Sea. The vessel was empty, however, and was allowed to proceed.

Williams said Tuesday there had been about 550 U.S. interceptions in the Persian Gulf, the Red Sea and the Gulf of Oman since the operation began Aug. 17. But most of those have just been radio contact with commercial vessels, he said. Only 20 ships have been boarded.

On Aug. 18, two U.S. warships fired warnings shot across the bows of two Iraqi oil tankers leaving the Persian Gulf, but the tankers ignored the warnings and kept moving out to sea. No further U.S. action was taken.

CAIRO (SEPT. 5) UPI - Egypt hiked its crude oil export prices Wednesday $3.50 a barrel across the board, partially offsetting a $5 reduction last week.

With the latest increase, Egyptian prices are now $10 higher than they were prior to Iraq's invasion of Kuwait Aug. 2.

The Egyptian General Petroleum Corp. announced that the premium Zeit Bay-Ras el Behar and Gulf of Suez blends were now priced at $29.30 and $29 a barrel, respectively.

The medium Balaim and Ras Badran crudes were priced at $28.15 and $27 a barrel, respectively, EGPC said, and the heavy Ras Ghareb would sell for $26.70 a barrel.

Egypt Friday reduced its crude oil export prices by $5 a barrel. Prices

had previously been reduced by a total of $11.50 a barrel in the month following the invasion and U.N. embargo of Iraqi and Kuwaiti exports.

#90248u1346 09/05/1990 ~United Press International

(SEPT. 5) UPI - Gasoline prices nationwide fell 3.4 cents a gallon from the previous week's peak levels but experts Wednesday said the relief to motorists may be short-lived even if the Persian Gulf situation doesn't worsen.

The American Automobile Association in its latest survey released Wednesday said the average price of regular unleaded gasoline at self-service stations was $1.273 a gallon, down 3.4 cents from the previous week's $1.307 a gallon, which was the highest price recorded since Thanksgiving 1981.

The latest decline is the first price drop since Aug. 13. But the prices are still 19.8 cents higher than Aug. 1, the day prior to Iraq's invasion of Kuwait.

''This is probably a reflection of the decrease in demand for gasoline after the Labor Day weekend, which marks the end of the summer driving season,'' said David Morehead of the Petroleum Marketers Association of America, a Washington, D.C.-based trade group for independent gasoline marketers.

''I also think people are responding to the recent price increases by driving less and conserving gasoline.''

Rutherford Poats at the Energy Futures Group in Bethesda, Md., called the decline a ''mere lull in the market.''

''If the situation as it looks now continues into the fall, I would say we are probably looking at steadily rising prices,'' Poats said. ''That is because the demand for crude oil traditionally rises in the fourth quarter which means higher prices and if the refinery capacity remains strained as it is now or if one or two refineries encounter problems, we could see product prices such as gasoline jump very quickly.''

Poats said it should also be noted the current inventory or stocks of gasoline in the country is about 210 million barrels, much lower than last year's level of about 225 million barrels.

''At the same time the refineries are at near capacity utilization. So I wouldn't put too much stock in this 3.4 cent decline because the prospects for further increases are fairly high. The latest decline may only be a reflection of the intense competition among marketers that comes after the

end of the summer driving season but this is not going to perpetuate itself.''

Thus, he said, even if there is no worsening of the Persian Gulf crisis, U.S. motorists are likely to see higher gasoline prices.

Poats also said it is too early to tell if motorists have begun to conserve gasoline.

The AAA said its survey found supplies of gasoline adequate throughout the country despite the higher Labor Day weekend demand.

Prices decreased most in the Southwest, West and Southeast. The declines were more modest in the Midwest, New England and Mid-Atlantic. Prices were virtually unchanged in the Great Lakes region.

In futures trading on the New York Mercantile Exchange Wednesday, unleaded gasoline for October delivery had fallen 1.67 cents in early afternoon to 92.85 cents a gallon, as traders apparently took profits after the price rose by 8.34 cents Tuesday.

#90248u1351 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - President Bush spoke by telephone Wednesday with Ambassador Nathaniel Howell at the beleagured U.S. Embassy in Kuwait and told him ''to keep up the good work,'' a White House spokesman said.

Bush expressed ''the appreciation of American citizens'' for the efforts Howell and his skeleton staff have made to help other Americans trapped by the Iraqi invasion, press secretary Marlin Fitzwater said.

Fitzwater said the American diplomats remaining in Kuwait city are facing ''very difficult circumstances'' in terms of physical hardships, but the embassy continues to work actively to get American citizens out of the Persian Gulf state.

Fitzwater said Bush spoke with Howell for about 10 minutes around 10:30 a.m. EDT.

The embassy compound in Kuwait has been isolated by Iraqi troops, with water and electricity cut off. Some telephone service has continued, but officials assume calls are being monitored.

#90248u1352 09/05/1990 ~United Press International

MOSCOW (SEPT. 5) UPI - Workers in western Siberia's rich Tyumen oil and

natural gas fields threatened a strike Wednesday if emergency measures were not implemented to raise their standard of living.

The official Soviet news agency Tass said the workers made the threat in a statement adopted at a meeting of the Tyumen regional trade union committee of the oil and gas industry. They did not give a deadline.

''We understand that an ultimatum is an extreme measure, but other measures have already been used,'' the chairman of the regional committee, identified only by his last name Trifonov, told Tass.

''A year has passed since we began to manifest our anxiety over sharpening social tension in the region,'' Trifonov said. ''On the contrary, allocations for the development of Tyumen region were cut, and supplies to oil and gas workers are irregular.

''The branch is on the verge of crisis. Mass dismissals have begun, and people are not protected by any resolutions. We demand serious decisions.''

The oil and gas workers are asking for ''a package of social guarantees,'' including better living conditions and more available consumer goods, Tass said.

#90248u1362 09/05/1990 ~United Press International
WASHINGTON (SEPT. 5) UPI - Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, offered a plan Wednesday to strengthen the nation's deposit insurance funds and limit taxpayer liability in bank and thrift failures.

''It is time for the Congress to start putting the hard issues on the table for debate,'' Gonzalez said in a speech to the House.

''We must now confront what no one wanted to admit four or five years ago: the deposit insurance system is in urgent need of repair. Not only did the savings and loan insurance fund fail, today the bank insurance fund is facing a fifth consecutive year of multibillion-dollar losses,'' he said.

Among the changes Gonzalez proposed is remival cf ceilings on insurance premium assessments paid by banks and thrifts and giving regulators authority to change the assessments as conditions require.

He also proposed extending the assessments to foreign deposits, establishing a risk-based premium system to ensure that institutions that engage in greater risks pay higher premiums, and limiting the investments that can be made in the insured funds in order to further reduce the risk exposure.

Gonzalez also suggested that Congress consider limiting the number of accounts that can be insured and reducing the current $100,000 insurance coverage for individual accounts.

Gonzalez said regulatory agencies should be strengthened and he called for creation of a single consolidated regulatory agency that ''is truly independent and that can provide consistent supervision of all insured institutions.''

The plan calls for strengthening capital of insured institutions to ensure that owners risk their money, not just the taxpayers', Gonzalez said.

-30- 1918
#90248u1366 09/05/1990 ~United Press International
JOHANNESBURG, SOUTH AFRICA (SEPT. 5) UPI - Relative calm returned to black

townships Wednesday, but a war of words between black leader Nelson Mandela and Defense Minister Gen. Magnus Malan erupted over the army's role in killing 11 people outside a migrant worker hostel.

''They have come here not for the purpose of maintaining law and order but for the purpose of carrying on a war against the black man,'' Mandela told a crowd of about 2,000 supporters in Vosloorus, one of several townships torn by recent strife.

While giving no indication Tuesday's killings in the southern township of Sebokeng jeopardized power-sharing talks between the African National Congress and the white government, Mandela said, ''We are going to warn the government that if they want war, they will have war.

''They have used live bullets against our people instead of using water jets and other methods of crowd control. They are doing that because they don't care for the lives of the black man. That is what is happening and the government must stop that.''

In a statement, Malan criticized Mandela for blaming the army for the attack instead of ''addressing the essence of the causes of the conflict'' between rival black factions. More than 570 people have died in the past three weeks in the inter-tribal violence.

''The defense force and the South African police are repeatedly called upon to intervene in such situations and, while endangering their own lives, and under provocation, prevent human slaughter.

''At the same time, black leaders who don't seem to be able to manage the conflict, conveniently transfer the blame to the security forces... In terms of security considerations it is time for reflection and responsible action,'' Malan said.

Police reported calm had returned to the townships Wednesday, with only two incidents related to faction fighting overnight, neither of which caused any casualties. One house was burned down and a police patrol came under fire from unidentified gunmen.

Defense force headquarters said a board of inquiry had begun investigating Tuesday's incident. Eleven people were killed at the gates of the Sebokeng hostel when a platoon of army troops opened fire to disperse a crowd of township residents.

The crowd, angered by an alleged attack by vigilantes of the Zulu movement Inkatha, had massed outside the hostel. Police put the crowd at 5,000 and said they were armed with gasoline bombs and other dangerous weapons, prompting police trapped inside the hostel while investigating the earlier killings to call for army reinforcements.

But the ANC said in a statement Wednesday the hostel, which has had no Zulu residents since last month, was raided at 2 a.m. by armed Inkatha vigilantes and ''some whites.'' During the raid, 19 hostel dwellers were killed, the ANC said.

The 11 killed by army troops were among 36 who died in Sebokeng Tuesday. They were the first killings by soldiers since the government imposed tough emergency regulations on strife-torn townships on Aug. 24 that included the deployment of extra police and military units.

Mandela again Wednesday rejected any suggestions that the conflict between the ANC, which draws heavily among Xhosas for its support, and the Zulu movement led by chief Mangosuthu Buthelezi was a tribal one.

''We have no quarrels with the Zulu people,'' he said. ''These are our people. These are our flesh and blood. What we condemn and what we are going to deal with are people who allow themselves to be used by police to kill our people.''

What happened wa unclear. People outside the hostel were sitting down when the soldiers arrived. Peter Mabuye, a photogpraher for Afrikaans weekly Vaalweekblad, said the soldiers fired after at least one unidentified object was thrown at them.

''Then the shooting broke out. I threw myself on the ground, bullets whistled above me. I pressed myself flat until a tear gas grenade landed next to me.'' After the shooting stooped, Mabuye said the soldiers climbed into the vehicles and drove away.

The shooting followed release over the weekend of a report by a commission of inquiry into the shooting deaths of demonstrators by police in Sebokeng in March. The commission was sharply critical of police behavior, and Mandela noted, ''only confirms that the conduct of the police leaves much to be desired.''

WASHINGTON (SEPT. 5) UPI - Bowing to calls from lawmakers, President Bush will address Congress Tuesday evening on developments in the Persian Gulf and the goals of the military buildup to thwart Iraqi aggression.

The nationally televised address in the House at 9 p.m. EDT will occur just two days after Bush returns from his weekend emergency summit meeting with Soviet President Mikhail Gorbachev on the Gulf crisis.

White House spokesman Marlin Fitzwater said that the congressional invitation was extended to Bush by Speaker Tom Foley, D-Wash., and Senate Democratic leader George Mitchell of Maine at a White House luncheon.

-30- 821

#90248u1411 09/05/1990 ~United Press International

(SEPT. 5) UPI - Iraqi President Saddam Hussein today rallied Moslems around the world to rise up against their pro-Western rulers. In a nearly 40-minute televised speech read by his spokesman, Saddam specifically called on Moslems in Egypt and Saudi Arabia- quoting- ''to revolt against their traitors, rulers and fight foreign presence in the holy land.'' Saddam likened Operation Desert Shield to the United States in Vietnam. .

A plane carrying 92 Western women and children landed in London today on a flight from the Jordanian capital. British officials say the group fled Baghdad yesterday on a U-S-chartered Iraqi Airways jet. Also today, French officials say an Air France jet left Paris for Amman to collect 44 French women and children who landed in Jordan yesterday aboard an Iraqi plane from Iraq. Iraqi President Saddam Hussein has agreed to free Western women and children held in Iraq and occupied Kuwait. .

The Pentagon says an Iraqi vessel seized and commandeered by the Navy in the Gulf of Oman remains at sea today. Chief Pentagon spokesman Pete Williams says the United States has NOT determined yet what to do with the ship's cargo of tea, other than to keep it away from Iraqi ports. The ship was seized yesterday under a U-S intercept operation designed to enforce a U-N embargo against Iraqi goods.

President Bush received full support for his actions in the Persian Gulf in a one-hour meeting this morning with 30 Congressmen just back from the region. Rhode Island Democratic Senator Claiborne Pell said he was pleased with the willingness of gulf countries to carry their own share of the burden. And the head of the Senate Foreign Relations Committee said morale of U-S troops was high.

-30- 1890

#90248u1412 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - President Bush marked the first anniversary of his drug war Wednesday by helping release a rosy report on the battle and vowing that despite the Persian Gulf crisis illicit narcotics remain his top concern.

''Block by block, school by school, child by child, we will take back the streets,'' declared Bush, flanked by federal anti-drug chief William Bennett. ''We will never surrender.''

Encouraged by figures showing decreased drug use and reduced cocaine and heroin hospital emergency room cases, Bush said, ''The crisis is far from over. But there are clear signs of progress.''

Other figures, however, not listed in Bennett's report, ''Leading Drug Indicators,'' show that many cities, including the nation's capital, are in the grips of record murder rates, many tied to narcotics.

Bush made no reference to the drug-related slayings. But he said: ''My administration will remain on the front lines until this scourge is licked for good.''

The president made the comments at a White House briefing on drugs after conferring earlier in the day with about 30 members of Congress who just returned from the volatile Persian Gulf.

''I know other subjects are preoccupying all of us these days,'' said Bush referring to the high-stakes showdown with Iraqi President Saddam Hussein. ''But this (drugs) remains number one.''

On Sept. 5, 1989, Bush issued a congressionally mandated national anti-drug strategy that resulted in Congress approving $9.5 billion for interdiction, law enforcement, treatment and prevention.

The president has requested that Congress raise the figure to $10.6 billion for fiscal 1991, which begins Oct. 1. This would mark a 70 percent increase in federal anti-drug funding in the past two years.

Bennett, in his ''white paper'' report, cited studies showing a slight decline in drug-related emergency room admissions, as well as a somewhat big drop in drug use by teenagers.

One survey found that the percentage of teenagers saying that they had used drugs within the past 30 days fell from more than 35 percent in 1981 to 25 percent in 1987 to less than 20 percent last year.

''Mounting empirical evidence indicates that our current epidemic, though still intolerably large, has begun to recede,'' said Bennett, who attributed the gains, in part, to Bush's leadership and the American people's resolve.

Reaction to Bennett's ''white paper'' was swift and pointed.

House Government Operations Committee Chairman John Conyers, D- Mich., said that the 4 percent drop in cocaine emergency room visits cited in the report ''is very welcome news.''

But, Conyers noted, studies have shown that ''the number of deaths in the United States resulting from cocaine use have increased by 11 percent in the last year.''

''Drug czar Bennett and President Bush cannot deny that we are losing the drug war in our inner cities,'' he said. ''I am concerned that the Bush-Bennett drug strategy has emphasized assistance to upper middle class abusers and their families, not the chronic abusers who are most often poor and minorities.''

The congressman also said the United States ''will never win this war on drugs until we rethink and refocus the priorities of the drug strategy.''

He said, ''Spending over 70 percent of the budget on law enforcement leaves inadequate dollars for prevention and treatment. The budget should be reallocated to reflect a 50-50 division.''

#90248u1417 09/05/1990 ~United Press International

WARSAW, POLAND (SEPT. 5) UPI - The leadership of the Solidarity union voted Wednesday to take away the Solidarity logo from Gazeta Wyborcza, the daily newspaper established by the union in 1989.

Barbara Malak, spokeswoman for the Solidarity National Council, resigned to protest the decision, which passed on a 26-21 vote with 12 abstentions during an all-day meeting in the Baltic seaport of Gdansk.

The move, which came in the leadership's first meeting after the August

holidays, has further shaken the Solidarity movement. It is split into two opposing camps, one supporting Solidarity leader Lech Walesa and the other Prime Minister Tadeusz Mazowiecki.

Gazeta Wyborcza (''Election Gazette''), was set up as an outgrowth of the historic roundtable talks in spring 1989 between the former communist government and Solidarity.

Observers at the meeting said the discussion was short and Walesa did not participate, although the move was his initiative.

The roundtable participants agreed to hold partially free parliamentary elections in June which were swept by Solidarity, and the union was given the right to set up a daily newspaper before the elections.

Walesa named the union's chief ideologist, Adam Michnik, as editor-in-chief, and it quickly became the most influential paper in Poland. The newspaper retained its title after the elections.

But Walesa began criticizing the Mazowiecki administration for its economic policies and for alleged foot-dragging on political reform, particularly in failing to remove former communist managers from the bureaucracy.

The Solidarity-led government has imposed a tough economic stabilization program Jan. 1 that has brought a 40 percent decline in the standard of living.

Michnik and other former Walesa advisers have broken with Walesa to support Mazowiecki.

Last June, Walesa sent a letter to Michnik acknowledging that he could not fire him because the paper is now under a private partnership called Agora and not sole property of the Solidarity union, but calling on him to resign. Michnik refused.

Walesa has frequently complained that Gazeta no longer represents Solidaritys views.

The move was considered an effort by Center Alliance, the movement supporting Walesa, to go on the offensive in support of his campaign for president and for other political changes.

Walesa has complained that the current president, former Communist Party leader Wojciech Jaruzelski, is ill-suited to the current political situation.

SALT LAKE CITY (SEPT. 5) UPI - An insolvent savings and loan association cannot escape federal takeover by simply changing into a commercial bank, a U.S. Office of Thrift Supervision lawyer argued Wednesday.

''This is an overt, deliberate attempt to escape the regulatory scheme,'' OTS attorney Harvey Levin said in urging Utah federal Judge David Winder to reject Home Mortgage Bank's request for an injunction to halt its takeover.

''This would allow individual states to make individual inroads on federal regulation,'' Levin said. ''States cannot deprive federal regulatory agencies of their authority. This is a deliberate contrivance to strip OTS of its authority.''

The agency ordered the Resolution Trust Corp. July 5 to step in as conservator of Home Mortgage, which it claimed had suffered ''operational losses every quarter and every year'' since 1983.

''This was a failing, if not a failed, institution,'' said Levin. ''It was in unsafe and unsound condition.''

But Home Mortgage attorney Jeffrey Jones claimed the thrift had changed its state charter June 15, switching to a commercial bank and taking itself out of the Office of Thrift Supervision's control.

In the suit to halt the two federal regulatory agencies from liquidating the bank's assets, Jones said Home Mortgage was just trying ''to get back what OTS took without authority. We want it returned to its rightful owners.''

The financially troubled Utah bank, which serves about 15,000 customers, ''can be recapitalized,'' he claimed.

''There may not be a need for any taxpayer dollars. The public interest is served by private dollars used to resuscitate this bank. The owners are being deprived of the right to operate their businesses. Everything of value to Home will be lost'' if the Resolution Trust Corp. sells off the assets,'' Jones said.

Winder took the arguments under advisement. The judge said he would rule quickly on the motion for an injunction.

Home Mortgage executive Fred Smolka said the thrift got into trouble in the early 1980s when Grant Affleck convinced numerous borrowers to take out second mortgages and invest the money in his real estate properties.

Affleck's businesses went bankrupt and he was convicted of defrauding investors. But, during those legal proceedings, the courts ruled Affleck and not the borrowers was responsible for the second mortgage payments.

Smolka said Home Mortgage has obtained a $2 million settlement against the loan insurance company. That money and about $1 million in funds from private investors now held in escrow will solve the bank's financial problems, he said.

''But we're not going to put those funds into the bank now just so Resolution Trust can have access to them,'' he said.

And officials from the state Financial Institutions Department said they approved the change to a commercial bank because they believed Home Mortgage's managers ''had a realistic opportunity to make this a successful financial institution. They had a sufficient plan and sufficient capital.''

However, Levin said the switch ''is an effort to avoid the board's

scrutiny ... a frustration of uniform federal regulation'' of the ''of uniform federal regula

Home Mortgage, Levin said, ''has been in the red for seven years. It has no prospects for survival. The capital they would put in is insufficient.''

Jones conceded the banking firm ''has suffered loses. That doesn't mean that will continue into the future. The OTS cannot justify this by saying its actions would be frustrated.''

NEW YORK (SEPT. 5) UPI - A national index of help-wanted ads remained unchanged in July, and is likely to stay that way during the Middle East crisis, an economic research organization reported Wednesday.

The Conference Board said the seasonally-adjusted index, based on help-wanted advertising volume at 51 major newspapers across the country, was unchanged from June but 17 points below the year-ago level.

Movement in the labor market is likely to remain sluggish while the Persian Gulf crisis causes businesses and consumers to put expansion plans on hold, the New York-based group added.

''As of August 1, the economy in general and the labor market in particular was poised for a modest uptick in the second half of the year '' said Conference Board Economist Ken Goldstein.

''Now it is more likely that exporters, business investors and consumers will put some plans on hold until the economic and political situation in the Persian Gulf becomes clear.

''For the labor market, that probably means no big staff expansions over the next few months and little chance of want-ad volume quickly turning around.''

The group said worsening economic prospects could be especially harmful to the New England and Middle Atlantic regions which ''seemed on the verge of coming out of a long, steep economic decline.''

Want-ad volume in the Mountain, Pacific and East South Central regions has started to decline at a somewhat faster pace, the group said, while figures for West South Central, including oil drilling areas, remained fairly stable over the period.

''Higher oil prices could induce a pickup in oil exploration and new investment in oil refining and gas line equipment,'' the Conference Board

said.

QUITO, ECUADOR (SEPT. 5) UPI - The closing of a radio network that made accusations against a brother of President Rodrigo Borja does not signal any restriction on freedom of the press, a government official said Wednesday.

Borja cancelled late Tuesday the licenses for the frequencies used by Radio Sucre, making good on a threat he made last week.

The network, owned by opposition congressman Vicente Arraba Dito, accused a brother of Borja of participation in a $53 million arms deal with the army.

Borja reacted by giving the station five days to prove the charges. He offered his resignation as president if the station provided proof and threatened to cancel its license if it failed to back the accusations.

The order reverting the frequencies to the state silenced the six stations of the network that functioned in various cities.

Social Communications Secretary Leopoldo Barriga said the closure does not mean the government was moving to restrict press freedoms and was taken because the radio network made false accusations.

''It put in doubt the morality of the president, his family and the armed forces,'' Barriga said.

Network officials said they would appeal the closure.

#90248u1469 09/05/1990 ~United Press International
BOSTON (SEPT. 5) UPI - The Bank of New England Corp. took the first step Wednesday to work out a deal that could retire some or all of its $706 million debt and shore up its badly deteriorated capital position.

The banking company said it had asked bondholders to prepare to negotiate a ''restructuring'' of that debt.

Spokesman James Dorsey termed the effort ''a further step to recapitalize the corporation.''

Although Dorsey declined to be more specific about what terms the company will seek, restructuring could mean anything from a sharply dicounted cash

buyout of the bonds to a swap that would exchange some of the company's severely depressed stock for them.

In whatever form, a satisfactory deal is important to the bank not just for the potential improvement in its capital position but also because the bonds carry high, semi-annual interest payments, much of which are coming due by Oct. 1.

If no compromise is made by then, the bank would have either of two unpleasant choices.

One would be to part with a substantial sum of badly needed cash in interest payments on the bonds. That, in any case, might not be allowed by federal regulators who have the power to halt such payment to protect the interests of depositors and their insurer, the Federal Desposit Insurance Corp.

In the second case, if regulators refused to approve the interest payment, the banking company would have to renege on its bonds, which could conceivably result in forced bankruptcy by bondholders.

Dorsey said he could not estimate when an agreement might be reached.

Representatives of bondholders were delighted with the bank's announcement.

''This is great news,'' said one. ''It means we're at the beginning stage of an exchange offer'' for the bonds.

''If it's done right, there's a high probability a lot of bonds will be exchanged and it means Bank of New England will get a major, massive infusion of capital,'' said the bondholder representative who declined to be identified.

The capital infusion would come through a transaction that might cost Bank of New England cash or, possibly, stock. If the bank could buy back a $1,000 face-value bond for, say, $100, it would thus remove a $1,000 liability for just a $100 loss in assets.

The bonds have lost as much as 75 percent of their face value in the market since the company's financial troubles came to light last year, said the representative of another group of bondholders.

Bank of New England said it had asked bondholders ''to form a committee and select financial and legal advisers so that negotiations can begin regarding restructuring'' the debt.

#90248u1498 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - In the interest of romance, a judge presiding over an unexpectedly long robbery trial discharged a juror with imminent wedding plans to give the bride time to get her nails and hair done before the ceremony.

But it was in the interest of justice that State Supreme Court Justice Phyllis Bamberger refused to set aside the guilty verdicts against the two robbery suspects, she said in a written decision released Wednesday.

In a ruling upholding the robbery and weapons convictions of Ronald Moss and Calvin McBride, the judge said she discharged the juror, identified only as ''Miss G.,'' during the trial only as a last resort.

She dismissed her after determining the juror would have suffered ''an unduly onerous burden'' if forced to change her wedding and honeymoon plans.

Bamberger noted the juror had planned to be married at City Hall on Friday May 11, throw a wedding bash on Saturday, May 12, and leave on a honeymoon Tuesday, May 15, using pre-paid, non-refundable airline tickets costing $430.

In her decision, Bamberger noted that before the morning ceremony the juror also planned to get a manicure and have her hair coiffed.

Bamberger tried to keep the juror as long as possible - even offering to have a judge marry the couple at the reception. But she warned the bride-to-be she would have to expand her guest list to include a court officer if deliberations had begun.

The juror quietly considered her betrothed and then told the judge, ''I don't think he is going to approve of that.''

She also said her future husband's qualms about changing plans ''would be on my mind. I don't know how much it would effect me. I would be thinking, 'Oh, God, I don't know.'''

Days after ''Miss G.'' was discharged May 9, the rest of the Bronx jury convicted Moss and McBride of second-degree robbery and possession of a dangerous instrument.

#90248u1509 09/05/1990 ~United Press International

LOS ANGELES (SEPT. 5) UPI - A photographer hired by MTV to take photographs of Axl Rose and his Guns N' Roses band at a video awards show has sued the group and their bodyguard for allegedly shoving him and injuring him, court documents showed Wednesday.

According to the Superior Court lawsuit, Jeff Kravitz was hired by a MTV publicist to photograph celebrities, including Rose, at the MTV Music Video Awards presentation Sept. 6, 1989.

Kravitz, wearing a large yellow ''staff'' tag that allowed him access to all parts of the Universal Amphitheater, where the show was held, was preparing to snap a picture of the heavy metal rock star when one of his bodyguards, identified only as Stewart, approached Kravitz, the suit said.

The bodyguard shouted to Kravitz ''no pictures'' and ''placed his hand over the lens of the camera, shoved the camera against Kravitz and shoved the shoulder of Kravitz,'' the suit said.

A picture taken at that moment shows part of a vest Rose was wearing and the outline of a hand, the suit said.

Kravitz started to take another picture when the bodyguard stepped in front of the camera, ''shouting 'I told you no pictures,' threatening to smash the camera to the ground and to harm Kravitz, and grabbed (his) camera to pull it away from him,'' the lawsuit said.

As Kravitz tried to protect himself and his camera, he lost his footing, and although he did not fall, was injured, the suit said.

Kravitz suffered a sprained or strained back, causing ''severe neck pain'' and ''massive headaches'' and also aggravated a previous injury to his elbow, the suit said.

The lawsuit, which alleges negligence and conspiracy to commit assault and battery, seeks unspecified compensatory and punitive damages.

Rose could not be reached for immediate comment.

#90248u1536 09/05/1990 ~United Press International

DEADHORSE, AK (SEPT. 5) UPI - An all-night fire at an oil field support warehouse near Prudhoe Bay was extinguished Wednesday and 1,000 workers who fled a toxic chemical cloud returned to their work camps, officials reported.

There were no casualties and no disruption to oil production at the North Slope oil fields.

The fire started late Tuesday in a shop operated by Dowell Schlumberger, a firm that does oil well site work, but Anchorage company manager Louis Steinke said the damage should have no impact on production or drilling.

Steinke said the blaze was confined to a 32,500-square-foot maintenance building that housed chemicals, which were set afire and released into the air.

Winds pushed the low-hanging chemical cloud and smoke toward work camps, triggering a 10-hour evacuation.

''Originally, the fire was our concern. Then, the explosions were our concern. Now, the chemicals are our concern,'' said Caribou Inn manager Meg Halsey, who took in 100 of the evacuated workers.

''We're just waiting for the cloud of bad things to pass us,'' she said early Wednesday as dozens of firefighters from two oil companies, Arco and BP, and the local government, the North Slope Borough, battled the fire in the sub-freezing pre-dawn hours Wednesday.

Six work camps were evacuated, said Gary Greener, a dispatcher for Veco, an oil field service company, which was among those that sent its workers away from the toxic cloud. Greener stayed behind, four blocks from the fire, to maintain contact with the producing oil fields.

Greener said he heard, saw and felt the explosion and said, ''It was just your typical mushroom cloud.''

The fire started at 5:15 p.m. Tuesday in the unoccupied warehouse. Less than five hours later, with the blaze still out of control, the Arco Fire Department decided firefighters should ''back away from the fire, based upon the fact that there were several known toxic and highly volatile chemicals and acids located in the structure and the probability of an explosion was high,'' said North Slope Borough public safety officer Larry Hinken.

Noxious gases coming from the burning building also prompted an evacuation at 10 p.m. that lasted until 8 a.m.

Government officials said 1,000 workers were uprooted from oil field camps and sent to the Deadhorse airport terminal for temporary shelter. Many were housed for the night in other camps and Deadhorse hotels.

Steinke downplayed the danger, calling the evacuations precautionary. But Arco said the chemicals posed a threat. And government officials voiced concerns about the chemical releases.

''With barrels of things blowing up, we don't know how much they dissipate '' said Debby Bloom, spokeswoman for the state Department of Environmental Conservation, which sent investigators to the scene.

Bloom said the substances involved included nitrogen, hydrochloric acid, hydroflouric acid and xylene, a toxic and flammable solvent.

North Slope officials were concerned that Dowell Schlumberger supervisor Charlie Winlow ''revealed that they were not entirely aware of the various chemicals stored in that plant,'' Hinken said in a statement.

No chemicals spilled onto the tundra or grounds around the fire, Bloom

said.

Deadhorse is an oil industry service center for Prudhoe Bay and other North Slope oil fields that produce one-fourth of the domestic oil supply.

Cause of the fire remained under investigation. Steinke declined to state a damage estimate.

-30- 3740

#90248u1540 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Traveling to the tension-filled Middle East now is not only more dangerous, it's more expensive.

Commercial airlines flying to Persian Gulf destinations are facing higher insurance costs and passing those increases on to passengers in the form of war-zone surcharges, airline representatives said.

Italy's Alitalia has added a one-way $50 surcharge, the Netherland's KLM has added surcharges ranging from about $28 to $102 one-way, British Airways has proposed a one-way surcharge of about $57, Turkish Airlines is planning a surcharge beginning next week and West Germany's Lufthansa added surcharges starting at $41 to Persian Gulf destinations, airline spokesmen said.

The surcharges are an attempt to meet higher insurance costs, they said.

Airlines flying in politically tense or war-torn areas must purchase separate insurance coverage, in addition to regular coverage for aircraft and passengers, known as ''war-risk'' policies, industry experts said.

David Larner, spokesman for insurer Lloyd's of London, said increased insurance premiums were being charged to airlines due to tensions in the Gulf and the risk of war.

''Generally, more risks are being levied at two levels,'' he said. ''A higher level is being assessed to carriers domiciled in the Gulf region.''

Large international carriers based outside the Gulf also are being charged an average of $1 million more per week due to the Gulf crisis, he said.

The highest risks for flights were assessed to those originating or terminating in Jordan, followed by Saudi Arabia, said Larner.

Other Gulf states were assessed lower risk charges, he added. Regular commercial flights to Kuwait and Iraq have ceased.

The cost of insuring aircraft fleets can be staggering. The Kuwait Airways

fleet confiscated by Iraq is valued at $600 million, while a British Airways jumbo jet seized by Iraq on the tarmac at Kuwait airport is valued at $28 million, Larner said.

Vendors of war-risk insurance are concerned about the potential for loss in the Gulf, which makes their policies costly, said one aircraft insurer who asked not to be identified.

''Because the war-risk market is pretty small and a little bit nervous right now, we're talking about a substantial amount of money,'' the insurer said. ''Airlines are concerned and are prepared to pass it on to passengers.

''Even though insurance isn't a huge cost compared to fuel, it certainly is going to cost them a lot more to go into the Gulf,'' he added.

Members of the International Air Transport Association, a trade association of the world's major airlines, voted last week to seek individual government approval for surcharges of 5 percent to 8 percent on international fares.

The proposed surcharges, to be effective Oct. 1, are intended to partially recover the ''extraordinary cost rises'' due to the Gulf crisis, IATA said in a statement.

While much of airlines' higher costs are increased fuel prices, their insurance costs have risen as well, IATA spokesman John Brindley said last week.

A single trip by an jumbo jet, for example, now is costing a premium of about $25,000, he said.

Richard Livingston, a spokesman for the Airline Passengers Association consumer group, said carriers should raise fares rather than apply surcharges.

Surcharges are inequitable because they're frequently the same amount, no matter the price of the ticket, he said.

''My whole feeling about security measures is if anything needs to be done it should be done by the government and not be left to the consumer to pay for,'' he said.

Alitalia began adding its surcharge of $50 one-way and $100 roundtrip Aug. 22 on flights to the United Arab Emirates, Jordan, Saudi Arabia, Syria, Egypt and Iran, a spokesman said.

British Airways has proposed its surcharge to government aviation

authorities and was awaiting their approval, said John Lempl, a spokesman for the carrier in New York.

The proposed surcharge is ''due to the increased fuel costs, increased insurance premiums we're being hit with,'' said Lempl, who would not elaborate on the cost of the carrier's insurance premiums.

The surcharge includes flights to Abu Dhabi, Bahrain, Cairo, Dubai, Doha, Jeddah, Muscat, Riyadh and Tel Aviv, he said.

Insurance rates for Turkish Airlines have risen 5 percent to 8 percent due to the Middle East crisis, a spokesman in New York said.

The Turkish carrier has not determined the exact amount of its surcharge on flights to the Gulf region, which is slated to take effect Sept. 12, but is hoping to keep it under 5 percent, a spokesman said.

Lufthansa's surcharge, which applied to flights from Germany to destinations including Cairo, Tel Aviv, Damascus, Abu Dhabi and Bahrain, began Aug. 23, a spokeswoman said in New York.

El Al, the Israeli carrier, has not increased its fares, a spokeswoman in New York said. The carrier proceeded with previously scheduled plans to lower fares Aug. 20, she said.

KLM launched its surcharges Sept. 3. The surcharges apply to the Dutch airline's flights to Cairo, Tel Aviv, Abu Dhabi, Bahrain, Damascus, Doha, Dubai, Muscat, Amman, Dharan and Jedda.

#90248u1541 09/05/1990 ~United Press International

ANCHORAGE, AK (SEPT. 5) UPI - A small plane missing for two days has been found smashed into a mountainside, killing all five aboard, state and federal officials said Wednesday.

Helicopters flew to the rugged site north of Anchorage to recover the bodies Wednesday, Alaska State Troopers said.

The Cessna 206, on a flight from the northwestern Alaska town of Kotzebue to Anchorage, disappeared Sunday right after a routine radio message from the pilot indicated no problems. The plane was found late Tuesday at the 4,000-foot level of a mountain near Talkeetna, said Federal Aviation Administration spokeswoman Mary Lou Wojtalik. No identities were released.

This brings to eight the number killed in two plane crashes Sunday and Monday.

In the other crash, a Frontier Flying Service plane carrying 10 people - seven of them from the same family, including two infants - crashed near Kaltag, killing school principal Kevin LeFevour, 32, and two young daughters; his wife and three other children were injured, said trooper spokeswoman Janelle Hout. Two teenage students and the pilot also were hurt.

The National Transportation Safety Board was investigating both accidents.

#90248u1565 09/05/1990 ~United Press International

PARIS (SEPT. 5) UPI - The world oil market has sufficient supplies despite the Persian Gulf crisis, and the effect of the U.N. embargo of Kuwaiti and Iraqi crude oil may not be felt significantly until November, the

International Energy Agency said Wednesday.

''The oil market at present is generally well-supplied'' in spite of Iraq's Aug. 2 invasion of Kuwait and the embargo of about 4.3 million barrels a day of Iraqi and Kuwaiti crude ordered by the United Nations four days later, the IEA said in its monthly oil report for August.

The embargo's effect was not felt for much of August because of the arrival at markets of Iraqi and Kuwaiti cargoes loaded prior to the invasion, the Paris-based agency said.

''The small shortfall in late August arrivals has been made up by commercial stock draw,'' said the IEA, made up of the world's 21 largest industrialized, oil-consuming nations.

Moreover, sufficient stocks exist worldwide to compensate for much of the Iraqi and Kuwaiti shortfall in September, the agency said.

A continued drawdown of commercial stocks combined with anticipated lower demand and higher production from countries such as Saudi Arabia and Venezuela ''will also cover much of the shortfall in October,'' the IEA report sahd"

But the IEA acknowledged the situation could turn more difficult starting in November.

''Beginning in November,'' the IEA said, ''increased seasonal demand - particularly for light products and heating fuels - could complicate distribution of products in regional markets.''

If this shortfall persists, ''the market could become increasingly tighter during the winter months,'' the IEA added. ''This will come at a time when demand is seasonally highest and as the ability for significant commercial stockdraw gradually diminishes.''

In addition, the report said, ''Severe cold weather and extended refinery operations by industry at full capacity could also further increase market tightness.''

The IEA said the degree of refineries' flexibility to different types of crude oil would also affect supply of and demand for petroleum products in the coming months.

WASHINGTON (SEPT. 5) UPI - The Navy lifted the suspension Wednesday on the firing of the 16-inch bombardment guns on the battleship USS Wisconsin, operating in the Persian Gulf as part of Operation Desert Shield.

The suspension on firing the guns on the nation's four battleships was imposed last May 24 when powder bags used in the 16-inch guns ignited

during testing at the Naval Weapons Station in Dahlgren, Va.

The tests were part of the Navy's reopened investigation into the April 1989 explosion in a 16-inch gun turret aboard the battleship USS Iowa that killed 47 sailors.

The Navy's original investigation concluded that the blast on the Iowa was deliberately set, most likely by gunner's mate Clayton Hartwig, who was killed in the explosion.

But the Navy was forced to reopen its investigation when Sandia National Laboratories, conducting an independent investigation for Congress, determined that the blast could have been accidental and could have occurred if the powder bags were rammed too far and too fast into the gun's breech.

The Navy then obtained an unexplained ignition of powder bags during its own, subsequent tests, and it ordered a suspension on firing of the battleship's guns.

Navy spokesman Lt. Mark Walker said Wednesday's lifting of the suspension on the firing of the Wisconsin's 16-inch guns did not mean the Navy had closed its investigation into the Iowa explosion.

''Naval Sea Systems Command continues testing of various theories into the explosion aboard the USS Iowa,'' he said.

Walker said the Navy authorized the Wisconsin to resume live firing of its 16-inch guns following completion of a testing period in which there were safety inspections, ordnance certification and on-board powder verification.

''The Naval Sea Systems Command has now determined that the guns may fire certain lots of propellant,'' he said, adding that powder bags not in these specific lots have been removed from service.

Walker also said the battleship USS Missouri, currently on operations off the coast of California, will be authorized to resume firing of its 16-inch guns upon completion of a period of training, inspection and on-board powder verification.

The Iowa and the fourth battleship, the USS New Jersey, are going to be mothballed next year under current Navy plans.

The nine 16-inch guns on battleships can fire 2,700-pound, armor- piercing shells up to 24 miles away. At 2,000 yards, the shells can perforate a concrete wall 36 feet thick, the Navy said.

The last time the deafening 16-inch guns were fired in anger was in 1983, when the USS New Jersey was deployed off the coast of Lebanon in support of U.S. Marines who were ashore near Beirut.

(SEPT. 5) UPI - U-S Senator Robert Dole is with a delegation in Moscow, where Soviet President Gorbachev met with Iraq's foreign minister today. Dole came out of talks with Gorbachev saying he's optimistic about Iraq-Soviet contacts in light of the upcoming Bush- Gorbachev summit. Dole says it's possible the Iraqi envoy has a message for Gorbachev to pass on to President Bush. .

Thousands of refugees are stranded in a 30-mile frontier strip of fiery desert between Iraq and Jordan- and it's the wait that's the worst. Refugees wait for hours to get food and water, in addition to the wait to go home. There are about 60-thousand refugees from Iraq and Kuwait in the city of tents and makeshift shelters made of towels and sheets. .

The travel of U-S military and government personnel in the Philippines is being restricted today following reports of increased threats against Americans. Off-post leave and non-essential travel was canceled until further notice. Officials say the action was just a precaution, but they would NOT specify the threats.

Eight young men charged in the weekend stabbing death of a Utah tourist on a New York subway platform are being held without bail today following their arraignment on murder charges. A New York newspaper report says the men are part of a gang that requires members to mug someone before they are admitted.

Pope John Paul continued his 11-day tour of Africa with a stop in the tiny nation of Burundi. The pontiff received a big welcome as he called for an end to the tribal violence that has long-plagued the former Belgian colony. The elitist Tutsi tribe has often massacred members of the majority Hutu tribe.

#90248u1596 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - A teenage boy testified Wednesday how torching victim David Opont was taken away by another youth shortly before he was set afire and left to die for apparently refusing drugs.

The unidentified 14-year-old suspect, known only by the initials ''G.S.,'' went on trial before Brooklyn Family Court Judge Joseph Esquirol, who banned the public from the courtroom and limited media coverage to six reporters.

Opont's ordeal drew nationwide attention, as former President Reagan and a number of other celebrities came to visit the frail boy at his hospital bed during his recovery from severe burns.

The witness, who also was not identified, said he was walking to school with Opont when the defendant rode up on a bicycle, stopped them, and asked them if they had any money.

The youth searched the boys' pockets and schoolbags, then opened his

jacket to show the handle of a knife, the witness testified. Then he let the witness go and took Opont away, he said.

The witness said he went on to school, reported the incident to a teacher who reported it to police.

In opening the trial, Esquirol called it a ''fact finding procedure'' in that the defendant will not face punitive imprisonment if found guilty but will be given time in a youth facility because of his age. It is a non-jury trial and Esquirol will decide the youth's fate.

''G.S.'' is being tried on 12 counts including attempted murder, kidnapping, robbery and assault with a deadly weapon. He faces up to three years in a reform facility if he is convicted on the most serious charges.

Opont, a frail, soft-spoken recent immigrant from Haiti, was dragged into a Flatbush basement as he headed to school March 7.

Opont told authorities a bigger child, described by police as a foster child and a neighborhood bully, tried to force him to smoke something he thought was drugs.

The attacker set fire to Opont's clothing, burning him over 55 percent of his body. Doctors at first gave him only a 50 percent chance of survival.

The story of the attack and Opont's refusal to take drugs swiftly gained national attention. Cards and gifts poured into New York Hospital-Cornell Medical Center's burn unit and luminaries, including Ronald Reagan, Bill Cosby and the Rev. Jesse Jackson came to the boy's bedside.

(SEPT. 5) UPI - Secretary of State Baker says the Bush administration has opened talks with the Vietnamese-backed head of Cambodia's government. Baker- in an appearance before the Senate Foreign Relations Committee today- revealed the new departure from the U-S policy of isolating Cambodia's Communist regime.

The International Trade Commission rendered a decision that should get a warm reception from the beleaguered domestic sweater industry. The I-T-C ruled that sweaters from the Far East were being dumped on the U-S market at an unfair low price. The sweaters now will be hit with a duty that increases their price.

Health officials have met about half of 226 goals they were to have completed by 1990. And one health department official says judging by the impact on mortality and improved quality of life he believes they've done ''quite well.'' 26 percent of the goals were NOT met and there was NOT enough data to assess the others.

The Mayflower-Two left its dock for the first time in 30 years today, sailing with a crew dressed as Pilgrims in open waters off Plymouth, Massachusetts. The replica of the ship that carried Pilgrims to Plymouth Rock showed that it is still in fine sailing condition after crossing the Atlantic in 1957.

Poland's official news agency says Soviet authorities stopped three American Indians from entering the Soviet Union because their passports were the wrong color. The three are part of a group of about 50 Iroquois taking part in a- quoting here- ''sacred run for peace'' across Europe.

#90248u1680 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The government, attempting to determine the level of drug abuse by truckers, will conduct voluntary tests on commercial drivers at roadside scales from coast to coast, officials said Wednesday.

Starting in October, the Federal Highway Administration intends to randomly check 400 drivers at selected sites in Maryland, Missouri, Arizona, Washington and Virginia for nine types of drugs as well as alcohol.

The identity of the drivers participating in the testing will be kept confidential, the agency said.

FHWA Administrator Thomas Larson said: ''The sites will serve as laboratories to evaluate procedures for the collection of urine and breath samples and to administer a questionnaire about drug use in the preceding month.''

''If the pilot study demonstrates the feasibility of gathering the desired information, more data will then be collected in a national study, at nine randomly selected, geographically diverse sites,'' Larson said.

The agency said the data will help determine whether it should ''refine'' drug regulations that took effect in December and require interstate

carriers with 50 or more drivers of large trucks to test regularly for drugs.

''The inclusion of alcohol in these tests will give the department valuable additional data about the extent of alcohol abuse among truck drivers,'' Larson said.

In a related development, Transportation Secretary Samuel Skinner announced the government levied a $15,000 fine against Action Express, Inc., of Boise, Idaho, the first such civil penalty against an interstate trucking company under the new drug rules.

The department said that the penalty was imposed ''because the carrier knowingly permitted a driver to operate a truck after he tested positive for use of a controlled substance in a pre-employment drug test.''

Said Skinner: ''This just simply cannot be allowed.''

#90248u1681 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Stocks closed higher Wednesday in yet another day of light trading after fighting off some midday weakness sparked by a belligerent speech made by Iraqi President Saddam Hussein.

The Dow Jones industrial average, which lost 0.99 Tuesday, gained 14.85 to 2628.22.

Among broader market gauges, the New York Stock Exchange composite index rose 0.80 to 177.93 and Standard & Poor's 500-stock index added 1.30 to 324.39. The price of an average share rose 14 cents.

Advances outpaced declines, 948-567, among the 1,970 issues crossing the NYSE tape. Big Board volume totaled 120,610,000 shares, up from 92,940,000 traded Tuesday, the lowest volume of the year and the lowest since last Dec. 26.

Wednesday was the first day since Aug. 30 that volume has topped 100 million shares.

The market spent the early part of the session drifting near Tuesday's closing levels. But the Dow industrials lost about 15 points after a midday speech by Saddam Hussein, who called the Persian Gulf crisis a battle between Islam and ''unjust rulers'' and said Iraq would not give in to the worldwide trade embargo ordered by the United Nations against his country.

Traders said the statement sparked some program selling, used to profit on

the price difference between stocks and stock-index futures.

But the Dow quickly bounced back. This, said Don Hays, director of investment strategy at Wheat, First Securities Inc. in Richmond, Va., ''shows Saddam Hussein has lost his stinger. Today we went down for an hour on what he said but came right back.

''I think people have a strong feeling he's a temporary problem,'' Hays continued. ''There may be some bad consequences associated with him, but people seem to think they'll be temporary.''

The oil market did not shrug off his comments so easily. October crude-oil futures were up 77 cents to $29.89 a barrel in late trading.

But higher oil prices did not seem to concern stock traders too much Wednesday, since interest rates fell in the bond market. One of the fears of higher oil prices is that they will fuel inflation and force interest rates to remain high to keep spiraling consumer prices in check.

Treasury bonds were up 14/32 in late trading, with their yield down to 8.97 percent.

''Lower rates are going to be the carrot that'll get this market going back up, get people coming to the party,'' said Hays.

On the trading floor, AT&T was the most active issue, up 1/8 to 32 1/8.

General Electric followed, down 1 to 60 1/4. Pinnacle West Capital was third, up 1/2 to 12 7/8 after sinking Tuesday on news PacifiCorp agreed to drop its efforts to acquire the company. Pinnacle West reportedly projected Wednesday it would raise its book value to the $20-a-share range by 1993.

IBM was next, unchanged at 102 1/2 after introducing its first new line of mainframes in 5 years.

Among other blue chips, Exxon rose 3/4 to 50 7/8 in active trading as oil issues were strong thanks to higher oil prices. Texaco jumped 1 3/4 to 63 3/4, Chevron rose 1 3/4 to 77 5/8 and USX, which owns Marathon Oil, added 1/2 to 33 3/8.

Elsewhere among the Dow stocks, General Motors lost 3/4 to 38 1/4, but Eastman Kodak rose 3/4 to 41 1/2 and Alcoa jumped 1 1/2 to 66 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 144,643,050 shares, compared with 114,440,910 shares traded in the previous session.

Prices closed sharply higher in moderate trading on the American Stock Exchange.

The Amex Market Value index, heavily weighted with energy issues, rose 2.67 to close at 325.41. Advances led declines 305-198 among the 758 issues traded. The price of an average share rose 9 cents. Composite volume totaled 12,050,200 shares, compared with 10,058,900 shares traded Tuesday.

Salomon's put warrants on the Tokyo stock market's Nikkei index led the Amex issues, up 3/4 to 17.

The National Association of Securities Dealers composite index rose 0.77 to 382.44.

NEW YORK (SEPT. 5) UPI - The dollar closed lower against major world currencies in light trading Wednesday as market participants remained sidelined in anticipation of U.S. employment data due at the end of the week.

Late in the New York trading session, the dollar was quoted at 1.5585 German marks, off from 1.58 Tuesday, and at 141.65 Japanese yen, off from 143.35 Tuesday.

Other New York dollar rates: 1.2955 Swiss francs, down from 1.3130; 5.2205 French francs, off from 5.2950; and 1,162.50 Italian lire, down from 1,178.75.

The British pound rose to $1.9040 from $1.88 Tuesday.

After a bout of buying early in the day, the dollar closed near its lows for the day, analysts said.

''The dollar did not have a good day,'' said Bob Hatcher of Barclays Bank

PLC. ''We basically sagged here in New York.''

Market participants remained on the sidelines, awaiting the government's employment report due Friday, he said.

Analysts expect a weak employment report could prompt the Federal Reserve to ease monetary policy.

''Obviously the market is still of the opinion that an interest rate cut by the Fed is imminent, possibly as early as Friday if the employment data dictates,'' Hatcher said.

''Clearly the market is testing the down side for the dollar,'' he said. ''I get the feeling the dollar will continue to drift lower as people position themselves for what they feel will be numbers to justify Fed easing.

''Right now the market consensus seems to be to approach that slightly short on dollars,'' he said.

In European trading the U.S. dollar fell against the major currencies Wednesday amid mounting speculation the Fed will cut interest rates to stimulate the economy. Gold was up.

Other analysts said concern over the cost of the U.S. deployment in the Gulf was beginning to hurt the dollar.

The dollar dropped in Frankfurt at 1.5625 German marks against Tuesday's close of 1.5825, and also was down in Zurich at 1.3035 Swiss francs from 1.3130.

In London, the pound jumped more than two cents against the U.S. unit to $1.8975 from $1.8750.

The dollar slipped in Paris, Brussels and Milan, at 5.2420 French francs vs. 5.2820, 32.1850 Belgian francs vs. 32.52, and 1,168 Italian lire vs. 1,172.90.

Earlier in Tokyo, the dollar plunged to an eight-month low against the Japanese yen on expectations that U.S. interest rates will be lowered.

The dollar closed at 142.30 yen, down 1.75 yen from Tuesday's close of 144.05 yen, the Bank of Japan said. It was the dollar's lowest closing rate since Dec. 28, when it finished at 142.20 yen.

Growing anticipation of lower interest rates prompted life insurance firms and other institutional investors to actively sell dollars against the yen and other major currencies, dealers said.

Gold closed higher in Zurich at $386.50 an ounce against $383.50, and also was up in London at $387 an ounce against $382.25.

Republic National Bank in New York closed cash gold at $387.25 an ounce, up from $384.75 Tuesday. The New York Commodity Exchange settled contract gold at $386.10 an ounce, up from $383.70.

Silver was unchanged in Zurich at $4.75 an ounce, but closed higher in London at $4.79 an ounce from $4.75.

Republic closed cash silver at $4.77 an ounce, up slightly from $4.76. Comex silver finished at $4.735 an ounce, up from $4.719.

CALGARY (SEPT. 5) UPI - Alberta gas producers have tentatively agreed to a 15-year deal to supply Southern California Edison with natural gas beginning in 1993, the producers' marketing company announced Wednesday.

The value of the deal was not immediately known.

Craig Frew, president of Western Gas Marketing Ltd., said that an agreement outlining general terms for supplying gas to the California utility owned by SCECorp was signed and that formal contracts will be completed before the end of the year.

Some 750 Alberta natural gas producers represented by Western Gas will ship a minimum of 50 million cubic feet of gas a day to Southern California Edison beginning in 1993, the marketing company said.

Frew said the ''sale represents a major initiative in securing a new market opportunity.''

''Terms assure producers that they will receive prices that are competitive with other sources of natural gas into California over the life of the contract,'' Frew added.

Western Gas traditionally has focused on sales to distributors feeding off a pipeline that runs from Alberta to Quebec with connections to pipelines in midwestern and northeastern United States.

Western Gas is a subsidiary of TransCanada Pipelines Ltd.

DETROIT (SEPT. 5) UPI - United Auto Workers union officials said Wednesday that General Motors Corp. intends to begin phasing out production at its Pontiac Engine plant in May 1991, ultimately affecting about 2,200 hourly

workers.

The giant automaker refused to either confirm or deny the suspected closing, saying it does not publicly disclose its future product plans. But GM spokeswoman Kathy Tanner said ''the workforce and union know what our product plans are.''

''There is no product after 1992,'' said Dick Long, president of UAW Local 653, which represents workers at the Pontiac complex. ''The corporation told us back in 1987 that they did a five-year business plan, and they seem to be sticking to it.''

Long said about 700 workers will be let go in May 1991, as GM ends production of the 2.5-liter four-cylinder engine for use in cars like the Pontiac Grand Am. The remainder will lose their jobs by March or April of 1992, as other versions of that ''Iron Duke'' motor, made there since 1977 are ended.

The announcement comes as the UAW is seeking better job security assurances from GM in negotiations for a new national labor contract to replace the current three-year pact that expires Sept. 14.

Enhanced job security is among the union's top priorities, and this latest announcement could upset what were considered to be smoothly running talks between the union and carmaker.

Long said a strike authorization vote taken last week received a 97-percent approval from Local 653 members during a record turnout, and that the local may protest the phaseout.

''I think our people see that they may be without a job very soon,'' he said, noting that the Pontiac complex has lost over 6,000 jobs in recent years.

''Here we have workers giving it their all in high quality and low absenteeism,'' Long said. ''We have been doing all the things we need to do. Now its time for General Motors to do something.''

The complex's foundry was closed in September 1987, and its mid- sized Pontiac and Buick car plant closed in late 1988. Pontiac's Fiero car plant part of the complex but not part of the same bargaining unit, was also ''indefinitely idled'' in 1988.

Several hundred workers were also phased out of the Pontiac engine plant, with production slipping from 6,000 to 2,000 engines a day as GM began building more of its small engines overseas, Long said.

The Pontiac complex also has a pressed-metal facility that employs about

2,800 workers, Long said.

GM was hit with a week-long walkout last month at a Flint parts plant to protest jobs losses before agreeing to guaranteed employment levels at that facility.

#90248u1745 09/05/1990 ~United Press International

(SEPT. 5) UPI - Iraqi Foreign Minister Tariq Aziz made a surprise visit to Moscow Wednesday where he met with President Mikhail Gorbachev in an apparent bid to strengthen ties with Iraq's former ally prior to a scheduled superpower summit.

Details of the talks were not disclosed, but Sen. Robert Dole, who was also in Moscow to see Gorbachev, speculated the Iraqi minister wanted Gorbachev to pass a message to President Bush at the summit in Helsinki, Finland, Sunday.

''It's possible he has a message to give to Gorbachev to pass on to President Bush,'' Dole said of Aziz's visit, which Moscow said was requested by Iraq.

Britain, meanwhile, dismissed a Soviet proposal for an international peace conference on the Middle East, which would include discussion of the Arab-Israeli conflict, as having ''no chance of success.''

The rejection was made public by British Foreign Minister Douglas Hurd, who arrived in Jordan from Saudi Arabia to discuss the Persian Gulf crisis and the refugee buildup from Iraq and occupied Kuwait in what some observers said was one of the worst refugee crises in modern world history.

Hurd said there was no link between the gulf crisis and the Palestinian question for self-determination ''because the two are completely different and only the aggressor made the link.''

A defiant Saddam, in an address broadcast by Iraqi television and radio, said the ''children of Iraq are dying because food is insufficient'' as a result of the U.N. trade embargo, but renewed his call for all Moslems to rise up against their ''corrupt'' pro-Western rulers in a holy war.

Declaring ''victory is near,'' in the address read by his spokesman, Saddam specifically urged citizens of the U.S. allies Egypt and Saudi Arabia ''to revolt against their traitors, rulers and fight foreign presence in the holy land.''

Likening Operation Desert Shield to the U.S. deployment in Vietnam, he compared the will of the Iraqi fighters to that of the Vietnamese people

during the war in Indochina.

''Never imagine the will of Iraqi people for it is not convenient for believers to be frightened of such numbers or such troops,'' Saddam said in reference to the U.S.-led military buildup in Saudi Arabia, site of Islam's holiest places of worship.

''We will never let you down,'' Saddam said in his appeal to Moslems around the world.

In Washington, press secretary Marlin Fitzwater accused the Iraqi leader of making ''so many outrageous statements.''

''We see it as another sign of desperation that Iraq is lashing out with hypocricy and irrelevant statements. For Saddam to claim moral rectitude is beyond belief,'' Fitzwater said.

Fitzwater said Bush will address Congress at 9 p.m. Tuesday, after his summit with Gorbachev, on developments in the Persian Gulf and the goals of the military buildup to thwart Iraqi aggression.

While diplomats continued maneuvering to find a settlement to the standoff in the Persian Gulf, governments and international agencies focused their attention on thousands of foreigners caught trying to flee Iraq and Kuwait.

A plane carrying 92 Western women and children, 57 of them British, 29 American, four Australian and two Canadian, arrived in London from Amman, a stopping-off point in their flight from Iraq.

A Virgin Atlantic flight carrying 28 hostages - 24 Americans, three Canadians and one Jordanian resident if the United States - freed from Iraq was expected to land at Newark International Airport.

Egypt's Middle East News Agency said another plane of 150 British, Italian and Spanish women and children left Baghdad for Amman Wednesday. Another 300 British women and children who travelled to Baghdad in a grueling convoy from Kuwait were given visas for home, it said.

Saddam has said women and children hostages, kept in Iraq and Kuwait to guard against attack from Western forces in the Gulf, would be allowed to leave the two countries while the men remained. But the evacuation has been stymied by red tape and Iraq's insistence that no foreign planes land in Baghdad until Iraqi planes are allowed into Western countries - a violation of the U.N. embargo imposed against Iraq after its Aug. 2 invasion of Kuwait.

International relief agencies also stepped up efforts to care for an estimated 60,000 destitute foreign workers from Iraq and Kuwait who are

living a life of thirst, despair and hunger in a no-man's land on the Iraqi-Jordanian border. Water at the makeshift camps is so scarce that fights have erupted between ethnic groups when tankers deliver meager supplies.

U.S. warships, which diverted an Iraqi cargo ship filled with tea Tuesday, reportedly were monitoring two Iraqi oil tankers in the gulf region. Western diplomats said it appeared some food and supplies were being airlifted into Iraq despite the embargo.

The U.S. Central Command in Saudi Arabia refused to confirm or deny any warship activity.

In other developments:

- Arab newspapers reported the gulf state of Qatar expelled Palestine Liberation Organization diplomats, further isolating the organization. PLO Chairman Yasser Arafat has backed Saddam, alienating the gulf states that have funded him for years.

- The U.S. Joint Command in Saudi Arabia denied a report that the U.S. commander, Gen. Norman Schwarzkopf, had objected to a Saudi minister's contention that King Fahd would have to be consulted before the United States launched any military action from Saudi bases. A spokesman at the command said there was no dispute between U.S. and Saudi officials.

- The Navy released the Iraqi cargo ship it had seized to prevent the vessel from delivering a load of tea from Sri Lanka to Iraq, Pentagon officials said. Sri Lanka denied it violated a U.N. trade embargo by shipping some 3,000 tons of tea to Iraq, saying the intercepted vessel had sailed from Colombo before details of the embargo had been clarified.

- Japan announced its first shipment of equipment to the international force in the gulf would be a vessel loaded with 800 four- wheel drive vehicles.

- The Navy's Military Sealift Command is considering chartering a large Soviet cargo ship to help haul U.S. military equipment to Saudi Arabia for Operation Desert Shield, an official said.

- The U.S. Navy lifted the suspension Wednesday on the firing of the 16-inch bombardment guns on the battleship USS Wisconsin, operating in the Persian Gulf as part of Operation Desert Shield. The suspension on firing the guns had been imposed after an April 1989 explosion in a 16-inch gun turret aboard the battleship USS Iowa that killed 47 sailors.

Western diplomats said the Iraqi foreign minister's visit to Moscow was an attempt by Iraq to strengthen ties with its former ally, which has sided

with the United States in the dispute over Kuwait.

''The Iraqis are surprised that the Soviets have not sided with them but with the U.S.,'' said a Western diplomat in Cairo who did not want to be identified. ''I imagine (Aziz's) trip is Iraq trying to improve relations.''

The Soviet Union was a staunch ally if Iraq during the Iran-Iraq war, which ended in 1988, and has sold Iraq much of its arsenal of weapons. Sovier officials have maintained contact with Iraq throughout the crisis, saying their special relationship with Baghdad may help in the diplomatic efforts.

''Until now, however, no political or diplomatic contacts between Moscow and Baghdad have produced the desired result - the immediate withdrawal of all Iraqi troops from Kuwait and the restoration of that country's independence and sovereignty,'' the official Soviet Tass news agency said in reporting on Aziz's visit.

There was no comment from Aziz on his Moscow visit.

British hostages returning to London said they were relieved to be out, but were worried about those left behind.

''I am very pleased but my husband is still in there,'' said Diane Cooper of Britain at Gatwick Airport outside of London.

The Iraqi News Agency quoted the men who remained in Iraq as praising Saddam for letting the women and children go.

''Mr. Richard Wimtley, also a British, wondered why were the American boys or Yankees protecting emirs and oil sheiks, whose funds were accumulated in European, Japanese and U.S. banks and chased girls in nightclubs, while millions of people in Arabia, Africa, Europe, Asia, America and Britain starved,'' the agency said in a report in English that could not be verified.

International relief agencies, including the International Red Cross, continued efforts to help the thousands of evacuees caught in Jordan.

Jordan has alternately begged for and demanded aid from developed countries for the thousands of displaced persons, who are living under cardboard shelters in makeshift camps.

U.N. agencies have raised $20 million to help the displaced workers, a spokesman said in Geneva. The Austrian Red Cross sent baby food, powdered milk, blankets and tents to the border.

Most of those stranded were menial workers in Kuwait and Iraq who sent home paychecks to countries that are too poor to evacuate them from Jordan.

''We were money-making machines for our governments yesterday,'' said Reza Hussein, 32, of Pakistan. ''We are garbage today.''

#90248u1746 09/05/1990 ~United Press International

MIAMI (SEPT. 5) UPI - Tropical Storm Isidore formed in the mid-Atlantic with 40 mph winds Wednesday and forecasters said it was likely to strengthen into a hurricane.

At noon EDT, Isidore was centered near latitude 9.9 north, longitude 34.8 west. That was about 750 miles southwest of the Cape Verde Islands, or about 1,700 miles east of Trinidad.

It was moving due west at near 18 mph and was expected to continue that motion for at least the next day or two.

Isidore was a minimal storm with 40 mph winds, just 1 mph above the tropical storm threshold. It was also a relatively small storm, with tropical storm force winds extending about 35 miles from the center.

But forecasters at the National Hurricane Center in Miami said it was likely to grow stronger over the next several days, probably reaching hurricane strength in about 72 hours.

''It's still five days away from the eastern Caribbean. It has a lot of warm water to go over for the next four or five days. It has time to grow '' said Ray Fagen, a meteorologist at the National Hurricane Center. ''It is growing more organized and our feeling is that it will continue to intensify.''

Isidore is the ninth named storm of the Atlantic-Caribbean hurricane season, which runs from June 1 to Nov. 30. Three storms - Bertha, Diana and Gustav - have grown to hurricane strength of 74 mph or more.

Forecasters said the nine-storm total was was two or three more storms than average for this time of year, but their effect on land has been minimal.

#90248u1755 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Average yields for money market mutual funds were lower in the latest reporting week, while rates at competing savings and loan institutions also were lower, financial information services that

track these yields and rates said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.47 percent, down from 7.48, and 30-day simple yields eased to 7.49 percent from 7.50 the previous week.

The average maturity of fund portfolios was 46 days, up from 45.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 5.89 unchanged; Super- Now accounts, 4.97 percent, down from 4.98; six-month certificates of deposit, 7.51 percent, down from 7.53 percent; 1-year CDs, 7.61 percent, down from 7.62; 2 1/2-year CDs, 7.67 percent, down from 7.69; and five- year CDs, 7.79 percent, down from 8.80.

The average rate for a one-year, adjustable-rate mortgage was 8.28 percent down from 8.30 percent.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.77 percent from 9.81 and the average rate for a 30- year, fixed-rate mortgage fell to 10.08 percent from 10.12.

The average rate for a four-year automobile loan was 12.26 percent, down from 12.27 percent.

#90248u1782 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - In two days of congressional hearings, Secretary of State James Baker responded to questions about the Bush administration's long-term strategy in the Persian Gulf with a call for a new regional security system.

But members of Congress said they have doubts about who would belong to such a system and whether it would work, and Baker acknowledged Wednesday that key details of his proposal still had to be refined.

The problem posed to Baker during hearings before House Foreign Affairs and Senate Foreign Relations committees was what the United States

intended to do once it achieved its immediate goal of forcing Iraq out of Kuwait.

Should America go home? Or should it move against Saddam Hussein and destroy his chemical and nuclear weapons capabilities? Or try something else?

While ruling nothing in or out, Baker said it was not a U.S. goal to oust Saddam, but the administration was discussing ''regional security structures and arrangements that will guarantee an equilibrium in this region.''

''We would expect to work with friends and allies to create a more durable order, not in any sense, necessarily, to impose ourselves, but to find mutually acceptable arrangements,'' he told the Senate panel Wednesday.

Baker did not specify who would belong to the system and what the U.S. role ''might or might not'' be, other than saying it would ''not be unreasonable to think that perhaps we might have a continued naval presence in the gulf.''

''We have no particular model,'' he said. ''(The proposal) should not be equated with the idea that somehow we are calling for a NATO of the Middle East.''

Members of the committees speculated that pressure from Congress and administration critics had something to do with Baker's proposal.

''I think Secretary Baker would say thay he has been forced perhaps by these insistent questions about how to maintain the peace,'' said Sen. Richard Lugar, R-Ind., former chairman of the Senate committee.

''I see it not as a clearly thought-out proposal, but a response to a question from a member of Congress,'' added Rep. Lee Hamilton, D-Ind., chairman of the House subcommittee on the Middle East.

Lugar, possibly the most influential congressional Republican on foreign affairs, said he believes a regional security system would only represent a partial solution to the Iraqi military threat.

''Prior to this regional security situation trying to maintain control ... Iraq's leadership must change,'' he said. ''Otherwise, I believe that the job of this regional security operation is going to be a very, very difficult one.''

Lugar added that ''how Iran fits into this is not really clear.'' Asked about Israel's involvement, he said that ''is a really interesting seminar question.''

Hamilton said he doubts whether Arab countries would join such a security system without any progress being made on the Arab-Israeli conflict.

''If Israel has military superiority and posses weapons of mass destruction, I don't think an Arab state will join a security system that is designed to deny such weapons to Iraq,'' he said.

Rep. Mel Levine, D-Calif., a strong supporter of Israel, said despite the current crisis, the ''relatively stable autocracies'' of the Persian Gulf often have different interests than the United States.

''This administration too often has wished that particular Arab governments, including Saddam Hussein's, were more moderate than they really are,'' he said. ''There's been a great deal of wishful thinking in this administration.''

-30- 3827

#90248u1795 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - Test-tube studies show a drug made from pokeweed, a common, poisonous plant, may provide a powerful new strategy for tackling the deadly AIDS virus, researchers said Wednesday.

The novel compound, which teams an anti-viral protein derived from pokeweed leaves with laboratory-made antibodies, appears highly effective at seeking out cells infected with the AIDS virus and keeping the virus from multiplying in the test tube, researchers said. Healthy cells appear unharmed by the drug, they added.

Despite the drug's early promise, researchers cautioned people infected with the AIDS-causing human immunodeficiency virus, or HIV, against taking pokeweed on their own.

''We are warning everyone not to eat the plant because it is toxic. We used a highly purified protein out of the plant and conjugated it to an antibody,'' said Joyce Zarling, a researcher at Oncogen, a Seattle subsidary of Brisol-Myers Squibb.

Pokeweed, properly called Phytolacca americana, is a poisonous North American plant with clusters of purplish-white flowers, reddish- purple berries and smooth leaves and stems. The Indians used the berries for staining, and some rural people cook the plant in its very young stage as ''poke salad,'' but there have been reports of people getting ill from that dish.

A National Institutes of Health researcher, who asked not to be named, Wednesday said the new compound was particuarily interesting because it

was specifically targeted at the cells most often infected with HIV.

However, the scientist cautioned against drawing any conclusions from cell studies about possible human applications, observing that many promising compounds fall by the wayside during the testing process. Potential problems with the new compound include immune reactions and its ability to reachinfected cells in the body.

In a study published in the British journal Nature, Zarling and researchers from the University of Minnesota and University of California-San Diego presented results to back up their compound's anti-HIV potential.

By itself, pokeweed antiviral protein, or PAP, can thwart the replication of HIV and other viruses. However, it would have to be given to patients at levels that could cause serious side effects, such as kidney damage, Zarling said.

To boost PAP's power, the researchers hooked the plant protein up with laboratory-grown antibodies, called monoclonal antibodies, designed to seek out and enter the immune cells most likely to be infected with HIV. Those cell bear a protein, called CD-4, that the HIV attaches to and uses to invade cells.

Studies of HIV-infected cells, including some fresh ones taken from AIDS patients, showed the new compound was longer lasting and was 1,000 times more potent than PAP alone, researchers said. They noted it could prevent HIV multiplication at doses one-10,000th or less than that of AZT, the only government-approved AIDS drug.

In other innovative approaches, different scientists are teaming up laboratory-made solutions of CD-4 with plant and bacterial toxins that hopefully will act as decoys to sop up HIV-infected cells and destroy them.

However, Zarling noted those compounds do not work against cells where HIV lies ''silent,'' or not actively multiplying. In addition, those toxins lack the specific anti-viral activity found in PAP, and instead simply kill infected cells, she said.

Another advantage of the pokeweed compound may be its long-lasting effect. In tissue cultures, its anti-HIV power appeared to persist for several weeks inside cells after outside supplies of the drug were washed out.

''The effect on virus activity may be irreversible,'' Zarling said. However, she emphasized animal studies, let alone human tests, have not yet begun.

Even if the drug performs as well in patients as it did in the test-tube,

Zarling does not envision the compound as an AIDS cure, but rather as one of multiple drugs in a chemotherapy strategy similar to that used to treat cancer. In its current design, the drug cannot attack free virus in the bloodstream and would also be difficult to deliver to HIV-infected brain cells.

Eroding consumer confidence and heightened prospects of a recession caused sales of domestically built vehicles in late August to slump 21 percent from strong year-ago levels, pushing sales for the full month down 16.1 percent, automakers reported Wednesday.

Sales of domestically built cars alone during August skidded 17 percent from year-ago levels after falling 18.8 percent during the final 10 days of August. Light truck sales fell 14.5 percent for the full month, following a 24.9 percent drop during the Aug. 21-31 period.

The annual sales rate for domestically built cars - the most common measure of industry performance - was a weak 6.7 million cars during August, vs. 8.1 million last year. The selling rate for late August was 6.8 million cars, down sharply from last year's 8.6 million, the highest rate in 1989.

Analysts said much of the decline was because the industry, a leading indicator of economic health, was being measured against excessively strong sales a year ago as buyers sought to take advantage of lucrative rebates that expired at the end of August.

But dismal reports about the nation's economy, along with higher fuel prices because of the Mideast tensions, also kept consumers out of showrooms, especially those near military bases.

''It has slowed down somewhat,'' said Gene Marshburn, sales manager at Sanders Ford in Jacksonville, N.C., outside Camp Lejeune. ''I don't know how many Marines are at Lejeune, but (the deployment) has affected our sales. I would say 25 or 30 percent.''

''These numbers are horrible,'' said Tom Webb, chief economist for the National Automobile Dealers Association, adding that ''we see little hope for an immediate turnaround'' because of recent economic events.

But despite the overall slump, Marshburn and other dealers said shoppers may be coming back after getting over the initial shock of the Middle East situation.

''The last 10 days we had a good selling period,'' he said. ''I think it's getting over. People in our town realize the world has got to go on.''

''They're starting to trickle back in,'' agreed James Moan, sales manager of Wester, a Dodge and Volkswagen dealership in Seaside, Calif., near Fort Ord. ''We've made a few deals with officers, but the normal enlisted man just hasn't been around.''

Walter Wilkins of Bay Chevrolet in Norfolk, Va., said ''traffic is up for unexplained reasons. We've had some 36,000-plus (soldiers) ship out, and frankly, we've been pleasantly surprised.''

The slowdown comes as automakers keep up a wide range of generous buyer incentives, even on 1991 models that are hardly off delivery trucks.

''People may also be playing chicken with the factories,'' said a sales analyst for Ford Motor Co. ''They may be holding out for even stronger rebates, since they don't hear dealers complaining that they are short of cars.''

The nine companies, which also include General Motors Corp., Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp., Mitsubishi Motor Sales of America, Inc. and Subaru-Isuzu Automotive Inc. (SIA) reported combined sales of 568,751 cars and 328,837 trucks in the United States during the August.

This compares with 685,365 cars and 384,658 trucks sold in the year-ago month.

The daily selling rate of 33,244 vehicles compares with 39,630 vehicles per day for the same period last year. There were 27 selling days this year, the same as in the year-ago month.

The nation's Big Three automakers all posted double digit declines in both

car and truck sales for late August.

Industry leader GM posted a 21.5 percent slide in sales of its domestically made cars for late August, pulling full-month sales down nearly 19 percent. GM also posted a 24.3 percent decline in light truck salds,for the final 10 days of August, bringing truck sales for the full month down 15.8 percent from last year.

Ford's car sales fell 32.8 percent in late August, pulling its August sales down 26.8 percent. Ford's light truck sales fell 22.4 percent during late August, with its full-month truck sales off 7.1 percent from year-ago levels.

Chrysler's domestic car sales slid 31.7 percent in late August, bringing full month sales down 32.5 percent from year-ago levels. Its light truck sales including minivans slumped 30.2 percent in late August, pushing sales down 22.6 percent for the entire month.

So far in 1990, the firms have sold nearly 4.74 million cars, down 5.9 percent from just over 5 million units sold during the first eight months of 1989.

Light truck sales through August totaled 2.81 million units, 2.7 percent behind the 2.87 million trucks sold during the same period a year ago when measured by sales per day.

#90248u1865 09/05/1990 ~United Press International

CAPE CANAVERAL, Fla. (SEPT. 5) UPI - Rocket engineers detected hydrogen gas leaking into the shuttle Columbia's engine room Wednesday, forcing NASA to cancel the hard-luck crew's planned Thursday launch on a mission already running three months late. Liftoff of the 36th shuttle mission on a 10-day astronomy mission had been planned for 1:20 a.m. EDT Thursday, but less than an hour after the start of fuel loading Wednesday, launch director Robert Sieck cancelled the countdown because of an fuel leak in the ship's engine room.

''We will be scrubbing this launch attempt for Thursday morning,'' NASA spokeswoman Lisa Malone said. ''The concentrations of hydrogen in the orbiter's aft compartment are at a level that are above what the acceptable rates are. We are securing from the launch countdown at this time.''

There was no immediate word on when another launch attempt would be made, but if the problem can be fixed in time for a Friday liftoff try, launch would be scheduled for 1:21 a.m.

The decision to delay the flight was a frustrating disappointment to Columbia's seven-member crew - a post-Challenger record - who came with hours of launch May 29 only to be grounded by a hydrogen fuel leak similar to the one that developed Wednesday.

It also was disappointing to NASA managers, who were looking for a successful launch to end a four-month flight hiatus after a summer of near-constant criticism over problems with the Hubble Space Telescope, the shuttle program and the agency's planned space station.

But it was not to be, and instead of proceeding with plans to launch Columbia on its 10th flight, engineers began conducting a series of tests to isolate the leak and to determine what might be done to fix it.

Commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46, presumably took the news of their latest delay in stride, but their reaction was not immediately available.

In the meantime, NASA's disappointing summer of setbacks and delay lingers on, despite earlier optimism that the leaks had been banished once and for all, raising the possibility of additional problems.

Engineers began slowly pumping a half-million gallons of rocket fuel into Columbia's giant external tank around 4:40 p.m., but shortly after high-speed fueling began, sensors detected traces of hydrogen in the shuttle's engine room.

''We monitoring a leak in the orbiter's aft engine compartment,'' Malone said. ''We've got leak detectors in various areas and we are picking up some traces of hydrogen in the area. We are keeping a close eye out on the concentration levels.''

Columbia was grounded in May after hydrogen spewed into the ship's engine compartment during fueling. The leak later was blamed on damaged seals inside a 17-inch-wide fuel line fitting that allows the shuttle's tank to be jettisoned in space.

Columbia was equipped with a disconnect assembly borrowed from the new shuttle Endeavour, and Malone said no hydogen gas was detected between the shuttle and its external tank where the fitting is located.

The space agency hopes to follow Columbia's flight by launching the shuttle Discovery next month on a critical mission to fire the Ulysses solar probe to the sun.

Discovery was hauled out to launch pad 39B overnight Tuesday. What impact

Columbia's latest problem might have on that mission is not yet known.

Columbia's $150 million ''Astro-1'' payload is made up of four high-tech telescopes built to study high-energy X-rays and ultraviolet light emitted from especially violent stars, galaxies and other energetic enigmas, light that cannot penetrate Earth's atmosphere.

Whenever they finally get off the ground, Columbia's astronauts plan to work around the clock in two 12-hour shifts throughout the flight with Parker, Hoffman, Parise and Durrance - all astronomers - responsible for operating the shuttle's Astro observatory.

BOSTON (SEPT. 5) UPI - A clerk magistrate refused Wednesday to lodge criminal charges against the Institute of Contemporary Art where a

controversial exhibit by the late photographer Robert Mapplethorpe has been on display for over a month.

Museum Director David Ross hailed the decision as a ''victory'' against censorship, but the anti-pornography group that had sought the charges pledged to continue its campaign to shut down the exhibit, saying the issue is ''too important to give up.''

The exhibit, ''Robert Mapplethorpe: The Perfect Moment'' which contains several examples of homoeroticism, opened on Aug. 1 and was to run through Oct. 4. From the outset Massachusetts Attorney General James Shannon said he planned no action because it did not violate state laws.

Nevertheless, a coalition called First Amendment Common Sense sought criminal charges against the museum and Ross. The group was particulary offended by seven photographs in the exhibit, including one of a nude boy and another showing a young girl whose uplifted skirt exposes her genitalia.

After a hearing in Boston Municipal Court, First Assistant Clerk Rosemary Carr refused to issue criminal complaints.

Cassandra Warshowsky, a lawyer representing the museum and Ross, said Carr's decision was inevitable because there were no grounds for charges. ''This is the right thing,'' she said. ''This is the correct thing.'' Warshowsky also noted that Shannon and other law enforcement officials already had chosen not to take action against the exhibit.

''It is a victory for those who believe that artists should be able to produce art as they like,'' said Ross.

Warshowsky said she believed the exhibit would face no more legal challenges, but a spokeswoman for the anti-pornography group said it would continue its battle.

''We have a number of options that we are considering. This is one battle but there is a war which we cannot give up,'' said Evelyn Dubel, who represents First Amendment Common Sense. She said the group had 10 days to appeal the clerk's decision.

Dubel said the group was particulary offended by the inclusion in the exhibit of the two photos depicting children. ''The entire exhibit has a highly sexually (charged) atmopsphere,'' she said. ''To put images of children in with those pictures of perverted sex and nude men with erections is absolutely abomindable.''

The Mapplethorpe exhibit became the center of controversy last April when it opened in Cincinnati. The Cincinnati Center for Contemporary Arts and

its director were indicted on obscenity charges.

Hamilton County Common Pleas Judge David Albanese was to rule Thursday on two motions to dismiss the obscenity indictments and to judge the exhibit as a whole, rather than just focusing on the offensive photographs. The trial is scheduled to start Sept. 24.

#90248u1949 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - The Bush administration must take aggressive steps to bolster slumping wheat prices, such as using this weekend's summit meeting to offer new inducements for Soviet purchases, a key congressman said Wednesday.

Wheat prices have fallen in the face of bumper crops around the world. The Agriculture Department has forecast prices will average $1 a bushel below last year's season-average of $3.72.

''It is imperative ... to take decisive action so our nation's farmers know the U.S. government will stand beside them in these difficult times '' Rep. Dan Glickman, D-Kan., said in a letter that proposed steps to export more wheat and to limit the size of next year's crop.

''Urge the president to expand trade with the Soviet Union by offering it additional assistance during his summit with President (Mikhail) Gorbachev this weekend,'' Glickman said in the letter to Agriculture Secretary Clayton Yeutter. ''The United States could offer additional Export Enhancement Program initiatives to the Soviets.''

Glickman, chairman of the House Agriculture subcommittee on wheat, soybeans and feed grains, also said the Kremlin should be reminded that emigration reforms would open the door to obtaining export credits.

''It is clear the Soviets need such assistance, especially food assistance to effect their domestic economic reforms,'' Glickman said.

In addition, he urged aggressive action to help meet Egypt's food needs, especially because of its role in the Middle East crisis.

The United States has an offer in place to sell 2 million metric tons of wheat to the Kremlin.

On the domestic front, Glickman said Yeutter by the end of this week should ''announce the specific'' land set aside that will be required for the 1991 wheat crop. So far, Yeutter has only given a possible range for the setaside, pending enactment of the new farm policy law.

''You should be aware that it is my judgment that most members of the Agriculture Committee would opt for at least a 20 percent (setaside) and I concur,'' Glickman said.

Farmers were required to idle 5 percent of their land to qualify for farm program benefits this year. The government has estimated this year's crop as 2.7 billion bushels, compared with 2.04 billion bushels in 1989.

-30- 2497

#90248u1970 09/05/1990 ~United Press International

NEW YORK (SEPT. 6) UPI - U.S. gasoline imports fell markedly last week and crudd-cil supplies declined a little more than expected, the American Petroleum Institute reported Wednesday.

For the week ended Aug. 31, daily gasoline imports dropped to 192,000 barrels from 287,000 barrels in the previous week and were well below year-ago imports of 221,000 barrels, the oil industry's weekly survey showed.

Crude oil inventories fell 4.4 million barrels to 372.2 million barrels from 376.6 million barrels in the prior week but remained well above year-ago levels of 335.8 million barrels.

Oil analysts had been anticipating a decline in the range of 2 million to 3 million barrels.

Gasoline supplies stayed virtually level at 210.5 million barrels vs. 210.9 million barrels in the prior week but were considerably less than year-ago levels of 217.7 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, declined slightly to 162.3 million barrels from 162.6 million barrels a week earlier but remained significantly higher than year-ago levels of 156.5 million barrels.

Daily gasoline production edged up to 7.3 million barrels from 7.2 million in the previous week and higher than the year-ago daily output of 7.1 million barrels.

U.S. refineries operated at 92 percent of capacity last week, compared with 92.4 percent a week earlier and 91.8 percent a year ago.

Crude-oil imports moved up to 6.8 million barrels a day from 6.6 million barrels a day in the previous week and were higher than year-ago imports of 6.4 million barrels a day.

Daily imports of all refined products slipped to 1.9 million barrels from

2.2 million barrels in the preceding week but were higher than the year-ago level of 1.7 million barrels.

Inventories of distillate - used for home heating oil and diesel fuel - rose to 126.7 million barrels from 124 million barrels a week earlier and remained above year-ago levels of 116.8 million barrels.

Distillate production remained level at 3.1 million barrels daily, the same as in both the preceding week and the year-earlier week.

Daily distillate imports fell to 354,000 barrels from 360,000 barrels in the previous week but were higher than year-ago imports of 222,000 barrels.

-30- 2470

#90248u1974 09/05/1990 ~United Press International

HONOLULU (SEPT. 6) UPI - Castle & Cooke Chairman and Chief Executive Officer David Murdock Wednesday announced the phase-out of commercial production of pineapple on Lanai and said he forsaw the end of major agriculture in Hawaii.

Murdock and ILWU leader Tommy Trask said plans call for pineapple workers to be transferred to resort hotel and diversified agriculture jobs on the island over the next several years - especially during the next six months as resort and related jobs open.

Murdock said its is no longer economically feasible to grow, handle, and ship pineapple grown in Hawaii. He said there are other locations where the costs of production are much lower.

In response to a question on the future of Hawaii's agricultural industry, Murdock predicted flatly that ''agriculture will leave Hawaii, (whether) people want to keep it here or not.''

Murdock said wages were high in Hawaii but very low in other Pacific countries, making it much cheaper to grow crops elsewhere.

''I don't believe - except for agriculture that will be used in the island of Hawaii - that there will be agricultural industry of any major significance in the future,'' he said.

''It is a thing of the past, a way of the past - and unless Hawaii recognizes that, they will find they have geared for an industry that no longer exists,'' he said.

Trask said jobs on Lanai will be offered to all of the agriculture workers and training will be offered to those that need it.

''We're not too concerned with jobs on Lanai,'' Trask said. ''It's getting people to fit in to the proper position in the hotels and golf courses that are going to be built there. Nobody's pushing the panic button.''

''We'd like to see pineapple stay on the island, but we've got to face reality,'' he said.

Trask said wages and benefits in the new jobs would be better than those in the old agricultural positions. He said he did not see union membership declining but rather increasing once the changeover is complete.

The ILWU represents both the agriculture workers and the employees of the island's two resort hotels, the already-open Koele Lodge and the Manele Bay Resort, which is to open in eight months.

Lanai, nicknamed the ''Pineapple Island,'' is a 139.5-square-mile island located next to Maui. It is 98 percent owned by Castle & Cooke, whose Dole subsidiary has long operated a 16,000-acre pineapple plantation which employs 366 of the 2,092 residents as well as seasonal workers from other islands.

Dole last year replanted only half the acreage of the previous year - 1,000 acres - and replanted only 750 acres on Lanai this year, with total acreage farmed only at 6,000-7,000 acres of pineapple for canned fruit.

In 1982, Hawaii, Thailand, and the Philippines each had 20 percent of the world market for Hawaii, Murdock said. In 1989, Thailand had doubled its share to 40 percent while Hawaii's share had halved to 10 percent.

Murdock said the company will keep its 7,700 acres of pineapple on Oahu for sale as fresh fruit, especially to the mainland.

A decision has not been made on the future of the Dole cannery on Oahu, which employs 1,098 salaried workers and seasonal help. Del Monte and Libby formerly operated canneries in Hawaii but have closed them down.

He said about 100 acres will remain in pineapple production to supply the island hotels and local residents.

Murdock said he forsaw jobs in many areas on Lanai - in construction, fishing to supply the hotels, and diversified agriculture.

He said he saw jobs in restaurants, recreation such as horseback riding and a new 18-hole golf course at Manele, fishing to supply hotels with fresh fish, and construction of housing for new residents as well as company workers.

The company also plans diversified agriculture, including forage crops for

livestock; vegetable crops to make the island as self- sufficient as possible, and tree crops such as papayas, citrus, and perhaps bananas.

Murdock also saw opportunities for cottage industries as residents produce handicrafts, woodwork, and painting for sale to visitors, which he said exists on other islands but not on Lanai.

But, he said the day of thousands of acres of plantations growing sugar and pineapple in Hawaii was ending. ''It's only a matter of time until major agricultural operations no longer function in Hawaii because of the cost.''

Murdock said a smaller industry could survive to grow food for consumption in Hawaii. ''It doesn't take very much land to grow all the food that is eaten by a million people in the Hawaiian islands,'' he said.

#90248u1990 09/05/1990 ~United Press International

WASHINGTON (SEPT. 5) UPI - Israel and the United States agreed Wednesday to restart the Arab-Israeli peace process and not to link the stormy Palestinian issue and the Israeli occupied territories to the Persian Gulf crisis.

The agreement came at the first meeting between Secretary of State James Baker and Israeli Foreign Minister David Levy that ran 3 1/2 hours - 90 minutes longer than scheduled. It was the first visit to Washington for the white-haired Levy, who does not speak English.

In addition, Baker said he and Levy ''made good progress'' toward working out details for implementation of a $400 million U.S. loan guarantee, which would be used to build houses for Soviet immigrants to Israel, provided they are not constructed in the occupied territories.

''We had some very specific and in-depth discussions on this issue,'' Baker told a joint news conference at the State Department.

Overall, he said, ''we had very, very useful, friendly, productive discussions across the full range of the Israeli-United States agenda.''

The meeting came against the backdrop of the desert stalemate over Iraq's seizure and occupation of Kuwait. Levy went to great lengths to portray Israel as being solidly behind the United States in the crisis even though he said his country ''is really keeping a low profile'' in the potentially explosive situation.

He described Washington's tough stance against Baghdad as ''correct and courageous.''

''The U.S. government is deeply appreciative of the approach which

the He said he and Levy ''discussed the gulf crisis in quite some detail '' but he gave no specifics.

As for the moribund Arab-Israeli peace process, which collapsed in March along with Israeli Prime Minister Yitzhak Shamir's previous coalition government, Baker said he and Levy ''made good progress in terms of recommitting ourselves to pursue'' a dialogue with the Palestinians.

''We have agreed to work hand-in-hand toward a continuation of the peace process,'' Levy said in Hebrew through an interpreter.

It marked the first time since the formation of Shamir's new government in the late spring that Israel publicly agreed to restart the peace process.

''It is very, very important in the context of the overall situation in the Middle East that there be a credible peace process under way,'' Baker said. ''We also agreed that we should not link the situation between Israel and the Palestinians with the situation in the Persian Gulf, as some have demanded.''

Iraqi President Saddam Hussein has said he would negotiate over Kuwait if Israel makes peace with the Palestinians over the occupied West Bank and Gaza Strip. Baker told the Senate Foreign Relations Committee earlier in the day that he held such a linkage in ''low minimum regard.''

''We have agreed that we will continue to work together to implement Shamir's initiative,'' Baker said.

Shamir proposed in May 1979 that the Palestinians hold elections in the West Bank and Gaza, which was a condition of the 1978 Camp David peace accords.

Baker tried to get a dialogue going between Israel and the Palestinians. But the process collapsed over Israel's refusal to identify which Palestinians would be acceptable as candidates for election.

Both men appeared pleased with the outcome of their meeting, with Levy terming Baker ''my good friend'' and saying with a grin, ''I should call him Jim and he should call me David.''

Baker said they had begun ''a good personal relationship'' but did not take up Levy's first name cue, referring to his Israeli counterpart as David Levy.

#90248u2041 09/05/1990 ~United Press International
NEW YORK (SEPT. 5) UPI - Pete Sampras, one of a new breed of prominent young Americans, delivered 24 aces Wednesday to post a startling five- set victory over Ivan Lendl and gain the semifinals of the U.S. Open.

Admittedly tiring in the fourth set, the 19-year-old Californian got a lift from the suportive crowd to complete a 6-4, 7-6 (7-4), 3-6, 4-6, 6-2 victory.

''I was getting a little tired in the fourth set and the crowd got me back into it,'' he said. ''My feet were aching and without the crowd support I wouldn't be in this situation.''

In the semifinals, Sampras will meet the winner of a Wednesday night match between four-time Open champion John McEnroe and David Wheaton, both unseeded.

This will mark the first time in nine years that Lendl has failed to reach the final. During that stretch he won the crown three times.

''It's disappointing, of course, but it had to end sooner or later,'' Lendl said. ''I wish it never had ended, but it happened today.

''I know all the reasons it happened, all the reasons I haven't played well this year. I have to forget it and go on.''

Earlier in the day, Arantxa Sanchez Vicario took advantage of Zina Garrison's sore ankle to punch out an easy 6-2, 6-2 victory and gain a semifinal date against Steffi Graf.

Graf, the two-time defending champion and No. 1 seed, came back from a slow start to win 12 of the last 14 games and defeat Jana Novotna 6-3, 6-1.

A year ago, Sampras upset then defending champion Mats Wilander in the second round, also in five sets, but said this victory was much bigger.

''This is the top of it, beating Lendl in the quarterfinals of the U.S. Open,'' he said. ''This is what it's all about. I really don't believe what's happening now, it's a dream come true. This is what I've been working for all summer. I've really worked hard and this is the reward, to be in the semifinals of the U.S. Open.''

Oddly, two years ago Sampras was a house guest of Lendl at Greenwich, Conn., where the two trained together. Lendl took the occasion to give the youngster hints on how to care for himself.

He said he always has been a fan of Lendl, who is rarely a crowd favorite.

''I always pulled for him,'' Sampras said. ''I felt sorry for him. He is a true professional in every sense of the word.''

Sampras said Lendl told him at that time, ''You've got to train so hard you can't walk home. Now I feel I can play, I'm fit, and can last as long as anyone on the tour.''

MOSCOW (SEPT. 5) UPI - Iraqi Foreign Minister Tariq Aziz met with President Mikhail Gorbachev Wednesday to discuss the Persian Gulf crisis, four days before a U.S.-Soviet summit expected to focus on the issue.

Soviet officials said the Iraqi side had requested Wednesday evening's surprise meeting, and visiting U.S. Senate Republican leader Robert Dole quoted Gorbachev as saying, ''I'm prepared to hear him out.''

The official Soviet news agency Tass said in a two-paragraph report after the meeting that Gorbachev and Aziz ''held a frank discussion on the situation in the Persian Gulf'' but gave no other details.

Soviet television showed an unsmiling Gorbachev and Aziz chatting as the meeting began, with none of the smiles and pleasantries that usually accompany picture-taking sessions before such meetings.

Dole, R-Kan., who led a delegation that met with Gorbachev earlier in the day, said he was optimistic about the Iraqi-Soviet contacts and the upcoming summit.

''They obviously wanted to have some contact before Sunday's (summit) meeting. He's not coming here just to get wet,'' Dole said of Aziz, who arrived in Moscow in a driving rainstorm. ''It's possible he has a message to give to Gorbachev to pass on to President Bush.''

Soviet officials, saying they hope to use Moscow's ''special relationship'' with Baghdad to help negotiate a settlement to the crisis, have maintained contacts with Iraqi officials despite the Kremlin's condemnation of the Aug. 2 invasion of Kuwait and support for U.N. sanctions.

The Soviets have insisted in previous meetings with Iraqi officials that Baghdad immediately withdraw its troops from Kuwait as the first step to dnhing the crisis and avoiding all-out war.

Moscow cut off arms shipments to its one-time close ally in the gulf after the invasion and is supporting international sanctions against Iraq, although it has refused to participate in a naval blockade or the international military presence in the region.

The surprise visit by Aziz came four days before Gorbachev and Bush were to meet in Helsinki to discuss the crisis that began with Iraq's invasion and occupation of Kuwait.

In addition to regular diplomatic contacts in Baghdad and Moscow, Gorbachev and other Soviet officials met Iraqi special envoy Saadoun

Hammadi last month as part of the intense Soviet diplomatic effort to find a peaceful solution to the Gulf crisis.

''Until now, however, no political or diplomatic contacts between Moscow and Baghdad have produced the desired result - the immediate withdrawal of all Iraqi troops from Kuwait and the restoration of that country's independence and sovereignty,'' Tass said in a report on Aziz's visit.

The Soviet Union expressed disappointment at the results of talks last week in Amman between Aziz and U.N. Secretary-General Javier Perez de Cuellar, and Soviet officials have said they are hopeful the Gorbachev-Bush summit will be a step forward toward a solution.

There were reports earlier in the week that King Hussein of Jordan would also visit Moscow this week to discuss the Gulf crisis, but diplomatic sources in Rome where Hussein was visiting said Tuesday the monarch had decided not to make the trip to the Soviet Union.

The Soviets have also proposed an international conference be held to resolve problems in the Middle East, a suggestion British foreign minister Douglas Hurd dismissed as having ''no chance of success.''

''There have been conferences galore on this question...and there is no magic in holding a conference which has no chance of success,'' Hurd said during a visit to Amman, Jordan Wednesday.

Dole, the Kansas Republican who is minority leader in the U.S. Senate, praised what he called unprecedented superpower cooperation in efforts to solve the Gulf crisis.

Speaking at an airport news conference before leaving Moscow, Dole said Sunday's summit in Helsinki was yet another ''turning point'' in relations between the two countries.

''The (leaders of) two superpowers are meeting for the first time in response to a conflict when we're both on the same said,'' Dole said.

He said the Senate delegation ra1/2 a monument in Leningrad that reminded the senators of the U.S.-Soviet cooperation in World War II and added, ''We think we have it again in the Persian Gulf.''

Dole said he believed Bush and Gorbachev agreed that any solution to the Gulf crisis would have to begin with an Iraqi pullout from Kuwait.

''My impression was that Gorbachev was in almost complete agreement on that point,'' Dole said.

OVERLAND PARK, Kan. (SEPT. 5) UPI - Yellow Freight System Inc. said Wednesday it would seek federal regulatory approval to raise its fuel surcharge, citing higher fuel prices that have increased the company's operating costs.

The company said it would ask the Interstate Commerce Commission to raise the surcharge to 1.9 percent from 1.4 percent. If the ICC approves, the surcharge would become effective Monday.

''We want to emphasize that this surcharge is based only on the increased cost of fuel and therefore is purely a pass-through surcharge,'' said Yellow Freight president and chief executive officer George Powell III. ''Should prices decline to July levels, the surcharge ''levels, the surcharge

Yellow Freight announced a fuel surcharge Aug. 22 and told customers it would monitor fuel costs weekly.

Weekly monitoring of fuel costs will continue, the company said Wednesday.

Yellow Freight System, with 1989 operating revenue of $2.2 billion, serves customers in more than 35,000 destinations throughout the United States, Puerto Rico, and several Canadian provinces.

The company is a subsidiary of Yellow Freight System Inc. of Delaware.

TORONTO (SEPT. 5) UPI - Americans shouldn't fear the socialist Ontario provincial government they may face after Thursday's election, experts said Wednesday.

If the Liberal government of Premier David Peterson falls to the New Democratic Party in Thursday's provincial election, as polls suggest it will, the new left-wing government won't present a political or economic threat to the United States, the experts say.

''Ontario is going to be a good or bad place for Americans no matter who is in power,'' said Gord White, a political science professor at the University of Toronto.

Besides, said White, ''the Ontario NDP isn't a particularly radical party.''

Although the NDP advocates closing corporate tax loopholes, scrapping the

Canada-U.S. free trade deal and raising the minimum wage, ''it's going to be hard for them to make sweeping changes,'' White said.

Ontario, the center of Canadian finance and industry, is a major U.S. trading partner and a favored destination for American investors among Canadian provinces.

Dave McFadden, president of the Toronto-based Canada-U.S. Business Association, said while the NDP platform is worrisome, the American business community will likely wait and see how party policies translate to reality.

''Anybody who is realistic and concerned about Ontario's economic future has to tailor policies to fit economic realities,'' McFadden said. ''You can't defy economic gravity.''

Professor Nelson Wiseman, also a U of T political scientist, said previous NDP provincial governments in British Columbia, Saskatchewan and Manitoba were business-friendly. ''NDP socialist governments in Canada are not to be feared,'' he said.

''An NDP government in Ontario would go to great lengths to reassure the American business communities and investors,'' Wiseman said.

As for the election campaign, Wiseman said ''the Liberals miscalculated and the NDP tapped the right pulses.''

Ontario Premier David Peterson, riding a wave of enormous personal and party popularity shored by an enormous election win just two years ago, seemed a sure bet to form another majority government.

When the election was called July 30, the Liberals held 93 of the Ontario Legislature's 130 seats, the NDP 18 and the Progressive Conservatives 17. There were two vacant seats.

Peterson and the Liberals ran a feel-good, ''don't worry-be happy'', campaign hoping to capitalize on summer voter apathy.

But last week, a poll indicated the NDP would form a minority government, wherein a party does not hold a clear majority of seats in the Legislature but holds more than any other party. Opposition parties, who combined may hold more seats than the government, can vote together in the Legislature at any time to defeat the government.

Many Canadians favor minority governments, perceiving them to be more responsive, active governments.

Voter disgust with Peterson opportunistically calling an election years

before legally required to, growing skepticism about the government's integrity and anger over such policies as no-fault car insurance worked against Peterson and the Liberals.

At almost every whistle stop on the campaign trail, Peterson has been met with demonstrations of voter anger and a number of Liberal election events have been marred by jostling between Liberal supporters and protestors.

In the wake of last week's poll, the normally upbeat, soothing sounding Liberal leader has adopted a shrill, at times near-hysterical, tone as he warns supporters and voters about the supposed dangers of an NDP government.

#90248u2129 09/05/1990 ~United Press International

(SEPT. 5) UPI - Here is a roundup of the latest major events in the Persian Gulf crisis stemming from the Aug. 2 Iraqi invasion of the oil-rich emirate of Kuwait.

Iraqi Foreign Minister Tariq Aziz made a surprise visit to Moscow Wednesday where he met with President Mikhail Gorbachev in an apparent bid to strengthen ties with Iraq's former ally prior to a scheduled superpower summit. Details of the talks were not disclosed, but Sen. Robert Dole, who was also in Moscow to see Gorbachev, speculated the Iraqi minister wanted Gorbachev to pass a message to President Bush at the summit in Helsinki, Finland, Sunday.

Britain, meanwhile, dismissed a Soviet proposal for an international peace conference on the Middle East, which would include discussion of the Arab-Israeli conflict, as having ''no chance of success.'' The rejection was made public by British Foreign Minister Douglas Hurd, who arrived in Jordan from Saudi Arabia to discuss the Persian Gulf crisis and the refugee buildup from Iraq and occupied Kuwait in what some observers said was one of the worst refugee crises in modern world history.

WASHINGTON - The first signs of congressional reservations about U.S. policy in the Persian Gulf crisis emerged Wednesday, as Secretary of State James Baker outlined U.S. plans to isolate Iraq and prevent future aggression. Most members of the Senate Foreign Relations Committee echoed the praise that came one day earlier at a House Foreign Affairs Committee meeting, where Baker and President Bush were lauded for their moderation and firmness in the crisis, as well as their willingness to use international rather than American pressure.

The State Department announced Wednesday that Baker will leave late Wednesday on an 11-day, eight-nation trip that will start in the Persian Gulf and take him to Helsinki, Finland for the Bush-Gorbachev summit and then to Moscow.

GENEVA - International relief agencies stepped up their campaign Wednesday to aid thousands of foreign refugees stranded in the desert along the Jordanian-Iraqi border as they try to flee the Persian Gulf crisis. The Austrian Red Cross sent baby food, powdered milk, 3,000 blankets and 26 large tents in an 11-ton shipment to border refugee camps Wednesday, and U.N. officials in Europe said they had raised $20 million in aid.

Arab newspapers reported the gulf state of Qatar expelled Palestine Liberation Organization diplomats, further isolating the organization. PLO Chairman Yasser Arafat has backed Saddam, alienating gulf states that have funded him for years.

CAPE CANAVERAL, FL (SEPT. 5) UPI - NASA's space shuttle program has been hobbled by elusive fuel leaks ever since Columbia was grounded in May the night before launch on a 10-day astronomy mission.

Here is a chronology of NASA's summer setbacks:

-May 29: Columbia, scheduled for launch May 30 on a 10-day astronomy mission, is grounded during fuel loading when sensors detect hydrogen gas spewing into the ship's engine compartment.

-June 6: Hydrogen fuel is pumped back aboard Columbia in a test to pinpoint the source of the leak. It is traced to a 17-inch-wide fuel line disconnect fitting that allows the shuttle's fuel tank to be jettisoned in space. NASA managers order the shuttle hauled back to its hangar for repairs.

-June 12: Columbia is moved back to the Vehicle Assembly Building for removal from its external tank and boosters. The disconnect fitting is later removed and shipped to California for tests to determine the cause of the leak.

-June 18: Atlantis replaces Columbia on pad 39A for a planned launch around July 15 to carry a secret military satellite into orbit.

-June 29: Engineers conduct a fueling test with Atlantis to make sure no leaks are present like the one that grounded Columbia. To their dismay, a leak shows up almost immediately and the shuttle's military mission is put

on hold indefinitely.

-July 13: Atlantis is fueled again to isolate the location of its leak. Officials say the leaks experienced by Columbia and Atlantis are different and that they apparently were coincidental.

-July 25: Atlantis undergoes a third fueling test and leaks again. NASA managers order the ship hauled back to its hangar for repairs, saying the leakage involved a flange where the shuttle's primary hydrogen fuel line bolts to the disconnect fitting. Engineers later say the leak involved the fitting itself.

-Aug. 9: Columbia, equipped with a new 17-inch disconnect fitting borrowed from the shuttle Endeavour, is once again hauled to launch pad 39A for another attempt to get off the ground.

-Aug. 20: NASA sets Sept. 1 as Columbia's new launch date, confident its fuel leak problems have been banished once and for all.

-Aug. 29: Columbia's countdown resumes.

-Aug. 30: The countdown was halted, delaying launch, because of problems with one of four on-board telescopes.

-Sept. 3: Columbia's countdown resumes after the telescope is fixed.

-Sept. 5: The shuttle is grounded once again when sensors detect hydrogen gas leaking into the shuttle's engine compartment.

#90248u2158 09/05/1990 ~United Press International
(SEPT. 5) UPI - President Bush telephoned Ambassador Nathaniel Howell today at the beleaguered U-S Embassy in Kuwait. A White House spokesman says Bush told Howell to- quote- ''keep up the good work.'' The president was referring to efforts by Howell's staff to help Americans trying to leave the occupied country.

The Navy today lifted the suspension on firing of the 16-inch bombardment guns on the battleship U-S-S Wisconsin, which is operating in the Persian Gulf as part of Operation Desert Shield. The suspension on firing the guns on the four U-S battleships was imposed May 24th when powder bags used in the 16-inch guns ignited during testing. The tests were part of the Navy's re-opened probe into the April 1989 gun turrent blast that killed 47 sailors aboard the U-S-S Iowa. That investigation remains open.

Iraqi Foreign Minister Tariq Aziz met with Soviet President Gorbachev in Moscow today to discuss the Gulf crisis. Details on talks at the Kremlin

were NOT immediately available. The meeting took place four days before a U-S-Soviet summit in Finland that's also expected to focus on the Gulf crisis. U-S Senator Robert Dole, who met with Gorbachev earlier today, says Aziz may have given the Soviet leader a message for President Bush.

#90248u2173 09/05/1990 ~United Press International

(SEPT. 5) UPI - Black South African leader Nelson Mandela is engaging in a war of words with the nation's defense minister over the army's handling of black rioting in the township of Sebokeng. 11 people were killed when troops opened fire on rioters. Mandela charges the army came NOT to maintain control, but to continue its war against blacks. Defense Minister Magnus Malan says Mandela is trying to shift the blame for the violence.

President Bush is marking the first anniversary of his so-called war on drugs with the release of a report indicating decreased drug use. However, other figures NOT listed in the administration's report show many cities- including the nation's capital- are in the grips of record murder rates, many tied to narcotics. Bush made NO mention of the drug- related slayings today.

A tropical storm formed in the mid-Atlantic today... and forecasters predicted it will likely strengthen into a hurricane during the next few days. At last report, Tropical Storm Isidore was about 750 miles southwest of the Cape Verde Islands and was blowing 40-mile-an-hour winds.

If a New York bride did NOT make it to church on time, she only has herself to blame. A judge released a decision today saying she discharged a juror so the woman could attend her own wedding... but that was NOT sufficient reason to set aside the trial's resulting robbery convictions against two men.

-30- 1569

#90248u2314 09/05/1990 ~United Press International

(SEPT. 5) UPI - Another leak has forced NASA to postpone tomorrow's already delayed launch of the shuttle Columbia. Plans to get the 10-day astronomy mission under way before dawn were called off today after engineers detected traces of hydrogen gas in Columbia's engine room during fueling. Blast-off is already running three months late, because of an earlier hydrogen leak.

Secretary of State Baker is off today on an 11-day, eight-nation trip, to solidify international support in the Persian Gulf crisis. Before he left, Baker briefed the Senate Foreign Relations Committee. Baker heard the first congressional reservations about Operation Desert Shield. Delaware Democrat Joseph Biden raised questions about the War Powers Act, saying...

''I'm with you. I just want to know where we are going.''

The battleship U-S-S Wisconsin was given the O-K today to fire its huge 16-inch guns. The Wisconsin is one of the U-S military ships operating in the Persian Gulf due to Iraq's invasion of Kuwait. The suspension was placed on the Wisconsin and the Navy's three other battleships last May after powder bags ignited during testing prompted by the April 1989 explosion aboard the battleship U-S-S Iowa.

Canada's native affairs minister met today in Ottawa with Indian leaders in an attempt to renew negotiations to end the 56-day-old standoff at the Mohawk reservation south of Montreal. Talks broke off last week, with one of the main sticking points being amnesty for Mohawk protesters. One Indian leader called the situation at the reserve ''volatile.''

#90248u2353 09/05/1990 ~United Press International

(SEPT. 5) UPI - Pope John Paul talked about the AIDS epidemic today on his trip through Africa, where as many as five-Million people are estimated to have contracted the virus that causes the disease. The pope told bishops in Burundi that a purely medical approach to the epidemic would NOT succeed. He called for a return to ''emotional maturity and ordered sexuality.''

Officials in Deadhorse, Alaska, say there were NO casulties from an all-night chemical fire at an oil field support warehouse. The fire did NOT disrupt oil production at the North Slope oil fields, but a toxic cloud forced the evacuation of one-thousand workers. The blaze was extinguished today and the workers allowed to return to their work camps.

A teen-age witness testified today before a New York Family court judge that David Opont was taken away by another youth shortly before he was set afire, apparently for refusing to take drugs. The torching incident last March gained national attention as a number of celebrities visited Opont during his recovery. The UNidentified 14-year-old suspect in the attack will be sent to a youth facility if found guilty.

Yale University is out with the first study into the effects of passive smoking on children. The study claims to show that children raised in a family of smokers are twice as likely to develop lung cancer than are children NOT regularly exposed to cigarette smoke.

-30- 1579

#90248u2436 09/05/1990 ~United Press International

NEW YORK (SEPT. 5) UPI - Taking the court one hour after the formidable figure of Ivan Lendl was obliterated from his immediate future, John

McEnroe punctuated his return to big-time tennis Wednesday night with a straight-sets victory over David Wheaton at the U.S. Open.

McEnroe, a second-round loser at the Open the previous two years, used a deft touch at the net and a solid serve to crush Wheaton 6-1, 6- 4, 6-4 to reach the semifinals for the first time since 1985.

Pete Sampras, one of the new wave of prominent young Americans, delivered 24 aces to remove Lendl from the picture, 6-4, 7-6 (7-4), 3-6, 4-6, 6-2.

As a result, in Saturday's semifinals, McEnroe will face the 12th- seeded Sampras with an opportunity to become the first unseeded man to reach the Open final since Jan Kodes in 1971. An unseeded player never has won the championship.

''I haven't won here since '84 and I haven't been in a Grand Slam final for five years, so it would be a big thrill to be in the final again,'' said the 31-year-old New Yorker, a four-time Open champion. ''I went through some difficult times the last few months losing matches, and I haven't played well here the last couple of years.

''I'm not going to be playing that many more here, so I'm excited about my opportunities.''

This marks the first time in nine years Lendl has failed to reach the final. During that stretch he won the crown three times.

''It's disappointing, of course, but it had to end sooner or later,'' Lendl said. ''I wish it never had ended, but it happened today.

''I know all the reasons it happened, all the reasons I haven't played well this year. I have to forget it and go on.''

Earlier in the day, Arantxa Sanchez Vicario took advantage of Zina Garrison's sore ankle to punch out an easy 6-2, 6-2 victory and gain a semifinal date against Steffi Graf.

Graf, the two-time defending champion and No. 1 seed, came back from a slow start to win 12 of the last 14 games and defeat Jana Novotna 6-3, 6-1.

From 1-1 in the opening set, McEnroe swept seven games in a row to 2-0 in the second set. Wheaton, a 21-year-old from Minnesota who also reached the Wimbledon quarterfinals, jumped to a 4-1 lead in the third set, but McEnroe broke in the seventh and ninth games.

''It's going to be a very exciting match,'' McEnroe said of Sampras, to whom he lost a three-setter in Toronto in July. ''I knew Sampras would give Lendl a tough time. Pete is one of the most talented guys out there.

''I'm doing it a lot better than I did when we played in Toronto, and he is, too. We'll both be ready Saturday.''

Admittedly tiring in the fourth set, Sampras got a lift from the supportive crowd to complete his 4-hour, 5-minute victory over Lendl.

''I was getting a little tired in the fourth set and the crowd got me back into it,'' said the 19-year-old Californian. ''My feet were aching and without the crowd support I wouldn't be in this situation.''

A year ago Sampras upset then defending champion Mats Wilander in the second round, also in five sets, but said this victory was much bigger.

''This is the top of it, beating Lendl in the quarterfinals of the U.S. Open,'' he said. ''This is what it's all about. I really don't believe what's happening now, it's a dream come true. This is what I've been working for all summer. I've really worked hard and this is the reward, to be in the semifinals of the U.S. Open.''

Oddly, two years ago Sampras was a house guest of Lendl at Greenwich, Conn., where the two trained together. Lendl took the occasion to give the youngster hints on how to care for himself.

He said he always has been a fan of Lendl, rarely a crowd favorite.

''I always pulled for him,'' Sampras said. ''I felt sorry for him. He's a true professional in every sense of the word.''

Sampras said Lendl told him at that time, ''You've got to train so hard you can't walk home. Now I feel I can play, I'm fit, I can last as long as anyone else on the tour.''

The men's semifinal bracket will be completed Thursday when defending champion Boris Becker plays Aaron Krickstein in the afternoon and Andre Agassi faces Andrei Cherkasov at night.

Sampras, who had 27 service winners in addition to 24 aces, was guilty of 57 unforced errors. He was far more aggressive than Lendl, approaching the net 127 times to 34 for his opponent.

With the dismissal of Lendl, an American-born man is assured of playing in the final for the first time since 1985, when McEnroe lost to Lendl.

After Sampras achieved the only service break of the opening set in the final game, Lendl appeared ready to even the match when he served for the second set at 5-4. Sampras, though, broke back immediately.

Lendl staved off four break points in the 11th game, then saved three set points on his serve in the 12th to force the tie-break. On his five serves in the tie-break, which he never trailed, Sampras had four service winners and an ace.

Lendl then took charge, breaking in the second game of the third set and in the first and third games of the fourth, when he went up 4-0.

Sampras lost his intensity in these two sets and no longer was making the spectacular shots he did earlier in the day. Still, he fought back to close to within 4-3 before Lendl ran out the set.

''It was good mentally that I got on the board in the fourth, otherwise he'd have steamrolled me,'' Sampras said.

Given a lift by the crowd, Sampras gained the decisive break in the fourth game of the final set with a forehand down the line. Lendl had a break point in the seventh game, but then netted a backhand service return. Sampras followed with an ace and Lendl sent another backhand service return into the net to virtually close his chances.

Sampras broke again in the next game to end the match.

''I didn't expect this kind of breakthrough at this age,'' said Sampras, who is ranked 12th in the world and is among a group of young Americans that includes Agassi, Michael Chang, Krickstein, Jay Berger and Jim Courier among the top 16. ''I thought it would take me a little longer.''

Sanchez Vicario opened each set with a pair of service breaks for 3-0 leads and never allowed the ailing Garrison to present a firm challenge.

Garrison, generally a strong serve-and-volleyer, made merely 15 approaches to the net, winning six of the points.

''My movement was OK, but mentally I couldn't forget about it, it just kept creeping in my head,'' the fourth seed said of her right ankle, which was taped. ''Basically, I was pushing the ball back and hoping she would miss. I just wasn't there today.

''I have a high tolerance for pain, and I just wanted to make her work for her money. I don't feel good volleying at all, which is why I preferred to stay back, and moving forward hurts me.''

Sanchez Vicario insisted she knew nothing of Garrison's injury, and credited her ability to move pcc ystprxx. uf to ns$ nbw xia r sbc-open:1055ped ld-1stadd sked 9-5

The men's semifinal bracket will be completed Thursday when defending

champion Boris Becker plays Aaron Krickstein in the afternoon and Andre Agassi faces Andrei Cherkasov at night.

Sampras, who had 27 service winners in addition to 24 aces, was guilty of 57 unforced errors. He was far more aggressive than Lendl, approaching the net 127 times to 34 for his opponent.

With the dismissal of Lendl, an American-born man is assured of playing in the final for the first time since 1985, when McEnroe lost to Lendl.

After Sampras achieved the only service break of the opening set in the final game, Lendl appeared ready to even the match when he served for the second set at 5-4. Sampras, though, broke back immediately.

Lendl staved off four break points in the 11th game, then saved three set points on his serve in the 12th to force the tie-break. On his five serves in the tie-break, which he never trailed, Sampras had four service winners and an ace.

Lendl then took charge, breaking in the second game of the third set and in the first and third games of the fourth, when he went up 4-0.

Sampras lost his intensity in these two sets and no longer was making the spectacular shots he did earlier in the day. Still, he fought back to close to within 4-3 before Lendl ran out the set.

''It was good mentally that I got on the board in the fourth, otherwise he'd have steamrolled me,'' Sampras said.

Given a lift by the crowd, Sampras gained the decisive break in the fourth game of the final set with a forehand down the line. Lendl had a break point in the seventh game, but then netted a backhand service return. Sampras followed with an ace and Lendl sent another backhand service return into the net to virtually close his chances.

Sampras broke again in the next game to end the match.

''I didn't expect this kind of breakthrough at this age,'' said Sampras, who is ranked 12th in the world and is among a group of young Americans that includes Agassi, Michael Chang, Krickstein, Jay Berger and Jim Courier among the top 16. ''I thought it would take me a little longer.''

Sanchez Vicario opened each set with a pair of service breaks for 3-0 leads and never allowed the ailing Garrison to present a firm challenge.

Garrison, generally a strong serve-and-volleyer, made merely 15 approaches to the net, winning six of the points.

''My movement was OK, but mentally I couldn't forget about it, it just kept creeping in my head,'' the fourth seed said of her right ankle, which was taped. ''Basically, I was pushing the ball back and hoping she would miss. I just wasn't there today.

''I have a high tolerance for pain, and I just wanted to make her work for her money. I don't feel good volleying at all, which is why I preferred to stay back, and moving forward hurts me.''

Sanchez Vicario insisted she knew nothing of Garrison's injury, and credited her ability to move the ball around with pinning Garrison at the baseline.

''I really play fantastic,'' the sixth seeded Spaniard said. ''I moved the ball well because that's my game, and when I had the chance I go for the winners. I played very smart.''

Graf is 7-1 over Sanchez Vicario, but the single defeat was a memorable one, coming in the final of the 1989 French Open.

''I have nothing to lose against Steffi,'' Sanchez Vicario said. ''I will play my game. She knows I'm tough, and I know she's No. 1.''

Graf now has reached the semifinals in her last 15 Grand Slam championships, winning nine.

''I didn't have the best start, that's for sure, but I got in it pretty well,'' said Graf, in quest of the 10th Grand Slam title of her career. ''I feel very good. I feel I'm in excellent position but I can't underestimate any of the other players.''

Novotna, who now has taken merely one set from Graf in nine career meetings, broke service to open the match, then held to go up 2-0.

The 12th seed had another break point in the third game, which Graf saved with a service winner, and the 21-year-old West German went on to take the next four games.

Novotna won only one game in the second set, holding at love in the third game.

Novotna, a 21-year-old from Czechoslovakia, blamed her poor performance on the fact she was playing for the first time on the Stadium Court.

''I had no chance this year to play on the Center Court,'' she said. ''It's not just the whole atmosphere, but the court is different. I found it difficult to play serve and volley because the court is slower.''

(SEPT. 5) UPI - Another fuel leak rained on NASA's plans to launch the shuttle Columbia tomorrow morning on a 10-day astronomy mission. Blast-off was already three months behind schedule because of an earlier hydrogen leak. Rocket engineers today detected hydrogen gas seeping into Columbia's engine room during the shuttle's fueling process. There was NO immediate word on a date for another launch attempt.

More Westerners made their way of out of Iraq today... including Americans. 29 Americans were on a plane carrying 92 women and children that arrived in London from Jordan, where it stopped during the flight from Baghdad. Another flight carrying 24 more Americans, three Canadians and one Jordanian who lives in the United States was expected to land at New Jersey's Newark International Airport.

.

Thousands of refugees fleeing Iraq across land are being helped by several international relief agencies. The groups are speeding to aid the refugees stranded in the desert along the Iraqi-Jordanian border. The Austrian Red Cross sent an 11-ton shipment of supplies that included baby food, powdered milk, three-thousand blankets and 26 large tents. Officials say the condition of the refugees worsens with each passing day.

Tropical Storm Isidore formed in the mid-Atlantic early today and forecasters predict it will likely strengthen into a hurricane within 72 hours. Isidore's winds increased from 40 to 45 miles an hour this afternoon. The storm was located about 750 miles southwest of the Cape Verdes Islands... some five days away from the eastern Caribbean. It is the ninth storm named during the 1990 Atlantic- Caribbean hurricane season

(SEPT. 5) UPI - A forsenic dentist has been recruited in an attempt to solve the murders of five college students in Gainesville, Florida. Dr. Michael West has pioneered techniques using dental models to match bite marks and using ultraviolet photography to match fingerprints. Detectives hope to use a bite mark on one of the victims to find a suspect.

The government hopes to estimate the rate of drug abuse by the nation's truckers. The plan calls for confidential tests at roadside scales for nine drugs and alcohol. All testing will be voluntary. The tests will begin next month in Maryland, Missouri, Arizona, Virginia and Washington state. The data will be used to refine federal drug laws applying to the trucking industry.

California evangelist Morris Cerullo has hit a snag in his attempt to buy the Heritage U-S-A complex formerly owned by disgraced televangelist Jim Bakker. Cerullo has offered 52-Million dollars for the complex, but calls P-T-L's access to satellite time essential to the deal. The P-T-L satellite contract expires in February, and satellite owner H-B-O says it's NOT interested in extending the contract.

A published study says AIDS researchers are looking into pokeweed- a common, poisonous plant found across North America- as a possible treatment. Pokeweed has proved effective in the test tube in isolating cells infected with AIDS and keeping the virus from spreading. But scientists say their research is still at an early stage, and they counsel against AIDS victims eating the plant.

#90248u2698 09/05/1990 ~United Press International

(SEPT. 5) UPI - A Chicago radio station is reporting that an American civilian has been shot by an Iraqi soldier in Kuwait City. W-B-B-M A-M says a State Department spokesman has confirmed that the department is investigating a report that the American was shot while trying to escape Kuwait City. It's NOT clear whether the American was wounded or killed.

An airliner carrying 28 hostages freed from Iraq landed tonight at Newark International Airport in New Jersey. A spokeswoman for Governor Jim Florio says Virgin-Atlantic Airways Flight One carried 24 Americans, three Canadians and one Jordanian who was believed to be an American resident.

Iraq's foreign minister made a surprise visit today to Moscow, where he met with Soviet President Gorbachev. NO word on what was said. But Senator Bob Dole- who's also in Moscow- speculates the minister wants Gorbachev to pass a message to President Bush at Sunday's summit in Finland.

Hopes of restoring confidence at the beleagured space agency were dashed today. NASA was forced to scrub tomorrow morning's planned launch of the shuttle Columbia after engineers detected hydrogen gas leaking into the engine room during fueling.

.

NO immediate word on when another launch attempt would be made. It's also NOT known how Columbia's latest problems will affect NASA's plans to launch the shuttle Discovery next month on a critical mission to fire the Ulysses solar probe into orbit around the sun.

Forecasters say Tropical Storm Isidore is still five days from the eastern Caribbean. But they predict it will intensify into a hurricane before

then. At last report, Isidore was about 17-hundred miles east of Trinidad and moving west at 18 miles an hour. Its top winds were 45 miles an hour.

The calender may say September, but it felt more like mid-summer in parts of the southwest and southern United States today as the mercury climbed into the triple digits. Longview, Texas, registered 102 degrees this afternoon.

#90248u2727 09/05/1990 ~United Press International

(SEPT. 5) UPI - Testimony began today in Brooklyn, New York, in the trial of a 14- year-old boy charged with setting afire a Haitian immigrant boy last March after the child apparently refused drugs. The burn victim, David Opont, survived and his struggle to recover from his severe injuries drew nationwide attention.

A clerk magistrate in Boston refused today to lodge criminal charges against the Institute of Contemporary Art for displaying a controversial exhibit by the late photographer Robert Mapplethorpe. Museum officials hail the decision, but the group that sought the charges says it will continue trying to shut down the exhibit.

A photographer hired by M-T-V to take photographs during last year's video awards show has filed suit in Los Angeles against Guns N' Roses and the band's bodyguard. The photographer says the bodyguard allegedly shoved him- injuring him- when he tried to photograph lead singer Axl Rose.

More than six-thousand teachers in California, Michigan, Illinois and Pennsylvania were on strike today in contract disputes affecting at least 100-thousand students. Strikes also hit colleges in Michigan, Connecticut and Pennsylvania.

A consumer group says there's still too much fat in school lunches. As it did last year, the Public Voice for Food and Health Policy says the federal government should require schools in limit the amount of fat in its lunchtime menus to 30 percent of total calories.

Authorities in St. Louis say a police officer under investigation for a possible foot fetish has resigned. They say about a dozen women pulled over by the officer for minor traffic violations accused him of touching, tickling or looking at their bare feet while he searched their shoes for drugs.

#90248u2821 09/05/1990 ~United Press International

(SEPT. 5) UPI - Supreme Court Justice Harry Blackmun today rejected a

plea by Arkansas officials to overrule an appeal court's stay of execution for death row inmate Barry Fairchild. A three-judge appeals panel stayed the execution yesterday. Fairchild had been scheduled to die tonight at Arkansas' Cummins State Prison for the 1983 rape and murder of a young Air Force nurse.

A California judge today rejected defense arguments of ameliorating circumstances and sentenced a sheriff's deputy to 13 years in prison for killing his estranged wife. Anthony Scalzo's attorneys had argued for probation on the grounds that his mind was impaired at the time of the shooting because he was taking the sleeping pill Halcion.

Organizers of the Miss America Pageant say they are ''NOT concerned at all'' over reports that a self-declared civil rights leader is organizing a protest in Atlantic City, New Jersey, to coincide with the beauty contest Saturday. Steve Young says his ''Forgotten Youth'' group will stage a ''peoples' pageant'' on the boardwalk to draw attention to civil rights issues.

BURLINGTON, MA (SEPT. 6) BUSINESS WIRE - Symbolics Inc. (NASDAQ: SMBX), Thursday announced that it had entered into an agreement with a Japanese consortium, led by Nichimen Corp., granting the consortium an exclusive license in Japan of distribution and manufacturing rights to Symbolics' Ivory processor-based software and hardware products for a period of five years.

Symbolics received aggregate cash proceeds of $3.9 million in exchange for the license and related transactions.

Nichimen Corp., a major Japanese trading company, currently distributes Symbolics' products in Japan through its subsidiary, Nihon Symbolics Corp. Under this agreement, Symbolics will continue to manufacture hardware products for the consortium on a cost basis, and will furnish new Ivory-based products for a period of two years.

Symbolics stated that this capital infusion will aid the company in financing its future business plans. Jay Wurts, Symbolics' chairman, chief executive officer, and president, stated, "This agreement underscores the unique advantage our technology provides to meet opportunities within today's highly competitive workstation and graphics markets."

Symbolics Inc., headquartered in Burlington, is the leading provider of symbolic processing hardware and software used in sophisticated applications, including interactive scheduling and planning, hypertext-based publishing, computer-aided mathematical computing and HDTV-based graphics imaging and processing. Symbolics and Ivory are trademarks of Symbolics, Inc.

SAN JOSE, CA (SEPT. 6) BUSINESS WIRE - BT Tymnet Inc., provider of the international value-added network Tymnet, Thursday announced it has been selected by Prodigy Services Co., a partnership of IBM and Sears, to provide nationwide access to the Prodigy service, which was launched nationally Thursday morning.

With the utilization of the Tymnet Network, the Prodigy service becomes the nation's first coast-to-coast system linking families to information and services for a low flat fee.

For the 60 million Americans that have potential access to a personal computer, the Prodigy service is an affordable way to manage their personal finances, call up current information and advice on demand, shop from home, exchange mail, plan travel activities, play challenging games and help educate their children at the touch of a few key strokes.

With only regional coverage available previously, BT Tymnet now makes the Prodigy service available nationwide. BT Tymnet Selection Prodigy is building its own telecommunications system by erecting Prodigy Local Sites (PLSs) across the country. These sites are being supplemented by BT Tymnet in over 300 locations, providing a total of approximately 500 access sites in the United States.

"BT Tymnet has allowed us to offer the Prodigy service on a national basis two years earlier than if we continued to build a network on our own," said Prodigy President Theodore Papes.

"We chose BT Tymnet not only because it is the leader among Value-Added Networks in access coverage, but also because of the flexibility of its software-based solution, their willingness to work together with us, and their responsiveness to our requests," added Papes.

Said BT Tymnet President and Chief Executive Officer Mark Baker, "We view our partnership with Prodigy as an alliance with one of the most innovative companies today, with the potential to be a major force in the 90s. Our commitment to Prodigy is evidenced by our major network upgrade of over 200 Tymnet sites to support 2400 bps, and the addition of ten new sites specifically for this customer."

Prodigy has co-located IBM Series 1 computers at BT Tymnet node sites in New York, Fairfax, Chicago, Dallas, Denver, San Francisco, and Newport Beach. Multiple Series 1 computers at these hub sites can each support up to 256 simultaneous users and are front ended by BT Tumnet Compact XL Engines (packet switches).

OVERLAND PARK, KS (SEPT. 6) BUSINESS WIRE - Sprint Services, a unit of US Sprint Communications Co., has announced that Peggy Fields has been named director of operations for its Relay Texas center in Austin, Texas.

Fields joined Sprint Services in February 1989 as director of operations for the company's Phoenix, Ariz. regional operations center. Fields now will manage operations in both Austin and Phoenix.

The Public Utility Commission of Texas awarded the Relay Texas contract to Sprint Services in March. Under the contract, Sprint Services will provide telephone communications to Texas residents who are deaf, hard of hearing or speech impaired. The Relay Texas center opened Sept. 1 in Austin.

Prior to joining Sprint Services, Fields managed seven operator services centers in AT&T's Northern and Eastern territories. Before the AT&T divestiture in 1984, she managed long-distance and operator services for Southwestern Bell in northern Texas. She began her career in 1966, as an operator for Southwestern Bell in Wichita Falls, Texas.

Sprint Services is based in Overland Park, Kan., which is located in

metropolitan Kansas City. The business unit was established in 1988 to provide operator support for US Sprint customers.

It now provides a variety of call assistance and 900 services to a rapidly growing market. Sprint Services has regional operations centers in Kansas City, Mo.; Nashville, Tenn.; Phoenix, Ariz.; Richmond, Va.; Indianapolis, Ind.; and Jacksonville, Fla.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SALT LAKE CITY (SEPT. 6) BUSINESS WIRE - Gull Laboratories Inc. (NASDAQ:GULL), a leading manufacturer and marketer of high-quality diagnostic test kits for the detection of infectious diseases, Thursday announced results for the second quarter and six months ended June 30.

While net income declined, revenues increased 26 percent for the quarter and 23 percent for the six-month period.

For the quarter just ended, the company reported a net loss of $47,000 or less than 1 cent per share on revenues of $1.5 million compared to net income of $207,000 or $.04 per share on revenues of $1.2 million for the same period a year ago.

For the six-month period, net income reached $23,000 or less than 1 cent per share on revenues of $2.8 million, compared to net income of $403,000 or $.08 per share on revenues of $2.2 million last year.

Dr. Myron Wentz, president and chairman of the board, stated that a strategic decision was made to position Gull for more rapid growth than is available in infectious disease diagnostics. ''While sales continue to grow and are at an all-time high,'' Wentz said, ''we invested significantly in the expansion of our diagnostics division and in the establishment of two new divisions. We believe these investments will strengthen our present position in diagnostics and the new divisions will allow us to compete in larger markets.''

Gull Laboratories Inc. remains in a strong cash and liquid asset position. At June 30, 1990, current assets exceeded current liabilities by 3.7 to

1. The company also has a $1 million revolving line of credit providing a positive liquidity position.

Gull Laboratories Inc. develops, manufactures and markets high quality diagnostic test kits for the detection of infectious diseases. The company markets these products for use in hospitals and clinical laboratories around the world.

#90249b0037 09/06/1990 ~Business Wire

CEDAR RAPIDS, IA (SEPT. 6) BUSINESS WIRE - Rockwell International Corp.'s Collins Defense Communications (CDC) has been awarded an $18.3 million production contract for the AN/GRC-XXX HAVE QUICK II UHF AM/FM Ground Radio.

The contract was issud by the Air Force Systems Command's Electronic Systems Division at Hanscom Air Force Base in Bedford, Mass. It calls for initial production of 492 radio sets with two follow-on production options scheduled in fiscal year 1992 and 1993.

The high-performance AN/GRC-XXX receiver-transmitter updates the Air Force's UHF HAVE QUICK capability by offering increased ECCM capability in the presence of radio jamming. It is primarily intended for use in dense UHF co-site locations where it is designed to reduce or eliminate co-site interference.

Offering reliable communications in normal or stressed environments, the AN/GRC-XXX will be rack mounted in tactical vans, shelters and fixed ground installations. The equipment also performs air traffic control communications at collocated VHF/UHF transmitter/receiver sites.

Completely solid state, the AN/GRC-XXX provides AM and FM communications on any one of 7,000 channels in the 225 to 399.975 MHz band with 20 watts AM or 50 watts FM carrier output.

Its similarity to existing AN/GRC-171(V)2 family of radio systems increases life cycle cost (LCC) benefits while providing increased flexibility and capability where required.

The AN/GRC-XXX system is compatible with radios incorporating the standard UHF ECCM modes known as HAVE QUICK and HAVE QUICK II. When an upgrade to

HAVE QUICK IIA is called for, all that is required is a field modification easily increasing the anti-jam margin and ensuring 3 C in a stressed environment.

Work on the program will be performed at CDC's facilities in Cedar Rapids and Salt Lake City and is expected to have no impact on employment in either city.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

TUSTIN, CA. (SEPT. 6) BUSINESS WIRE - Robert J. Williams was elected senior vice president, specialty services of Eldorado Bank, and Gary A. Green was promoted to vice president and manager of the bank's Tustin office, succeeding Williams.

Williams will be responsible for all the bank's specialty services including its Victorville loan production office, small business administration (SBA) and real estate loans, escrow, leasing, bankcard and appraisal services. He will continue to have headquarters in the Tustin office and will be a member of the bank's senior management team.

Williams has over 20 years experience in banking with Security Pacific National Bank, Pacific National Bank and Huntington Beach National Bank where he served as senior vice president, credit administration. He joined Eldorado Bank in March 1989 as vice president and manager of the Tustin branch office. Williams is a graduate of San Diego State University where he majored in business administration.

Green joined Eldorado Bank in March, 1989, as vice president, business banking officer, with headquarters in the Tustin office. Prior to joining Eldorado he was vice president, manager, of the South Coast Regional Office of Coast Bank. Previously he was with 1st Business Bank and Bank of America. Green received his master's degree in business administration from the University of Southern California and his bachelor of arts degree from California State University at Fullerton.

Commenting on the promotions, J.B. Crowell, president and chief executive officer of Eldorado, said, ''Both these individuals have made substantial contributions to our growth. Their new positions are indicative of the increased responsibilities and larger roles they are taking to accommodate Eldorado's continued expansion.''

Eldorado Bank, with total assets of about $300 million, operates through nine locations in Orange, Riverside and San Bernardino counties. It is a wholly-owned subsidiary of Eldorado Bancorp (ASE:ELB).

SANTA ANA, CA (SEPT. 6) BUSINESS WIRE - The First American Financial Corp. (NASDAQ:FAMRA) has acquired control of the Southwest Title & Trust Co. of Oklahoma City for cash and notes, according to D.P. Kennedy, president.

''Southwest Title & Trust Company fits well into our Oklahoma title network and provides the company with an interest in an Oklahoma County title plant as well as title plants in Cleveland County and Pottawatomie County,'' Kennedy said.

Dewey Jernigan, president of Southwest, will remain as a consultant and honorary board chairman. James Kott, First American state manager for Okalahoma, was elected to succeed him as president. First American's Oklahoma operations will be moved to Southwest's building.

First American plans to acquire the balance of the shares held by the minority interest as soon as possible.

The First American Financial Corp. operates its title insurance business through its principal subsidiary, First American Title Insurance Co., one of the largest title insurers in the nation. The company offers title services through a network of more than 5,500 offices or agents in all 50 states.

It also provides title services abroad in the Bahamas, Guam, Mexico, Puerto Rico, the Virgin Islands and the United Kingdom.

EL PASO, TEXAS (SEPT. 6) BUSINESS WIRE - El Paso Electric Co. announced Thursday that it has adopted, subject to regulatory approval, a share purchase rights plan and authorized the filing for the necessary regulatory approvals of the Federal Energy Regulatory Commission and the New Mexico Public Service Commission.

The plan cannot be put into effect without the prior approval of both commissions. The plan was not adopted in response to any known takeover attempt or threat.

Upon receipt of approval from both commissions, the company will declare a dividend distribution of one share purchase right (right) for each outstanding common share of the company. When declared, each right will entitle shareholders to buy one newly-issued share of common stock of the company at an exercise price of $25.

The rights will be exercisable only if a person or group acquires 15 percent or more of the company's common shares or announces a tender offer for 30 percent or more of the company's common shares. The company will be entitled to redeem the rights at 1 cent per right within certain time periods.

If a shareholder acquires 15 percent or more of the company's outstanding common shares, each right will entitle its holder to purchase, at the right's then-current exercise price, a number of the company's common shares having a market value at that time of twice the right's exercise price.

If the company is acquired in a merger or other business combination transaction, each right will entitle its holder to purchase, at the right's then-current exercise price, a number of the acquiring company's common shares having a market value at that time of twice the right's exercise price.

The dividend distribution will be made to shareholders of record on a date set after regulatory approval. The rights will expire in 10 years.

SAN FRANCISCO (SEPT. 6) BUSINESS WIRE - Monarch Capital Corp., one of the nation's leading variable life and disability income insurance companies, has consolidated its national investment operations at Associated Capital Investors Inc. (Associated), a San Francisco-based money management firm in which Monarch holds a controlling interest.

In addition to transferring to Associated $1.3 billion in assets previously managed by the company's Springfield, Mass. headquarters, Monarch moves its entire investment department headed by current vice chairman and chief investment officer George Siguler.

Siguler, 43, becomes president and chief investment officer for Associated replacing Thomas B. Kelley who will remain with Associated through the end of the year to provide continuity during the management transition. Kelley is considering several ventures but is not ready to discuss his specific plans.

Siguler engineered Monarch's acquisition of Associated from BankAmerica Corp. in 1988. Since the acquisition, he has had oversight responsibility for the firm.

''I anticipate continuing Associated's philosophy of pursuing quality growth investments, with greater emphasis on quantitative controls,'' said Siguler.

Other portfolio management staff joining Siguler in the move include Michael J. Romanowski, Douglas A. Barry, John E. Leslie III, and Seth A. Reicher.

Siguler first gained a reputation as an innovative investment strategist during his tenure managing Harvard University's assets from 1973 to 1983, where he was a founding partner of the Harvard management Co. Before joining Monarch in 1984, Siguler served as chief of staff of the U.S. Department of Health and Human Services for two years.

At Monarch Siguler has guided the firm's investment strategy, including managing the company's bond portfolio, overseeing all private equity investing and targeting investments for the company's branded variable life and annuity products.

Under Siguler, Monarch's fixed income performance has surpassed that of 95 percent of all professional managers during the past five years. Monarch's equity management returns have topped the market in each of the past three years, and Monarch's participation in private investments has brought a five-year compound annual rate of return exceeding 37 percent.

In addition, sales of variable life and annuities have been riding a wave of resurgent interest in the investment products arena.

Siguler has just moved to Tiburon, Calif., with his wife Pamela and their four children. He is a member of the Visiting Committee of the Harvard Medical School and has also served as a director of the Investor Responsibility Research Center, an organization that deals with shareholders' rights.

Associated Capital Investors Inc. is an investment manager for institutional clients, mutualfunds and high net-worth individuals.

DALLAS (SEPT. 6) BUSINESS WIRE - Southmark Corp. Thursday announced the promotion of Robert M. Galecke to chief operating officer and ececutive vice president.

Galecke previously served Southmark as executive vice president, treasurer and secretary.

In addition, Richard G. Knoblock and Jack Lowe were appointed to the board of directors of Southmark, replacing James A. Colquitt and Arthur L. Crowe Jr., who served on an interim basis following Southmark's emergence from Chapter 11 proceedings in mid-August.

These appointments fulfill the requirement that Southmark maintain a board

comprised of a least three directors, of which two must be independent.

Glen Adams, chairman, president and chief executive officer, commented, ''Bob Galecke's familiarity with the company's various businesses and his vast experience with the many levels of management will prove invaluable as we move into this new phase of the company's history.''

Before joining Southmark in 1986, Galecke was president and chief operating officer of Amrecorp Realty Inc., a national real estate syndication and property management company. He also served as executive vice president and senior lending officer for First Bank Milwaukee in the early 1980s. Galecke received a B.S. in Economics and a graduate degree from the School of Banking at the University of Wisconsin.

Adams continued, ''Southmark is indeed fortunate to have directors of the caliber of Richard Knoblock and Jack Lowe. I am confident that both will make significant contributions to Southmark in the months ahead.''

Both Knoblock and Lowe have extensive experience in the private sector and have been involved with a number of large corporations. Knoblock currently serves as president of the Electro Kinetics Division of Pacific Scientific Co. in Santa Barbara, Calif.

He previously served in executive posts with Kavlico Corp. and Lear Siegler Corp. Knoblock graduated from the United States Military Academy and served as a pilot in the United States Air Force for several years, including three years of active duty in Southeast Asia.

Lowe is chairman of the board and chief executive officer of TDIndustries, an employee-owned mechanical contracting firm headquartered in Dallas. A director of Turtle Creek National Bank, Lowe is also active in several civic and community organizations, including the Community Council of Greater Dallas, Baylor University Medical Center Foundation, Dallas County Community College District Foundation, and the Salvation Army.

He graduated Magna Cum Laude from Rice University and served for two years in the United States Navy, assigned to the Manned Spacecraft Center, NASA, in Houston.

Southmark Corp., headquartered in Dallas, is a real estate and financial services company.

LOS ANGELES (SEPT. 6) BUSINESS WIRE - The buyout of The Prudential California Realty (PCR) by its senior management team was successfully completed Thursday.

As a result, PCR is now the largest independent residential real estate brokerage firm in the state of California and one of the largest in the nation.

The finalization of the agreement and the announcement was made by the senior management of the new company, George Rathman, who will serve as chairman and chief executive officer of the firm, Rick Merrill, who will be president and chief operating officer and Robert LeFever, who will be the executive vice president.

In addition to the senior management, four regional directors will participate as limited partners: Joseph Balla in Northern California, Rolinda Smith in Beverly Hills/West Los Angeles, Roger Ewing in North Los Angeles/Ventura/Santa Barbara and Robert Foster in the South Bay/Orange County/Inland Empire. Steve Games will continue to serve as the president of The Prudential California Realty, San Diego.

The Prudential California Realty is the largest independent residential real estate marketing firm in California with 78 offices extending from the San Francisco Bay area to San Diego and having more than 4,200 sales associates. PCR generated more than $9 billion in California sales in 1989 and has expertise in both statewide and international marketing with extensive capabilities in the Pacific Rim.

In addition to being the largest independent real estate firm in California, PCR will be the largest member of The Prudential Real Estate Affiliates national network, which has nearly 1,000 offices and 24,000 sales associates.

PCR will continue to enjoy the support of Prudential's national television advertising program and nationwide relocation management services.

HOUSTON (SEPT. 6) BUSINESS WIRE - Team Inc. (ASE:TMI) ("the company") and Source Environmental Sciences Inc., both of Houston, Thursday announced that they have signed a letter of intent for the acquisition by Team Inc. of all of the common stock of Source Environmental.

The price of the transaction was not disclosed; however, it will be a

stock transaction and accounted for as a pooling of interest by Team. The acquisition is subject to the approval of both boards and execution of a definitive agreement.

Source Environmental is a professional environmental consulting firm serving Team's present industrial customer base. It began its operation in 1984 specializing in air quality service, including the preparation of environmental permit applications, atmospheric dispersion modeling, fugitive air emission monitoring, and environmental impact assessments and audits for industrial facilities.

Jack Coblenz, the founder, will continue to serve and direct Source as a wholly-owned subsidiary of Team.

With the merger of Source, Team, already a national leader in plant emissions monitoring and control, will take another step forward in its stated commitment to expand its service capabilities in the areas of comprehensive environmental and air quality permitting.

This expanded line of service to Team's customers is intended to insure that new and existing industrial customers would have access through Team to the resources they require to meet present and new clean air compliance standards.

Team also confirmed, as stated in its press release dated July 11, 1990, that spending on road maintenance and repair work by the state of Texas was reduced for July and August because of budgetary constraints as the state neared the end of its Aug. 31, 1990 fiscal year. However, this situation was temporary and will affect the company's first quarter only as the state's new budget began Sept. 1, 1990, and it is expected that spending will return to normal for the remainder of the year.

The first quarter will be profitable for the company but less than originally anticipated. First quarter results will be available and released at the end of September. The company is optimistic for the year's results because of expected strong performance in all divisions during the rest of this fiscal year.

Team Inc. is a national service company and a leader in the repair and maintenance of America's public and private infrastructure from roads and bridges to industrial plants. Headquartered in Houston, Texas, the company has 53 operating locations in 24 states and serves the international market through licensee arrangements in 12 countries. Team Inc. is traded on the American Stock Exchange under the symbol TMI.

SOUTH SAN FRANCISCO, CA (SEPT. 6) BUSINESS WIRE - Guy F. Atkinson Co. of California (NASDAQ:ATKN), Thursday announced that its pipe distribution business Comco Pipe & Supply Co. has purchased assets of the March Pipe Company Inc. of Commerce, Calif.

Terms of the sale were not disclosed.

This purchase provides Comco, with headquarters in Edmonton, Alberta, Canada, an established pipe distribution network serving the greater Southern California region. This network is in addition to its existing Northern California and Canada operations. Comco will be servicing customers in Southern California from a new yard located in Rialto, Calif.

Comco supplies pipe, flanges, and fittings to the energy, industrial, construction, and manufacturing industry segments.

Guy F. Atkinson Co. of California is a diversified corporation with interests in construction, manufacturing, industrial pipe distribution, and oil and gas exploration and development.

#90249b0089 09/06/1990 ~Business Wire
JUNEAU, AK (SEPT. 6) BUSINESS WIRE - Sealaska Corp. reported net income of $16.8 million on revenues of $110.7 million for the fiscal year ended

March 31, 1990.

The company's assets total more than $302.3 million, an increase from last year's $278.9 million. ''Sealaska's earnings are attributable largely to income from timber sales and interest earnings from our investment portfolio,'' Sealaska Chief Executive Officer and President Byron I. Mallott said.

Revenues from timber operations were $95.5 million, generated from a harvest of 98.7 million board feet (MMBF). Sealaska's $147.5 million investment portfolio accounted for $12.1 million in income, up 34 percent from the previous year's $9.1 million in income.

Revenues of $177 million from Sealaska's seafood subsidiary, Ocean Beauty Seafoods Inc. (OBSI) and revenues of $8.5 million from Sealaska's Building Products Group (BPG), were not recorded in fiscal year 1990's financial statements.

Sealaska announced in July that an Indonesian firm had signed an agreement to purchase the Seattle-based seafood processing and distribution company. The BPG, which includes Alaska Aggregate Corp. in Anchorage and Fairbanks Sand & Gravel, is held for sale. OBSI and BPG have been accounted for as a discontinued operations.

The decision to sell OBSI was part of a strategic plan adopted by the Sealaska board of directors in December of 1989. ''Sealaska's plan included selling OBSI, reducing corporate overhead expenses by 25 percent, providing a shareholder vote on whether or not we should issue Sealaska stock to ''New Natives'' as provided under the 1991 amendments, and resolving the 7(i) revenue sharing disputes with the other regional Native corporations,'' said Mallott.

''We are well under way to meeting the strategic objectives established by the board. Sealaska's financial strength and liquidity places the company in an ideal position for expanding into new business areas,'' he said.

Sealaska distributed approximately $5.6 million to its 16,000 shareholders from fiscal year 1990 income. Each shareholder with 100 shares received $357. ''Our annual distributions are very important to our shareholder families and to the Southeast economy. Whenever Sealaska or Southeast village corporations distribute money, we are pumping millions of dollars directly into the local communities,'' Mallott said.

Sealaska will be conducting an advisory shareholder vote to determine whether or not the corporation should issue stock to Southeast Natives born after Dec. 18, 1971, (the passage of the Alaska Native Claims Settlement Act). Under the 1991 Amendments to ANCSA, Native corporations have the option of issuing stock to ''New Natives'' provided that a

majority of the shareholders vote in favor of such action. Sealaska estimates that there are at least 8,000 New Natives eligible to receive Sealaska stock.

The advisory vote will be on the 1990 proxy for Sealaska's annual meeting which is scheduled for Nov. 3 in Saxman.

Sealaska Corp., headquartered in Juneau, Alaska, is one of the 13 regional corporations formed under the Alaska Native Claims Settlement Act of 1971. Sealaska's primary investments are in forest products, minerals development and portfolio management.

#90249b0090 09/06/1990 ~Business Wire

DENVER (SEPT. 6) BUSINESS WIRE - USMX Inc. Thursday announced the discovery of potentially significant gold mineralization at five targets in the Alligator Ridge Trend in White Pine County, Nev.

USMX began aggressively exploring its Alligator Ridge Trend properties in June 1990. To date a total of eight targets have been drill tested. Initial results from this drilling show that five areas with potential ore grades and thicknesses have been located. The five areas are as follows:

POKER FLATS: Located approximately 1.5 miles southeast of the Casino Mine.

REPEAT: Located approximately 1 mile southwest of Poker Flats.

HORSESHOE: Located approximately 1.5 miles southeast of Repeat.

SKY: Located approximately 1,500 feet northwest of the Placer/Dome Top Deposit Pit.

EAST TOP: Located approximately 500'E. of the Placer/Dome Top Deposit Pit.

None of these targets have been fully delineated by drilling and no estimate of tons or grade is possible at this time. The following is a listing of the best hole USMX has drilled in each area:

POKER FLATS: CRS-210 encountered an interval from 15 feet to 70 feet of .108 opt Au.

REPEAT: CRS-214 encountered an interval from 55 feet to 135 feet of .084 opt Au.

HORSESHOE: BHR-22 encountered an interval from 0 feet to 75 feet of .025 and 110 feet to 135 feet of .064 opt Au.

SKY: SAR-20 encountered an interval from 45 feet to 135 feet of .081 opt Au.

EAST TOP: BDR-149 encountered an interval from 130 feet to 180 feet of .098 opt Au.

All of these holes are oxidized and the mineralization is at shallow depths. While drilling results to date are encouraging, with the identification of significant intervals of ore grade mineralization, much work needs to be done before a reserve calculation can be made.

Aggressive exploration of these and additional targets will continue throughout the remainder of the year.

USMX is currently in the start-up phase at its Casino Mine. To date approximately 90,000 tons of ore have been placed on the heap leach pad. Construction of the process facilities has been completed, with leaching scheduled to commence early September.

USMX Inc. is involved in the exploration, development, and production of gold properties in the United States. The company's stock is listed on the NASDAQ National Market System under the symbol USMX.

AUSTIN, TX (SEPT. 6) BUSINESS WIRE - SEMATECH announced today it has awarded an Equipment Improvement Program (EIP) contract to Applied Materials Inc. of Santa Clara, Calif.

The EIP will be performed in a joint beta site program at IBM's Advanced Semiconductor Technology Center (ASTC), a semiconductor development site in East Fishkill, N.Y. IBM will act as contractor for the program.

The EIP will focus on the characterization of Applied Materials' Endura 5500 Physical Vapor Deposition (PVD) Masterfab, a newly introduced ultra-high vacuum PVD system, used to deposit thin films of aluminum and refractory metals on semiconductor wafers.

According to U.S. Rep. Tom J. Campbell, R-Calif., the announcement represents an emerging trend within the semiconductor industry. ''The new spirit of cooperation between semiconductor manufacturers and their suppliers is very significant in revitalizing America's competitiveness. The input of IBM and Sematech on the Endura 5500 will be invaluable.''

Due to the fact that the Endura 5500 is a new product, SEMATECH's interest is in evaluating capability, performance and reliability data from which to establish a baseline of expectations for future enhancements of the equipment.

''Basically, what we're trying to do is evaluate Applied's 5500 to see exactly what it's capable of in terms of meeting the needs of America's semiconductor manufacturers today. Then, we will compare its existing capabilities against what we know will be necessary to meet tomorrow's needs,'' said Dr. Turner E. Hasty, SEMATECH's chief operating officer.

The Endura 5500 is used in the sputtering process which utilizes energetic ions to erode source material off a metal target, such as aluminum or refractories like titanium or titanium nitride, for deposition onto a wafer.

''The Endura 5500 represents the latest technology in PVD systems.'' said Jim Bagley, president of Applied Materials, ''We are pleased that SEMATECH and IBM have chosen to evaluate our system, and confident they will be impressed with the Endura 5500's full range of proven and potential capabilities for advanced semiconductor manufacturing.''

After the Endura 5500 is characterized for PVD processing, it will be evaluated for for service as a cluster tool for integrated processes to meet SEMATECH's Phase 2 requirements -- those designed for manufacturing semiconductors at 0.5-micron feature sizes.

According to Neil Poulin, program manager for the characterization of the 5500 at IBM's ASTC, the project is a valuable method for revitalizing America's semiconductor technology. ''I am looking forward to evaluating the Endura 5500 along with SEMATECH. Our joint efforts will result in future equipment with the capabilities to compete with the best in the world.''

SEMATECH, a consortium of 14 American semiconductor manufacturers and the U.S. Department of Defense, has the mission of restoring U.S. semiconductor manufacturing leadership capability.

Applied Materials, Inc. is a member of SEMI/SEMATECH, an independent industry association headquartered at SEMATECH. SEMI/SEMATECH has 128 members, consisting of majority-owned American suppliers to the semiconductor manufacturing industry.

SEMI/SEMATECH serves as a communications link between SEMATECH's 14 semiconductor manufacturers and suppliers. Its mission is to achieve a continuous improvement in the relationship between users and suppliers of semiconductor equipment and materials.

LOS ANGELES (SEPT. 6) BUSINESS WIRE - Fidelity Investments, the nation's largest privately held mutual fund and discount brokerage firm, Thursday announced the acquisition of the California brokerage accounts of First Interstate Discount Brokerage, a subsidiary of First Interstate Bancorp of Texas.

The acquisition, which is effective Sept. 17, also includes accounts in Arizona, Oregon, Idaho, Washington and Texas, for a total of more than 25,000 accounts. Terms of the sale were not disclosed. This is Fidelity's fifth acquisition during the past 12 months, bringing the total number of brokerage accounts acquired to more than 100,000.

"The acquisition represents Fidelity's strong commitment to building the discount brokerage business in the Western U.S.," said Sal LaBarbera, western region senior vice president for Fidelity's brokerage unit. "This is an ideal match because both Fidelity and First Interstate place such a high priority on customer service."

Investors used to calling First Interstate's brokerage operation in Houston between 9 a.m. and 7 p.m. (EDT) will be able to access Fidelity's registered finanical representatives 24-hours a day, seven days a week. In addition, customers seeking in-person service can visit one of Fidelity's 60 walk-in Investor Centers nationwide.

In California, Fidelity has centers located in downtown Los Angeles, Century City, Irvine, San Diego, San Jose, Sacramento, San Francisco and Walnut Creek.

All transactions will continue to be cleared through National Financial

Services Corp., a Fidelity subsidiary specializing in clearing and execution services for the correspondent brokerage business. Fidelity's commission rates are comparable to First Interstate's.

Fidelity has been in the brokerage business since 1978 and is one of the nation's leading discount brokerage firms with over two million institutional and retail brokerage accounts. Through Fidelity, investors can trade stocks, bonds, and options, as well as U.S. Government or municipal securities, at a savings rate of up to 76 percent over a full-cost broker.

Other investment options available through Fidelity include mutual funds, certificates of deposits (CDs), unit investment trusts (UITs), annuities and precious metals.

#90249b0099 09/06/1990 ~Business Wire

TUSTIN, CA (SEPT. 6) BUSINESS WIRE - CMS Enhancements Inc. (NYSE:CME) Thursday announced that net revenues for the fourth-quarter ended June 30, 1990, were $33,571,000 compared with $42,831,000 for the same quarter a year ago.

Non-recurring charges taken in the fourth quarter resulted in a loss of $1,744,000, or 55 cents per share, compared with net income of $1,218,000, or 48 cents per share, for the fourth quarter of last fiscal year.

Net sales for the fiscal-year 1990 were $187,724,000 compared with $200,385,000 for fiscal 1989, while net income for fiscal 1990 was $405,195, or 13 cents per share, compared with $4,804,000, or $1.88 per share, for the same period a year ago.

Per-share results have been computed with 24-percent more shares outstanding for fiscal-year 1990's fourth quarter and the full fiscal year than in prior comparable periods and have been adjusted to reflect the one-for-four ''reverse'' split of the company's common stock on Dec. 5, 1989.

''While fiscal 1990 does not represent results that we are pleased with as a comparison with the prior fiscal year, we are looking ahead to fiscal 1991 with cautious optimism,'' stated Jim Farooquee, president and chief executive officer of CMS.

Farooquee went on to say that ''the loss for the fourth quarter is primarily the result of the previously announced writedown of our tape backup subsystem inventory taken during the fourth quarter which totaled approximately $5 million and the lower revenues are a reflection of the extensive competition within CMS's product lines.''

CMS Enhancements is a producer and worldwide marketer of mass-data storage devices and accessories for most major brands of personal and laptop computers. CMS markets its products through dealers and distributors in over 61 countries throughout the world. -0- T

LONGVIEW, WA (SEPT. 6) BUSINESS WIRE - The board of directors of Longview Fibre Co. (NYSE:LFB) Thursday declared an increased fourth regular quarterly dividend in the company's fiscal year ending Oct. 31, 1990, of 13 cents per share and an extra year-end dividend of 3 cents per share on the outstanding common stock of the corporation payable Oct. 10, 1990, to shareholders of record at the close of business on Sept. 25, 1990.

After adjusting for the five-for-one stock split in April 1990, this payment of 16 cents per share brings the total dividends paid in this fiscal year to 52 cents per share, which compares with 48 cents per share paid in the corresponding period of the prior fiscal year.

SCOTTS VALLEY, CA (SEPT. 6) BUSINESS WIRE - Seagate (NASDAQ/NMS:SGAT) has appointed John P. Weyandt to vice president, Twin Cities Engineering the company announced Thursday.

Based at Seagate's Minneapolis facility and reporting to Seagate chief technical officer Brendan Hegarty, Weyandt will have charge of product development for the company's Twin Cities Development Center.

Bringing more than 20 years of manufacturing and engineering experience to his new position, Weyandt began a 20-year career with Control Data Corp. in 1969 as a product test manufacturing engineer.

In the succeeding years, Weyandt held responsibility for the management of new product manufacturing engineering and planning for CDC's line of RSD, FSD, and SMD products; and in 1986 was responsible for driving the company's Sabre ''mini-plant,'' charged with manufacturing engineering for all new and production Sabre products.

In 1987, Weyandt became director, Sabre product development for Imprimis Technology, a Control Data subsidiary. And after Seagate's acquisition of Imprimis in 1989, Weyandt was appointed executive director, Twin Cities Engineering.

Brendan Hegarty commented: ''John Weyandt has greatly excelled in his area of expertise, and we are looking forward to the contributions he will continue to make to Seagate's engineering and product development endeavors.''

Weyandt, 43, holds a bachelor of science degree in Mechanical Engineering from the University of Minnesota.

Seagate Technology is the world's leading supplier of disc storage devices and components to original equipment manufacturers and remarketers.

SPOKANE, WA (SEPT. 6) BUSINESS WIRE - Pegasus Gold Inc. (ASE, TSE:PGU) announced Thursday that it will adopt a modified mining plan at its Montana Tunnels mine in western Montana based on a review of all current economic data and the most recent drill results.

The new work has been reviewed and verified by an outside consulting firm. Under the revised plan, the stripping ratio at Montana Tunnels will decline by more than half over the life of the mine, from 3.3:1 to 1.4:1, while cash costs (net of by-product credits) potentially could be reduced by as much as 40 percent over the corresponding period. As a result, the earnings and cash flow contribution from this deposit will be enhanced considerably despite the fact that recoverable ounces of gold will drop by approximately 10 percent (5 percent on a gold equivalent basis).

In addition to major revisions to the mining plan, other refinements made primarily to the mill facility have resulted in Montana Tunnels achieving the highest level of consistency and recoveries since its inception. Other future changes such as the possible installation of a gravity circuit could further increase operating efficiencies.

John Willson, president and chief executive officer of the company, stated ''After our announcement last August, the staff at Montana Tunnels has worked diligently to achieve the optimum mine plan and operating procedures. These latest results are very gratifying and a tribute to our people at the mine.''

The following table provides comparative data between the previous and revised mining plans at Montana Tunnels.

Pegasus Gold Inc. is a major North American gold producer that currently produces over 340,000 ounces of gold from six mines in the western United States. The company also produces significant quantities of silver, lead and zinc. Pegasus Gold common shares are traded on the American Stock Exchange and the Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Montreal Stock Exchange.

HOUSTON (SEPT. 6) BUSINESS WIRE - Texas Eastern Transmission Corp. and Algonquin Gas Transmission Co., subsidiaries of Panhandle Eastern Corp. (NYSE:PEL), have filed a request with the Federal Energy Regulatory Commission (FERC) for authorization to waive certain tariff provisions that will permit enhanced flexibility to inject into storage third-party gas purchased from sources other than Texas Eastern or Algonquin.

The request is supported by the Algonquin Customer Group, which is composed of most of Algonquin's customers.

The filing would permit Algonquin's customers to begin injecting gas purchased from third-party sources into storage under certain of Algonquin's storage rate schedules, which would increase their competitive options.

The waiver would enhance the ability of these Algonquin customers or any customers under certain Texas Eastern storage rate schedules to move gas on the Texas Eastern system by allowing the injection of third-party gas transported under any agreement pursuant to Texas Eastern's open access interruptible transportation tariff.

The companies have requested FERC grant the waiver on an expedited basis to permit the activities to start without delay.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

LOS ANGELES (SEPT. 6) BUSINESS WIRE - Reg Murphy, publisher of the Baltimore Sun newspapers, will become chairman and be succeeded as publisher and chief executive officer by Michael J. Davies, currently editor, publisher and chief executive officer of The Hartford Courant, announced David Laventhol, president of Times Mirror.

Raymond A. Jansen Jr., The Courant's senior vice president and general manager, will become the publisher and chief executive officer of The Courant, Laventhol said. The changes are effective immediately.

''Reg Murphy has been an outstanding leader of The Baltimore Sun for the past decade, both before and after Times Mirror's acquisition of the paper

in 1986,'' Laventhol noted. ''He has been a journalistic innovator, leading the paper to two Pulitzer Prizes and record-breaking circulation gains.

''He has substantially improved business operations during his tenure at The Sun. He has also been an active leader in the community. Earlier this year, Reg indicated that he wanted to step aside, but stayed at our request to ensure a smooth transition.''

''Now we are pleased that another high calibre publisher and Times Mirror executive, Mike Davies, will continue the tradition of strong leadership of The Sun,'' Laventhol said. ''In his seven years at the helm of The Hartford Courant, Mike was an industry leader, launching a major new zoning effort last year and improving customer service at every level of the newspaper.''

''Although Mike will be missed at The Courant, we have enormous confidence in his successor, Ray Jansen, who has been at the paper since 1982," Laventhol said. "This move represents a continuity of leadership and direction for the successful Courant team.''

Davies and Jansen will report to Richard T. Schlosberg III, Times Mirror group vice president, newspapers.

Murphy will continue to represent Times Mirror on the board of directors of Newspapers First, a national advertising sales organization.

Murphy, 56, joined The Baltimore Sun in July 1981 after serving as editor and publisher of The San Francisco Examiner since 1975. From 1961 to 1975 he was with the Atlanta Constitution, joining as political reporter and editor and moving up to editor of the newspaper in 1968. Murphy began his newspaper career with The Macon Telegraph and News in Georgia in 1955.

He attended Mercer University and Harvard University and has been awarded honorary doctorates from Mercer, Utah State University, University of Maryland Baltimore County and Towson State University. The native of Gainesville, Ga., resides with his wife in Ruxton, Md.

Davies, 46, came to The Hartford Courant in 1983 from The Kansas City Star and Times, where he had been president and editor since 1978. Prior to that he spent two years as managing editor of The Courier-Journal in Louisville, Ky., and was managing editor of The Louisville Times from 1971 to 1976. His journalism career began in 1961 as a reporter for the Savannah (Georgia) Morning News.

He earned his bachelor's degree from Georgia State University and his master's in journalism from Northwestern University. Davies was born in England and moved to the United States with his family in 1957. He is

married and has two children.

Jansen, 51, joined The Courant in 1982 as vice president, advertising, following a 22-year career in advertising sales and management at Newsday, another Times Mirror newspaper. He was named vice president, marketing, in 1984, senior vice president, marketing and operations, in 1985, and has held his current position since 1986. A graduate of Syracuse University, Jansen and his wife live in Avon, Conn., and have two children.

Times Mirror (NYSE/PSE:TMC) is a Los Angeles-based media and information company which publishes the Los Angeles Times, Newsday and New York Newsday, the Baltimore Sun newspapers, The Hartford Courant, The Morning Call, The (Stamford) Advocate and Greenwich Time. The company also has interests in broadcast and cable television and book, magazine and other publishing.

DALLAS (SEPT. 6) BUSINESS WIRE - BANK ONE, Texas Thursday purchased certain assets and assumed all the deposits and certain other liabilities of Northside Bank, San Antonio as part of BANK ONE's continuing program of statewide expansion, announced Harvey R. Mitchell, chairman and chief executive officer of BANK ONE, Texas.

The bank was closed Thursday afternoon, and the Federal Deposit Insurance Corp. (FDIC) was appointed as receiver.

Northside Bank, 4011 San Pedro, will be open Friday during regular banking hours. Customers of Northside Bank may continue to use their checks and make deposits as before. All deposits were transferred intact and remain insured by the FDIC to the applicable limits. Additionally, interest rates on all exisiting certificates of deposit will remain unchanged.

''This acquisition evidences BANK ONE's continuing commitment to serve the entire San Antonio marketplace and to provide the best, most convenient service to our customers,'' Mitchell said.

Jim R. Hamilton, BANK ONE San Antonio president and chief executive officer, said: ''The Northside Bank acquisition gives BANK ONE an important presence in north central San Antonio. The full-service lobby and 10-lane drive-through facility will provide added convenience for BANK ONE's existing customers there as well as give us the opportunity to provide BANK ONE's excellent package of services to our many new customers.''

Hamilton noted that BANK ONE has expanded aggressively in San Antonio during 1990. Including the acquisition of Northside Bank, BANK ONE has increased its San Antonio offices from three at the end of 1989 to 12. With the expansion of BANK ONE ATMs into Diamond Shamrock convenience stores, BANK ONE will have a presence in 99 locations in San Antonio.

Northside Bank had deposits of $51.2 million at Aug. 31, 1990.

LOS ANGELES (SEPT. 6) BUSINESS WIRE - MGM/United Artists, Pathe Entertainment and Narconon International staged a premiere of Chuck Norris' new film ''Delta Force 2'' at the Guild of America last Thursday, August 23.

The premiere, which raised over $300,000 in ticket sales and donations was held for the benefit of Narconon Chilocco New Life Center, a newly opened drug rehabilitation center situated on 167 acres of Native American sovereign land in northern Oklahoma.

Norris attended the after-premiere supper party following the screening, hosted by actress Kirstie Alley, international spokesperson for Narconon Chilocco. The party included a performance by jazz great, Chick Corea.

Concurrent with the release of ''Delta Force 2'' Norris is spearheading an organization called ''Kick Drugs out of America,'' an effort to activate the martial arts community to become involved in the anti-drug movement.

Inspired by the drama surrounding Colombian drug lord Carlos Lehder, ''Delta Force 2'' was enthusiastically received when screened last month for a group of senators and members of the House of Representatives in a continuing effort to focus attention on the anti-drug movement.

Narconon Chilocco is the newest facility in the Narconon International Network which uses the drug-free methods developed by L. Ron Hubbard. Narconon was first started in 1966 by an Arizona State penitentiary inmate and heroin addict who successfully used L. Ron Hubbard's methods to get himself and fellow inmates off drugs. In 1972 the Narconon program became available to the general public and since then hundreds of thousands of ex-users have been successfully rehabilitated.

REDONDO BEACH, CA (SEPT. 6) BUSINESS WIRE - Dr. Stephen J. Lukasik has joined TRW as vice president and chief scientist for the Space & Defense Sector.

In this newly created position, Lukasik will be responsible for advising senior management on areas of potential business development which involve a high degree of technical innovation.

Lukasik joins TRW after a distinguished career in industry and government. Since 1985 he served as corporate vice president of technology for the Northrop Corp. He joined Northrop in 1982 as vice president and manager of the Northrop Research and Technology Center.

Prior to that, he served as chief scientist for the Federal Communications Commission from 1979 to 1982 and worked for the Rand Corp. from 1977 to 1979, as senior vice president for national security programs and then as chief scientist. He also spent two years as a vice president of Xerox Corp. from 1974 to 1976.

From 1968 to 1974 Lukasik worked for the U.S. Department of Defense Advanced Research Projects Agency. He joined the agency as director for nuclear test detection and then moved up to deputy director and then director of the agency.

Earlier he worked for Stevens Institute of Technology and Westinghouse Bettis Nuclear Laboratory.

Lukasik has also served on a number of advisory panels for the Department of Defense and the Central Intelligence Agency and is the author of a number of papers on strategic and technical issues. He is a member of the board of trustees and chairman of the Educational Planning Committee for Harvey Mudd College, a member of the Engineering Advisory Council of the University of California at Berkeley, and a member of the Engineering Board of Councilors of the University of Southern California.

He also served on the board of directors of the Software Productivity Consortium and the board of trustees for the National Security Industrial Association, and currently serves on the Committee on Scientists and Engineers in Government for the national Research Council.

Lukasik received his B.S. in physics from Rensselaer Polytechnic Institute and his M.S. and Ph.D. in physics from the Massachussetts Institute of Technology. He is a member of Sigma Xi, Tau Beta Pi, the American Physical Society and the American Physical Society and the American Association for the Advancement of Science. He has received numerous honors, including an honorary doctorate in engineering and the Ottens Research Award from Stevens Institute of Technology and the Distinguished Civilian Service Medal with Oak Leaf Cluster from the Secretary of Defense.

The Space & Defense Sector provides products and services for space, advanced electronics, and computer-based systems and software markets for defense, civil and international customers.

MOORPARK, CA (SEPT. 6) BUSINESS WIRE - Richard M. Drysdale, chairman of the board, announced Thursday that Jeffrey A. Wilson had been named president and chief executive officer of Terminal Data Corp. effective Sept. 17.

''Jeff Wilson is a highly skilled and proven executive who brings to TDC an extensive background in micrographics combined with a broad knowledge of the document image processing systems market. This unique background will provide TDC with outstanding leadership for the company's major businesses and in repositioning the company for the future,'' Drysdale stated.

Wilson has most recently been president of Adaptive Information Systems, a division of Hitachi, which is a leader in the electronic document image processing systems business. He was formerly the president of the records management division of Bell & Howell, and general manager of Citicorp Services Management Group.

Wilson earned his bachelor of arts degree at the University of Illinois, and received his business education at the University of Chicago.

''The board of directors of TDC believes that Jeff Wilson will provide the direction and dynamics to successfully accelerate the growth of our

company,'' Drysdale added.

Terminal Data Corp., headquartered in Moorpark, designs and manufactures document image capture devices.

TORONTO (SEPT. 6) BUSINESS WIRE - Enscor Inc. Thursday announced that its board of directors has approved a write-down in the value of certain of its land holdings, resulting in a reduction of equity by 74 cents per outstanding common share.

As a result of this write-down, the company's cash flow position will be augmented by an anticipated tax recovery of $5.5 million.

The write-down of approximately $15 million of the pre-tax value of certain of the company's land holdings follows an intensive examination by management of portfolio values. Write-downs were taken where warranted on a project-by-project basis. The process was prompted by management's concerns about current and anticipated conditions in the depressed real estate market in the greater metropolitan Toronto region.

Martin Simon, president, stated, ''With this write-down I now anticipate a net book value of $1.68 per common share on Sept. 30, 1990, which will leave Enscor with a strong balance sheet highlighted by approximately $21 million of total shareholders' equity. This write-down provides Enscor with the scope to market new homes more successfully under difficult conditions.''

REDWOOD CITY, CA (SEPT. 7) BUSINESS WIRE - Oracle Corporation (NASDAQ:ORCL), developer and marketer of the ORACLE(R) relational database management system, Thursday announced that for the quarter ended August 31 sales are expected to increase approximately 30 percent.

As a result, Oracle Corporation's total revenue for the last four quarters is anticipated to exceed one billion dollars.

Unfortunately, the Company had planned for a revenue growth rate of 50 percent. As a consequence of this revenue shortfall, expenses grew faster than revenues, and the Company will report its first quarterly loss in its history. Specifically, the Company expects to lose approximately $0.20 per share.

In light of anticipated first quarter results and the prevailing economic conditions which contributed to them, the Company has reduced its revenue growth rate goal from 50 percent to 25 percent for the year. The Company is in the process of completing a restructuring and cost-cutting program whereby an increase in sales of 25 percent in a quarter will yield a similar percent increase in earnings. The Company expects to be profitable in its second quarter.

The Company said final results for the quarter will be announced at its Press and Analyst Day on September 25, as originally planned. About Oracle

Oracle Corporation, headquartered in Redwood City, CA, is the world's leading supplier of database management software and services

and the third largest software and services company in the world.

The Company offers its products, along with related consulting, education and support services, in 90 countries around the world. Oracle Systems Corporation is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

LA JOLLA, CA (SEPT. 6) BUSINESS WIRE - Cytel Corp. Thursday announced that it has merged with its wholly owned subsidiary, Glytec Inc.

Continuing operations under the Cytel name, the combined company will develop a novel class of anti-inflammatory drugs based upon recent advances made by a team of researchers from the parent firms.

In December 1989 Glytec was founded to exploit technology licensed exclusively from Yale University to the first large-scale method for synthesizing carbohydrates. Carbohydrates are biological molecules which include simple sugars the body uses for energy, as well as others that play a key role as information carriers in the body.

According to Jay D. Kranzler, M.D., Ph.D., Cytel's president and chief executive officer, the merger was a strategic response to new findings of how a special type of cell receptor triggers the migration of white blood cells to sites of infection in the body.

Known as ''cellular adhesion molecules'' -- or CAMs, the receptors normally activate the immune system to fight bacterial or viral infections. However, in arthritis and other inflammatory disorders, swelling, pain and tissue damage can result when the body's defense mechanism turns upon itself.

''As results of the research collaboration progressed rapidly, we realized the business strength of combining Cytel's technical expertise in immunology with Glytec's ability to design and synthesize carbohydrates,'' said Kranzler.

''Our decision to merge the two firms represents a further expansion of Cytel's product focus, and underscores our commitment to exploiting the central role of immune receptors as active sites for drug modulation.''

Found on the lining of blood vessels, CAMs are carbohydrate-linked proteins that are capable of binding to white blood cells, which then pass through the blood vessel wall and into areas of injury or infection.

Prior to the merger, researchers from Cytel and Glytec have been developing a prototype drug that prevents the CAM from attaching to the

white blood cell to treat unwanted inflammation characteristic of certain types of arthritis and other disorders. The work will continue at Cytel under the direction of vice president James C. Paulson, Ph.D.

Cytel Corp. was founded in 1987 to apply recent advances in immunology to the development of a new generation of drugs to modulate the immune system. Based upon key research milestones of its founders, scientists and advisers, the company was formed to exploit the central role of immune receptors in treating a wide variety of diseases.

SAN FRANCISCO (SEPT. 6) BUSINESS WIRE - Del Monte Foods announced Thursday that Norman S. Mackenzie has been appointed executive vice president and chief financial officer.

Mackenzie had been senior vice president and chief financial officer for the organization since February.

Mackenzie's newly created position within Del Monte Foods will include management of the company's international businesses consisting of operations in Mexico, Central America and Panama as well as the processed pineapple operation in the Philippines. Continuing to report to Mackenzie will be the business planning function, the office of the treasurer, as well as the finance and the auditing departments of Del Monte Foods.

Mackenzie, 46, is a 21-year veteran at Del Monte Foods. He has served the company in a number of domestic and international positions during his tenure. Positions held include: vice president of finance U.S.A., director of auditing, vice president of finance Philippines and Far East.

Mackenzie holds a business administration degree from UCLA and received an MBA in agriculture economics from the California State University at San Luis Obispo.

A resident of Penngrove, Calif., Mackenzie was born in Montreal, Canada and raised in Santa Barbara, Calif. He is married to Janis and they have two daughters. Norm and his family are involved in raising quarter horses and active in national quarter horse associations.

Del Monte Foods is an independent, privately held San Francisco based

company, manufacturing and marketing food and beverage products under the Del Monte brand name.

CANTON, MA (SEPT. 6) BUSINESS WIRE - Hills Department Stores Inc. (NYSE:HDS) today announced that total sales for the fiscal four-week period ended Sept. 1, 1990 decreased 4.5 percent to $176.3 million from $184.7 million for the corresponding period in 1989 due to a shift in a major back-to-school circular which fell in fiscal August last year and fiscal July this year.

Same store sales for fiscal August 1990 decreased 8.1 percent, also due to the shift in the promotional calendar. Total and same store sales for fiscal July and August combined increased 6.4 percent and 3.0 percent, respectively, over the corresponding period in 1989.

Sales for the fiscal thirty-week period ended Sept. 1, 1990 increased 7.3 percent to $1,086.4 million from $1,012.8 million for the corresponding period a year ago. Same store sales increased 3.9 percent during this period.

Stephen A. Goldberger, chairman and chief executive officer, commented, ''We continue to manage inventories closely, which remain below last year's levels. We believe our third quarter advertising and promotional programs, coupled with our chainwide fashion fixture enhancements, will impact positively on our fall sales. Sales results for the past several weeks have been encouraging.''

Hills reported sales in fiscal 1989 based on a 53-week year. Consequently, the ending dates for 1990 fiscal months are one calendar week later than the corresponding 1989 fiscal month ending dates. Had the company reported results based on a 52-week year, the comparable four-week period would have reflected increases of 7.9 percent for total sales and 3.8 percent on a same store basis. Results for the comparable thirty-week calendar period would have reflected increases of 5 percent and 2 percent, respectively.

Hills Department Stores Inc. is a discount store chain, operating in 14 states, with 212 locations compared with 202 stores a year ago.

WOODLAND HILLS, CA (SEPT. 6) BUSINESS WIRE - E.N. Phillips Co. (NASDAQ:ENPQ), parent company of Testing 1 2 3 which establishes and manages health screening centers in major California shopping malls with a local medical sponsor, reports that 51.2 million of its outstanding Class A warrants have been exercised, raising approximately $640,000 to finance the continuing expansion of its mall-based health screening centers.

''Testing 1 2 3 has earned outstanding acceptance in the healthcare community and with the public,'' says Hal B. Phillips, chairman of the board of E.N. Phillips Co. ''The new capital enables us to meet the demand for adding Testing 1 2 3 centers. Each new center we are able to open speeds payback time and profitability.''

''It really is remarkable in this market,'' comments Peter Blowitz, president of Toluca Pacific Securities, market maker and investment banker for E.N. Phillips Co., ''to have the majority of the warrants exercised in such a short time. The rapid response demonstrates strong investor and broker confidence in the company's future.

''And these are long-term players. They understand the company's need for capital to open more centers to achieve a critical mass without additional underwriting.''

In 1989, E.N. Phillips Co. raised $1.5 million in a private placement which sold out in four weeks.

Currently, E.N. Phillips Co. has opened seven Testing 1 2 3 health screening centers, each sponsored by a local hospital or multispecialty medical group. Testing 1 2 3 manages the marketing and administration of the centers; each medical sponsor provides the medical professionals and equipment components for the ongoing screening program.

By year's end, a total of 15 Testing 1 2 3 centers are projected to be open, in construction or under contract. Each center is located in a permanent storefront site within a major regional shopping mall in California.

JOPPA, MD (SEPT. 6) BUSINESS WIRE - Merry-Go-Round Enterprises, Inc. (MGR/NYSE) today announced that sales for the four-week period ending September 1, 1990 increased 33% to $62.6 million from $46.9 million in the corresponding period in August 1989.

Same store sales for August 1990 on a comparable day-to-day basis increased 20%.

Sales for the thirty week period ending September 1, 1990 increased approximately 46% to $308.4 million from $211.1 million in the corresponding period a year ago.

Michael D. Sullivan, President and Chief Executive Officer, commented, ''We are delighted with our strong sales performance in August despite a difficult economic and retail environment and tough sales comparisons from a year ago.''

Same store sales for August 1989 had increased 30%.

Merry-Go-Round Enterprises, Inc., is a leading specialty clothing chain selling contemporary fashions for young men and women in over 630 retail stores in 37 states.

#90249b0619 09/06/1990 ~Business Wire

LAS VEGAS, NV (SEPT. 6) BUSINESS WIRE - United Gaming Inc. (NASDAQ:UGAM) Thursday announced results for the 1990 fiscal year and fourth quarter ended June 30.

The company also announced senior level management changes and significant reductions in general and administrative expenses.

For the 1990 fiscal year, revenues rose 27 percent to $90,205,000, from $65,389,000 in 1989, while earnings were $3,895,000 compared with $5,779,000 for the 12 months ended June 30, 1989.

Primary earnings per common and common equivalent share for 1990 were 45 cents, compared with 70 cents for 1989, based on weighted average number of shares outstanding of 8,594,000 and 8,312,000 for the 1990 and 1989 periods, respectively.

Revenues for the fourth quarter increased 30 percent to $25,894,000, from $18,010,000 in 1989. Net income was $72,000, compared with $1,449,000 during the like period of 1989. Primary earnings per common and common equivalent shares for the fourth quarter were 1 cent, compared with 17 cents for the fourth quarter 1989, based on weighted average number of shares outstanding of 8,999,000 and 8,431,000 for the 1990 and 1989 periods, respectively.

Since the end of fiscal 1990 a number of unanticipated events occurred. As a result of those events, the company recognized charges of $1,665,000 in the fourth quarter of fiscal year 1990:

-- In late August, the developer of the Double Eagle hotel casino informed the company he was unable to secure financing to complete the project. The company decided to abandon the Double Eagle project resulting in a charge of $630,000.

-- In August a customer, to whom the company had made loans, unexpectedly announced that it was ceasing operations and was placed in involuntary bankruptcy resulting in a charge of $667,000.

-- Due to general market conditions, the company in August decided not to pursue a planned public financing and accordingly expensed all fiscal 1990 charges of $368,000.

-- Carole A. Carter has been promoted to president and chief operating officer. Carter most recently served as vice president - administration at the company.

-- John W. Alderfer, formerly chief financial officer of The Bicycle Club (world's largest card casino with revenues of $90 million), has been selected to serve as the vice president - finance and chief financial officer.

#90249b0621 09/06/1990 ~Business Wire

CUPERTINO, CA (SEPT. 6) BUSINESS WIRE - Meeting customer demand for higher performance systems at lower prices, Apple Computer, Inc.'s USA Division announced price reductions of up to 20 percent on all models of its hig performance Macintosh IIci personal computer.

The Macintosh IIci derives its high performance from a 25MHz Motorola 68030 microprocessor/68882 math coprocessor combination. It features the same flexible compact design and three industry-standard NuBus expansion slots of the Macintosh IIcx. However, the Macintosh IIci goes beyond the IIcx by adding built-in monitor support for a broad range of monitors as well as an optional high speed cache.

''We offered a special promotion on the IIci to dealers two months ago, since then we've seen sales of the IIci take off,'' said Bob Puette, president of Apple USA. ''Our customers tell us they appreciate the high level of performance and expansion options of the IIci.''

Since it was announced in September, 1989, the Macintosh IIci has met with widespread acceptance. It has also been popular with customers that want an A/UX, Apple's version of UNIX, system. The IIci incorporated for the first time full 32-bit architecture, built-in 32-bit color support and integrated video support -- all significance advancements in the Macintosh II architecture.

To further offer customers more expansion options, Apple began shipping an optional cache card last month. The small card lets users increase the performance of the IIci by up to 30 percent. The card consists of 32KB of 25-nanosecond static RAM and sells for a suggested retail price of $399.

The IIci is the right combination of price and performance for customers. Its high performance characteristics are especially suited to financial analysis, graphic design, desktop publishing or for anyone who desires a more responsive system.

Prices and configurations, effective immediately through Apple authorized resellers throughout the United States, are as follows:

System Configuration	Old Price	New Price	Change 4MB
RAM/SuperDrive floppy	$7,469	$5,969	-$1,500 4MB
RAM/80MB Hard Disk	$8,169	$6,669	-$1,500 4MB
RAM/80MB Hard Disk (Parity)	$8,669	$7,169	-$1,500 4MB
RAM/80MB Hard Disk (A/UX)	$8,769	$7,269	-$1,500

NEW YORK (SEPT. 6) BUSINESS WIRE - Enzo Biochem Inc. (AMEX:ENZ) Thursday announced that the company repurchased $3,570,000 aggregate principal amount of its 9 percent Convertible Subordinated Debentures due March 15, 2001 for $1,931,750 in the fiscal fourth quarter, resulting in an extraordinary gain of $1,638,250.

Herbert B. Bass, vice president - finance explained, ''The prevailing price levels of the bonds presented an excellent opportunity for Enzo to retire a portion of our debt and experience a significant extraordinary gain. This extraordinary gain will be reflected in the company's fiscal fourth quarter ended July 31, 1990.''

The debentures retired were part of the $35 million debentures originally issued and delivered on March 24, 1986. Enzo had previously repurchased $1.5 million of these debentures in October of 1987.

Enzo Biochem Inc. is an established New York City-based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and genetic engineering techniques and in providing diagnostic services to the medical community.

#90249b0642 09/06/1990 ~Business Wire

CHATSWORTH, CA (SEPT. 6) BUSINESS WIRE - Datametrics Corp. (ASE:DC) Thursday reported profitable results for the third quarter and the nine months ended July 29.

For the third quarter of fiscal 1990, net income was $47,522 on revenues of $6,503,344 in contrast to a loss of $278,906 on revenues of $8,275,937 in fiscal 1989. For the nine-month period, net income amounted to $367,845 on revenues of $20,551,870 vs. a loss of $2,131,573 on revenues of $21,277,659 a year ago.

Sidney E. Wing, president and chief executive officer, attributed the company's profitability to reduced operating costs, better inventory controls and management of working capital, as well as lower interest expenses due to the continuing reduction of debt.

He said revenues were down from last year because of delays in anticipated contracts resulting from the current uncertainties as to the defense budget. He noted, however, that the company had recently been awarded four major contracts approximating $6 million.

Wing said: ''We are extremely pleased that despite lower revenues,

Datametrics was able to sustain its turnaround from fiscal 1989's losses for the third quarter in a row. We are now structured for continued profitability, reflecting the cost-containment measures implemented over the past year.''

Datametrics Corp. is a 28-year-old producer of computer peripherals for aerospace, defense and industrial markets.

The company's products include mil-spec and ruggedized high-speed, non-impact printers, printer/plotters, teleprinters, high-density cartridge tape recorders, facsimile products and keyboards, all of which meet stringent requirements for operating under extreme variations in temperature, moisture, radiation, vibration and shock.

#90249b0643 09/06/1990 ~Business Wire

IRVINE, CA (SEPT. 6) BUSINESS WIRE - Truck and bus drivers, airline pilots, or anyone suspected of drinking can now be quickly and easily screened for alcohol by non-medical persons with the aid of On-Site ALCOHOL, a low-cost disposable test kit developed by TLI.

The On-Site test is both accurate and simple to use. With samples of saliva, urine, serum or other liquids, the credit card-sized device will indicate the presence of alcohol in three minutes or less.

According to TLI President and Chief Executive Officer Michael O'Donnell, Ph.D., ''The On-Site testing kit was developed to meet the need for quick and easy alcohol screening with immediate results. Every day there are thousands of opportunities in this country to prevent accidental death or injury through the use of a simple, on-the-spot, yes-or-no alcohol-screening procedure.''

Dr. O'Donnell noted that the On-Site test will return a positive indication if the sample tested contains .02 percent blood alcohol or higher and the subject may be referred to a laboratory test for a quantitative assessment of alcohol level. The legal definition of intoxication in the United States ranges from .05 percent to .1 percent.

Each On-Site test is completely self-contained in a foil packet and the procedure can be carried out anywhere. Individual packets contain a disposable alcohol test card, saliva swab, tranfer pipette and reagent

ampule, plus an instruction/detection guide.

In use, the detection reagent ampule is opened and a drop is placed in the reagent well. If testing saliva, the subject is asked to saturate the swab for about 30 seconds; the swab is then placed in the specimen well on the test card.

In three minutes if the reagent well is entirely yellow, the results are negative; if there is a green-to-blue spot surrounded by yellow, the results are positive, showing a .02-percent or higher alcohol level.

Dr. O'Donnell stated that many agencies and organizations are ideal candidates for On-Site ALCOHOL test kits, including airlines, trucking and taxi companies, probation and parole offices, schools, public transit systems, air-traffic-control operations and industries where employees operate dangerous or complicated machinery.

On-Site ALCOHOL tests are priced at $2.20 each and are packaged in kits of 50 units. They have a one-year shelf life at room temperatures.

TLI, a privately held corporation founded in 1976, is a leading innovator and provider of toxicology products, information, services and procedures. Headquarters are located at 2 Goodyear, Irvine, Calif. 92718. Telephone: 714/770-9381 or 800/854-0277; FAX: 714/770-0863.

AKRON, OH (SEPT. 6) BUSINESS WIRE - The Goodyear Tire & Rubber Co.

announced Thursday that it expects to record third quarter charges totaling approximately $63 million, $51 million after tax.

The charges consist of approximately $43 million of restructuring costs and approximately $20 million of environmental cleanup costs associated with operations discontinued in 1986.

The restructuring charges relate to costs associated with the realignment of European tire marketing, distribution and production support operations which will eliminate approximately 1,180 jobs by mid-1992; the phase-out of medium and heavy truck tire production at the Valleyfield, Quebec, plant; the rationalization of certain associated production operations in North America; and other employee reductions at overseas locations.

Chairman Tom H. Barrett said, ''The company's restructuring activities in 1990, together with continuing cost containment measures, are designed to improve the cost effectiveness of the company's North American and European operations while improving service to our customers.

''These measures are designed to strengthen our core businesses as we continue our focus on improving production efficiencies and the development of high quality products which meet the needs of our customers '' Barrett said.

Due to continued competitive pressures in the tire industry, reduced original equipment market demand in North America and Europe, and the previously described unusual items, the company expects to report a net loss of approximately $65 million for the third quarter of 1990.

The competitive and market conditions experienced in the third quarter are expected to continue during the fourth quarter. A general economic downturn is likely for late 1990 and into 1991, with the prospect of the Mideast crisis resulting in increased raw material costs and other adverse market conditions. In light of current and anticipated market conditions the company presently expects that its 1990 fourth quarter net income will approximate the $14.7 million net income recorded in the 1989 fourth quarter.

SCOTTSDALE, AZ (SEPT. 6) BUSINESS WIRE - Frank H. Crerie, chairman of the board of Stan West Mining Corp. (OTC:SWMC), Thursday announced that the company has acquired First International Acceptance Corp., an Irvine, Calif.-based development stage company, which plans to enter the automotive finance industry upon completion of its first phase of financing for $5 million.

Crerie said, ''We are excited about First International's unique concept of financing and the ability to utilize our public company in their plans.''

The combination provides for the issuance of the company's preferred stock to the former owner of First International. The preferred stock will represent 80 percent voting control of the company.

Crerie has resigned as chairman of the company but will continue to serve as a consultant. Graham R. Jones has been appointed chairman and Steven E. Hively has been appointed chief financial officer of the company.

Jones announced that a special shareholders meeting will be called to change the name of the company to FIAC Inc. and to authorize the reverse split of the company's common stock.

CARSON, CA (SEPT. 6) BUSINESS WIRE - Malcolm Candlish, chairman and CEO of Cleveland based Sealy Inc. Thursday announced the appointment of Christopher H. Binkley as president of Sealy's Advanced Sleep Products subsidiary.

Binkley, 44, joins Advanced Sleep Products from Avery International where he served as director of marketing of the K&M Division and previously as director of marketing for Avery's Commercial Products Division.

Prior to his six year tenure at Avery, Binkley held various marketing positions at Van De Kamp's Frozen Foods and The Pillsbury Co.

Binkley earned a bachelors degree at Northwestern University and a Master of Science Degree from Massachusetts Institute of Technology's Sloan School of Management.

Candlish stated, ''Sealy's company-wide emphasis on and financial commitment to marketing discipline will be refocused at Advanced Sleep under Chris Binkley's leadership.

''Chris's extensive marketing background and successful track record are ideal qualifications to lead the subsidiary in addressing an increasingly competitive marketplace.

''We are confident of Chris's ability to successfully apply his 19-year consumer product marketing experience to furthering Advanced Sleep's competitive position.

''An additional challenge and opportunity for Chris will be to oversee the sales and marketing of Sealy's soft-sided flotation sleep products, which were recently placed under the direction of our Advanced Sleep Products subsidiary. The soft-sided bedding market is a particularly exciting and fast growing segment of the waterbed industry.''

Through various subsidiaries, Sealy Corp. produces the complete Sealy line of mattresses including the world famous Posturepedic. Other operations include: The Stearns & Foster Bedding Co., one of the oldest and largest premium-brand bedding manufacturers in the country; Advanced Sleep Products, a leading manufacturer and distributor of waterbeds; Woodstuff Manufacturing Inc., a manufacturer of waterbed furniture; and the Sealy Furniture Co. and the Stearns & Foster Upholstery Furniture Co., manufacturers of convertible sofas.

NEW YORK (SEPT. 6) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced Thursday that a joint venture, in which its subsidiary, Millicom International Holdings Limited participates as a shareholder, has been awarded a license to provide cellular telephone service in Bolivia.

Millicom's partners in the venture include Comvik International AB, a Swedish telecommunications concern, as well as Bolivian partners. Initially, Millicom will retain a 46 percent interest in the operation, Comvik 23 percent and the remaining 31 percent will be held by the Bolivian partners.

J. Shelby Bryan, chairman and chief executive officer of Millicom Inc., stated, ''Millicom's license award in Bolivia will enable us to provide high quality telephone service to businesses and consumers.

''With additional licenses held in Chile, Costa Rica, Guatemala, and Mexico, this license further consolidates our position as the leading cellular network operator in these regions. It also presents us with the opportunity to provide international roaming capabilities to our customers in each of the Central and South American countries in which we hold licenses.''

The license was granted to Millicom by a presidential decree after the consortium won a tender issued by the Directorate General of Telecommunications. Currently, this is the only cellular telephone license that has been granted by the Bolivian government to serve its 8 million people.

The system will initially serve Bolivia's major metropolitan areas

including La Paz, Cochabamba, and Santa Cruz. Service in these cities is expected to commence in the second quarter of 1991. The AMPS cellular system will operate in the 800 Mhz range.

Millicom Inc. is a diversified international communications company with primary interests in cellular telephone systems, alphanumeric paging systems and satellite television.

SALT LAKE CITY, UT (SEPT. 6) BUSINESS WIRE - Gull Laboratories Inc. (NASDAQ: GULL), a leading manufacturer and marketer of high-quality diagnostic test kits for the detection of infectious diseases, Thursday announced results for the second quarter and six months ended June 30. While net income declined, revenues increased 26 percent for the quarter and 23 percent for the six-month period.

For the quarter just ended, the company reported a net loss of $47,000, or less than one cent per share, on revenues of $1.5 million compared to net income of $207,000 or four cents per share, on revenues of $1.2 million for the like period a year ago.

For the six-month period, net income reached $23,000, or less than one cent per share, on revenues of $2.8 million, compared to net income of $403,000, or eight cents per share, on revenues of $2.2 million last year.

Dr. Myron Wentz, president and chairman of the board, stated that a strategic decision was made to position Gull for more rapid growth than is available in infectious disease diagnostics.

"While sales continue to grow and are at an all-time high," Wentz said, "we invested significantly in the expansion of our diagnostics division and in the establishment of two new divisions. We believe these investments will strengthen our present position in diagnostics and the new divisions will allow us to compete in larger markets."

Gull Laboratories Inc. remains in a strong cash and liquid asset position. At June 30, current assets exceeded current liabilities by 3.7 to 1. The company also has a $1 million revolving line of credit providing a positive liquidity position.

Gull Laboratories Inc. develops, manufactures and markets high quality diagnostic test kits for the detection of infectious diseases. The company

markets these products for use in hospitals and clinical laboratories around the world.

WARSAW, IND. (SEPT. 6) BUSINESS WIRE - Biomet Inc. (NASDAQ:BMET) Thursday reported record sales and earnings for its first fiscal quarter ended Aug. 31, 1990.

($000's Except Per Share Data)

	First Quarter Ended Aug. 31:		
	1990	1989	Pct Change
Net sales	$46,110	$37,758	22 pct
Gross profit	31,780	25,887	23 pct
Income from operations	12,004	9,089	32 pct
Net income	8,796	6,514	35 pct
Earnings per share	32 cents	24 cents	33 pct

Biomet's sales and earnings increases for the first quarter of fiscal year 1991 were primarily attributable to continued market penetration of the company's reconstructive and electrical stimulation devices.

Biomet Inc. and its subsidiaries design, manufacture and market products used primarily by orthopedic medical specialists in both surgical and non-surgical therapy, including reconstructive and trauma devices, electrical bone growth and neuromuscular stimulators, orthopedic support devices, operating room supplies and powered surgical instruments.

Biomet and its subsidiaries currently operate manufacturing and/or office facilities in Warsaw and Indianapolis; Parsippany, N.J.; Guaynabo, Puerto Rico; Bridgend, South Wales; and Swindon, England. The company currently distributes its products in approximately 100 countries.

#90249b0693 09/06/1990 ~Business Wire

CARROLLTON, TX (SEPT. 6) BUSINESS WIRE - Optek Technology Inc. (NASDAQ: OPTX) announced Thursday a net loss for the third quarter of fiscal 1990 ended July 27, 1990 of $848,000, or $.27 per share, compared to net earnings of $415,000, or $.11 per share, for last year's third quarter. Revenues were $14,421,000 versus $14,580,000 a year ago.

Jim Crownover, president, explained that adjustment of the pace of manufacturing and level of inventories to better reflect current bookings lead to an under absorption of fixed costs and a corresponding reduction of gross margin for the quarter.

"The company generated cash during the quarter despite the reported loss and reduced its loan balance by $500,000," Crownover said. He noted that new order bookings were $13,865,000 for the period compared to $13,380,000 for last year's third quarter.

Crownover added that he is "extremely encouraged" that new orders at Optek's Opcom subsidiary, which manfactures fiber optic local area network (LAN) equipment, rose to $2.3 million for the first nine months of fiscal 1990 from $0.3 million for the same period of last year.

For the nine months ended July 27, 1990, the net loss was $2,332,000, or $.73 per share, on net sales of $39,685,000. For the first nine months of fiscal 1989, net earnings were $1,299,000, or $.35 per share, on revenues of $43,796,000.

Founded in 1979, Optek Technology Inc. designs, manufactures, and markets its optoelectronic components and fiber optic local area network equipment both domestically and internationally. The company markets these products to the aerospace, office equipment, computer, electronics, and communications industries.

PRINCETON, NJ (SEPT. 6) BUSINESS WIRE - Metropolitan Life Insurance Co., the nation's largest insurer in total life insurance, and Prime Financial Partners, L.P. (AMEX: PFP), a financial services company which offers employee benefit plans for small corporations, announced Thursday a joint marketing agreement.

Metropolitan Life and affiliated companies will offer a wide range of life insurance products as funding vehicles for the Prime Financial Benefit Trust. The plans will be made available through MetLife Brokerage, MetLife's life insurance brokerage arm. The Prime Trust is an employee benefit plan which provides death and severance benefits to employees funded on a tax deductible basis to the corporate employer.

Additional benefits of the plan include protection of assets from creditors, flexible funding options, liquidity, estate tax-free benefits and the security of MetLife guaranteed values.

The Prime Trust has been offered since 1988, and has over 500 employer participants and $60 million of assets. The MetLife family of companies manages over $128.4 billion of assets, and has received the highest ratings

from A.M. Best, Standard and Poor's, and Moody's Investors Service.

J. Craig Sullivan, J.D., MetLife Brokerage Advanced Marketing director who is the program coordinator observed that "Metropolitan's strength, retention, and integrity will add a whole new dimension to this powerful employee benefit concept."

COLUMBUS, OH (SEPT. 6) BUSINESS WIRE - Consolidated Stores Corp. (NYSE:CNS) Thursday reported that for the seventh fiscal month ended Sept. 1, 1990, retail sales totaled $52.0 million, up 31.6 percent from $39.5 million a year earlier.

Consolidated Stores also reported that sales for comparable stores open at least two years rose 27.8 percent in August.

Retail sales for the seven months of fiscal 1990 were $342.3 million, up 15.6 percent from $296.2 million a year earlier. Comparable sales for the seven months were up 10.1 percent.

William G. Kelley, chairman and chief executive officer stated, ''Comparable stores sales have been trending up steadily from 10.6 percent in April to 18.6 percent in July, and now 27.8 percent in August.

''August sales were particularly strong because of our customer's enthusiastic response to a close-out buy of merchandise from a national drug store chain.

''Our company has been repositioned back to the close-out specialty retail business and we are delighted that so many customers have rediscovered us.''

NEW YORK (SEPT. 6) BUSINESS WIRE - Tiffany & Co. (NYSE: TIF) will establish a store in Toronto, Canada, it was announced Thursday by William R. Chaney, chairman.

The Toronto store represents the next step in Tiffany's ongoing international expansion program. Tiffany has leased a three-story 13,000 square foot building located at 85 Bloor Street West and expects to open its store there in the fall of 1991.

Chaney said, "We are very pleased that Tiffany will be entering Toronto, especially in such a prestigious location. This represents Tiffany's first retail store in Canada and its largest international store."

"Toronto is a major cosmopolitan market with a significant population of affulent consumers who seek the finest luxury product offerings and exceptional customer service. This new store offers considerable sales opportunities and is a natural evolution of Tiffany's key global strategy

to aggressively pursue expansion around the world," Chaney added.

Tiffany is an internationally renowned retailer with locations in the United States, Europe, and the Far East. The company's merchandise offerings include an extenisve selection of fine jewelry, sterling silverware, china, crystal, watches, clocks, stationery, leather goods, scarves, and fragrances.

In addition to its flagship New York store, Tiffany operates retail stores in Atlanta, Beverly Hills, Boston, Chicago, Costa Mesa, Dallas, Houston, San Francisco, and the Washington, D.C. area. Exclusive Tiffany merchandise is also offered through a select group of prestigious jewelers and specialty retailers in other cities.

Direct marketing is carried out through the corporate division and the Tiffany Selections catalog. International retail sales are made through Mitsukoshi department stores and a wholesale distributor in Japan, the Tiffany stores in London, Munich, Zurich, and Hong Kong, and through Faraone stores in Milan and Florence.

EAST HARTFORD, CT (SEPT. 6) BUSINESS WIRE - Foshing Airlines of Taiwan announced its order Thursday for two Airbus A320 airliners, each to be powered by two International Aero Engines V2500 turbofans.

These aircraft will be delivered in 1992 and will increase the rapidly growing fleet of V2500 powered equipment in the Asia/Pacific region.

These engines, worth about $30 million dollars, further increase the market share for the V2500 on the Airbus A320/A321 to over 70 percent since January 1990.

Of great importance to Foshing in the selection on the V2500 was IAE's proven ability to provide product support both before and after the engines enter service.

Sal Curvino, vice president of IAE Product Support, commented ''Our support team will be working closely with our counterparts at Foshing to ensure that the V2500 is smoothly introduced into revenue service. We at IAE are very pleased to be part of the Foshing family and their growth plans in this very important part of the world.''

The V2500 is also available on the A321 and the MD-90 family of aircraft.

OWINGS MILLS, MD (SEPT. 6) BUSINESS WIRE - UNIVERSAL SECURITY INSTRUMENTS INC. (NASDAQ Symbol: USEC) Thursday announced results for its fourth quarter and fiscal year ended March 31, 1990.

The results were delayed as a result of a fire which destroyed the Company's headquarters on March 28, 1990.

Sales for the fourth quarter ended March 31, 1990, were $3,802,260 as compared to $6,154,818 for the same quarter last year. The material decline in fourth quarter sales was a result of the fire. The Company reported a net loss for the three months ended March 31, 1990 of $374,377, or $0.11 per share, as compared to a loss of $381,262 or $0.11 per share, for the comparable fourth quarter last year. Included in the Company's fiscal 1990 fourth quarter results was an extraordinary gain of $179,945, or $0.05 per share, from a partial settlement of its fire insurance claim.

For the year ended March 31, 1990, sales were $21,611,908 as compared to $23,548,550 for the prior fiscal year. For fiscal 1990, the Company reported net income of $118,199, or $0.03 per share, as compared to a net loss of $595,128 or $0.17 per share for fiscal 1989. Fiscal 1990 year-end results include an extraordinary gain of $795,664, or $0.23 per share, resulting from a real estate sale and the partial insurance settlement.

The Company stated that it has settled with its insurance carrier for loss of its building and believes that claims for its inventory, machinery and equipment and business interruption will be settled during the next several months. UNIVERSAL SECURITY INSTRUMENTS believes that the ultimate settlement of all of its insurance claims will have a favorable impact on its financial statements, however the Company is currently unable to estimate the full effect of these claims on its balance sheet and income statement.

In a separate announcement, the Company stated today that its Board of Directors has approved the extension of the expiration of the 715,000 outstanding common stock purchase warrants (NASDAQ Symbol: USECW) for ten months from November 15, 1990 to September 16, 1991. The Company said it would take such action as may be necessary including appropriate filings

with the Securities & Exchange Commission and State regulatory agencies to effect the extension. Each common stock purchase warrant permits the holder to purchase one share of the Company's common stock at an exercise price of $6.25 and is redeemable at a price of $12.50 per warrant.

UNIVERSAL SECURITY INSTRUMENTS, INC. designs, manufactures and markets video, telecommunications, and security products.

BUDAPEST, HUNGARY (SEPT. 6) BUSINESS WIRE - Northern Telecom (NYSE:NT) and its Austrian PBX licensee Kapsch AG have donated a $70,000 Meridian SL-1 system to provide state-of-the-art communications services to East Europe's first Regional Environment Center (REC), opened Thursday in Hungary.

The Meridian SL-1 PBX will handle both voice and data communications, with access to the public X25 network, for the REC which is housed in a 200-year-old converted Silk Mill in Budapest. Advanced features such as the Meridian Mail voice messaging systems are also being installed for the benefit of the 15 REC employees and their clients across Eastern and Central Europe.

The REC was proposed by President Bush and founded by an international consortium including the U.S. Environmental Protection Agency (EPA), the European Community and the Austrian and Hungarian Governments.

The center is an independent, non-profit organization that supports initiatives to tackle the natural resource and environmental problems that could threaten prospects for sustained economic growth in the newly emerging democracies of the region.

''Reliable and efficient communications will be of vital importance to the REC if it is to succeed in its task which is crucial to the political and economic development of Central and Eastern Europe,'' said Margaret Kerr, Northern Telecom's vice president, environment, health & safety, and vice chairman of the board of the World Environment Center based in New York.

Northern Telecom is recognized by the United States EPA and Environment Canada as an Industry leader in CFC elimination in the North America electronics industry. The company has committed to eliminate ozone

depleting CFCs (chloroflurocarbon compounds) from its worldwide manufacturing operations by the end of 1991.

Kapsch AG is the licensed vendor of Northern Telecom's Meridian 1 range of PBX products in Austria. The company is also one of Northern Telecom's partners in the Hungarian telecommunications joint venture, BHG-teleCOM, based in Budapest.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems, providing products and services to telephone operating companies, corporations, governments, universities and other institutions worldwide. Northern Telecom with 1989 revenues of $6.1 billion, employs over 49,000 people around the world.

VANCOUVER, BRITISH COLUMBIA (SEPT. 6) BUSINESS WIRE - Trimin Resources Inc. wishes to report that the annual general meeting of the company's shareholders originally scheduled to be held at 2:00 p.m., Aug. 31, at 2500 - 1055 Dunsmuir Street, Vancouver, British Columbia has been adjourned to 2:00 p.m., on Oct. 15 at 2500 - 1055 Dunsmuir Street, Vancouver, British Columbia.

The adjournment was made pursuant to a court order issued by the Supreme Court of British Columbia.

The court order was issued in light of the fact that Trimin's notice of the company's annual general meeting and its related information circular, proxy and supplementary mailing card had been delivered late to certain unregistered shareholders of the company by one of the mailing intermediaries and that there is therefore some concern that some of Trimin's shareholders did not have adequate notice of the meeting.

BURLINGTON, MA (SEPT. 6) BUSINESS WIRE - Symbolics Inc. (NASDAQ:SMBX), Thursday announced a net profit for its quarter ending June 30, 1990 of $115,000, or less than $.01 per share, compared with a profit of $533,000 or $.02 per share for the fourth quarter of fiscal 1989.

Revenues for the quarter were $12,481,000, compared with revenues of $11,333,000 for the previous quarter. The Company also reported a net loss for fiscal 1990 of $6,177,000 or $.22 per share, compared with a profit of $1,781,000 or $.06 per share for fiscal 1989.

Revenues for the fiscal year were $53,538,000, compared with revenues of $67,237,000 for the previous fiscal year.

The company also stated that on Aug. 30, 1990, it had completed an agreement with a Japanese consortium led by Nichimen Corp. for a five year exclusive license in Japan of manufacturing and distribution rights to Symbolics' Ivory-based software and hardware products. The aggregate cash proceeds to Symbolics from the license and related transactions was $3.9 million.

Jay Wurts, Symbolics' chairman, chief executive officer, and president, stated, ''Improved results in our fourth fiscal quarter, due primarily to shipments of both our new high performance workstation and our graphics products and to the effect of ongoing cost reduction programs, contributed to our return to profitability in the fourth quarter.

''In light of increasing competition within our workstation market, the need for continued investment in our graphics business, uncertain economic conditions and decreased customer capital spending, we continue to seek outside financing, such as our recent transaction with Nichimen Corporation, to ensure we have sufficient working capital to complete our strategic plans.''

Symbolics Inc., headquartered in Burlington, Mass., is the leading provider of symbolic processing hardware and software used in sophisticated applications, including interactive scheduling and planning, hypertext-based publishing, computer-aided mathematical computing and HDTV-based graphics imaging and processing.

Symbolics and Ivory are trademarks of Symbolics Inc.

LOUISVILLE, KY (SEPT. 6) BUSINESS WIRE - Vencor Inc. (NASDAQ/NMS: VCOR) Thursday announced that it has filed a Registration Statement with the Securities and Exchange Commission relating to the offering of 2,000,000 shares of common stock. The company plans to offer 1,850,000 shares in the

offering, and the balance of 150,000 shares are to be offered by selling shareholders.

Vencor said that the company's net proceeds from the offering will be used to reduce outstanding indebtedness, to purchase and convert additional hospital facilities and for general corporate purposes.

Managing underwriters for the offering are Hambrecht & Quist Inc.; Prudential-Bache Capital Funding; Robertson, Stephens & Co. and J.C. Bradford & Co.

Vencor completed its initial public offering through the sale of 1,700,000 shares of common stock in September 1989. The company specializes in providing long-term hospital care for patients who suffer from catastrophic illness. Vencor has 10 hospitals located in Arizona, Colorado Florida, Illinois, Indiana, Louisiana and Texas.

A Registration Statement relating to these securities has been filed with the Securities and Exchange Commission, but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the Registration Statement becomes effective.

This shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

SHAWNEE, OK (SEPT. 6) BUSINESS WIRE - Barton Industries Inc. (NASDAQ:BART) has announced that a wholly owned subsidiary of Barton, Barton Fiber Systems Inc., and a wholly owned subsidiary of The Southern Co., Southern Co. Services Inc., acting on its own behalf and as agent for other Southern subsidiaries, Alabama Power Co., Georgia Power Co., Gulf Power Co., Mississippi Power Co. and Savannah Electric & Power Co., have entered into a contract for the grant to Barton Fiber Systems of rights to construct and install a fiber optic transmission cable and related facilities, along selected routes on the Southern electric system.

The engineering and installation will be performed by the Southern electric system with Barton Fiber Systems reimbursing them for their actual costs incurred.

Under terms of the agreement, specific fibers will be dedicated to the exclusive use of the Southern electric system. The remaining fibers will

be dedicated to Barton Fiber Systems' exclusive use.

Barton's primary anticipated use of its dedicated fibers will be for the transmission of information received from Barton's energy automation systems to its customers' corporate offices. In addition, Barton stated that its previously announced contract discussions with two major long distance carriers to utilize a portion of its dedicated fibers are proceeding and Barton anticipates making an announcement in this regard in the near future.

In commenting on the agreement, C. W. Earl Johnson, chairman of the board and chief executive officer of Barton, stated, ''The development of this fiber optic system will place Barton Industries even further ahead of its competition as the preeminent company in the energy industry services field.

''This system will provide a vital strategic link in the services Barton provides by enabling the more efficient transfer of data from our automation units in field locations to our customers' corporate headquarters.''

NEW YORK (SEPT. 6) BUSINESS WIRE - NBC has entered into an exclusive agreement with Leisure Concepts Inc. (NASDAQ/NMS:LCIC) appointing the New York and Los Angeles firm as the worldwide licensing and merchandising agent for the network's upcoming Saturday morning music and comedy series ''Guys Next Door.''

Announcement of the agreement was made last week by Albert Spevak, vice president, Marketing & Production Business Affairs, NBC Productions, and Stanley A. Weston, chairman of the board, Leisure Concepts Inc. (''LCI'').

''Guys Next Door'' was launched last week (Monday, Aug. 27) with a special prime time preview (8:30 - 9 p.m. NYT, repeated Saturday, Sept. 1 at 11:30 a.m. NYT), and will premiere in its regular Saturday morning time period Sept. 8 (11:30 - noon NYT).

Under the agreement, LCI will be responsible for the licensing of manufacturers for a wide range of ''Guys Next Door'' merchandise. License agreements have already been completed for numerous product categories including posters, t-shirts, sweatshirts, coordinated clothing sets, sleepwear, towels, watches, jewelry, backpacks, banners and various novelty items.

The merchandise will be available through mass market, record, gift and department stores. Additionally, special marketing programs will be conducted with retailers, licensees and SBK Records, which has already released the ''Guys Next Door'' single, ''I Was Made for You,'' and released the album ''Guys Next Door'' Sept. 4.

''Guys Next Door'' is a high-energy half-hour of comedy and music performed by five exciting teen stars: Eddie Garcia, Bobby Leslie, Patrick J. Dancy, Damon Sharpe and Chris Wolf. The program represents an innovative leap into the future of broadcast and music with its fresh mix of youth-directed comedy, contemporary sounds and original music videos.

''Guys Next Door'' is produced by NBC Productions. Vince Manze is executive producer. Deborah Liebling is co-executive producer.

PRINCETON, NJ (SEPT. 6) BUSINESS WIRE - Prince Holdings Inc., announced Thursday that it has agreed to be acquired by Edizione Holding SpA, the Italian company which controls the Benetton Group, Nordica and other related companies.

''This sale will enable Prince to continue its growth and development as the world's premier racquet sports company and, equally important, allow Prince to enter other sporting goods categories such as golf,'' said John M. Sullivan, chairman of Prince Holdings Inc.

Prince currently markets tennis and squash racquets, footwear, apparel, racquet strings, sport bags, necessities and ball stringing machines under the Prince brand name.

It also markets racquetball racquets and related products under the Ektelon brand name and golf shafts under the Grafalloy brand name.

''The acquisition by Edizione Holdings SpA enables us to maintain and build on our family of products within the environment of the Edizione group. Similar philosophies and cultures within the sporting and leisure goods categories each of the companies serve represent an exciting marketing opportunity,'' said Sullivan.

According to Sullivan, the desire of Prince to enhance the efforts to build a worldwide sporting goods company was key to the decision to sell the company to Edizione.

Prince senior management and Brentwood Associates purchased Prince from Unilever N.V. in August of 1987. Since that time, sales and profits have continued to grow as the company expanded its product and market reach.

''Prince has become a truly international company under Brentwood ownership,'' said Frederick J. Warren, a general partner of Brentwood Associates.

Brentwood Associates is a Los Angeles-based management buyout firm which has completed a number of buyouts in addition to Prince, including Mobile Technology, Graphic Controls, Educational Publishing Co. and Acme Rents.

Morgan Stanley was the financial advisor for Prince and Lehman Brothers represented Edizione Holding SpA.

Terms of the sale are not being disclosed.

#90249b0761 09/06/1990 ~Business Wire

PISCATAWAY, NJ (SEPT. 6) BUSINESS WIRE - Rheometrics, Inc., a manufacturer of sophisticated materials testing instruments, Thursday reported record sales and improved earnings for the fiscal year ended June 30, 1990.

The record sales of $30.4 million for FY90 were up 18% from the $25.8 million achieved in the prior year. Rheometrics earned $81,000 ($.03 per share), compared to $54,000 ($.02 per share) in FY89. Fourth quarter sales

of $11.9 million were 43% higher than the 1989 quarter. The Company earned $1.1 million ($.35 per share) versus $194,000 ($.06 per share) a year ago.

Dr. Starita noted that: ''The strong fourth quarter performance may cause a softening in the first quarter of FY91, which has traditionally been the Company's weakest period. At the same time, the overall trends are positive. Domestic sales in FY90 were up 21% and European operations were solid. Revenues from our Japanese subsidiary were down about 10%, however we have strengthened that management team and anticipate a quick return to stable and profitable growth in the Far East.''

''The disappointing profit performance in FY90 caused us to look critically at our operating philosophy and to focus on programs and policies designed to improve profits in FY91," Dr. Starita added. ''Specific efforts to reduce costs and working capital investment have been instituted, reflecting the entire Company's commitment to achieving success in these areas.''

Rheometrics, Inc. manufactures sophisticated rheological instruments for the plastics, coatings, food, biomedical and adhesives industries. The Company's common stock trades on the NASDAQ National Market System under the symbol ''RHEM.''

#90249b0775 09/06/1990 ~Business Wire

HUNTSVILLE, AL (SEPT. 6) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Thursday announced a new low-end line of workstations and servers, the Series 2000.

The Series 2000 is a family of full-featured, production-ready color graphics workstations and servers. The high-quality workstations support 2D and 3D graphics. Priced as low as $15,900, the Series 2000 is available for immediate shipment. More than 900 applications from Integraph and third-party vendors are immediately available on the Intergraph platform. These packages include the largest set of integrated applications from any vendor in the technical graphics computing industry.

''From a competitive standpoint, the value of the Series 2000 is unequalled when compared to other brands after competitors' entry-level workstations are configured for real 2D/3D color applications. We have configured this product line to be fully functional and production ready '' said Loyd Tarver, executive director, Systems Product Marketing. ''It completes a highly competive workstation family for 1990, complementing our previously introduced Series 6000.''

Target Markets

The Series 2000 is targeted at the computer graphics technical markets -- Mechanical Design, Engineering, and Manufacturing, Electronics, Mapping, Electronic Publishing, AEC, and other interactive computer graphics markets.

''The Series 2000 comes to market as part of an architecture that provides a balance between CPU performance, graphics, I/O, communications and application solututions -- a balance which exceeds measurements such as MIPS alone.

Many customers have experienced the tremendous cost of integrating their own applications and systems. Intergraph's integrated applications software and technical infomation management capabilities immediately save the end user that time and money. Our total-solutions philosophy has made us the number one supplier of CAD/CAM/CAE in North America,'' said Eliott James, president of Intergraph. Series 2000 Standard Features

The Series 2000 includes four workstation models:

-- The desktop InterPro 2020 with a single 19-inch screen

-- The desktop InterPro 2020 with dual 19-inch screen

-- The 19-inch single-screen InterAct 2020 with integral furniture and menu tablet

-- The dual 19-inch screen InterAct 2020 with integral furniture and digitizing table

Each model includes as standard features:

-- 12.5 MIPS RISC processor

-- 16MB of memory (expandable to 64MB)

-- 200MB hard disk, and 1.4MB floppy disk drive

-- SCSI port, three RS232 serial ports, and one parallel port

A high-performance graphics engine supports dynamic drawing capabilities of 360,000 2D vectors per second and 100,000 3D vectors per second. Eight planes enable the display of 256 colors from a palette of 16.7 million colors.

The Series 2000 includes the following software: XNS; TCP/IP communications; Looking Glass, a graphical user interface; and Intergraph's implementation of AT&T's UNIX System V, Release 3.1 operating system with Berkely extensions.

Series 2000 Server

For server requirements, the InterServe 2000 provides multifunctional capabilities for plotting, additional compute node of file management and storage. Standard features include:

-- 12.5 MIPS RISC/processor

-- 16MB of memory (expandable to 64MB)

-- 200MB hard disk drive and 1.44 MB floppy disk drive

-- IEEE 802.3 (Ethernet) communications port

-- Three RS232 serial ports

-- Versatec/differential parallel port

-- XNS and TCP/IP communications support

The InterServe 2000 is ideal for dedicated applications such as plotting.

Upward Compatibility/Open System Environment

Intergraph continues its commitment to upward compatibility. With the Series 2000, applications software now running on existing models will run on the Series 2000 without modification. Upward compatibility protects customer investments in existing application software and data files and ensures compatibility with the entire line of Intergraph products. Intergraph's products encompass a broad array of industry standards to enable connectivity in multivendor network systems.

#90249b0782 09/06/1990 ~Business Wire

HUNTSVILLE, AL (SEPT. 6) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Thursday announced price reductions on its Series 6000 mid-range and high-end workstation line.

Reductions range from 10 to 35 percent. Most important, an Intergraph workstation with a 27-inch, 2-megapixel display can now be purchased for $26,000, making this 27-inch display fully competitive with 19-inch display workstations.

''There are several benefits associated with this price reduction,'' stated Loyd Tarver, executive director, Systems Product Marketing. ''First, users can now take advantage of the Series 6000 27-inch capability for a price equivalent to 19-inch display workstations.

''Second, this reduction makes Intergraphs's mid- and high-end products even more competitive and puts our unique 27-inch capability into the hands of a much broader user set. This has been made possible by continued improvements in our cost of manufacturing.''

Series 6000 Highlights

As with other Intergraph workstation products, the Series 6000 is configured to be fully functional and production ready more than 900 software application packages readily available for technical graphic applications.

The Series 6000 offers two levels of graphics performance. Intergraph's EDGE I Graphics Processor supports eight planes, plus one highlight plane, of double-buffered graphics, achieving the display of 256 colors, plus one highlight color, from a palette of 16.7 million.

At a higher level, the EDGE II processor provides 24-bit true color, supports drawing rates of 400,000 2D vectors/second and 350,000 3D vectors/second, and allows the display of 16.7 million colors from a palette of 16.7 million.

EDGE II also enables realistic rendering with Gouraud shading at 25,000 100-pixel shaded triangles per second, and single- and dual-screen InterPro workstations, single- and dual-screen InterAct workstations, and InterServe servers.

#90249b0783 09/06/1990 ~Business Wire

HUNTSVILLE, AL (SEPT. 6) BUSINESS WIRE - Thursday Intergraph Corp. (NASDAQ:INGR) announced that Houston-headquartered Brown & Root U.S.A. Inc. signed a $7.9 million contract for 250 of Intergraph's new Series 2000 UNIX workstations and servers.

The Series 2000 will replace PCs on the desktops of many designers and enable them to design in 2D and 3D on a single workstation.

One of the largest and most diverse contractors in the world, Brown & Root provides engineering design, construction and maintenance services for a broad spectrum of industries.

Brown & Root designers will use the Series 2000 workstations and Intergraph AEC applications to design a variety of complex projects for

the petroleum and chemical, civil, forest products, power, marine, and manufacturing and process industries, as well as governments.

''Brown & Root wants to use Intergraph's 3D applications, and we are convinced of the cost savings of working in 3D,'' said Steve Yates, chief information officer of Brown & Root. ''A 3D model helps us build a better product and reduce costs by identifying interferences before construction begins.

''When our design is 100 percent correct, we can eliminate costly reworks in the field. The benefits of reduced construction costs are passed directly to the client.''

Intergraph's 3D graphics applications build project databases which include non-graphic information about the project. ''The project database is a sophisticated way to control project data and communicate between disciplines,'' Yates explained.

''As a single information source, it helps decrease the amount of paper and floppy disks the company uses to communicate. The database also gives our clients a greater understanding of the materials that will be used on a project.''

The convergence of the cost of DOS and UNIX was an important factor in the company's decision to move design to the workstation. ''The price and performance of the UNIX environment has become very attractive,'' Yates said. ''We get more power for our money with UNIX than DOS.''

Yates explained that the UNIX operating system offers greater system security, faster processing, increased memory, multitasking, and multiwindowing capabilities. ''We see faster, more powerful design without the limitation of DOS. Moving to UNIX was the writing on the wall '' he said.

The Intergraph system at Brown & Root in Houston is networked via Ethernet to its Mobile, Ala., Alhambra, Calif., and Colliers Wood and The Broadway offices in London. Over the network, engineers in remote Brown & Root offices can contribute to a project.

Coordinating the plans of several disciplines is a fundamental feature of Intergraph applications. This allows designers on a network to directly reference the working designs of others on the same project.

#90249b0785 09/06/1990 ~Business Wire

CHELMSFORD, MA (SEPT. 6) BUSINESS WIRE - The Optronics division of Intergraph Corp. (NASDAQ:INGR) Thursday announced that Xyvision Inc. of Wakefield, Mass., has signed a value added reseller (VAR) agreement to market the Optronics ColorSetter 2000 imagesetter as an output device for Xyvision's Contex product line of design and prepress systems for the graphic arts.

''By integrating Optronics output devices into Contex Pro System 40 configurations, we can now offer a complete turnkey system to a broad segment of the graphic arts community,'' comments Jeff Crown, director, market development at Xyvision.

''Optronics output devices coupled with our new version 3.4 software, which includes both production stripping and full contone masking capabilities, gives us an ideal solution for general purpose trade shops and printers who need to streamline stripping and assembly including continuous tone images and line art.''

ColorSetter 2000 is a 2,000 dpi drum-based imagesetter for making color separations of composite layouts including text, graphics, line art and continuous tone images.

It accepts input in a wide variety of file formats, including DDES (a standard for file interchange between prepress systems) and is also PostScript compatible, providing support for the full range of PostScript typefaces and formats.

ColorSetter can output individual film separations as large as 19.6 inches by 25 inches, or up to four A4 sized pages 4-up on a single sheet of 20-inch by 26-inch precision pin-mounted film. Linework scanning up to 19 inches by 25 inches is available as an option.

''We are pleased that Xyvision has selected to integrate Optronics products into their systems,'' comments Bruce Harrison, Optronics' general manager. ''Xyvision's solutions for producers of packaging, publications, advertisements, catalogs and collateral materials are a perfect complement to the high quality, precision and productivity available with Optronics imagesetters.''

The Optronics division of Intergraph Corp. manufactures and markets precision imaging systems, including laser imagesetters, photoplotters, scanners and film recorders, for computer graphics applications in the engineering, mapping, manufacturing, scientific analysis, and graphic arts industries.

Xyvision Inc. designs and markets open-architecture systems for publishing document management, color design and prepress production.

ST. LOUIS (SEPT. 6) BUSINESS WIRE - Roosevelt Financial Group Inc. (NASDAQ:RFED), announced Thursday that Douglas T. Breeden, 39, has been elected to the board of directors of both Roosevelt Financial Group Inc. and its wholly owned subsidiary, Roosevelt Bank, a Federal Savings Bank.

Breeden will fill the vacancy created by the retirement of William E. Pettit, who has reached the mandatory retirement age of 70.
Breeden is a professor of finance at the Fuqua School of Business, Duke University, Durham, N.C. He was on the faculties of the University of Chicago and Stanford prior to moving to Duke in 1985. He is on the board of directors of the American Finance Association and is an associated editor of the Journal of Finance.

Breeden holds a bachelor of science degree from the Massachusetts Institute of Technology and a doctorate in finance from Stanford University.

Breeden is also chairman of the board of Smith Breeden Associates Inc., an investment advisory firm with offices in Chapel Hill, N.C.; Overland Park, Kan.; and Dallas.

The firm serves as a consultant and investment advisor to banks, thrifts and pension funds, and has performed consulting projects and mortgage portfolio management for several federal agencies, including the Resolution Trust Corp., the Office of Thrift Supervision and the Federal Savings and Loan Insurance Corp. Roosevelt's management began developing many of its current investment and hedging strategies in conjunction with Smith Breeden Associates in 1986. The firm is still employed as a consultant to Roosevelt's investment activities. Breeden has served as an advisory director of Roosevelt since January, 1989.

''Mr. Breeden has been an integral part of Roosevelt's success during the past four years,'' noted Clarence M. Turley Jr., chairman of the board. ''We would expect his contributions to be even more valuable as a member of our board of directors.''

Pettit, who is retiring from Roosevelt following 15 years of service, is chairman of the board of Neff-Petterson's Inc., a clothing retailer in

Springfield, Mo. Pettit joined Roosevelt as an advisory board member in 1975, following Roosevelt Bank's acquisition of Safety Federal Savings of Springfield.

He was elected to the board of directors in 1978 and most recently was a member of the Executive and Compensation Committees of the Board.

''Mr. Pettit's advice and counsel will be missed,'' stated Turley. ''We wish Mr. Pettit and his family the best and thank him for his years of service.''

Roosevelt Financial Group Inc. is the holding company for Roosevelt Bank, a Federal Savings Bank. With $1.6 billion in assets, Roosevelt Bank is the largest St. Louis-based savings institution. Roosevelt Bank conducts operations through 22 full service offices in Missouri and Illinois, including 20 in the metropolitan St. Louis area.

LAS VEGAS (SEPT. 6) BUSINESS WIRE - After nearly 36 years of service to the Showboat, Fred L. Morledge has announced his resignation and retirement effective July 24, 1990.

Immediately prior to resigning and announcing his retirement, Morledge was a senior vice-president, assistant secretary, director, and audit committee chairman of Showboat Inc. and senior vice-president and assistant secretary of Showboat Operating Co., the operating company and gaming licensee of the Las Vegas Showboat Hotel and Casino.

Up until July 24, Morledge also served as a Director of Ocean Showboat Inc.

Morledge, a native of Nebraska City, Neb., moved to the Western region of the United States with his parents during World War I. During the 1920s and early 1930s, Morledge was employed primarily in the gold mining industry and in the investment banking and brokerage business.

In 1933, Morledge moved from California to Overton, Nev. in hopes of developing a sodium silica plant. Morledge, together with his partner Lloyd Veitch, came upon and leased the Spartan Silica plant from the United States Government who had taken over the plant after its owners were unable to make a profit.

Morledge and Veitch made the plant profitable and continued its operations until fire destroyed the plant in 1937. From 1939 through 1955, Morledge served as vice-president and general manager of Nevada Silica Sand Inc. in Overton. While residing in Overton, over a period of 22 years, Morldege held various public offices and also served as chairman of the Chamber of Commerce and Town Board Chairman.

In 1953, Morledge joined a partnership which included J.K. Houssels Sr. and Bill Moore, which operated the El Cortez Hotel. Two years later, he was named manager of the El Cortez Hotel and served in that capacity until approximately 1962. In the mid 1950s, Morledge, once again with J.K. Houssels Sr., Bill Moore, and others, founded the Las Vegas Showboat.

In 1960, Morledge and the other partners decided to convert their operations at the Las Vegas Showboat into a corporation, Showboat Inc. Until announcing his resignation and retirement, Morledge had, without interruption, served as a director of Showboat Inc. from its inception.

Morledge has been selected Director-Emeritus to Showboat Inc.

Showboat Inc., through its subsidiaries operates resorts in Las Vegas and Atlantic City featuring casino gambling, bowling, and other sports attractions and special events.

NEW YORK (SEPT. 6) BUSINESS WIRE - The Dun & Bradstreet Corp. announced Thursday that Howard W. Smith has been named senior vice president for information marketing programs of the company's Business Information Group effective October 1.

The company also announced that Nick L. Mancini has been appointed president of Dun & Bradstreet Canada Ltd., effective September 24. Mancini succeeds Smith.

In making the announcements, James E. Rutter, executive vice president of The Dun & Bradstreet Corp. responsible for the Business Information Group, said, ''In this new assignment, Howard will oversee the development of new programs to enhance the worldwide consistency and quality of D&B data, and to accelerate the development and implementation of the global marketing and customer-service strategies of our risk-management businesses. At the same time, Nick's appointment ensures a smooth transition in our D&B Canada operations.''

Howard W. Smith joined Dun & Bradstreet Business Credit Services in 1966 and held a number of positions before being named vice president for product planning and research in 1983. He was named senior vice president for planning and development in 1986. He was appointed president of D&B Canada Ltd. in 1988, the position he held prior to his latest appointment.

Nick L. Mancini was previously senior vice president and general manager of American Express Canada's Financial Services Group businesses, with responsibility for Traveler's Cheques, the Optima Card, Insurance Services Amex's Asset and Lending Services, and the Lifetime Card.

He also served as a member of American Express Canada's Executive Committee and was a director of American Express Canada Inc. Earlier he served as vice president for Business and Strategic Planning.

He joined the company in 1982, having previously held positions with the Toronto Stock Exchange and the Traders Group/Guaranty Trust Company of Canada. Mancini holds an M.A. and an H.B.A. in economics from the University of Toronto.

Dun & Bradstreet Business Information Group is a unit of The Dun & Bradstreet Corp., the world's largest marketer of business information and related services, with worldwide operating revenue of $4.3 billion in 1989.
